2. Boomerang Architecture (MBAJ)CAM Project Design Update

The Board of Trustees approved the schematic design presented for the Center for Advanced Manufacturing by MBAJ Architects during their May 12, 2014, meeting.

The original building design was over 28,000 square feet and the cost estimate came in at $6 million. The construction budget for the new Center is $3.9 million, therefore, the design team worked with the College staff and President to reduce the building size to 21,200 square feet. The cost estimate for the revised structure came in right on budget at $3.9 million.

Mr. Rick Brown and Mr. Stan Anthony of Boomerang Architecture (MBAJ) presented the changes that were necessary to bring the building in on budget. To reduce costs, the ceiling heights were lowered, the corridor widths reduced, “storefront” windows reduced, and two classrooms eliminated. The Board was assured the functionality of the building had not been compromised, simply reorganized to economize square footage.
Concerns that were raised about infrastructure for future expansion, loss of classroom space, functionality, restroom facilities, and an access road to the main campus were addressed and discussed to the Board’s satisfaction. A copy of the presentation from Boomerang will be kept with the Board minutes.

**Upon a recommendation by the Facilities Committee, Mr. Smith moved that the Gaston College Board of Trustees approve the revised schematic design for the Center for Advanced Manufacturing. The motion carried.**

F. FACILITIES

1. Pharr Trade & Industrial Roof Replacement Bid

The Pharr Trade & Industrial Roof Replacement Phase I project was bid on June 2, 2014. A pre-bid meeting was held on Thursday, May 29, 2014, at 1:00 p.m. Bidding contractors were required to attend to receive direction, present questions, address concerns, and provide information pertinent to the proposed project. Sealed bids were received on Tuesday, June 10, at 3:00 p.m.

The scope of the project includes the roofing section above the renovation area. The section is 122 ft. x 121 ft. (equivalent to 150 squares).

The roof project will be broken up into two separate stages. The first stage will be to remove the existing roofing and install a vapor barrier on the entire concrete structure. This will be left in place until the contractor has removed and replaced units on the roof, and cut the necessary new roof openings. Once the general contractor has installed the curbs and necessary equipment, the roofing and insulation will be installed. The general contractor and roofing company will coordinate their efforts to complete the project in a timely manner.

The bids ranged from $282,400 to $350,973. The low bid was received from Able Exterior Remodeling and Roofing of Midland, North Carolina for $282,400. The College estimated $250,000 from the FY 2014-15 county capital budget to complete the roofing project.

**Upon a recommendation by the Facilities Committee, Mr. Smith moved that the Gaston College Board of Trustees approve the low bid of $282,400 from Able Exterior Remodeling and Roofing for Pharr Trade & Industrial Roof Replacement Phase I.** The motion carried.

2. Café Operations

Due to continuing financial loss, Facilities Chair, Dr. Jim Watson, suggested that the College re-visit outsourcing the Café. A small, local company contracts with Cleveland Community College. Cleveland CC currently earns a profit from the lease.

The College is requesting permission to investigate outsourcing food services by issuing a request for proposal. The Café currently operates at a loss of $76,000-$78,000 annually. If the service was outsourced, the College would receive a percentage of net sales, making the operation profitable.

**Upon the recommendation of the Facilities Committee, Mr. Smith moved that the Board of Trustees approve issuing a request for proposal for food services to investigate the feasibility of outsourcing café operations.** The motion carried.
3. Rental Fee Proposal

Rental and related service fees were last increased in 2010. An in-depth review of similar local rentals has been compiled. The Administration is recommending a new, simpler fee structure for the renovated Myers Center Multi-purpose Auditorium. A proposal for rental fees was reviewed by the Board.

Collections for set-up fees and service fees (i.e. housekeeping, security and AV) are used to offset the cost of providing these services. Rental fees are used to offset the cost of maintenance and upkeep for the Multi-purpose Auditorium.

The new Multi-purpose Auditorium will seat 440 at round tables, which is under the fire marshal's rating of 460. It can also seat 1017 people individually on chairs. Many questions arose as to the target audience to use the space; marketing of the space; fees for partner organizations, and fees for organizations for profit and non-profit; possible discounts for local organizations; catering; use of alcohol on the premises; and other rules and regulations. The College does have Facility Guidelines it follows with regard to renting out spaces and/or classrooms on campus, but Board members did not have copies of this information.

Mr. Smith entertained a motion by Sheriff Cloninger to send the new fee structure for the Myers Center Multipurpose Auditorium back to the Facilities Committee for further study. Mr. Keigher seconded the motion. The motion carried.

4. Capital Reports
