Gaston College Program Review Process

The purpose of program review at Gaston College is to provide ongoing and continuous opportunities to evaluate each program's status and effectiveness, and ensure that it is aligned with the College's Vision, Mission, Strategic Plan, and Institutional Philosophy. This evaluation includes identifying a program's strengths and areas for potential improvement to ensure and/or enhance its overall quality. In addition to a dedicated desire to review and make improvements, program reviews are further required by State Code (1B SBCCC 400.3 Program Review), which states, "Each college shall monitor the quality and viability of all its programs and services. Colleges shall review each curriculum program, each program area within continuing education, and their Basic Skills programs at least every five years to determine program strengths and weaknesses and to identify areas for improvement." Effective program review is a reflective and analytical process that seeks input from various sources including students, instructors, staff, and those who invest in the program's graduates. These data, along with other available measures, are intended to show the quality and viability of a program. An effective program review will meet at least the following three objectives:

1. To ensure the program is operating within or is aligned with the College's Mission.
2. To improve curriculum, instruction, and learning.
3. To ensure that resources are appropriately allocated so that the program is efficient.

For the 2023-2024 program review cycle, the office of Institutional Effectiveness and Academic Affairs implemented a new schedule for the program review process. In efforts to streamline this process and alleviate duplication of work, programs were identified for review on a biennial cycle as indicated below.

Groups

- **Group A: Arts and Sciences and Health and Human Services Programs**

- A10600 Associate in Fine Arts in Visual Arts
- A20100 Biotechnology
- A10100 Associate in Arts
- A10300 Associate in General Education
- A1030N Associate in General Education Nursing
- A10400 Associate in Science
- A10500 Associate in Engineering
- A1010T Associate in Arts in Teacher Preparation
- A1040T Associate in Science in Teacher Preparation
- A55220 Early Childhood Education
- A55140 Cosmetology
- A45340 Emergency Medical Science
- C55230 Esthetics Technology
- A45630 Health & Fitness Science
- A45360 Health Information Technology
- A45380 Human Services Technology
- A45400 Medical Assisting
- A45110 Associate Degree Nursing
- D45660 Practical Nursing
- A45580 Pharmacy Technology

- A45720 Respiratory Therapy
- A45740 Surgical Technology
- A45780 Veterinary Medical Technology

- **Group B: Career and Technical Education and Public Safety Programs**
 - A25800 Accounting and Finance
 - D35100 AC, Heating, and Refrigeration Technology
 - A40130 Applied Engineering Technology
 - A30120 Audio and Video Production
 - A60160 Automotive Systems Technology
 - A25120 Business Administration
 - A40140 Civil Engineering Technology
 - A50210 Computer Integrated Machining
 - A55180 Criminal Justice Technology
 - A35130 Electrical Systems Technology
 - A40200 Electronics Engineering Technology
 - D30200 Gunsmithing
 - A25590 Information Technology
 - A40320 Mechanical Engineering Technology
 - A25310 Medical Office Administration
 - A25370 Office Administration
 - A25380 Paralegal Technology
 - A30170 Sports Media Technology
 - A50500 Textile Technology
 - D50420 Welding Technology
 - A55240 Fire Protection Technology
 - A55480 Public Safety Administration

Assessment Cycles

- 2023-2024 – Group A
- 2024-2025 – Group B
- 2025-2026 – Group A
- 2026-2027 – Group B
- 2027-2028 – Group A
- 2028-2029 – Group B

Program Review Components

The program review process includes the completion of the following:

- Comprehensive Academic Program Review Form
- Program Curriculum Map
- Program Learning Outcomes Assessment*

*All programs submit the program learning outcomes assessment every year, regardless of program cycle

The **Comprehensive Academic Program Review form** contains the following areas/related questions to be completed for each program in the review cycle:

- Executive Summary
 - Strengths: What are we doing well?
 - Areas for Improvement: What can we do to better serve our students?
 - Needs: What do we need from the Institution?
 - Actions: What are our next steps? How will we make use of this program review for future improvement?
- Program Data
 - Program Enrollment Data
 - Is program enrollment growing or declining?
 - Have full-time and part-time pathways been updated/reviewed?
 - In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?
 - What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?
 - Enrollment Analysis and demographics (race, gender, age)
 - Share the strategies that are utilized to support underserved populations and non-traditional enrollments.
 - Review program enrollment for at other institutions in neighboring counties.
 - Why are students in Lincoln and Gaston counties enrolling/not enrolling in the program? Identify strategies for enrollment growth. Demographic Enrollment Analysis by Race/Ethnicity:
 - Discuss similarities and/or differences between the college's overall enrollment and the program's enrollment as it pertains to race/ethnicity, gender, age.
 - Discuss program actions to enroll and retain underserved students or special population students.
- Course and Grade Distribution Data
 - Data
 - Number of Students in Each Course
 - Numbers Sections for Each Course
 - Ration of Students/Sections
 - FTE
 - FTE Value
 - Grade Distribution by Course and Delivery Method
 - Questions

- Are courses (including general education and elective courses) selected and sequenced in a way that makes sense?
 - How do Course Success Rates compare to the College success rate?
 - Are the courses that are being offered for the program meeting enrollment needs?
 - Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?
 - Are significant curriculum revisions anticipated in the next two years?
 - Does the program offer clinical, WBL, or Apprenticeship opportunities?
 - If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?
 - How does the program ensure they are choosing the best delivery methods?
 - What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?
- Course Evaluations
 - Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.
 - Explain how the student feedback is being used to improve the course(s).
- Student Progression, Retention, and Completion Rates
 - Discuss the program retention and identify any barriers to student progress.
 - Discuss the student completion data and any identified trends.
 - Identify any known barriers to timely student completion and how they can be addressed.
 - What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?
- Community Connection/Partnerships
 - What partnerships and/or community outreach activities are related to the program?
 - How valuable is this program to the community?
 - How does this program lead to employment opportunities in the local community or prosperity zone?
 - How have we benefitted from community partnerships and what other opportunities exist for collaboration?
 - What is the advisory committee feedback?
 - What do we do that sets us apart from neighboring institutions?
 - How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?
- Program Financial Viability
 - How financially viable is the program?
- Job Placement or Transfer
 - Share the graduation outcome data regarding job placement or transfer.
- Additional Information – external accrediting agencies, graduate surveys, employer surveys, etc.

The **Curriculum Map** contains a list of the program outcomes and core classes in the program. Program faculty review the program learning outcomes and selected courses within the program. The map indicates

the level at which each student learning outcome is addressed in the content delivery in each course in relation to the global program learning outcomes. The levels in the curriculum map are indicated as follows:

- I: Introduced
- D: Developed and practiced with feedback
- M: Demonstrated at the mastery level appropriate for graduation

All academic programs have identified program learning outcomes and annually complete the **Program Learning Outcomes Assessment**. Student learning outcomes for curriculum programs are generally presented by highest award, but this information includes programs (diplomas and/or certificates) embedded within the highest awarded program. The Program Learning Outcomes Assessment contains the following:

- Description of each program learning outcome (PLO)
- Method by which the PLO will be assessed and the assessment means
- Success criteria used to determine if students successfully mastered the PLO
- Assessment analysis, which includes the results, strengths, and areas for improvement for the assessment
- Impact of changes made during previous assessment cycles
- Actions to be implemented for continuous improvement

Upon submission of all required documents, the Office of Institutional Effectiveness will conduct a thorough review of the Comprehensive Academic Program Review form, Curriculum Map, and Program Learning Outcomes Assessment and provide comments, questions, or suggestions.

Up to fifty-percent of the programs in the review cycle will be selected to present a 15-20-minute overview of the program to the Academic Program Performance Team (Program Review Board and Dean's Council members). The program review presentations will be open to any college faculty/staff to attend.

Program Review Presentation

Associate Deans/chairs/leads along with program faculty members will prepare the program review presentation (PowerPoint or handout) and be present during the presentation to the Academic Program Performance Team.

Topics which may be included in the presentation:

- Program Executive Summary– focus of program, enrollment, retention, student achievement, completers, job placement, etc.
- Highlight Successes
- Highlight areas for improvement
- Highlight needs – equipment, personnel, marketing, etc.
- Highlight best practices
- What's going well?
- Is the program utilizing all resources and opportunities available?
- Is the assessment and planning process used to benefit the program?
- Has the program implemented innovative ways of improving student and program success? Are there possibilities for innovation in the future?

- Are there changes or issues that will have an impact on the program in the future? How can the program navigate these changes effectively?
- Are there any community collaborations?

Program Review Timeline

Time	Step
July-September	<p>The Office of Institutional Effectiveness (IE) will enter all program level data to the Comprehensive Academic Program Review form for programs in the review cycle for the previous academic year (summer, fall, spring terms).</p> <p>All program data and assessment documents will be uploaded to the program's folder in OneDrive by September 30.</p>
August	<p>IE will attend divisional meetings for programs submitting full program review document during the upcoming cycle to discuss the review process.</p>
October 1 – October 31	<p>Associate Deans/chairs/leads will complete the Comprehensive Academic Program Review form, Curriculum Map, and Program Learning Outcomes Assessment for programs in the review cycle.</p> <p>Note: All programs will complete the Program Learning Outcomes Assessment.</p> <p>IE will serve as a resource to Associate Deans/chairs/leads during this time.</p>
November 1	<p>Deadline for the final program review documents will be uploaded to the program's folder in OneDrive by November 1 (i.e. Comprehensive Academic Program Review, Curriculum Map, Program Learning Outcomes Assessment)</p> <p>Note: ALL programs will submit Program Learning Outcomes Assessment every year for every program.</p>
November – December	<p>IE will compile and examine all submitted program review documents and provide feedback as needed to Associate Deans/chairs/leads.</p> <p>The Program Review Board will meet to discuss the review documents and review process.</p>
January – March	<p>Up to fifty-percent of the programs in the review cycle will be randomly selected to present an overview of the program to the Academic Program Performance Team (Program Review Board and Dean's Council members). Programs selected for presentation will be identified by mid-January. The program review presentations will be open to any college faculty/staff to attend. Any program in the review cycle involved in an external accreditation during the same timeframe will be exempt from the presentation requirement.</p>

Program Review Board

The purpose of the Program Review Board is to serve as a guide and support for program review processes and procedures.

Program Review Board Members

Lead – Nicole Fogle

Arts and Sciences Division

- Beth McCall
- Christine Ziemba-Tolbert
- Patricia Williams

Career & Technical Education Division

- Jeremy Railton
- Leslie Martin
- Scotty Brooks

Health and Human Services Division

- Breanne Walker
- Lythia Bynum
- Marlena Thomas
- Melody P. Gibson
- Phonzie Childers

Academic Program Performance Team

- Beth McCall
- Breanne Walker

Program Review – Arts and Sciences 2023-2024

Arts and Sciences Programs

- A10100 Associate in Arts
- A1010T Associate in Arts in Teacher Preparation
- A1040T Associate in Science in Teacher Preparation
- A10300 Associate in General Education
- A1030N Associate in General Education Nursing
- A10400 Associate in Science
- A10500 Associate in Engineering
- A10600 Associate in Fine Arts in Visual Arts
- A20100 Biotechnology
- A55220 Early Childhood Education

Program Review – A10100 Associate in Arts

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Brian Bookout

Associate Dean: Beth McCall

Program Code(s)/Name(s): Associate in Arts

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A10100 Associate in Arts
- P1012C Associate in Arts Pathway

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The mission and purpose of the Associate in Arts (AA) degree at Gaston College is to provide students with a transfer degree which allows for seamless entry to a senior institution. All public senior institutions in North Carolina and many private institutions are a part of the Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA). These agreements enable Gaston College graduates in the AA program to transfer with junior status. Gaston College graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.0 on a 4.0 scale in order to transfer with a junior status.

The AA degree is granted for a planned program of study consisting of a minimum of 60 semester hours of credit of college transfer courses. Within the degree program, students have the opportunity to achieve competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The Arts and Sciences Division Office (Dean and Associate Deans) serve as the primary program review team for this degree program. This group meets weekly depending upon current needs and activities of the division. Additionally, an external Transfer Advisory Committee meets annually to review curricula, transfer issues, and other topics. This committee is composed of Gaston College Faculty and Staff and representatives of four-year institutions where Gaston College students may transfer.

The following action items from the 2022-2023 program review cycle were addressed.

Two of the NCCCS critical success measures directly impacted by student success in the Associate in Arts program saw improvement in the NCCCS 2024 Performance Measures for Student Success Report. Relating to the NCCCS second performance measure, Credit English Success, the gateway course of ENG 111 saw improvement from 0.920 in the 2023 report, which put Gaston College in the Baseline category, to 1.039 in the 2024 report, moving Gaston College to the Average Band Minimum category. Relating to the seventh performance measure, Transfer Performance, Gaston College moved from 0.994 (Average Band Minimum) to 1.012 (Average Band Maximum). Relating to the NCCCS third performance measure, College Level Math Success Rates, Gaston College performance decreased from the prior year. During the year, the MAT department formed a committee, Student Success Rate of College Level Math Team, that identified students who needed MAT 100+. These students were contacted and found to either have already completed their program of study, had left the college, or the information in the system was not updated to

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

reflect the math that was needed. This process seemed to confuse the students and the faculty that were making the contacts. For the future, academic advisors need to strongly encourage students to enroll in a MAT 100+ course early in their time at Gaston College to further assist these students in completing College Level Math. The college has stayed in the same NCCCS band width of less than the college average but above the baseline.

Because demand for online classes occurs for all disciplines within the Associate in Arts program, continuing efforts have been made since the last program review to implement strategies to improve online learning and teaching. These efforts include divisional leadership presenting multiple workshops for specific departments, as well as for all faculty in the division.

In addition, several resources and guides for faculty in the Division of Arts and Sciences were created that focused on Regular Substantive Interaction (RSI), such as RSI Overview and Tips, RSI Instructor Self-Assessment for Online Courses, and Credit Hour versus Contact Hour in Online Courses to help faculty see the amount of hours in a given semester to help plan for their Activities and RSI. Divisional leadership also worked one-on-one with specific faculty who sought out individualized assistance throughout the year to address specific issues related to online instruction.

To develop, implement and promote the Gaston College Honors Program, an Honors Committee was created in Summer 2023, which met regularly through Fall 2023 and Spring 2024 to

- articulate a rationale for a revamped GC honors program and communicate that to the GC President's Council for approval,
- review and research honors programs at other community colleges in the NCCCS,
- determine honors program admission requirements,
- consider and determine program pathways to include one tailored for students who intend to transfer to four-year institutions and one for students who intend to graduate and enter the workforce,
- consider and determine requirements for each of the two pathways,
- identify grant opportunities and apply for an ITYC-NSF IUSE grant,
- create both mission and vision statements,
- survey faculty, evaluate survey responses and generate strategies and incentives to encourage more instructors to offer honors options,
- and develop honors program handbooks for both faculty and students.

Promoting transfer opportunities, the purpose on the Transfer Admission Guarantees (TAG) Co-Admission Program, occurred both on-campus and off.

- **On-campus** outreaches included an engaging bulletin board in a high traffic area of Robinson Classroom Building, the building where most classes related to the Associate in Arts program are held; a table at the GC Student Success Expo; information shared at the Gaston College Educators Breakfast; information included in the GC Leadership Gaston Scavenger Hunt; Fall Transfer Fair; College Now training event; SPARC – C3 interest meeting; GC Open House event; personal contact with SPARC-C3 students; Early College High School TAG Co-Admission event; SGA Spring 2024

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

welcome event; GECHS TAG Talk; Lincoln County HS 10th grade visit to GC; Rhino Roadmap information; GC Spring Transfer Fair; 49er Next Meeting; GC Spring Fest; and Senior Night.

- **Off-campus** TAG efforts included maintaining an information-rich website; Zoom meetings with a partner high school's counselor and partner private university to review and discuss aspects of the TAG program; information tables at area high school football games; presentation at a Lincoln County Teacher Cadet event; and campus visits to a local private college.

To meet the demands of higher enrollment and open faculty positions due to previous retirements/resignations, pressing needs for more English, Communications, and Mathematics faculty have been addressed with the addition of two full-time English instructors, one full-time Communications instructor, and one full-time Mathematics instructor.

Strengths:

The Associate of Arts program remains an essential part of Gaston College academic programs, evident from enrollment statistics. Courses within the Arts and Sciences (A&S) Division play a crucial role in all the degrees offered by the College. The Division continues to be at the forefront of statewide and national improvement initiatives. Given the interdependent nature of the Arts and Sciences Division, fostering collaboration with other programs and divisions at the College is a top priority and a significant strength. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules, created HyFlex course offerings, scheduled more eight-week classes, and added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location.

The Division offers numerous valuable academic resources to support students in successfully completing their studies. It actively participates in various campus initiatives and activities, such as the Developmental Education Alignment Project, Gaston College Study Abroad, Writing Center, Learning Center, MASC Center, Transfer Advising Center, Psi Beta, Gamma Beta Phi, Completion by Design, Achieving the Dream, NC College Transfer Program Association, STEM Persistence and Retention via Curricula, Centralization, and Cohorts (SPARC), Inquiry-Based Learning methods, and North Carolina Guided Pathways to Success (NC-GPS).

Many A&S faculty have received specialized professional development related to conducting high quality online courses in the form of online course audits, Blackboard and Accessibility Training (BaAT), Quality Matters Courses (QM), and Association of College and University Educators (ACUE).

Since the last assessment cycle, recruiting efforts to enroll students in Transfer Admissions Guarantees (TAG) Co-Admission Programs have been implemented. TAG programs offer transfer students guaranteed admission to select university partners. Divisional leaders have focused on marketing efforts for these important agreements through campus events like the Student Success Expo and collaborating with the GC Marketing and Communications Department to publicize the TAG program through GC's social media.

Areas for Improvement:

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The Arts and Sciences Division is always looking to enhance and improve the student experience. With continuous improvement in mind, several areas have been identified for further development. Additionally, divisional leaders will focus on providing further academic support to students in science and math courses, brainstorming ways to increase response rates for course evaluations and graduation surveys, improve seamless transfer to senior institutions, and reduce course withdrawal rates.

Needs:

- Rauch Science Building continues to be in desperate need of a new HVAC system due to dangerously high temperatures in the lab, which is a hazard with storing chemicals and materials in the lab. In addition, the greenhouse attached to Rauch continue to need repairs as it needs to be used for labs and resources.
- Arts and Sciences leadership will provide training for our faculty for the LMS upgrades and implementations.
- As Arts and Sciences continues to expand Lincoln Campus course offerings, leadership will assess, review, and monitor the classrooms to see if they meet student needs.
- Arts and Sciences has a critical need to hire more faculty in a variety of disciplines to meet the increasing number of course sections. This will allow us to provide more sections and times when courses could be offered to meet students' needs.

Actions:

1. Continue to improve the North Carolina Community College System Critical Success measures for student success rate in curriculum English.
2. Meet the North Carolina Community College System Critical Success measure for curriculum Math
3. Implement strategies to improve online learning and teaching, including LMS transition to Blackboard Ultra.
4. Continue to expand the Honors Program and Transfer Admission Guarantee programs.
5. Apply for grants to assist with supporting the Honors Program, Student Success initiatives, development of an online teaching and learning center, consortium with area community colleges and four-year institutions, and new SPARC offerings.

SECTION II: PROGRAM DATA

Program Enrollments

Academic Year 2023-2024 Unduplicated	A10100	P1012C
American Indian/Alaska Native	2	2

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis:</p> <p>Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>A comparison of the enrollment data from 2022-2023 to 2023-2024 indicates that enrollment is experiencing healthy growth in both A10100 and in P1012C. In A10100, the number of individuals enrolled grew from 964 in 2022-23 to 1072 in 2023-2024, which indicates an 11.2% percent increase. Enrollment among CCP students in P1012C was even more robust, with a growth from 1630 in 2022-23 to 1860 in 2023-24, a 14.11% percent increase.</p> <p>Both Full-Time and Part-Time pathways are updated and/or reviewed yearly.</p> <p>Like neighboring institutions CPCC, CVCC, and CCC, Gaston College's Associate in Arts program requires 60 semester hours of approved college transfer courses with a grade of C or better in each course. Like those colleges, the AA degree emphasizes competence in reading, writing, oral communication, fundamental mathematical skills, critical thinking skills and basic computer use.</p> <p>Various strategies have been implemented to improve enrollment goals, improve the program for students, and improve course offerings.</p> <ul style="list-style-type: none"> • All courses within the Associate of Arts degree pathway are sequenced to allow successful completion of the pathway that is both efficient for student completion and economical in terms of programing cost. • Foundational requirements are provided early in the program and promote completion of pre-requisite courses early

	Explanation/Narrative
	<p>in the program to ensure successful completion.</p> <ul style="list-style-type: none"> • Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible. • Improving course offerings is an important goal within the Arts and Sciences. • To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. • Previous semester data has been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The Arts and Science division has created Hyflex course offerings in English and has added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students.
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments. (Consider program demographic data compared to college wide demographic data.) Review program enrollment for A10100/P1012C at other institutions in our neighboring counties. Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Associate in Arts/AA Pathway at GC? Identify strategies for enrollment growth. When reviewing Spring 2024 student enrollment numbers of new & returning students, review the number of students enrolled at a neighboring institution that resides our service area (Gaston & Lincoln counties), and determine if the program has effectively marketed the Associate in Arts/AA Pathway to students in and around our service area counties.</p>	<p>Demographics A10100 during 2023-2024 Academic Year Percent Female 56% Percent Male 44% Percent White 32% Percent Non-White 14% Percent Unknown 51%</p> <p>Compared to the college-wide population, the AA program has a greater number of male students (44% vs. 36% college-wide) and a lesser number of female students (56% vs. 64% college-wide). However, the trend of having more female students than male is consistent with college demographics. During the 2023-2024 academic year, more white than non-white students were enrolled in the AA degree program.</p> <p>The Arts and Sciences Division provides academic holistic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science</p>

				Explanation/Narrative
Discuss program efforts (past or present) to address possible opportunities of enrollment growth.				Center, Learning Center, TRIO, and the Transfer Advising Center.
A10100	# of Students	Students From Gaston	Students From Lincoln	<p>Cleveland CC had 415 (new and recurring students for Spring 2024); however, 5 students from Lincoln & 17 from Gaston, the GC service area, enrolled in the Associate in Art program at CCC. That number represents 5.3% of the total number of AA students at CCC.</p> <p>$5 + 17 = 22$/Opportunity for program growth.</p> <p>Catawba Valley CC had 1,025 (new and recurring students for Spring 2024); however, 36 students from Lincoln & 8 from Gaston, the GC service area, enrolled in the Associate in Art program at CVCC. That number represents 4.3 percent of the total number of AA students at CVCC.</p> <p>$8 + 36 = 44$/Opportunity for program growth.</p> <p>Central Piedmont CC had 5,444 (new and recurring students Spring 2024); however, 36 students from Lincoln & 93 from Gaston, the GC service area, enrolled in the Associate in Art program at CPCC. That number represents 2.4 percent of the total number of AA students at CPCC.</p> <p>$36 + 93 = 129$/Opportunity for program growth.</p> <p>Program's enrollment growth action(s) and/or comment(s) below:</p> <p>While the percentage of students from Gaston/Lincoln counties represents five percent or less of the total number of AA students enrolled at neighboring institutions, these students indicate that Gaston College's AA program still has room to grow in attracting and retaining students from our service area. This may be done through increasing marketing efforts that make residents aware of the transferability of classes earned through the AA degree.</p>
Cleveland CC	415	17	5

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college **race/ethnicity** data.

Discuss program actions to enroll and retain underserved students or special population students.

Demographics A10100 during 2023-2024 Academic Year

Percent White 32%
Percent Asian 1%
Percent Black 6 %
Percent Hispanic 7%
Percent Unknown 51%

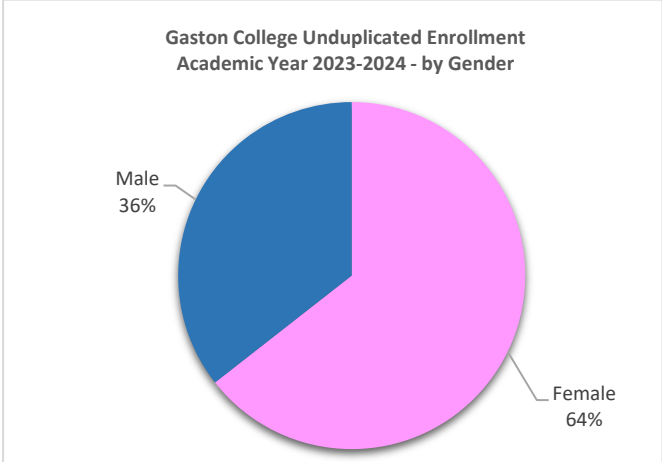

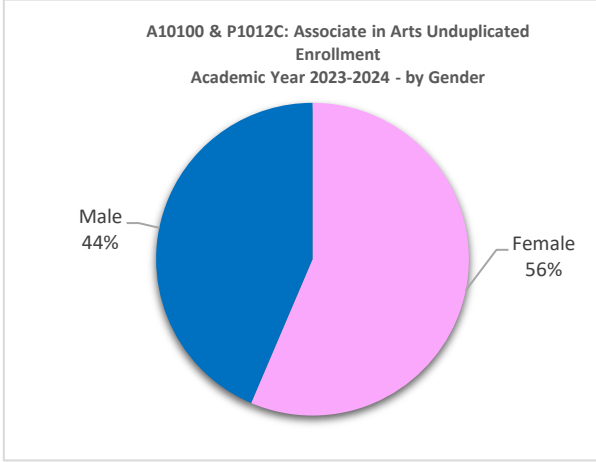

Demographics College-wide during 2023-2024 Academic Year

Percent White 55%
Percent Asian 2%
Percent Black 22 %
Percent Hispanic 15%
Percent Unknown 5%

Pronounced differences exist between several of the Race/Ethnicity categories at the program vs. college level. Some of these differences can be traced to the fact that over 51% of AA students are dual-enrolled high school students, who may have been advised by their high school counselors not to indicate their race when enrolling to Gaston College, resulting in 51% of AA students being identified as Unknown. That fact makes it difficult to know whether the low

	number of Black (6% vs. 22%) and Hispanic students (7% vs. 15%) enrolled in the AA program indicates a truly low number or just a misreported one.

Progress: Course and Grade Distributions Analysis

	Explanation
<p>Course Sequence/Success:</p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Course sequencing is a high priority within the Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A course matrix of semester offerings is provided to college program leaders.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p>

	Explanation
	<p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible.</p> <p>Based on current data, the Arts and Sciences course success rate is 89%.</p> <p>Currently, courses with low enrollments within A&S include the following:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>While there are several classes that have low enrollment, most classes have more than 10 students per section. The courses with low enrollment are managed well by providing only one section of that course.</p>
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements or total credit hours have been reviewed or revised within the last two years. This process is carried out through collaboration of department leads, program chairs, divisional deans, and the Curriculum Committee.</p> <p>One significant curriculum revision that will be enacted in the next two years is the launch of a state-mandated Development English co-requisite class, ENG 045, which will replace the current version of developmental instruction covered in a pre-requisite, ENG 002, and co-requisite, ENG 011. ENG 045 will serve students who have a high school GPA of 2.79 or below. Another curriculum change will occur as the current developmental math process will be replaced by the MAT Department's choice of one of the</p>

	Explanation
	<p>NCCCS's recommended options during the next assessment cycle.</p> <p>A significant number of AA classes are offered in area high schools. Instructors deliver the same content, with no changes in rigor or quality, in classes delivered on high school campuses. This is verified by internal audits regularly conducted by departmental leads, program chairs, and Distance Education personnel.</p>
<p>Modality:</p> <p>How does the program ensure they are choosing the best delivery methods?</p> <p>Include Quality Matters and online training information here</p>	<p>Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs and to increase the ability to hold more in-person labs throughout the week. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility and better use of lab space.</p> <p>The Math Department has expanded its online offering of prerequisite and corequisite classes to reduce the number of days a student has to be on campus. The English Department has also reworked schedules to include corequisite ENG 011 classes that occur on the same days as the seated portions of ENG 111 sections to help reduce the number of days a student is required to be on-campus.</p> <p>The Arts and Sciences division has expanded the number of HyFlex options to include ACA, EDU, ENG, PHY, and HIS classes to better meet the needs of students.</p> <p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving instruction in other professional development opportunities, such as QM and ACUE.</p> <p>The following faculty in Arts and Sciences have at least 1 course certified by Quality Matters:</p> <ul style="list-style-type: none"> • Tonia Broome (MAT-152)

	Explanation
	<ul style="list-style-type: none"> • Melanie Dekerlegand (ENG-111) • Michele Domenech (ENG-112) • Hisayo Tokura Gallo (PSY 241) • Leslie Huss (MAT-171) • Dr. Lori Metcalf (PSY-150) • Ed Pardue (SOC-210) • Judith Porter (MUS-110) • Jeff Pruett (HIS 111) • Susan Whittemore (BIO-111) • Dr. Patricia Williams (BIO 275) • Dr. Heather Woodson (EDU-243) • Chris Ziemba-Tolbert (ACA-122) <p>The following faculty in Arts and Sciences have received certification to be Certified Peer Reviewers for Quality Matters</p> <ul style="list-style-type: none"> • Ginger Black • Michele Domenech • Katie Jordan • Ed Pardue • Dr. Patricia Williams • Chris Ziemba-Tolbert <p>The following faculty in Arts and Sciences has received certification to be a Master Reviewer for Quality Matters</p> <ul style="list-style-type: none"> • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have earned the Full Online Teaching Certification (7-course program) for Quality Matters:</p> <ul style="list-style-type: none"> • Ginger Black • Katie Jordan • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have completed Professional Development in Quality Matters:</p> <ul style="list-style-type: none"> • Marguerite Bishop (IYOC) • Brian Bookout (IYOC & APPQMR) • Tonia Broome (IYOC & APPQMR) • Penny Brower (IYOC & APPQMR) • Heather Bruch (IYOC) • Amy Chaney (IYOC & APPQMR) • Melanie DeKerlegand (IYOC & APPQMR) • Keith Denson (IYOC & APPQMR)

	Explanation
	<ul style="list-style-type: none"> • Gerri Dobbins (IYOC & APPQMR) • Michele Domenech (IYOC & APPQMR) • Hisayo Tokura-Gallo (IYOC & APPQMR) • Mary Gourley (IYOC & APPQMR) • Leslie Huss (IYOC & APPQMR) • Dr. Shannon Landrum (IYOC) • Dr. Lori Metcalf (IYOC & APPQMR) • Mary Morton (IYOC & APPQMR) • Ed Pardue (IYOC & APPQMR) • Judith Porter (IYOC) • Jeffery Pruett (IYOC) • Dr. Chris Thurley (IYOC & APPQMR) • Susan Whittemore (IYOC & APPQMR) • Dr. Patricia Williams (DYOC, IYOC & APPQMR) • Dr. Heather Woodson (IYOC) • Chris Ziemba-Tolbert (APPQMR) • Bianca Yavelak (IYOC) • Jodi Valencic-Zieverink (IYOC)
<p>Student Achievement:</p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, and high withdrawal rate courses within the program?</p>	<p>Currently, courses with low enrollments within A&S:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> • The following courses had success rates lower than the divisional average of 89 - ACA 122; BIO 112, 155, 161, 163; CHM 103/130A, 151; COM 110, 231; EDU 119, 131, 146, 184, 221, 234, 280, 282; ENG 002, 011, 111; MAT 110, 121, 152, 172, 263; MUS 110; PSY 150; PHY 251, 252; REL 110 <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> • The following courses had withdrawal rates that exceeded the divisional average by more than five percent: ACA 122; ART 121; BIO 111, 112, 155, 161, 168, 169; CHM 130/130A, 151, 152, 251, 252; COM 110; EDU 119, 146, 151, 184, 187, 251, 279; ENG 002, 011, 112; HIS

	Explanation
	<p>112; MAT 003, 152, 172, 263, 271; MUS 110, 112; PSY 241; REL 110; SOC 225.</p> <p>The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and several courses have been identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues.</p> <p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.</p>
<p>Evaluation:</p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon Due to course evaluations being administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and in this evaluation cycle were 88-89%. Overall, student feedback for the program is positive.</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of</p>

	Explanation
	their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024 academic year, guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
A10100 Associate in Arts	A10100	54%	74%
P1012C Associate in Arts Pathway	P1012C	DNA	DNA

Program Progress: Retention and Progression

	Explanation
<u>SLOs and Curriculum Map:</u> Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
<u>Retention and Progression:</u> Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	<p>Program Retention A10100</p> <ul style="list-style-type: none"> Fall 2019 to Fall 2020 48% Fall 2020 to Fall 2021 65% Fall 2021 to Fall 2022 48% Fall 2022 to Fall 2023 54% Fall 2023 to Fall 2024 74% <p>Retention of new students in the AA program increased twenty percentage points from Fall 2023 to Fall 2024.</p> <p>Program Retention P1012C</p> <ul style="list-style-type: none"> Fall 2019 to Fall 2020 17% Fall 2020 to Fall 2021 52% Fall 2021 to Fall 2022 50% Fall 2022 to Fall 2023 DNA Fall 2023 to Fall 2024 DNA <p>The Associate in Arts program experienced a significant increase in fall-to-fall retention rates. Since growth has occurred for the last two years, this may indicate a sustained trend in growth.</p>

	Explanation
	<p>The barriers to student progress for the P1012C involve the uniqueness of the high school population. The student's goal may be to take a course or two and not to progress through the pathway. The P1012C pathway is for 11th and 12th grade students only. If students enroll in the pathway in the fall of their senior year, they would no longer be in this pathway or perhaps at Gaston College during the following fall. This may result in a lower fall-to-fall retention rate for this population.</p> <p>One factor that may have resulted in growth during the 2023-2024 academic year is increased divisional emphasis on retention efforts through timely and consistent interventions initiated by instructors through the Watermark platform to keep students enrolled.</p>

Credential Earned – Academic Year 2023-2024

Completion/Credentials Earned

	Explanation
<p>Graduation: Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p>	<p>A10100 Headcount – 1072 Awards – 290 Awards at the Highest Level – 290 Awards to Headcount Ratio – 27%</p> <p>P1012C Headcount – 1860</p>

	Explanation
What strategies have been and/or will be implemented to improve time to degree completion?	<p>Awards – 0 Awards at the Highest Level – 0 Awards to Headcount Ratio – 0%</p> <p>Timely student completion has been a major objective for both the Division and the College. Specific initiatives, such as Completion by Design, Achieving the Dream, and NC-GPS, have provided the framework for improvement strategies. Students in A10100 and P1012C have diversified goals for attending; completion of a credential is only one preference. Many students plan to transfer before fulfilling degree requirements. One strategy to encourage degree completion is dedicated advising for Arts and Sciences so students have one-on-one advising to help keep them on track within their pathway. In addition, the Watermark student retention system is a tool the Division of Arts and Sciences encourages faculty to use to ensure completion at the course level. This has led to the retention of more students within the Arts and Science division.</p>

SECTION III: CONNECTION

	Explanation
<p>Community: How valuable is this program to the community?</p> <p>How have we benefitted from community partnerships and what other opportunities exist for collaboration?</p>	<p>Part of the value of the Associate in Arts program is that every student who graduates with an AA degree and then lives and works in the community is better equipped to think critically, communicate effectively through various means, identify and solve problems, and lead successfully because of the training they received at Gaston College. In that way, this program is impacting the Gaston College service area both in the present and potentially in the future.</p> <p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>An annual Transfer Advisory Committee is conducted with representatives from the main senior institutions for our transfer students. Transfer Admission Guarantees (TAGs) Co-Admission Programs have been developed with several public and private institutions</p>

	Explanation
	<p>in our area. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>College Now is a program offered at Gaston College and is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment program for qualified high school students, in the GC service area of Gaston and Lincoln counties, to take tuition-free college classes. The Division of Arts and Sciences houses several dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), and ASTP (P1042T).</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, judging area high school art competitions, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the community.</p>
<p>Uniqueness: What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>The Arts and Sciences Division effectively promotes the following unique qualities of the college/division, as seen by the trend of increased enrollment and increased FTEs:</p> <p>Gaston College participates in North Carolina Guided Pathways to Success (NC-GPS). As a result of this initiative, we have created streamlined pathways for students in the various degree programs. One of the benefits of NC-GPS is to create greater cost savings and efficiencies for students.</p> <p>Division faculty/staff participate in a robust marketing plan with the high school population as a target audience. This includes information tables at community events like football games and participation with partners such as public, charter and private high school at events like the annual Educators Breakfast. We continue to collaborate with senior institutions regarding the Transfer Advising Agreement (TAG) Co-Admission Programs and Baccalaureate</p>

	Explanation
	<p>Degree Plans (BDPs) to ensure a smooth transfer process.</p> <p>Additionally, student resources for this program are unique. Beyond our traditional learning center, we also have both a Writing Center and Math and Science Center staffed with professional academic coaches who hold a bachelor's degree or higher.</p> <p>Gaston College offers a SPARC Scholars program. This program is a scholarship initiative funded by the National Science Foundation and a private donor to help offset the unmet financial needs of Gaston College students. Scholarships up to \$10,000 per student, per year, are offered to select full-time Associate of Science and Associate of Engineering students, who plan to transfer to a four-year university after graduating from Gaston College; major in Science, Technology, Engineering, or Math (STEM); and who show academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also available to participants of the program. The amount awarded is determined based upon federal financial need.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, attend at least 8 globally designated events, and complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. Students who complete the program receive special recognition on their Gaston College transcript and receive a certificate of completion from UNC - Chapel Hill.</p> <p>The first full Honors Program within Gaston College and the Arts and Sciences Division was launched during the 2023-2024 school year.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Associate in Arts (10100)	637.33	542.72	528.24	534.45	553.78
College Transfer Pathway Leading to an Associate in Arts (1012C)	257.13	353.94	480.22	608.94	737.97

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
College Transfer (includes CCP Transfer Pathways & Biotech)	\$6,863,459.75	2603.4	\$10,802,789.22	\$3,939,329.47	2648.9	\$10,819,239.89	\$3,955,780.14

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>FTE Count A10100</p> <ul style="list-style-type: none"> 2019-2020 637.3 2020-2021 542.72 2021-2022 528.24 2022-2023 534.45 2023-2024 553.78 <p>There was an increase in FTE of 19 FTE from 2022-2023 to 2023-2024, which represents the highest total since 2021.</p> <p>FTE Count P1012C</p> <ul style="list-style-type: none"> 2019-2020 257.1 2020-2021 353.94 2021-2022 480.22 2022-2023 608.94 2023-2024 737.97 <p>There was an increase in FTE of 129 from 2022-2023 to 2023-2024.</p>

	Explanation
	<p>The FTE increased for the A10100 program and increased to the highest point in the history of the P1012C program. The programs remain in high demand, especially among the high school population.</p> <p>The Arts and Sciences Division consistently earns approximately half of the College FTEs. The return on investment for this program is consistently high; FTE income significantly outweighs the cost for running the program and faculty salaries.</p>

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>The Transfer Advisory Committee meets annually with representatives from the main senior institutions for GC transfer students. Transfer Admission Guarantees (TAGs) have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several of the private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, they must attend at least 8 globally designated events, and they must complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. For 2023-2024, the Gaston College Study Abroad program traveled to Ireland and</p>

	Explanation
	<p>Switzerland. Students who complete the program receive special recognition on their Gaston College transcripts and receive a certificate of completion from UNC Chapel Hill.</p> <p>College Now, a program offered at Gaston College, is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment program for qualified high school students to take tuition-free college classes. The Division of Arts and Sciences houses several dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), ASTP (P1042T).</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, Educators Breakfast, Science Fairs, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the area community.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	N/A

Program Review – A1010T Associate in Arts in Teacher Preparation

Program Review – A1040T Associate in Science in Teacher Preparation

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Brian Bookout

Associate Deans: Beth McCall, Patricia Williams, Chris Ziemba-Tolbert

Program Code(s)/Name(s): Associate in Arts in Teacher Preparation/Associate in Science in Teacher Preparation

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- **A1010T Associate in Arts Teacher Preparation**
- **P1012T Associate in Arts Teacher Preparation Pathway**
- **A1040T Associate in Science Teacher Preparation**
- **P1042T Associate in Science Teacher Preparation Pathway**

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The mission and purpose of the Associate in Arts and Science in Teacher Preparation (AATP/ASTP) degree at Gaston College is to provide students interested in continuing their education to complete a bachelor's degree to become a teacher at any of the 15 University of North Carolina (UNC) system four-year institutions and 23 North Carolina Independent Colleges and Universities (NCICU). The Associate in Arts Teacher Preparation (AATP) degree program is for students interested in teaching non-science and math-related curriculum. The Associate in Science Teacher Preparation (ASTP) degree program is for students interested in teaching science and math-related curriculum.

Admission to College of Education programs is competitive and admission is not guaranteed. To be eligible for the transfer of credits under the AATP/ASTP Uniform Articulation Agreements, community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.7 on a 4.0 scale. In addition to completing their primary general education courses required for AA and AS pathways, student in the AATP and ASTP programs are required to complete EDU 187, 216, 250, and 279.

The AATP/ASTP degree is granted for a planned program of study consisting of a minimum of 60 semester hours of credit of college transfer courses. Within the degree program, students have the opportunity to achieve competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The Arts and Sciences Division Office (Dean and Associate Deans) serve as the primary program review team for this degree program. This group meets weekly depending upon the current needs and activities of the division. Additionally, an external Transfer Advisory Committee meets annually to review curricula, transfer issues, and other topics. This committee is composed of representatives of four-year institutions where Gaston College students may transfer.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The following action items from the 2022-2023 program review cycle were addressed.

Two of the NCCCS critical success measures directly impacted by student success in the Associate in Arts program saw improvement in the NCCCS 2024 Performance Measures for Student Success Report. Relating to the NCCCS second performance measure, Credit English Success, the gateway course of ENG 111 saw improvement from 0.920 in the 2023 report, which put Gaston College in the Baseline category, to 1.039 in the 2024 report, moving Gaston College to the Average Band Minimum category. Relating to the seventh performance measure, Transfer Performance, Gaston College moved from 0.994 (Average Band Minimum) to 1.012 (Average Band Maximum). Relating to the NCCCS third performance measure, College Level Math Success Rates, Gaston College performance decreased from the prior year. During the year, the MAT department formed a committee, Student Success Rate of College Level Math Team, that identified students who needed MAT 100+. These students were contacted and found to either have already completed their program of study, had left the college, or the information in the system was not updated to reflect the math that was needed. This process seemed to confuse the students and the faculty that were making the contacts. For the future, academic advisors need to strongly encourage students to enroll in a MAT 100+ course early in their time at Gaston College to further assist these students in completing College Level Math. The college has stayed in the same NCCCS band width of less than the college average but above the baseline.

Because demand for online classes occurs for all disciplines within the Associate in Arts program, continuing efforts have been made since the last program review to implement strategies to improve online learning and teaching. These efforts include divisional leadership presenting multiple workshops for specific departments, as well as for all faculty in the division.

In addition, several resources and guides for faculty in the Division of Arts and Sciences were created that focused on Regular Substantive Interaction (RSI), such as RSI Overview and Tips, RSI Instructor Self-Assessment for Online Courses, and Credit Hour versus Contact Hour in Online Courses to help faculty see the amount of hours in a given semester to help plan for their Activities and RSI. Divisional leadership also worked one-on-one with specific faculty who sought out individualized assistance throughout the year to address specific issues related to online instruction.

To develop, implement and promote the Gaston College Honors Program, an Honors Committee was created in Summer 2023, which met regularly through Fall 2023 and Spring 2024 to

- articulate a rationale for a revamped GC honors program and communicate that to the GC President's Council for approval,
- review and research honors programs at other community colleges in the NCCCS,
- determine honors program admission requirements,
- consider and determine program pathways to include one tailored for students who intend to transfer to four-year institutions and one for students who intend to graduate and enter the workforce,
- consider and determine requirements for each of the two pathways,

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- identify grant opportunities and apply for an ITYC-NSF IUSE grant,
- create both mission and vision statements,
- survey faculty, evaluate survey responses and generate strategies and incentives to encourage more instructors to offer honors options,
- and develop honors program handbooks for both faculty and students.

Promoting transfer opportunities, the purpose of the Transfer Admission Guarantees (TAG) Co-Admission Program, occurred both on-campus and off.

- **On-campus** outreaches included an engaging bulletin board in a high traffic area of Robinson Classroom Building, the building where most classes related to the Associate in Arts program are held; a table at the GC Student Success Expo; information shared at the Gaston College Educators Breakfast; information included in the GC Leadership Gaston Scavenger Hunt; Fall Transfer Fair; College Now training event; SPARC – C3 interest meeting; GC Open House event; personal contact with SPARC-C3 students; Early College High School TAG Co-Admission event; SGA Spring 2024 welcome event; GECHS TAG Talk; Lincoln County HS 10th grade visit to GC; Rhino Roadmap information; GC Spring Transfer Fair; 49er Next Meeting; GC Spring Fest; and Senior Night.
- **Off-campus** TAG efforts included maintaining an information-rich website; Zoom meetings with a partner high school's counselor and partner private university to review and discuss aspects of the TAG program; information tables at area high school football games; presentation at a Lincoln County Teacher Cadet event; and campus visits to a local private college.

To meet the demands of higher enrollment and open faculty positions due to previous retirements/resignations, pressing needs for more English, Communications, and Mathematics faculty have been addressed with the addition of two full-time English instructors, one full-time Communications instructor, and one full-time Mathematics instructor.

Strengths:

The Associate of Arts/Science in Teacher Preparation programs remain an essential part of Gaston College academic programs, evident from enrollment statistics. Courses within the Arts and Sciences (A&S) Division play a crucial role in all the degrees offered by the College. The Division continues to be at the forefront of statewide and national improvement initiatives. Given the interdependent nature of the Arts and Sciences Division, fostering collaboration with other programs and divisions at the College is a top priority and a significant strength. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules, created HyFlex course offerings, scheduled more eight-week classes, and added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The Division offers numerous valuable academic resources to support students in successfully completing their studies. It actively participates in various campus initiatives and activities, such as the Developmental Education Alignment Project, Gaston College Study Abroad, Writing Center, Learning Center, MASC Center, Transfer Advising Center, Psi Beta, Gamma Beta Phi, Completion by Design, Achieving the Dream, NC College Transfer Program Association, STEM Persistence and Retention via Curricula, Centralization, and Cohorts (SPARC), Inquiry-Based Learning methods, and North Carolina Guided Pathways to Success (NC-GPS).

Many A&S faculty have received specialized professional development related to conducting high quality online courses in the form of online course audits, Blackboard and Accessibility Training (BaAT), Quality Matters Courses (QM), and Association of College and University Educators (ACUE).

Since the last assessment cycle, recruiting efforts to enroll students in Transfer Admissions Guarantees (TAG) Co-Admission Programs have been implemented. TAG programs offer transfer students guaranteed admission to select university partners. Divisional leaders have focused on marketing efforts for these important agreements through campus events like the Student Success Expo and collaborating with the GC Marketing and Communications Department to publicize the TAG program through GC's social media.

Areas for Improvement:

The Arts and Sciences Division is always looking to enhance and improve the student experience. With continuous improvement in mind, several areas have been identified for further development. Additionally, divisional leaders will focus on providing further academic support to students in science and math courses, brainstorming ways to increase response rates for course evaluations and graduation surveys, improve seamless transfer to senior institutions, and reduce course withdrawal rates.

Needs:

- Rauch Science Building continues to be in desperate need of a new HVAC system due to dangerously high temperatures in the lab, which is a hazard with storing chemicals and materials in the lab. In addition, the greenhouse attached to Rauch continue to need repairs as it needs to be used for labs and resources.
- Arts and Sciences leadership will provide training for our faculty for the LMS upgrades and implementations.
- As Arts and Sciences continues to expand Lincoln Campus course offerings, leadership will assess, review, and monitor the classrooms to see if they meet student needs.
- Arts and Sciences has a critical need to hire more faculty in a variety of disciplines to meet the increasing number of course sections. This will allow us to provide more sections and times when courses could be offered to meet students' needs.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- Students in the Teacher Prep programs need to be placed in local schools to satisfy course requirements. As enrollment continues to grow in these programs, the Arts and Sciences division needs a new placement procedure and also needs to acquire agreements from local school districts.

Actions:

Continue to improve the North Carolina Community College System Critical Success measures for student success rate in curriculum English

1. Meet the North Carolina Community College System Critical Success measure for curriculum Math
2. Implement strategies to improve online learning and teaching, including LMS transition to Blackboard Ultra.
3. Continue to expand the Honors Program and Transfer Admission Guarantee programs.
4. Implement strategies to improve the student placement process.
5. Apply for grants to assist with supporting the Honors Program, Student Success initiatives, development of an online teaching and learning center, consortium with area community colleges and four-year institutions, and new SPARC offerings.

SECTION II: PROGRAM DATA

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>A comparison of the enrollment data from 2022-2023 to 2023-2024 indicates that enrollment is experiencing healthy growth in the Teacher Prep programs and pathways. The number of individuals enrolled grew from 96 in 2022-23 to 153 in 2023-2024, which indicates an 59.3% percent increase. Enrollment among CCP students was even more robust, with a growth from 18 in 2022-23 to 36 in 2023-24.</p> <p>Both Full-Time and Part-Time pathways are updated and/or reviewed yearly.</p> <p>Like neighboring institutions CPCC, CVCC, and CCC, Gaston College's Associate in Arts program requires 60 semester hours of approved college transfer courses with a grade of C or better in each course. Like those colleges, the AA degree emphasizes competence in reading, writing, oral communication, fundamental mathematical skills, critical thinking skills and basic computer use.</p> <p>Various strategies have been implemented to improve enrollment goals, improve the program for students, and improve course offerings.</p>
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A1010T/P1012T & A1040T/P1042T at other institutions in our neighboring counties.</p>	<p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p> <p>Discuss program efforts (past or present) to address possible opportunities of enrollment growth.</p> <ul style="list-style-type: none"> • Associate in Arts (including A1010T/P1012T)

				Explanation/Narrative
<ul style="list-style-type: none">Associate in Arts (including A1010T/P1012T)Associate in Science (including A1040T/P1042T) <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Associate in Arts in Teacher Preparation/Associate in Science in Teacher Preparation and their Pathways at GC? Identify strategies for enrollment growth.</p> <p>When reviewing Spring 2024 student enrollment numbers of new & returning students, review the number of students enrolled at a neighboring institution that resides our service area (Gaston & Lincoln counties), and determine if the program has effectively marketed the Associate in Arts in Teacher Preparation/ Associate in Science in Teacher Preparation and their Pathways in students in and around our service area counties.</p>				<p>Demographics A10100 during 2023-2024 Academic Year</p> <p>Percent Female 56%</p> <p>Percent Male 44%</p> <p>Percent White 32%</p> <p>Percent Non-White 14%</p> <p>Percent Unknown 51%</p> <p>Compared to the college-wide population, the AA program has a greater number of male students (44% vs. 36% college-wide) and a lesser number of female students (56% vs. 64% college-wide). However, the trend of having more female students than male is consistent with college demographics. During the 2023-2024 academic year, more white than non-white students were enrolled in the AA degree program.</p> <p>The Arts and Sciences Division provides academic holistic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center.</p> <p>Cleveland CC had 415 (new and recurring students for Spring 2024); however, 5 students from Lincoln & 17 from Gaston, the GC service area, enrolled in the Associate in Art program at CCC. That number represents 5.3% of the total number of AA students at CCC.</p> <p>5 + 17 = 22/Opportunity for program growth.</p> <p>Catawba Valley CC had 1,025 (new and recurring students for Spring 2024); however, 36 students from Lincoln & 8 from Gaston, the GC service area, enrolled in the Associate in Art program at CVCC. That number represents 4.3 percent of the total number of AA students at CVCC.</p> <p>8 + 36 = 44/Opportunity for program growth.</p>
A10100 (including A1010T)	# of Students	Students From Gaston	Students From Lincoln	
Cleveland CC	415	17	5	
CVCC	1,025	8	36	
CPCC	5,444	93	36	
P1012C (including P1012T)	# of Students	Students From Gaston	Students From Lincoln	
Cleveland CC	437	15	9	
CVCC	844	2	26	
CPCC	1,672	17	1

Cleveland CC	69	2	0	
CVCC	41	1	1	
CPCC	800	7	1	

	Explanation/Narrative
	<p>Central Piedmont CC had 5,444 (new and recurring students Spring 2024); however, 36 students from Lincoln & 93 from Gaston, the GC service area, enrolled in the Associate in Art program at CPCC. That number represents 2.4 percent of the total number of AA students at CPCC.</p> <p>$36 + 93 = 129$/Opportunity for program growth.</p> <ul style="list-style-type: none">• Associate in Science (including A1040T/P1042T) <p>Program's enrollment growth action(s) and/or comment(s) below:</p> <p>Demographics A10400 during 2023-2024 Academic Year</p> <p>Percent Female 60%</p> <p>Percent Male 40%</p> <p>Percent White 45%</p> <p>Percent Non-White 31%</p> <p>Percent Unknown 24%</p> <p>Compared to the college-wide population, the AS program has a greater number of female students (60% vs. 36% college-wide) and a lesser number of male students (40% vs. 64% college-wide). During the 2023-2024 academic year, more white than non-white students were enrolled in the AS degree program.</p> <p>Cleveland CC had 106 (new and recurring students for Spring 2024). 5 of those students were from Gaston and Lincoln Counties. That number represents 4.7% percent of the total number of AE students at CCC. The opportunity for program growth from CCC is 5 students.</p> <p>Catawba Valley CC had 201 (new and recurring students for Spring 2024); however, 36 students from Lincoln & 2 from Gaston, the GC service area, enrolled in the AS program at CVCC. That number represents 18.9% percent of the total number of AE students at CVCC. The opportunity for program growth from CVCC is 38 students.</p>

	Explanation/Narrative
	<p>Central Piedmont CC had 790 (new and recurring students Spring 2024); however, 4 students from Lincoln & 17 from Gaston, the GC service area, enrolled in the AS program at CPCC. That number represents 2.6 percent of the total number of AS students at CPCC. The opportunity for program growth from CPCC is 21.</p> <p>Program's enrollment growth action(s) and/or comment(s) below:</p> <p>While the percentage of students from Gaston/Lincoln counties represents five percent or less of the total number of AA, AS, and our Teacher Prep Program students enrolled at neighboring institutions, these students indicate that Gaston College's AA and AS programs still has room to grow in attracting and retaining students from our service area. This may be done through increasing marketing efforts that make residents aware of the transferability of classes earned through the AA degree.</p>

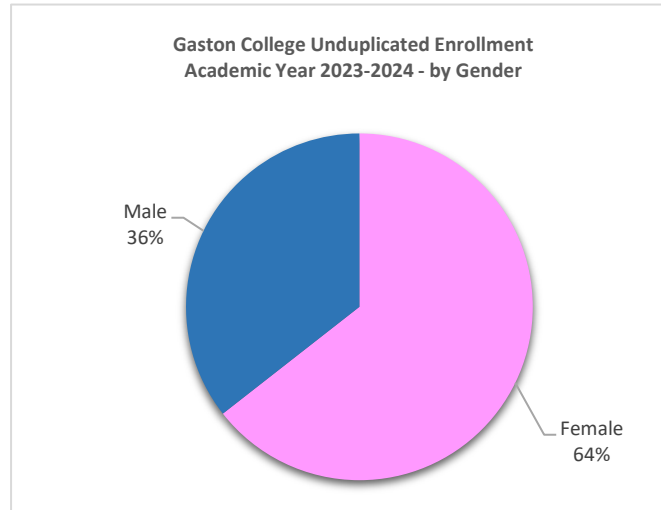

Demographic Enrollment Analysis by Race/Ethnicity:

<p>Demographic Enrollment Analysis by Race/Ethnicity: Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for 2023-2024 as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college <i>race/ethnicity</i> data.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Demographics A1010T and A1040T during 2023-2024 Academic Year</p> <p>Percent White 55%</p> <p>Percent Asian 2%</p> <p>Percent Black 22%</p> <p>Percent Hispanic 15%</p> <p>Percent Unknown 5%</p> <p>Demographics College-wide during 2023-2024 Academic Year</p> <p>Percent White 55%</p> <p>Percent Asian 2%</p> <p>Percent Black 22 %</p> <p>Percent Hispanic 15%</p> <p>Percent Unknown 5%</p> <p>Demographic enrollment in the Teach Prep programs parallel those of the wider college demographic data.</p>

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Gender:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to gender. For example, explain the if the **gender** breakout between male and female students is more, less, or the same as the college's overall gender breakout.

Discuss program actions to enroll and retain underserved students or special population students.

Demographics A10100 during 2023-2024 Academic Year

Percent Female 86%

Percent Male 14%

Demographics College-wide during 2023-2024 Academic Year

Percent Female 64%

Percent Male 36%

During the academic year 2023-2024, there were significantly more female students in the Teacher Prep Programs than male. Interestingly, the percentage of men in the AA program is 22 points lower than the percentage in the college overall. This may reflect the trend that shows more females than males enroll in education programs nationwide.

Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are a participant in the current North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.

The division plans to use marketing efforts to ensure all students in our service area understand the value of attending GC. Divisional leadership remains committed to making stakeholders within the service area aware of all A&S programs through participation in outward facing events such as the GC Student Success Expo; the Gaston College Educators Breakfast; the Fall Transfer Fair; College Now training events; GC Open House events; Early College High School TAG Co-Admission events; SGA welcome events; Lincoln County HS student visits to GC; GC Spring Fest; Lincoln County Apple Festival, and GC Senior Night.

Demographic Enrollment Analysis by Age:

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

The demographics above indicate that enrollment based on age is similar for the Teacher Prep programs as for the college with the exception of the 18-24 age group and the 25-44 age groups. The largest group by far consists of traditional college students from 18-24 years old which represents 79% of the total of students enrolled in the teacher prep programs.

Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are an early adopter of the North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.

Progress: Course and Grade Distributions Analysis

	Explanation
Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)	Course sequencing is a high priority within the Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A

	Explanation
<p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>course matrix of semester offerings is provided to college program leaders.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p> <p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible.</p> <p>Based on current data, the Arts and Sciences course success rate is 89%.</p> <p>Currently, courses with low enrollments within A&S include the following:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>While there are several classes that have low enrollment, most classes have more than 10</p>

	Explanation
	students per section. The courses with low enrollment are managed well by providing only one section of that course.
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements or total credit hours have been reviewed or revised within the last two years. This process is carried out through collaboration of department leads, program chairs, divisional deans, and the Curriculum Committee.</p> <p>One significant curriculum revision that will be enacted in the next two years is the launch of a state-mandated Development English co-requisite class, ENG 045, which will replace the current version of developmental instruction covered in a pre-requisite, ENG 002, and co-requisite, ENG 011. ENG 045 will serve students who have a high school GPA of 2.79 or below. Another curriculum change will occur as the current developmental math process will be replaced by the MAT Department's choice of one of the NCCCS's recommended options during the next assessment cycle.</p> <p>A significant number of AA classes are offered in area high schools. Instructors deliver the same content, with no changes in rigor or quality, in classes delivered on high school campuses. This is verified by internal audits regularly conducted by departmental leads, program chairs, and Distance Education personnel.</p>
<p><u>Modality:</u></p> <p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs and to increase the ability to hold more in-person labs throughout the week. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility and better use of lab space.</p> <p>The Math Department has expanded its online offering of prerequisite and corequisite classes to reduce the number of days a student has to be on</p>

	Explanation
	<p>campus. The English Department has also reworked schedules to include corequisite ENG 011 classes that occur on the same days as the seated portions of ENG 111 sections to help reduce the number of days a student is required to be on-campus.</p> <p>The Arts and Sciences division has expanded the number of HyFlex options to include ACA, EDU, ENG, PHY, and HIS classes to better meet the needs of students.</p> <p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving instruction in other professional development opportunities, such as QM and ACUE.</p> <p>The following faculty in Arts and Sciences have at least 1 course certified by Quality Matters:</p> <ul style="list-style-type: none"> • Tonia Broome (MAT-152) • Melanie Dekerlegand (ENG-111) • Michele Domenech (ENG-112) • Hisayo Tokura Gallo (PSY 241) • Leslie Huss (MAT-171) • Dr. Lori Metcalf (PSY-150) • Ed Pardue (SOC-210) • Judith Porter (MUS-110) <ul style="list-style-type: none"> • Jeff Pruett (HIS 111) • Susan Whittemore (BIO-111) • Dr. Patricia Williams (BIO 275) • Dr. Heather Woodson (EDU-243) • Chris Ziemba-Tolbert (ACA-122) <p>The following faculty in Arts and Sciences have received certification to be Certified Peer Reviewers for Quality Matters</p> <ul style="list-style-type: none"> • Ginger Black • Michele Domenech • Katie Jordan • Ed Pardue • Dr. Patricia Williams • Chris Ziemba-Tolbert

	Explanation
	<p>The following faculty in Arts and Sciences has received certification to be a Master Reviewer for Quality Matters</p> <ul style="list-style-type: none"> • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have earned the Full Online Teaching Certification (7-course program) for Quality Matters:</p> <ul style="list-style-type: none"> • Ginger Black • Katie Jordan • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have completed Professional Development in Quality Matters:</p> <ul style="list-style-type: none"> • Marguerite Bishop (IYOC) • Brian Bookout (IYOC & APPQMR) • Tonia Broome (IYOC & APPQMR) • Penny Brower (IYOC & APPQMR) • Heather Bruch (IYOC) • Amy Chaney (IYOC & APPQMR) • Melanie DeKerlegand (IYOC & APPQMR) • Keith Denson (IYOC & APPQMR) • Gerri Dobbins (IYOC & APPQMR) • Michele Domenech (IYOC & APPQMR) • Hisayo Tokura-Gallo (IYOC & APPQMR) • Mary Gourley (IYOC & APPQMR) • Leslie Huss (IYOC & APPQMR) • Dr. Shannon Landrum (IYOC) • Dr. Lori Metcalf (IYOC & APPQMR) • Mary Morton (IYOC & APPQMR) • Ed Pardue (IYOC & APPQMR) • Judith Porter (IYOC) • Jeffery Pruett (IYOC) • Dr. Chris Thurley (IYOC & APPQMR) • Susan Whittemore (IYOC & APPQMR) • Dr. Patricia Williams (DYOC, IYOC & APPQMR) • Dr. Heather Woodson (IYOC) • Chris Ziemba-Tolbert (APPQMR) • Bianca Yavelak (IYOC) • Jodi Valencic-Zieverink (IYOC)
<p>Student Achievement:</p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Currently, courses with low enrollments within A&S:</p>

	Explanation
	<ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> • The following courses had success rates lower than the divisional average of 89 - ACA 122; BIO 112, 155, 161, 163; CHM 103/130A, 151; COM 110, 231; EDU 119, 131, 146, 184, 221, 234, 280, 282; ENG 002, 011, 111; MAT 110, 121, 152, 172, 263; MUS 110; PSY 150; PHY 251, 252; REL 110 <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> • The following courses had withdrawal rates that exceeded the divisional average by more than five percent: ACA 122; ART 121; BIO 111, 112, 155, 161, 168, 169; CHM 130/130A, 151, 152, 251, 252; COM 110; EDU 119, 146, 151, 184, 187, 251, 279; ENG 002, 011, 112; HIS 112; MAT 003, 152, 172, 263, 271; MUS 110, 112; PSY 241; REL 110; SOC 225. <p>The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and several courses have been identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues.</p> <p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department</p>

	Explanation
	leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.
<p>Evaluation:</p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon Due to course evaluations being administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and, in this evaluation, cycle were 88-89%. Overall, student feedback for the program is positive.</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024 academic year, guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.</p>

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
A1010T Associate in Arts – Teacher Preparation	A1010T	35%	63%
P1012T Associate in Arts – Teacher Preparation Pathway	P1012T	DNA	DNA
A1040T Associate in Arts – Teacher Preparation	A1040T	DNA	DNA

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
P1042T Associate in Arts – Teacher Preparation Pathway	P1042T	DNA	DNA

Program Progress: Retention and Progression

	Explanation
<u>SLOs and Curriculum Map:</u> Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
<u>Retention and Progression:</u> Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	<p>A1010T (P1012T, A1040T, and P1040T unavailable)</p> <ul style="list-style-type: none"> Fall 2019 to Fall 2020 = n/a <ul style="list-style-type: none"> Fall 2021 to Spring 2022 = 80% Fall 2021 to Fall 2022 = 50% <ul style="list-style-type: none"> Fall 2022 to Spring 2023 64% Fall 2022 to Fall 2023 = 35% <ul style="list-style-type: none"> Fall 2023 to Spring 2024 = 63% <p>Retention of new students in the A1010T program remained steady from Fall 2023 to Fall 2024. This suggest a similar retention rate in the other teacher prep programs.</p> <p>In reviewing the data for our P1012T/P1042T pathways, no barrier appears to exist as there is 100% retention from the Fall to Spring term. Further data from future terms is needed to review all AATP/ASTP programs and pathways to make a better determination for any barriers.</p> <p>However, these pathways are for 11th and 12th grade students only. If students enroll in the pathway in the fall of their senior year, they would no longer be in this pathway or perhaps at Gaston College during the following fall. Therefore, based on the population of students enrolled in the pathway, we do not expect the Fall-to-Fall retention rate to be at the same rate in the future. One suggestion for improvement in this area would be to market to students during their senior year the benefits of staying at Gaston College to complete their AATP/ASTP degree program before going on to university. This marketing suggestion could be launched through a partnership with GC Marketing, College Now, and the Division of Arts and Sciences.</p>

Credential Earned – Academic Year 2023-2024 (*Achieving the Dream*)

Program Titles	Programs Code	2023SU	2023FA	2024SP	Grand Total
A1010T Associate in Arts – Teacher Preparation	A1010T	2	0	11	13
P1012T Associate in Arts – Teacher Preparation Pathway	P1012T	0	0	0	0
A1040T Associate in Science– Teacher Preparation	A1040T	0	0	1	1
P1042T Associate in Science – Teacher Preparation Pathway	P1042T	0	0	0	0
	Grand Total	2	0	11	14

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion?</p>	<p>Overall Headcount = 153 Awards = 14 Awards to Headcount Percentage = 9.1%</p> <p>Awards to headcount percentage was slightly lower compared with last year. This may reflect a higher number of first year students enrolling in the programs which suggests the Award to headcount percentage will be higher next year.</p> <p>Timely student completion has been a major objective for both the Division and the College. Specific initiatives, such as Completion by Design, Achieving the Dream, and NC-GPS, have provided the framework for improvement strategies. Students in Teach Prep programs have diversified goals for attending; completion of a credential is only one preference. Many students plan to transfer before fulfilling degree requirements. One strategy to encourage degree completion is dedicated advising for Arts and Sciences so students have one-on-one advising to help keep them on track within their pathway. In addition, the Watermark student retention system is a tool the Division of Arts and Sciences encourages faculty to use to ensure completion at the course level. This has led to the retention of more students within the Arts and Science division.</p>

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community?	
<p>Community:</p> <p>How valuable is this program to the community?</p> <p>How have we benefitted from community partnerships and what other opportunities exist for collaboration?</p>	<p>Our Teacher Prep programs are extremely valuable to our communities. North Carolina as whole and both Gaston and Lincoln counties are experiencing teacher shortages. Teacher vacancy rates hover around 6.5% and a 11.5% attrition rates. Attrition rates are even more pronounced for beginning teachers. Our Teacher Prep programs are in place to help with these needs. Gaston College has a Teacher Academy at our Lincoln Campus. The goal is for HS student in Lincoln County to begin their career path in education while in high school and then return to Lincoln County to teach. Both Gaston and Lincoln County have policies in place to support teacher assistants in their path to obtaining bachelors degrees in education so they can become licensed teachers. Our teacher prep programs aid in this transition.</p> <p>Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>An annual Transfer Advisory Committee is conducted with representatives from the main senior institutions for our transfer students. Transfer Admission Guarantees (TAGs) Co-Admission Programs have been developed with several public and private institutions in our area. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>College Now is a program offered at Gaston College and is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment program for qualified high school students, in the GC service area of Gaston and Lincoln counties, to take tuition-free college classes. The Division of Arts and Sciences houses several</p>

	Explanation
	<p>dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), and ASTP (P1042T).</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, judging area high school art competitions, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the community.</p>
<p>Uniqueness: What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>Arts and Sciences Division effectively promotes the following unique qualities of the college/division, as seen by the trend of increased enrollment and increased FTEs:</p> <p>Gaston College participates in North Carolina Guided Pathways to Success (NC-GPS). As a result of this initiative, we have created streamlined pathways for students in the various degree programs. One of the benefits of NC-GPS is to create greater cost savings and efficiencies for students.</p> <p>Division faculty/staff participate in a robust marketing plan with the high school population as a target audience. This includes information tables at community events like football games and participation with partners such as public, charter and private high school at events like the annual Educators Breakfast. We continue to collaborate with senior institutions regarding the Transfer Advising Agreement (TAG) Co-Admission Programs and Baccalaureate Degree Plans (BDPs) to ensure a smooth transfer process.</p> <p>Additionally, student resources for this program are unique. Beyond our traditional learning center, we also have both a Writing Center and Math and Science Center staffed with professional academic coaches who hold a bachelor's degree or higher.</p> <p>Gaston College offers a SPARC Scholars program. This program is a scholarship initiative funded by</p>

	Explanation
	<p>the National Science Foundation and a private donor to help offset the unmet financial needs of Gaston College students. Scholarships up to \$10,000 per student, per year, are offered to select full-time Associate of Science and Associate of Engineering students, who plan to transfer to a four-year university after graduating from Gaston College; major in Science, Technology, Engineering, or Math (STEM); and who show academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also available to participants of the program. The amount awarded is determined based upon federal financial need.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, attend at least 8 globally designated events, and complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. Students who complete the program receive special recognition on their Gaston College transcript and receive a certificate of completion from UNC - Chapel Hill.</p> <p>The first full Honors Program within Gaston College and the Arts and Sciences Division was launched during 2023-2024 school year.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
College Transfer (includes CCP Transfer Pathways & Biotech)	\$6,863,459.75	2603.4	\$10,802,789.22	\$3,939,329.47	2648.9	\$10,819,239.89	\$3,955,780.14

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>There was an increase in FTEs for all areas from 2022-2023 to 2023-2024. FTE increased from 6.09 in 2022/23 to 14.75 in 2023/24 A1010T and from .25 FTE to 2.91 FTE for A1040T during the same time.</p> <p>The program remains in-demand for students as they prepare for admission to their teacher education program at the four-year institution.</p> <p>The Arts and Sciences Division consistently earns approximately half of the College FTEs. The return</p>

	Explanation
	on investment for this program is consistently high; FTE income significantly outweighs the cost for running the program and faculty salaries.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>The Transfer Advisory Committee meets annually with representatives from the main senior institutions for GC transfer students. Transfer Admission Guarantees (TAGs) have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several of the private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, they must attend at least 8 globally designated events, and they must complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. For 2023-2024, the Gaston College Study Abroad program traveled to Ireland and Switzerland. Students who complete the program receive special recognition on their Gaston College transcripts and receive a certificate of completion from UNC Chapel Hill.</p> <p>College Now, a program offered at Gaston College, is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment</p>

	Explanation
	<p>program for qualified high school students to take tuition-free college classes. The Division of Arts and Sciences houses several dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), ASTP (P1042T).</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, Educators Breakfast, Science Fairs, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the area community.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	

Program Review - A10300 Associate in General Education

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Brian Bookout

Program Chair: Christine Ziemba-Tolbert

Program Code(s)/Name(s): Associate in General Education

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A10300 Associate in General Education
- A10300ST Associate in General Education-Pre-Surgical Technology

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The Associate in General Education (AGE) curriculum is designed for the academic enrichment of students who wish to broaden their education, with emphasis on personal interest, growth and development. Course work includes study in the areas of humanities and fine arts, social and behavioral sciences, natural sciences and mathematics, and English composition. Opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and the basic use of computers will be provided. Through these skills, students will have a sound base for lifelong learning. Graduates are prepared for advancements within their field of interest and become better qualified for a wide range of employment opportunities. This degree is not intended to prepare students for transfer to senior institutions; however, individual courses within the degree program may transfer. At Gaston College students are placed in the Associate in General Education (A10300) program for three main reasons. (1) Student who are seek admission to one of the Health and Human Services competitive programs, (2) students self-identify they only wish to obtain their Associate in General Education, or (3) they may have been enrolled in a different program of study and unfortunately do not meet the graduation requirements for that program of study but could graduate with an Associate in General Education degree.

The AGE curriculum program includes 15 semester hours of credit from general education curriculum courses, including six hours in communications, three hours in humanities/fine arts, three hours in social/behavioral sciences, and three hours in natural sciences or mathematics. An additional 49-50 semester credit hours are required from courses at the 110-199 or 210-299 level.

The Arts and Sciences Divisional Council (dean, associate deans, and department chairs) serves as the primary program review committee for this degree program. This group meets once or twice monthly depending upon current needs and activities.

The following action items from the 2022-2023 program review cycle were addressed.

Two of the NCCCS critical success measures directly impacted by student success in the Associate in General Education program saw improvement in the NCCCS 2024 Performance Measures for Student Success Report. Relating to the NCCCS second performance measure, Credit English Success, the gateway course of ENG 111 saw improvement from 0.920 in the 2023 report, which put Gaston College in the Baseline category, to 1.039 in the 2024 report, moving Gaston College to the Average Band Minimum category.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Relating to the seventh performance measure, Transfer Performance, Gaston College moved from 0.994 (Average Band Minimum) to 1.012 (Average Band Maximum). Relating to the NCCCS third performance measure, College Level Math Success Rates, Gaston College performance decreased from the prior year. During the year, the MAT department formed a committee, Student Success Rate of College Level Math Team, that identified students who needed MAT 100+. These students were contacted and found to either have already completed their program of study, had left the college, or the information in the system was not updated to reflect the math that was needed. This process seemed to confuse the students and the faculty that were making the contacts. For the future, academic advisors need to strongly encourage students to enroll in a MAT 100+ course early in their time at Gaston College to further assist these students in completing College Level Math. The college has stayed in the same NCCCS band width of less than the college average but above the baseline.

Because demand for online classes occurs for all disciplines within the Associate in General Education program, continuing efforts have been made since the last program review to implement strategies to improve online learning and teaching. These efforts include divisional leadership presenting multiple workshops for specific departments, as well as for all faculty in the division.

In addition, several resources and guides for faculty in the Division of Arts and Sciences were created that focused on Regular Substantive Interaction (RSI), such as RSI Overview and Tips, RSI Instructor Self-Assessment for Online Courses, and Credit Hour versus Contact Hour in Online Courses to help faculty see the amount of hours in a given semester to help plan for their Activities and RSI. Divisional leadership also worked one-on-one with specific faculty who sought out individualized assistance throughout the year to address specific issues related to online instruction.

To develop, implement and promote the Gaston College Honors Program, an Honors Committee was created in Summer 2023, which met regularly through Fall 2023 and Spring 2024 to

- articulate a rationale for a revamped GC honors program and communicate that to the GC President's Council for approval,
- review and research honors programs at other community colleges in the NCCCS,
- determine honors program admission requirements,
- consider and determine program pathways to include one tailored for students who intend to transfer to four-year institutions and one for students who intend to graduate and enter the workforce,
- consider and determine requirements for each of the two pathways,
- identify grant opportunities and apply for an ITYC-NSF IUSE grant,
- create both mission and vision statements,
- survey faculty, evaluate survey responses and generate strategies and incentives to encourage more instructors to offer honors options,
- and develop honors program handbooks for both faculty and students.

Promoting transfer opportunities, the purpose on the Transfer Admission Guarantees (TAG) Co-Admission Program, occurred both on-campus and off.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **On-campus** outreaches included an engaging bulletin board in a high traffic area of Robinson Classroom Building, the building where most classes related to the Associate in Arts program are held; a table at the GC Student Success Expo; information shared at the Gaston College Educators Breakfast; information included in the GC Leadership Gaston Scavenger Hunt; Fall Transfer Fair; College Now training event; SPARC – C3 interest meeting; GC Open House event; personal contact with SPARC-C3 students; Early College High School TAG Co-Admission event; SGA Spring 2024 welcome event; GECHS TAG Talk; Lincoln County HS 10th grade visit to GC; Rhino Roadmap information; GC Spring Transfer Fair; 49er Next Meeting; GC Spring Fest; and Senior Night.
- **Off-campus** TAG efforts included maintaining an information-rich website; Zoom meetings with a partner high school's counselor and partner private university to review and discuss aspects of the TAG program; information tables at area high school football games; presentation at a Lincoln County Teacher Cadet event; and campus visits to a local private college.

To meet the demands of higher enrollment and open faculty positions due to previous retirements/resignations, pressing needs for more English, Communications, and Mathematics faculty have been addressed with the addition of two full-time English instructors, one full-time Communications instructor, and one full-time Mathematics instructor.

Strengths:

The Associate of General Education program remains an essential part of Gaston College academic programs, evident from enrollment statistics. Courses within the Arts and Sciences (A&S) Division play a crucial role in all the degrees offered by the College. The Division continues to be at the forefront of statewide and national improvement initiatives. Given the interdependent nature of the Arts and Sciences Division, fostering collaboration with other programs and divisions at the College is a top priority and a significant strength. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules, created HyFlex course offerings, scheduled more eight-week classes, and added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location.

The Division offers numerous valuable academic resources to support students in successfully completing their studies. It actively participates in various campus initiatives and activities, such as the Developmental Education Alignment Project, Gaston College Study Abroad, Writing Center, Learning Center, MASC Center, Transfer Advising Center, Psi Beta, Gamma Beta Phi, Completion by Design, Achieving the Dream, NC College Transfer Program Association, STEM Persistence and Retention via Curricula, Centralization, and Cohorts (SPARC), Inquiry-Based Learning methods, and North Carolina Guided Pathways to Success (NC-GPS).

Many A&S faculty have received specialized professional development related to conducting high quality online courses in the form of online course audits, Blackboard and Accessibility Training (BaAT), Quality Matters Courses (QM), and Association of College and University Educators (ACUE).

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Since the last assessment cycle, recruiting efforts to enroll students in Transfer Admissions Guarantees (TAG) Co-Admission Programs have been implemented. TAG programs offer transfer students guaranteed admission to select university partners. Divisional leaders have focused on marketing efforts for these important agreements through campus events like the Student Success Expo and collaborating with the GC Marketing and Communications Department to publicize the TAG program through GC's social media.

Areas for Improvement:

The Arts and Sciences Division is always looking to enhance and improve the student experience. With continuous improvement in mind, several areas have been identified for further development. Additionally, divisional leaders will focus on providing further academic support to students in science and math courses, brainstorming ways to increase response rates for course evaluations and graduation surveys, improve seamless transfer to senior institutions, and reduce course withdrawal rates

Needs:

- Rauch Science Building continues to be in desperate need of a new HVAC system due to dangerously high temperatures in the lab, which is a hazard with storing chemicals and materials in the lab. In addition, the greenhouse attached to Rauch continue to need repairs as it needs to be used for labs and resources.
- Arts and Sciences leadership will provide training for our faculty for the LMS upgrades and implementations.
- As Arts and Sciences continues to expand Lincoln Campus course offerings, leadership will assess, review, and monitor the classrooms to see if they meet student needs.
- Arts and Sciences has a critical need to hire more faculty in a variety of disciplines to meet the increasing number of course sections. This will allow us to provide more sections and times when courses could be offered to meet students' needs.

Actions:

1. Continue to improve the North Carolina Community College System Critical Success measures for student success rate in curriculum English.
2. Meet the North Carolina Community College System Critical Success measure for curriculum Math
3. Implement strategies to improve online learning and teaching, including LMS transition to Blackboard Ultra.
4. Continue to expand the Honors Program and Transfer Admission Guarantee programs.
5. Apply for grants to assist with supporting the Honors Program, Student Success initiatives, development of an online teaching and learning center, consortium with area community colleges and four-year institutions, and new SPARC offerings.

SECTION II: PROGRAM DATA

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>According to the program enrollment data shared above compared to that for the 2022 – 2023 Academic Year, the enrollment for this program is growing.</p> <ul style="list-style-type: none"> 2022 – 2023 = 234 2023 – 2024 = 468 <p>No changes have been made to the pathway.</p> <p>Like neighboring institutions CPCC, CVCC, and CCC, Gaston College's Associate in General Education program requires 60 semester hours with a grade of D or better in each course. Like those colleges, the AGE degree emphasizes competence in reading, writing, oral communication, fundamental mathematical skills, critical thinking skills and basic computer use. The AGE curriculum program includes 15 semester hours of credit from general education curriculum courses,</p>

	Explanation/Narrative
	<p>including six hours in communications, three hours in humanities/fine arts, three hours in social/behavioral sciences, and three hours in natural sciences or mathematics. An additional 49-50 semester credit hours are required from courses at the 110-199 or 210-299 level.</p> <p>Various strategies have been implemented to improve enrollment goals, improve the program for students, and improve course offerings.</p> <ul style="list-style-type: none"> • All courses within the Associate of Arts degree pathway are sequenced to allow successful completion of the pathway that is both efficient for student completion and economical in terms of programing cost. • Foundational requirements are provided early in the program and promote completion of pre-requisite courses early in the program to ensure successful completion. • Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible. • Improving course offerings is an important goal within the Arts and Sciences. • To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. • Previous semester data has been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The Arts and Science division has created Hyflex course offerings in English and has added online and online-synchronous options of prerequisite

				Explanation/Narrative
				and co-requisite classes in Math and English to better serve the needs of students.
Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments. (Consider program demographic data compared to college wide demographic data.) New Question: Review program enrollment for A10300 at other institutions in our neighboring counties. When reviewing Spring 2024 student enrollment numbers of new & returning students, review the number of students enrolled at a neighboring institution that resides our service area (Gaston & Lincoln counties), and determine if the program has effectively marketed the Associate in General Education in students in and around our service area counties. Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Associate in General Education including Associate in General Education Nursing at GC? Identify strategies for enrollment growth. The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC. Discuss program efforts (past or present) to address possible opportunities of enrollment growth. Associate in General Education including General Education Nursing <i>The following data includes Associate in General Education (A10300) and Associate in General Education – Nursing (A1030N) students, which does not allow for a true comparison of students enrolled in the AGE program.</i>				Demographics A10300 during 2023-2024 Academic Year Percent Female: 84% Percent Male: 16% Percent White: 41% Percent Non-White: 47% Percent Unknown: 12% Compared to the college-wide population, the AGE program has a fewer number of male students (16% vs. 36% college-wide) and a higher number of female students (84% vs. 64% college-wide). However, the trend of having more female students than male is consistent with college demographics. During the 2023-2024 academic year, more non-white than white students were enrolled in the AGE degree program. The Arts and Sciences Division provides academic holistic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. The following data and review includes Associate in General Education (A10300) and Associate in General Education – Nursing (A1030N) students, which does not allow for a true comparison of students enrolled in the AGE program. Cleveland CC had 282 (new and recurring students for Spring 2024); however, 11 students from Lincoln & 48 from Gaston, the GC service area, enrolled in the Associate in General Education program at CCC. That number represents 20.9% of the total number of AGE and AGE-N students at CCC. 48 + 11 = 22/Opportunity for program growth.
A10300 (including A1030N)	# of Students	Students From Gaston	Students From Lincoln	
Cleveland CC	282	48	11	
CVCC	24	1	2	
CPCC	0	0	0	

	Explanation/Narrative
<p><i>*CPCC had no students in the program after Spring 2022.</i></p>	<p>Catawba Valley CC had 24 (new and recurring students for Spring 2024); however, 2 students from Lincoln & 1 from Gaston, the GC service area, enrolled in the Associate in General Education program at CVCC. That number represents 12.5 percent of the total number of AGE and AGE-N students at CVCC. 2 + 1 = 3/Opportunity for program growth.</p> <p>Program's enrollment growth action(s) and/or comment(s) below:</p> <p>Due to the data including AGE and AGE-N students, it is difficult to know how the specifics for the AGE program enrolled at the other institutions.</p> <p>While the percentage of students from Gaston/Lincoln counties represents just under 21% percent or less of the total number of AGE and AGE-N students enrolled at neighboring institutions, these students indicate that Gaston College's AGE and AGE-N program still has room to grow in attracting and retaining students from our service area. This may be done through increasing marketing efforts for the AGE and AGE-N program.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college *race/ethnicity* data.

Discuss program actions to enroll and retain underserved students or special population students.

Demographics A10300 during 2023-2024 Academic Year

Percent White: 41%
Percent Asian: 1%
Percent Black: 27 %
Percent Hispanic: 15%
Percent Unknown: 12%

Demographics College-wide during 2023-2024 Academic Year

Percent White 55%
Percent Asian 2%
Percent Black 22 %
Percent Hispanic 15%
Percent Unknown 5%

Pronounced differences exist between several of the Race/Ethnicity categories at the program vs. college level. Some of these differences may be traced to the fact that younger generations are not self-identifying their ethnicity by choice. There are 12% identifying as unknown ethnicity. However, there is a higher percentage of Black students enrolled in the AGE program compared to the college enrollment (27% vs 22%) and less students identified as White in

	the program compared to the college enrollment (41% vs 55%).
--	--

Demographic Enrollment Analysis by Gender:

<p>Demographic Enrollment Analysis by Gender: Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the gender breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Demographics A10300 during 2023-2024 Academic Year Percent Female: 84% Percent Male: 16%</p> <p>Demographics College-wide during 2023-2024 Academic Year Percent Female 64% Percent Male 36%</p> <p>During the academic year 2023-2024, there were more female students in the A10300 programs than male, which was consistent with the College demographics. Interestingly, the percentage of men in the AGE program is twenty points lower than the percentage in the college overall. Due to how the college places students in the AGE program for those waiting to be accepted to competitive Health and Human Services programs, historically more females are in the Health and Human Services career field.</p>
--	--

	<p>Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are a participant in the current North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.</p> <p>The division plans to use marketing efforts to ensure all students in our service area understand the value of attending GC. Divisional leadership remains committed to making stakeholders within the service area aware of all A&S programs, including the Associate in General Education, through participation in outward facing events such as the GC Student Success Expo; the Gaston College Educators Breakfast; the Fall Transfer Fair; College Now training events; GC Open House events; Early College High School TAG Co-Admission events; SGA welcome events; Lincoln County HS student visits to GC; GC Spring Fest; Lincoln County Apple Festival, and GC Senior Night.</p>

65+	0%																								

<p>Demographic Enrollment Analysis by Age: Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for 2023-2024 as it pertains to age. For example, explain if the age breakout between the different groups is more, less, or the same as the college's overall age breakout.</p> <p>Discuss program actions to enroll and retain underrepresented students or special population students.</p>	<p>The demographics above indicate that enrollment based on age for the Associate in General Education program is primarily 18 – 24 years old (44%) and 25 – 44-year-old (39%). The largest age range is 18-24-year-old which is comparable to the college's even though the percentage is not as high. Also, there is a higher percentage of 25 – 44-year old enrolled in the program than the college.</p> <p>Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are an early adopter of the North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.</p>
---	--

Progress: Course and Grade Distributions Analysis

	Explanation
<p>Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Course sequencing is a high priority within the Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A course matrix of semester offerings is provided to college program leaders.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p>

	Explanation
	<p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible.</p> <p>Based on current data, the Arts and Sciences course success rate is 89%.</p> <p>Currently, courses with low enrollments within A&S include the following:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>While there are several classes that have low enrollment, most classes have more than 10 students per section. The courses with low enrollment are managed well by providing only one section of that course.</p>
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements or total credit hours have been reviewed or revised within the last two years, without any changes. This process is carried out through collaboration of department leads, program chairs, divisional deans, and the Curriculum Committee.</p> <p>One significant curriculum revision that will be enacted in the next two years is the launch of a state-mandated Development English co-requisite class, ENG 045, which will replace the current version of developmental instruction covered in a pre-requisite, ENG 002, and co-requisite, ENG 011. ENG 045 will serve students who have a high school GPA of 2.79 or below. Another curriculum change will occur as the current developmental math process will be replaced by the MAT Department's choice of one of the NCCCS's recommended options during the next assessment cycle.</p>

	Explanation
	<p>In addition, there will be a new Associate in Applied Science in Health Sciences program beginning Fall 2025, which will impact enrollment in the AGE and AGE-N programs. Any students who is seeking admission to a Health and Human Services competitive program will be enrolled in the AAS-Health Sciences program and not an AGE or AGE-N pathway. Enrollment for the AGE and AGE-N programs will drop significantly when this new program is implemented.</p> <p>There is not a Career and College Pathway (CCP) for the AGE program at this time.</p>
<p>Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs and to increase the ability to hold more in-person labs throughout the week. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility and better use of lab space.</p> <p>The Math Department has expanded its online offering of prerequisite and corequisite classes to reduce the number of days a student has to be on campus. The English Department has also reworked schedules to include corequisite ENG 011 classes that occur on the same days as the seated portions of ENG 111 sections to help reduce the number of days a student is required to be on-campus.</p> <p>The Arts and Sciences division has expanded the number of HyFlex options to include ACA, EDU, ENG, PHY, and HIS classes to better meet the needs of students.</p> <p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving</p>

	Explanation
	<p>instruction in other professional development opportunities, such as QM and ACUE.</p> <p>The following faculty in Arts and Sciences have at least 1 course certified by Quality Matters:</p> <ul style="list-style-type: none"> • Tonia Broome (MAT-152) • Melanie Dekerlegand (ENG-111) • Michele Domenech (ENG-112) • Hisayo Tokura Gallo (PSY 241) • Leslie Huss (MAT-171) • Dr. Lori Metcalf (PSY-150) • Ed Pardue (SOC-210) • Judith Porter (MUS-110) • Jeff Pruett (HIS 111) • Susan Whittemore (BIO-111) • Dr. Patricia Williams (BIO 275) • Dr. Heather Woodson (EDU-243) • Chris Ziemba-Tolbert (ACA-122) <p>The following faculty in Arts and Sciences have received certification to be Certified Peer Reviewers for Quality Matters</p> <ul style="list-style-type: none"> • Ginger Black • Michele Domenech • Katie Jordan • Ed Pardue • Dr. Patricia Williams • Chris Ziemba-Tolbert <p>The following faculty in Arts and Sciences has received certification to be a Master Reviewer for Quality Matters</p> <ul style="list-style-type: none"> • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have earned the Full Online Teaching Certification (7-course program) for Quality Matters:</p> <ul style="list-style-type: none"> • Ginger Black • Katie Jordan • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have completed Professional Development in Quality Matters:</p> <ul style="list-style-type: none"> • Marguerite Bishop (IYOC)

	Explanation
	<ul style="list-style-type: none"> • Brian Bookout (IYOC & APPQMR) • Tonia Broome (IYOC & APPQMR) • Penny Brower (IYOC & APPQMR) • Heather Bruch (IYOC) • Amy Chaney (IYOC & APPQMR) • Melanie DeKerlegand (IYOC & APPQMR) • Keith Denson (IYOC & APPQMR) • Gerri Dobbins (IYOC & APPQMR) • Michele Domenech (IYOC & APPQMR) • Hisayo Tokura-Gallo (IYOC & APPQMR) • Mary Gourley (IYOC & APPQMR) • Leslie Huss (IYOC & APPQMR) • Dr. Shannon Landrum (IYOC) • Dr. Lori Metcalf (IYOC & APPQMR) • Mary Morton (IYOC & APPQMR) • Ed Pardue (IYOC & APPQMR) • Judith Porter (IYOC) • Jeffery Pruett (IYOC) • Dr. Chris Thurley (IYOC & APPQMR) • Susan Whittemore (IYOC & APPQMR) • Dr. Patricia Williams (DYOC, IYOC & APPQMR) • Dr. Heather Woodson (IYOC) • Chris Ziemba-Tolbert (APPQMR) • Bianca Yavelak (IYOC) • Jodi Valencic-Zieverink (IYOC)
<p>Student Achievement:</p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Currently, courses with low enrollments within A&S:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> • The following courses had success rates lower than the divisional average of 89 - ACA 122; BIO 112, 155, 161, 163; CHM 103/130A, 151; COM 110, 231; EDU 119, 131, 146, 184, 221, 234, 280, 282; ENG 002, 011, 111; MAT 110, 121, 152, 172, 263; MUS 110; PSY 150; PHY 251, 252; REL 110 <p>Courses with High Withdrawal Rates</p>

	Explanation
	<ul style="list-style-type: none"> The following courses had withdrawal rates that exceeded the divisional average by more than five percent: ACA 122; ART 121; BIO 111, 112, 155, 161, 168, 169; CHM 130/130A, 151, 152, 251, 252; COM 110; EDU 119, 146, 151, 184, 187, 251, 279; ENG 002, 011, 112; HIS 112; MAT 003, 152, 172, 263, 271; MUS 110, 112; PSY 241; REL 110; SOC 225. The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and several courses have been identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues. <p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.</p>
<p>Evaluation:</p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon Due to course evaluations being administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and in this evaluation cycle were 88-89%. Overall, student feedback for the program is positive.</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to</p>

	Explanation
	add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024 academic year, guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
Associate in General Education (A10300)	A10300	25%	60%

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	<p>Program Retention A10300</p> <ul style="list-style-type: none"> Fall 2020 to Fall 2021: 19% Fall 2021 to Fall 2022: 16% Fall 2022 to Fall 2023: 25% <p>Retention of new students in the AGE program increased by nine percentage points from Fall 2022 to Fall 2023.</p> <p>The Associate in General Education program experienced an increase in fall-to-fall retention rates. Due to the nature of how and why students are placed into the AGE program and when/if they are accepted to their competitive program of study this</p>

	Explanation
	<p>variable will continue to impact enrollment and retention for the program.</p> <p>Barriers to student progress: Since this program does not lead to specific career preparation and employment nor is designed for transfer to four-year institutions, students may choose to not complete this program as they may change to a specific career preparation program or transfer degree program that better aligns and prepares them for admission/entry.</p> <p>One factor that may have resulted in growth during the 2023-2024 academic year is increased divisional emphasis on retention efforts through timely and consistent interventions initiated by instructors through the Watermark platform to keep students enrolled.</p>

Credential Earned – Academic Year 2023-2024 (*Achieving the Dream*)

Program Titles	Programs Code	2023SU	2023FA	2024SP	Grand Total

	Grand Total	4	14	23	41

Trend Data - Credential Earned

Program Titles	Programs Code	2020-2021	2021-2022	2022-2023	2023-2024
Associate in General Education (A10300)	A10300	27	32	45	41
	Grand Total	27	32	45	41

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion?</p>	<p>A10300</p> <p>Headcount = 468</p> <p>Awards = 41</p> <p>Awards at the Highest Level – 41</p> <p>Awards to Headcount Ratio – 8.7%</p> <p>Timely student completion has been a major objective for both the Division and the College.</p>

	Explanation
	<p>Specific initiatives, such as Completion by Design, Achieving the Dream, and NC-GPS, have provided the framework for improvement strategies. Students in A10300 have diversified goals for attending; completion of a credential is only one preference. Many students plan to obtain admission to a competitive program in the Health and Humans Services programs before fulfilling degree requirements. In addition, the Watermark student retention system is a tool the Division of Arts and Sciences encourages faculty to use to ensure completion at the course level. This has led to the retention of more students within the Arts and Science division</p>

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community?	
<p>Community:</p> <p>How valuable is this program to the community?</p> <p>How have we benefitted from community partnerships and what other opportunities exist for collaboration?</p>	<p>Part of the value of the Associate in General Education program is that every student who graduates with an AGE degree and then lives and works in the community is better equipped to think critically, communicate effectively through various means, identify and solve problems, and lead successfully because of the training they received at Gaston College. In that way, this program is impacting the Gaston College service area both in the present and potentially in the future.</p> <p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, judging area high school art competitions, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the community.</p>
Uniqueness:	The Arts and Sciences Division effectively promotes the following unique qualities of the

	Explanation
<p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>college/division, as seen by the trend of increased enrollment and increased FTEs:</p> <p>Gaston College participates in North Carolina Guided Pathways to Success (NC-GPS). As a result of this initiative, we have created streamlined pathways for students in the various degree programs. One of the benefits of NC-GPS is to create greater cost savings and efficiencies for students.</p> <p>Division faculty/staff participate in a robust marketing plan with the high school population as a target audience. This includes information tables at community events like football games and participation with partners such as public, charter and private high school at events like the annual Educators Breakfast. We continue to collaborate with senior institutions regarding the Transfer Advising Agreement (TAG) Co-Admission Programs and Baccalaureate Degree Plans (BDPs) to ensure a smooth transfer process.</p> <p>Additionally, student resources for this program are unique. Beyond our traditional learning center, we also have both a Writing Center and Math and Science Center staffed with professional academic coaches who hold a bachelor's degree or higher.</p> <p>Gaston College offers a SPARC Scholars program. This program is a scholarship initiative funded by the National Science Foundation and a private donor to help offset the unmet financial needs of Gaston College students. Scholarships up to \$10,000 per student, per year, are offered to select full-time Associate of Science and Associate of Engineering students, who plan to transfer to a four-year university after graduating from Gaston College; major in Science, Technology, Engineering, or Math (STEM); and who show academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also available to participants of the program. The amount awarded is determined based upon federal financial need.</p>

	Explanation
	<p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, attend at least 8 globally designated events, and complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. Students who complete the program receive special recognition on their Gaston College transcript and receive a certificate of completion from UNC - Chapel Hill.</p> <p>The first full Honors Program within Gaston College and the Arts and Sciences Division was launched during the 2023-2024 school year.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Associate in General Education (A10300)	143.11	151	101.47	134.47	179.25

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
College Transfer (includes CCP Transfer Pathways & Biotech)	\$6,863,459.75	2603.4	\$10,802,789.22	\$3,939,329.47	2648.9	\$10,819,239.89	\$3,955,780.14

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>FTE Count A10300</p> <ul style="list-style-type: none">• 2019-2020 = 637.33• 2020-2021 = 542.72• 2021-2022 = 528.24• 2022-2023 = 534.45• 2023-2024 = 553.78 <p>There was an increase in FTE of 19 FTE from 2022-2023 to 2023-2024, which represents the highest total since 2021.</p> <p>The FTE increased for the A10300 program.</p> <p>The Arts and Sciences Division consistently earns approximately half of the College FTEs. The return on investment for this program is consistently high; FTE income significantly outweighs the cost for running the program and faculty salaries.</p>

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>The Transfer Advisory Committee meets annually with representatives from the main senior institutions for GC transfer students. Transfer Admission Guarantees (TAGs) have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several of the private institutions offer specific scholarship opportunities to Gaston College transfer students.</p>

	Explanation
	<p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, they must attend at least 8 globally designated events, and they must complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. For 2023-2024, the Gaston College Study Abroad program traveled to Ireland and Switzerland. Students who complete the program receive special recognition on their Gaston College transcripts and receive a certificate of completion from UNC Chapel Hill.</p> <p>College Now, a program offered at Gaston College, is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment program for qualified high school students to take tuition-free college classes. The Division of Arts and Sciences houses several dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), ASTP (P1042T).</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, Educators Breakfast, Science Fairs, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the area community.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	NA

Program Review - A1030N Associate in General Education Nursing

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Brian Bookout

Program Chair: Christine Ziemba-Tolbert

Program Code(s)/Name(s): Associate in General Education Nursing (A1030N)

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A1030N Associate in General Education Nursing

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The Associate in General Education (AGE) - Nursing degree is designed for students who wish to begin their study toward the Associate in Applied Science in Nursing (AAS-N) degree and a Bachelor's of Science in Nursing (BSN) based on the Registered Nurse (RN) to Bachelor of Science in Nursing (BSN) Articulation Agreement between the State Board of North Carolina (NC) Community Colleges and The University of North Carolina (UNC) Board of Governors. Students who complete their AAS-N (RN) and are seeking admission to a RN – BSN program at one of the UNC System institutions, can complete the Associate in General Education Nursing (A1030N) program of study to fulfill the four-year institution's general education requirements. It applies to all NC community colleges that operate associate degree nursing programs and to those eleven constituent institutions of The University of North Carolina that operate RN to BSN Programs (Appalachian State University, Fayetteville State University, East Carolina University, North Carolina Agricultural & Technical University, North Carolina Central University, UNC-Charlotte, UNC-Greensboro, UNC-Pembroke, UNC-Wilmington, Western Carolina University and Winston-Salem State University).

The AGE - Nursing degree shall be granted for planned programs of study consisting of a minimum of 61 semester hours of approved college transfer courses with a grade of C or better in each course.

At Gaston College students are placed in the Associate in General Education – Nursing (A1030N) program for two main reasons. (1) Student who are seek admission to one of the Health and Human Services competitive programs, or (2) students self-identify they only wish to obtain their Associate in General Education – Nursing.

The Arts and Sciences Divisional Council (dean, associate deans, and department chairs) serves as the primary program review committee for this degree program. This group meets once or twice monthly depending upon current needs and activities.

The following action items from the 2022-2023 program review cycle were addressed.

Two of the NCCCS critical success measures directly impacted by student success in the Associate in General Education - Nursing program saw improvement in the NCCCS 2024 Performance Measures for Student Success Report. Relating to the NCCCS second performance measure, Credit English Success, the gateway course of ENG 111 saw improvement from 0.920 in the 2023 report, which put Gaston College in the Baseline category, to 1.039 in the 2024 report, moving Gaston College to the Average Band Minimum category. Relating to the seventh performance measure, Transfer Performance, Gaston College moved from 0.994 (Average Band Minimum) to 1.012 (Average Band Maximum). Relating to the NCCCS third

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

performance measure, College Level Math Success Rates, Gaston College performance decreased from the prior year. During the year, the MAT department formed a committee, Student Success Rate of College Level Math Team, that identified students who needed MAT 100+. These students were contacted and found to either have already completed their program of study, had left the college, or the information in the system was not updated to reflect the math that was needed. This process seemed to confuse the students and the faculty that were making the contacts. For the future, academic advisors need to strongly encourage students to enroll in a MAT 100+ course early in their time at Gaston College to further assist these students in completing College Level Math. The college has stayed in the same NCCCS band width of less than the college average but above the baseline.

Because demand for online classes occurs for all disciplines within the Associate in General Education - Nursing program, continuing efforts have been made since the last program review to implement strategies to improve online learning and teaching. These efforts include divisional leadership presenting multiple workshops for specific departments, as well as for all faculty in the division.

In addition, several resources and guides for faculty in the Division of Arts and Sciences were created that focused on Regular Substantive Interaction (RSI), such as RSI Overview and Tips, RSI Instructor Self-Assessment for Online Courses, and Credit Hour versus Contact Hour in Online Courses to help faculty see the amount of hours in a given semester to help plan for their Activities and RSI. Divisional leadership also worked one-on-one with specific faculty who sought out individualized assistance throughout the year to address specific issues related to online instruction.

To develop, implement and promote the Gaston College Honors Program, an Honors Committee was created in Summer 2023, which met regularly through Fall 2023 and Spring 2024 to

- articulate a rationale for a revamped GC honors program and communicate that to the GC President's Council for approval,
- review and research honors programs at other community colleges in the NCCCS,
- determine honors program admission requirements,
- consider and determine program pathways to include one tailored for students who intend to transfer to four-year institutions and one for students who intend to graduate and enter the workforce,
- consider and determine requirements for each of the two pathways,
- identify grant opportunities and apply for an ITYC-NSF IUSE grant,
- create both mission and vision statements,
- survey faculty, evaluate survey responses and generate strategies and incentives to encourage more instructors to offer honors options,
- and develop honors program handbooks for both faculty and students.

Promoting transfer opportunities, the purpose on the Transfer Admission Guarantees (TAG) Co-Admission Program, occurred both on-campus and off.

- **On-campus** outreaches included an engaging bulletin board in a high traffic area of Robinson Classroom Building, the building where most classes related to the Associate in Arts program are held; a table at the GC Student Success Expo; information shared at the Gaston College Educators

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Breakfast; information included in the GC Leadership Gaston Scavenger Hunt; Fall Transfer Fair; College Now training event; SPARC – C3 interest meeting; GC Open House event; personal contact with SPARC-C3 students; Early College High School TAG Co-Admission event; SGA Spring 2024 welcome event; GECHS TAG Talk; Lincoln County HS 10th grade visit to GC; Rhino Roadmap information; GC Spring Transfer Fair; 49er Next Meeting; GC Spring Fest; and Senior Night.

- **Off-campus** TAG efforts included maintaining an information-rich website; Zoom meetings with a partner high school's counselor and partner private university to review and discuss aspects of the TAG program; information tables at area high school football games; presentation at a Lincoln County Teacher Cadet event; and campus visits to a local private college.

To meet the demands of higher enrollment and open faculty positions due to previous retirements/resignations, pressing needs for more English, Communications, and Mathematics faculty have been addressed with the addition of two full-time English instructors, one full-time Communications instructor, and one full-time Mathematics instructor.

Strengths:

The Associate of General Education – Nursing program remains an essential part of Gaston College academic programs, evident from enrollment statistics. Courses within the Arts and Sciences (A&S) Division play a crucial role in all the degrees offered by the College. The Division continues to be at the forefront of statewide and national improvement initiatives. Given the interdependent nature of the Arts and Sciences Division, fostering collaboration with other programs and divisions at the College is a top priority and a significant strength. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules, created HyFlex course offerings, scheduled more eight-week classes, and added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location.

The Division offers numerous valuable academic resources to support students in successfully completing their studies. It actively participates in various campus initiatives and activities, such as the Developmental Education Alignment Project, Gaston College Study Abroad, Writing Center, Learning Center, MASC Center, Transfer Advising Center, Psi Beta, Gamma Beta Phi, Completion by Design, Achieving the Dream, NC College Transfer Program Association, STEM Persistence and Retention via Curricula, Centralization, and Cohorts (SPARC), Inquiry-Based Learning methods, and North Carolina Guided Pathways to Success (NC-GPS).

Many A&S faculty have received specialized professional development related to conducting high quality online courses in the form of online course audits, Blackboard and Accessibility Training (BaAT), Quality Matters Courses (QM), and Association of College and University Educators (ACUE).

Since the last assessment cycle, recruiting efforts to enroll students in Transfer Admissions Guarantees (TAG) Co-Admission Programs have been implemented. TAG programs offer transfer students guaranteed admission to select university partners. Divisional leaders have focused on marketing efforts for these

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

important agreements through campus events like the Student Success Expo and collaborating with the GC Marketing and Communications Department to publicize the TAG program through GC's social media.

Areas for Improvement:

The Arts and Sciences Division is always looking to enhance and improve the student experience. With continuous improvement in mind, several areas have been identified for further development. Additionally, divisional leaders will focus on providing further academic support to students in science and math courses, brainstorming ways to increase response rates for course evaluations and graduation surveys, improve seamless transfer to senior institutions, and reduce course withdrawal rates

Needs:

- Rauch Science Building continues to be in desperate need of a new HVAC system due to dangerously high temperatures in the lab, which is a hazard with storing chemicals and materials in the lab. In addition, the greenhouse attached to Rauch continue to need repairs as it needs to be used for labs and resources.
- Arts and Sciences leadership will provide training for our faculty for the LMS upgrades and implementations.
- As Arts and Sciences continues to expand Lincoln Campus course offerings, leadership will assess, review, and monitor the classrooms to see if they meet student needs.
- Arts and Sciences has a critical need to hire more faculty in a variety of disciplines to meet the increasing number of course sections. This will allow us to provide more sections and times when courses could be offered to meet students' needs.

Actions:

1. Continue to improve the North Carolina Community College System Critical Success measures for student success rate in curriculum English.
2. Meet the North Carolina Community College System Critical Success measure for curriculum Math
3. Implement strategies to improve online learning and teaching, including LMS transition to Blackboard Ultra.
4. Continue to expand the Honors Program and Transfer Admission Guarantee programs.
5. Apply for grants to assist with supporting the Honors Program, Student Success initiatives, development of an online teaching and learning center, consortium with area community colleges and four-year institutions, and new SPARC offerings.

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>According to the program enrollment data shared above compared to that for the 2022 – 2023 Academic Year, the enrollment for this program is growing.</p> <ul style="list-style-type: none"> 2022 – 2023 = 692 2023 – 2024 = 785 <p>No changes have been made to the pathway.</p> <p>Like neighboring institutions CPCC, CVCC, and CCC, Gaston College's Associate in General Education – Nursing (AGE-N) program requires 60 semester hours with a grade of C or better in each course. Like those colleges, the AGE-N degree emphasizes competence in reading, writing, oral communication, fundamental mathematical skills, critical thinking skills and basic computer use. The AGE-N curriculum program is designed to meet the general education requirements of the four-year institutions participating in the RN to BSN Uniform Articulation Agreement.</p>

	Explanation/Narrative
	<p>Various strategies have been implemented to improve enrollment goals, improve the program for students, and improve course offerings.</p> <ul style="list-style-type: none"> • All courses within the Associate of Arts degree pathway are sequenced to allow successful completion of the pathway that is both efficient for student completion and economical in terms of programing cost. • Foundational requirements are provided early in the program and promote completion of pre-requisite courses early in the program to ensure successful completion. • Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible. • Improving course offerings is an important goal within the Arts and Sciences. • To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. • Previous semester data has been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The Arts and Science division has created Hyflex course offerings in English and has added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students.
<p><u>Enrollment Analysis:</u></p> <p>Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p>	<p>Demographics A10300 during 2023-2024 Academic Year</p> <p>Percent Female: 93%</p> <p>Percent Male: 7%</p> <p>Percent White: 34%</p> <p>Percent Non-White: 47%</p> <p>Percent Unknown: 21%</p>

				Explanation/Narrative
<p>New Question: Review program enrollment for A1030N at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Associate in General Education including Associate in General Education Nursing at GC? Identify strategies for enrollment growth.</p> <p>When reviewing Spring 2024 student enrollment numbers of new & returning students, review the number of students enrolled at a neighboring institution that resides our service area (Gaston & Lincoln counties), and determine if the program has effectively marketed the Associate in General Education Nursing in students in and around our service area counties.</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p> <p>Discuss program efforts (past or present) to address possible opportunities of enrollment growth. Associate in General Education including General Education Nursing</p> <p><i>The following data includes Associate in General Education (A10300) and Associate in General Education – Nursing (A1030N) students, which does not allow for a true comparison of students enrolled in the AGE program.</i></p>				<p>Compared to the college-wide population, the AGE-N program has a fewer number of male students (7% vs. 36% college-wide) and a significantly higher number of female students (93% vs. 64% college-wide). However, the trend of having more female students than male is consistent with college demographics. During the 2023-2024 academic year, more Non-White than White students were enrolled in the AGE-N degree program.</p> <p>The Arts and Sciences Division provides academic holistic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center.</p> <p>The following data and review includes Associate in General Education (A10300) and Associate in General Education – Nursing (A1030N) students, which does not allow for a true comparison of students enrolled in the AGE program.</p>
A10300 (including A1030N)	# of Students	Students From Gaston	Students From Lincoln	<p>Cleveland CC had 282 (new and recurring students for Spring 2024); however, 11 students from Lincoln & 48 from Gaston, the GC service area, enrolled in the Associate in General Education program at CCC. That number represents 20.9% of the total number of AGE and AGE-N students at CCC.</p> <p>48 + 11 = 22/Opportunity for program growth.</p>
Cleveland CC	282	48	11	
CVCC	24	1	2	
CPCC	0	0	0	
<p>*CPCC had no students in the program after Spring 2022.</p>				<p>Catawba Valley CC had 24 (new and recurring students for Spring 2024); however, 2 students from Lincoln & 1 from Gaston, the GC service area, enrolled in the Associate in General Education program at CVCC. That number represents 12.5 percent of the total number of AGE and AGE-N students at CVCC.</p> <p>2 + 1 = 3/Opportunity for program growth.</p> <p>Program's enrollment growth action(s) and/or comment(s) below:</p>

	Explanation/Narrative
	<p>Due to the data including AGE and AGE-N students, it is difficult to know how the specifics for the AGE-N program enrolled at the other institutions.</p> <p>While the percentage of students from Gaston/Lincoln counties represents just under 21% percent or less of the total number of AGE and AGE-N students enrolled at neighboring institutions, these students indicate that Gaston College's AGE and AGE-N program still has room to grow in attracting and retaining students from our service area. This may be done through increasing marketing efforts for the AGE and AGE-N program.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

<p><u>Demographic Enrollment Analysis by Race/Ethnicity:</u></p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for 2023-2024 as it pertains to race/ethnicity. For example,</p>	<p>Demographics A10300 during 2023-2024 Academic Year</p> <p>Percent White: 34%</p> <p>Percent Asian: 1%</p> <p>Percent Black: 30 %</p> <p>Percent Hispanic: 8%</p>
---	--

explain the race/ethnicity group with the most difference compare to the college ***race/ethnicity*** data.

Discuss program actions to enroll and retain underserved students or special population students.

Percent Unknown: 21%

Demographics College-wide during 2023-2024 Academic Year

Percent White 55%

Percent Asian 2%

Percent Black 22 %

Percent Hispanic 15%

Percent Unknown 5%

Pronounced differences exist between several of the Race/Ethnicity categories at the program vs. college level. Some of these differences may be traced to the fact that current students are not self-identifying their ethnicity by choice. There are 21% identifying as unknown ethnicity. However, there is a higher percentage of Black students enrolled in the AGE program compared to the college enrollment (30% vs 22%), less students identified as White in the program compared to the college enrollment (34% vs 55%), and less students identified as Hispanic in the program compared to the college enrollment (8% vs 15%).

Demographic Enrollment Analysis by Gender:

College Wide – Demographics 2023-2024

Gaston College Unduplicated Enrollment
Academic Year 2023-2024 - by Gender

Program – Demographics 2023-2024

A1030N: Associate in Gen Ed Nursing Unduplicated
Enrollment
Academic Year 2023-2024 - by Gender

Demographic Enrollment Analysis by Gender:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to gender. For example, explain the if the **gender** breakout between male and female students is more, less, or the same as the college's overall gender breakout.

Discuss program actions to enroll and retain underserved students or special population students.

Demographics A1030N during 2023-2024**Academic Year**

Percent Female: 93%

Percent Male: 7%

Demographics College-wide during 2023-2024**Academic Year**

Percent Female 64%

Percent Male 36%

During the academic year 2023-2024, there were more female students in the A1030N programs than male, which was consistent with the College demographics. Interestingly, the percentage of men in the AGE-N program is twenty-nine points lower than the percentage in the college overall. Due to how the college places students in the AGE-N program for those waiting to be accepted to competitive Health and Human Services programs, historically more females are in the Health and Human Services career field.

Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are a participant in the current North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.

The division plans to use marketing efforts to ensure all students in our service area understand the value of attending GC. Divisional leadership remains committed to making stakeholders within the service area aware of all A&S programs, including the Associate in General Education, through participation in outward facing events such as the GC Student Success Expo; the Gaston College Educators Breakfast; the Fall Transfer Fair; College Now training events; GC Open House events; Early College High School TAG Co-Admission events; SGA welcome events; Lincoln County HS student visits to GC; GC

	Spring Fest; Lincoln County Apple Festival, and GC Senior Night.

The largest age range is 18-24 year old which is comparable to the college’s even though the percentage is not as high. Also, there is a higher percentage of 25 – 44 year old enrolled in the program than the college.</p> </div> <div data-bbox="881 1386 1490 1770" data-label="Text"> <p>Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are an early adopter of the North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.</p> </div>																								

Progress: Course and Grade Distributions Analysis

	Explanation
<p>Course Sequence/Success:</p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Course sequencing is a high priority within the Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A course matrix of semester offerings is provided to college program leaders.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p> <p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible.</p> <p>Based on current data, the Arts and Sciences course success rate is 89%.</p> <p>Currently, courses with low enrollments within A&S include the following:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section.

	Explanation
	While there are several classes that have low enrollment, most classes have more than 10 students per section. The courses with low enrollment are managed well by providing only one section of that course.
<p>Curriculum/Course Materials</p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements or total credit hours have been reviewed or revised within the last two years, without any changes. This process is carried out through collaboration of department leads, program chairs, divisional deans, and the Curriculum Committee.</p> <p>One significant curriculum revision that will be enacted in the next two years is the launch of a state-mandated Development English co-requisite class, ENG 045, which will replace the current version of developmental instruction covered in a pre-requisite, ENG 002, and co-requisite, ENG 011. ENG 045 will serve students who have a high school GPA of 2.79 or below. Another curriculum change will occur as the current developmental math process will be replaced by the MAT Department's choice of one of the NCCCS's recommended options during the next assessment cycle.</p> <p>In addition, there will be a new Associate in Applied Science in Health Sciences program beginning Fall 2025, which will impact enrollment in the AGE and AGE-N programs. Any students who is seeking admission to a Health and Human Services competitive program will be enrolled in the AAS-Health Sciences program and not an AGE or AGE-N pathway. Enrollment for the AGE and AGE-N programs will drop significantly when this new program is implemented.</p> <p>There is not a Career and College Pathway (CCP) for the AGE-N program at this time.</p>
<p>Modality:</p> <p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs and to increase the ability to hold more in-person labs</p>

	Explanation
	<p>throughout the week. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility and better use of lab space.</p> <p>The Math Department has expanded its online offering of prerequisite and corequisite classes to reduce the number of days a student has to be on campus. The English Department has also reworked schedules to include corequisite ENG 011 classes that occur on the same days as the seated portions of ENG 111 sections to help reduce the number of days a student is required to be on-campus.</p> <p>The Arts and Sciences division has expanded the number of HyFlex options to include ACA, EDU, ENG, PHY, and HIS classes to better meet the needs of students.</p> <p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving instruction in other professional development opportunities, such as QM and ACUE.</p> <p>The following faculty in Arts and Sciences have at least 1 course certified by Quality Matters:</p> <ul style="list-style-type: none"> • Tonia Broome (MAT-152) • Melanie Dekerlegand (ENG-111) • Michele Domenech (ENG-112) • Hisayo Tokura Gallo (PSY 241) • Leslie Huss (MAT-171) • Dr. Lori Metcalf (PSY-150) • Ed Pardue (SOC-210) • Judith Porter (MUS-110) • Jeff Pruett (HIS 111) • Susan Whittemore (BIO-111) • Dr. Patricia Williams (BIO 275) • Dr. Heather Woodson (EDU-243) • Chris Ziemba-Tolbert (ACA-122) <p>The following faculty in Arts and Sciences have received certification to be Certified Peer Reviewers for Quality Matters</p>

	Explanation
	<ul style="list-style-type: none"> • Ginger Black • Michele Domenech • Katie Jordan • Ed Pardue • Dr. Patricia Williams • Chris Ziemba-Tolbert <p>The following faculty in Arts and Sciences has received certification to be a Master Reviewer for Quality Matters</p> <ul style="list-style-type: none"> • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have earned the Full Online Teaching Certification (7-course program) for Quality Matters:</p> <ul style="list-style-type: none"> • Ginger Black • Katie Jordan • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have completed Professional Development in Quality Matters:</p> <ul style="list-style-type: none"> • Marguerite Bishop (IYOC) • Brian Bookout (IYOC & APPQMR) • Tonia Broome (IYOC & APPQMR) • Penny Brower (IYOC & APPQMR) • Heather Bruch (IYOC) • Amy Chaney (IYOC & APPQMR) • Melanie DeKerlegand (IYOC & APPQMR) • Keith Denson (IYOC & APPQMR) • Gerri Dobbins (IYOC & APPQMR) • Michele Domenech (IYOC & APPQMR) • Hisayo Tokura-Gallo (IYOC & APPQMR) • Mary Gourley (IYOC & APPQMR) • Leslie Huss (IYOC & APPQMR) • Dr. Shannon Landrum (IYOC) • Dr. Lori Metcalf (IYOC & APPQMR) • Mary Morton (IYOC & APPQMR) • Ed Pardue (IYOC & APPQMR) • Judith Porter (IYOC) • Jeffery Pruett (IYOC) • Dr. Chris Thurley (IYOC & APPQMR) • Susan Whittemore (IYOC & APPQMR)

	Explanation
	<ul style="list-style-type: none"> • Dr. Patricia Williams (DYOC, IYOC & APPQMR) • Dr. Heather Woodson (IYOC) • Chris Ziemba-Tolbert (APPQMR) • Bianca Yavelak (IYOC) • Jodi Valencic-Zieverink (IYOC)
<p><u>Student Achievement:</u></p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Currently, courses with low enrollments within A&S:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> • The following courses had success rates lower than the divisional average of 89 - ACA 122; BIO 112, 155, 161, 163; CHM 103/130A, 151; COM 110, 231; EDU 119, 131, 146, 184, 221, 234, 280, 282; ENG 002, 011, 111; MAT 110, 121, 152, 172, 263; MUS 110; PSY 150; PHY 251, 252; REL 110 <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> • The following courses had withdrawal rates that exceeded the divisional average by more than five percent: ACA 122; ART 121; BIO 111, 112, 155, 161, 168, 169; CHM 130/130A, 151, 152, 251, 252; COM 110; EDU 119, 146, 151, 184, 187, 251, 279; ENG 002, 011, 112; HIS 112; MAT 003, 152, 172, 263, 271; MUS 110, 112; PSY 241; REL 110; SOC 225. <p>The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and several courses have been identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues.</p>

	Explanation
	<p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.</p>
<p><u>Evaluation:</u></p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon Due to course evaluations being administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and in this evaluation cycle were 88-89%. Overall, student feedback for the program is positive.</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024 academic year, guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.</p>

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
Associate in General Education Nursing (A1030N)	A1030N	35%	63%

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	<p>Program Retention A1030N</p> <ul style="list-style-type: none"> Fall 2020 to Fall 2021: 37% Fall 2021 to Fall 2022: 22% Fall 2022 to Fall 2023: 35% <p>Retention of new students in the AGE-N program increased by thirteen percentage points from Fall 2022 to Fall 2023.</p> <p>The Associate in General Education-Nursing program experienced an increase in fall-to-fall retention rates. Due to the nature of how and why students are placed into the AGE-N program and when/if they are accepted to their competitive program of study this variable will continue to impact enrollment and retention for the program.</p> <p>Barriers to student progress: Since this program does not lead to specific career preparation and employment nor is designed for transfer to four-year institutions, students may choose to not complete this program as they may change to a specific career preparation program or transfer degree program that better aligns and prepares them for admission/entry.</p> <p>One factor that may have resulted in growth during the 2023-2024 academic year is increased divisional emphasis on retention efforts through timely and consistent interventions initiated by instructors through the Watermark platform to keep students enrolled.</p>

Credential Earned – Academic Year 2023-2024 (*Achieving the Dream*)

Program Titles	Programs Code	2023SU	2023FA	2024SP	Grand Total
Associate in General Education Nursing (A1030N)	A1030N	2	0	4	6
	Grand Total	2	0	4	6

Trend Data - Credential Earned

Program Titles	Programs Code	2020-2021	2021-2022	2022-2023	2023-2024
Associate in General Education Nursing (A1030N)	A1030N	2	1	4	6
	Grand Total	2	1	4	6

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion?</p>	<p>A1030N</p> <p>Headcount = 785</p> <p>Awards = 6</p> <p>Awards at the Highest Level – 6</p> <p>Awards to Headcount Ratio – 0.76%</p> <p>Timely student completion has been a major objective for both the Division and the College. Specific initiatives, such as Completion by Design, Achieving the Dream, and NC-GPS, have provided the framework for improvement strategies. Students in A1030N have diversified goals for enrollment in the program and attending; completion of a credential is only one preference. Many students plan to obtain admission to a competitive program in the Health and Humans Services programs before fulfilling degree requirements. In addition, the Watermark student retention system is a tool the Division of Arts and Sciences encourages faculty to use to ensure completion at the course level. This has led to the retention of more students within the Arts and Science division.</p>

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community?	
<p>Community:</p> <p>How valuable is this program to the community?</p> <p>How have we benefitted from community partnerships and what other opportunities exist for collaboration?</p>	<p>Part of the value of the Associate in General Education-Nursing program is that every student who graduates with an AGE-N degree and then lives and works in the community is better equipped to think critically, communicate effectively through various means, identify and solve problems, and lead successfully because of the training they received at Gaston College. In that way, this program is impacting the Gaston College service area both in the present and potentially in the future.</p> <p>The AGE-N degree only leads to employment in the local community or prosperity zone if the employment opportunity indicates 'associate degree completed' with no specifics on a particular area or program. This degree program is meant to prepare students who seek admission to the RN to BSN nursing program at our participating four-year institutions. The degree assists students who are seeking to gain further education or admission to a particular healthcare program/field of study at Gaston or another institution</p> <p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>An annual Transfer Advisory Committee is conducted with representatives from the main senior institutions for our transfer students. Transfer Admission Guarantees (TAGs) Co-Admission Programs have been developed with several public and private institutions in our area. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events</p>

	Explanation
	throughout the year (such as community art shows, judging area high school art competitions, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the community.
<p>Uniqueness:</p> <p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>The Arts and Sciences Division effectively promotes the following unique qualities of the college/division, as seen by the trend of increased enrollment and increased FTEs:</p> <p>Gaston College participates in North Carolina Guided Pathways to Success (NC-GPS). As a result of this initiative, we have created streamlined pathways for students in the various degree programs. One of the benefits of NC-GPS is to create greater cost savings and efficiencies for students.</p> <p>Division faculty/staff participate in a robust marketing plan with the high school population as a target audience. This includes information tables at community events like football games and participation with partners such as public, charter and private high school at events like the annual Educators Breakfast. We continue to collaborate with senior institutions regarding the Transfer Advising Agreement (TAG) Co-Admission Programs and Baccalaureate Degree Plans (BDPs) to ensure a smooth transfer process.</p> <p>Additionally, student resources for this program are unique. Beyond our traditional learning center, we also have both a Writing Center and Math and Science Center staffed with professional academic coaches who hold a bachelor's degree or higher.</p> <p>Gaston College offers a SPARC Scholars program. This program is a scholarship initiative funded by the National Science Foundation and a private donor to help offset the unmet financial needs of Gaston College students. Scholarships up to \$10,000 per student, per year, are offered to select full-time Associate of Science and Associate of</p>

	Explanation
	<p>Engineering students, who plan to transfer to a four-year university after graduating from Gaston College; major in Science, Technology, Engineering, or Math (STEM); and who show academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also available to participants of the program. The amount awarded is determined based upon federal financial need.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, attend at least 8 globally designated events, and complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. Students who complete the program receive special recognition on their Gaston College transcript and receive a certificate of completion from UNC - Chapel Hill.</p> <p>The first full Honors Program within Gaston College and the Arts and Sciences Division was launched during the 2023-2024 school year.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

	19-20	20-21	21-22	22-23	23-24
Associate in General Education-Nursing (1030N)	407.55	364.2	303.81	297.31	353.38

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
College Transfer (includes CCP Transfer Pathways & Biotech)	\$6,863,459.75	2603.4	\$10,802,789.22	\$3,939,329.47	2648.9	\$10,819,239.89	\$3,955,780.14

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>FTE Count A10300</p> <ul style="list-style-type: none"> • 2019-2020 = 637.33 • 2020-2021 = 542.72 • 2021-2022 = 528.24 • 2022-2023 = 534.45 • 2023-2024 = 553.78 <p>There was an increase in FTE of 19 FTE from 2022-2023 to 2023-2024, which represents the highest total since 2021.</p> <p>The FTE increased for the A10300 program. The Arts and Sciences Division consistently earns approximately half of the College FTEs. The return on investment for this program is consistently high; FTE income significantly outweighs the cost for running the program and faculty salaries.</p>

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>The Transfer Advisory Committee meets annually with representatives from the main senior</p>

	Explanation
	<p>institutions for GC transfer students. Transfer Admission Guarantees (TAGs) have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several of the private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, they must attend at least 8 globally designated events, and they must complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. For 2023-2024, the Gaston College Study Abroad program traveled to Ireland and Switzerland. Students who complete the program receive special recognition on their Gaston College transcripts and receive a certificate of completion from UNC Chapel Hill.</p> <p>College Now, a program offered at Gaston College, is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment program for qualified high school students to take tuition-free college classes. The Division of Arts and Sciences houses several dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), ASTP (P1042T).</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, Educators Breakfast, Science Fairs, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the area community.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	

Program Review - A10400 Associate in Science

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Brian Bookout

Associate Dean: Dr. Patricia Williams

Program Code(s)/Name(s): Associate in Science

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A10400 Associate in Science
- P1042C Associate in Science Pathway

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The mission and purpose of the Associate in Science (AS) degree at Gaston College is to provide students with a transfer degree which allows for seamless entry to a senior institution. All public senior institutions in North Carolina and many private are a part of the Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA). These agreements enable Gaston College graduates in the AS program to transfer with junior status. Gaston College graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.0 on a 4.0 scale in order to transfer with a junior status.

The AS degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit of college transfer courses. Within the degree program, the students have the opportunity to achieve competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The Arts and Sciences Division Office (Dean and Associate Deans) serve as the primary program review team for this degree program. This group meets weekly depending upon the current needs and activities of the division. Additionally, an external Transfer Advisory Committee meets annually to review curricula, transfer issues, and other topics. This committee is composed of representatives of four-year institutions where Gaston College students may transfer.

Since the last program review, briefly discuss program strengths, areas of improvements, program needs, and program actions. If applicable, include program efforts to address recommendations from the last program review.

Meet the North Carolina Community College System Critical Success measures for student success rate in curriculum English and curriculum Math.

Two of the NCCCS critical success measures directly impacted by student success in the Associate in Arts program saw improvement in the NCCCS 2024 Performance Measures for Student Success Report. Relating to the NCCCS second performance measure, Credit English Success, the gateway course of ENG 111 saw improvement from 0.920 in the 2023 report, which put Gaston College in the Baseline category, to 1.039 in the 2024 report, moving Gaston College to the Average Band Minimum category. Relating to the seventh performance measure, Transfer Performance, Gaston College moved from 0.994 (Average Band Minimum)

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

to 1.012 (Average Band Maximum). Relating to the NCCCS third performance measure, College Level Math Success Rates, Gaston College performance decreased from the prior year. During the year, the MAT department formed a committee, Student Success Rate of College Level Math Team, that identified students who needed MAT 100+. These students were contacted and found to either have already completed their program of study, had left the college, or the information in the system was not updated to reflect the math that was needed. This process seemed to confuse the students and the faculty that were making the contacts. For the future, academic advisors need to strongly encourage students to enroll in a MAT 100+ course early in their time at Gaston College to further assist these students in completing College Level Math. The college has stayed in the same NCCCS band width of less than the college average but above the baseline.

Implement strategies to improve online learning and teaching.

Because demand for online classes occurs for all disciplines within the Associate in Arts program, continuing efforts have been made since the last program review to implement strategies to improve online learning and teaching. These efforts include divisional leadership presenting multiple workshops for specific departments, as well as for all faculty in the division.

In addition, several resources and guides for faculty in the Division of Arts and Sciences were created that focused on Regular Substantive Interaction (RSI), such as RSI Overview and Tips, RSI Instructor Self-Assessment for Online Courses, and Credit Hour versus Contact Hour in Online Courses to help faculty see the amount of hours in a given semester to help plan for their Activities and RSI. Divisional leadership also worked one-on-one with specific faculty who sought out individualized assistance throughout the year to address specific issues related to online instruction.

To develop, implement and promote the Gaston College Honors Program, an Honors Committee was created in Summer 2023, which met regularly through Fall 2023 and Spring 2024 to

- articulate a rationale for a revamped GC honors program and communicate that to the GC President's Council for approval,
- review and research honors programs at other community colleges in the NCCCS,
- determine honors program admission requirements,
- consider and determine program pathways to include one tailored for students who intend to transfer to four-year institutions and one for students who intend to graduate and enter the workforce,
- consider and determine requirements for each of the two pathways,
- identify grant opportunities and apply for an ITYC-NSF IUSE grant,
- create both mission and vision statements,
- survey faculty, evaluate survey responses and generate strategies and incentives to encourage more instructors to offer honors options,
- and develop honors program handbooks for both faculty and students.

Promoting transfer opportunities, the purpose on the Transfer Admission Guarantees (TAG) Co-Admission Program, occurred both on-campus and off.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- On-campus outreaches included an engaging bulletin board in a high traffic area of Robinson Classroom Building, the building where most classes related to the Associate in Arts program are held; a table at the GC Student Success Expo; information shared at the Gaston College Educators Breakfast; information included in the GC Leadership Gaston Scavenger Hunt; Fall Transfer Fair; College Now training event; SPARC – C3 interest meeting; GC Open House event; personal contact with SPARC-C3 students; Early College High School TAG Co-Admission event; SGA Spring 2024 welcome event; GECHS TAG Talk; Lincoln County HS 10th grade visit to GC; Rhino Roadmap information; GC Spring Transfer Fair; 49er Next Meeting; GC Spring Fest; and Senior Night.
- Off-campus TAG efforts included maintaining an information-rich website; Zoom meetings with a partner high school's counselor and partner private university to review and discuss aspects of the TAG program; information tables at area high school football games; presentation at a Lincoln County Teacher Cadet event; and campus visits to a local private college.

To meet the demands of higher enrollment and open faculty positions due to previous retirements/resignations, pressing needs for more English, Communications, and Mathematics faculty have been addressed with the addition of **two full-time English instructors, one full-time Communications instructor, and one full-time Mathematics instructor.**

Strengths:

The Associate of Science program remains an essential part of Gaston College academic programs, evident from the enrollment statistics. The courses within the Arts and Sciences (A&S) Division play a crucial role in all the degrees offered by the College. The Division continues to be at the forefront of statewide and national improvement initiatives. Given the interdependent nature of the Arts and Sciences Division, fostering collaboration with other programs and divisions at the College is a top priority and a significant strength. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data has been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.

The Division offers numerous valuable academic resources to support students in successfully completing their studies. It actively participates in various campus initiatives and activities, such as CoDE (Co-requisite Developmental Education), Gaston College Study Tours, Writing Center, Learning Center, MASC Center, Transfer Advising Center, Psi Beta, Gamma Beta Phi, Completion by Design, Achieving the Dream, NC College Transfer Program Association, STEM Persistence and Retention via Curricula, Centralization, and Cohorts (SPARC), Inquiry-Based Learning methods, and North Carolina Guided Pathways to Success (NC-GPS).

The Gaston College SPARC Scholars program is a scholarship initiative funded by the National Science Foundation (Grant Nos. 1355569, 1742128, 1833738) and a private donor to help alleviate the unmet financial needs of Gaston College students. Scholarships of up to \$10,000 per student per year are available to selected full-time Associate of Science and Associate of Engineering students who intend to transfer to a four-year university, major in STEM fields (Science, Technology, Engineering, or Math), and demonstrate

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also accessible to program participants, with the awarded amount determined based on federal financial need. In addition to receiving scholarship support for their unmet financial needs, SPARC Scholars are part of a closely-knit learning community with specially designed course schedules, enabling them to collaborate with fellow scholars and faculty members. SPARC Scholars also engage in undergraduate research experiences, extracurricular events, field trips, and benefit from mentorship provided by selected faculty members.

Another noteworthy STEM program is Bridges to Baccalaureate (B2B), a grant program supported by the National Institutes of Health. This collaborative initiative involves Gaston College, Rowan Cabarrus Community College, and the University of North Carolina at Charlotte, providing paid research opportunities to students in A.S and A.E. programs. The program facilitates paid undergraduate research experiences with Gaston College faculty members and allows students to engage in research at UNCC, fostering research relationships with faculty mentors there. Additionally, students receive travel support and financial assistance to present their work at regional and national conferences across the United States.

Areas for Improvement:

The Arts and Sciences Division is always looking to enhance and improve the student experience. With continuous improvement in mind, several areas have been identified for further development. Additionally, divisional leaders will focus on providing further academic support to students in science and math courses, brainstorming ways to increase response rates for course evaluations and graduation surveys, improvement of seamless transfer to senior institutions, and reducing course withdraw rates.

Recruiting efforts to enroll students in the SPARC program need improvement. While great strides were made over the last academic year, there are still significant issues getting the word out to talented high school students and their parents who display financial need. Each year, there are fewer first semester students in the program as students typically find out about the program by word of mouth after starting at the College or because students enter with College Now credits. At the high schools, specific science teachers have been the biggest supporters and recommended the program to students who would benefit from the program; however, the high school counselors do not typically do the same.

Needs:

- Rauch Science Building continues to be in desperate need of a new HVAC system due to dangerously high temperatures in the lab, which is a hazard with storing chemicals and materials in the lab. In addition, the greenhouse attached to Rauch continue to need repairs as it needs to be used for labs and resources.
- Arts and Sciences leadership will provide training for our faculty for the LMS upgrades and implementations.
- As Arts and Sciences continues to expand Lincoln Campus course offerings, leadership will assess, review, and monitor the classrooms to see if they meet student needs.
- Arts and Sciences has a critical need to hire more faculty in a variety of disciplines to meet the increasing number of course sections. This will allow us to provide more sections and times when courses could be offered to meet students' needs.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Actions:

- Continue to improve the North Carolina Community College System Critical Success measures for student success rate in curriculum English
- Meet the North Carolina Community College System Critical Success measure for curriculum Math
- Implement strategies to improve online learning and teaching, including LMS transition to Blackboard Ultra.
- Continue to expand the Honors Program and Transfer Admission Guarantee programs.
- Apply for grants to assist with supporting the Honors Program, Student Success initiatives, development of an online teaching and learning center, consortium with area community colleges and four-year institutions, and new SPARC offerings.

Entry – Program Enrollment

	Explanation/Narrative
Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's	A comparison of the enrollment data from 2022-2023 to 2023-2024 indicates that enrollment is slightly declining in growth in both A10400 and P1042C. In

	Explanation/Narrative
<p>enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>A10400, the number of individuals enrolled grew from 570 in 2022-23 to 547 in 2023-2024, which indicates an 4.2% percent decrease. In addition, the P1042C decreased from 612 in 2022-2023 to 502 in 2023-24, which indicates a 17.9% percent decrease.</p> <p>Both Full-Time and Part-Time pathways are updated and/or reviewed yearly.</p> <p>Like neighboring institutions CPCC, CVCC, and CCC, Gaston College's Associate in Science program requires 60 semester hours of approved college transfer courses with a grade of C or better in each course. Like those colleges, the AS degree emphasizes competence in reading, writing, oral communication, fundamental mathematical skills, critical thinking skills and basic computer use.</p> <p>Various strategies have been implemented to improve enrollment goals, improve the program for students, and improve course offerings.</p> <ul style="list-style-type: none"> • All courses within the Associate of Science degree pathway are sequenced to allow successful completion of the pathway that is both efficient for student completion and economical in terms of programing cost. • Foundational requirements are provided early in the program and promote completion of pre-requisite courses early in the program to ensure successful completion. • Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible. • Improving course offerings is an important goal within the Arts and Sciences. • To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules.

	Explanation/Narrative
	Previous semester data has been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The Arts and Science division has created Hyflex course offerings in English and has added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students.
Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments. (Consider program demographic data compared to college wide demographic data.) New Question: Review program enrollment for A10400/P1042C at other institutions in our neighboring counties. Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Associate in Science at GC? Identify strategies for enrollment growth. The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC. Discuss program efforts (past or present) to address possible opportunities of enrollment growth. Associate in Science	When reviewing Spring 2024 student enrollment numbers of new & returning students, review the number of students enrolled at a neighboring institution that resides our service area (Gaston & Lincoln counties), and determine if the program has effectively marketed the Associate in Science in students in and around our service area counties. Program’s enrollment growth action(s) and/or comment(s) below: Demographics A10400 during 2023-2024 Academic Year Percent Female 60% Percent Male 40% Percent White 45% Percent Non-White 31% Percent Unknown 24% Compared to the college-wide population, the AS program has a greater number of female students (60% vs. 36% college-wide) and a lesser number of male students (40% vs. 64% college-wide). During the 2023-2024 academic year, more white than non-white students were enrolled in the AS degree program. The Arts and Sciences Division provides academic holistic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Cleveland CC had 106 (new and recurring students for Spring 2024). 5 of those students were from Gaston and Lincoln Counties. That number represents 4.7% percent of the total number of AE

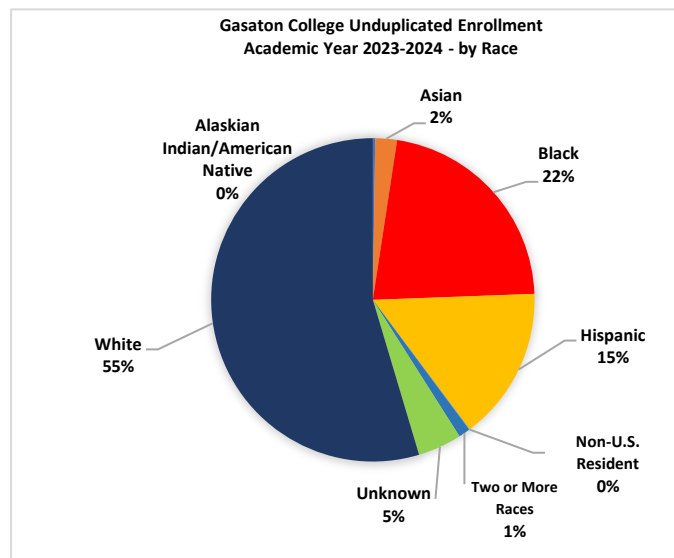

A10400	# of Students	Students From Gaston	Students From Lincoln
Cleveland CC	106	3	2
CVCC	201	2	36
CPCC	790	17	4

P1042C	# of Students	Students From Gaston	Students From Lincoln
Cleveland CC	69	2	0
CVCC	41	1	1
CPCC	800	7	1

	Explanation/Narrative
	<p>students at CCC. The opportunity for program growth from CCC is 5 students.</p> <p>Catawba Valley CC had 201 (new and recurring students for Spring 2024); however, 36 students from Lincoln & 2 from Gaston, the GC service area, enrolled in the AS program at CVCC. That number represents 18.9% percent of the total number of AE students at CVCC. The opportunity for program growth from CVCC is 38 students.</p> <p>Central Piedmont CC had 790 (new and recurring students Spring 2024); however, 4 students from Lincoln & 17 from Gaston, the GC service area, enrolled in the AS program at CPCC. That number represents 2.6 percent of the total number of AS students at CPCC. The opportunity for program growth from CPCC is 21.</p> <p>Program's enrollment growth action(s) and/or comment(s) below:</p> <p>While the percentage of students from Gaston/Lincoln counties represents 5.8 percent or less of the total number of AS students enrolled at neighboring institutions, these students indicate that Gaston College's AS program still has room to grow in attracting and retaining students from our service area. This may be done through increasing marketing efforts that make residents aware of the transferability of classes earned through the AS degree.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college *race/ethnicity* data.

Discuss program actions to enroll and retain underserved students or special population students.

Demographics A10400 during 2023-2024 Academic Year

Percent White 45%
Percent Asian 2%
Percent Black 13 %
Percent Hispanic 13%
Percent Unknown 24%

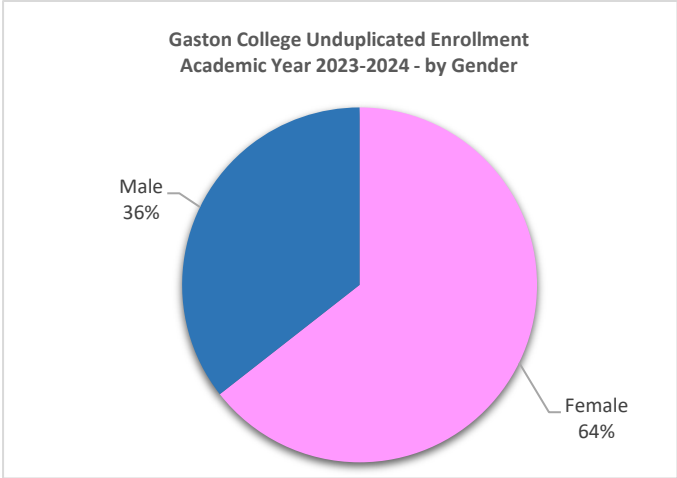

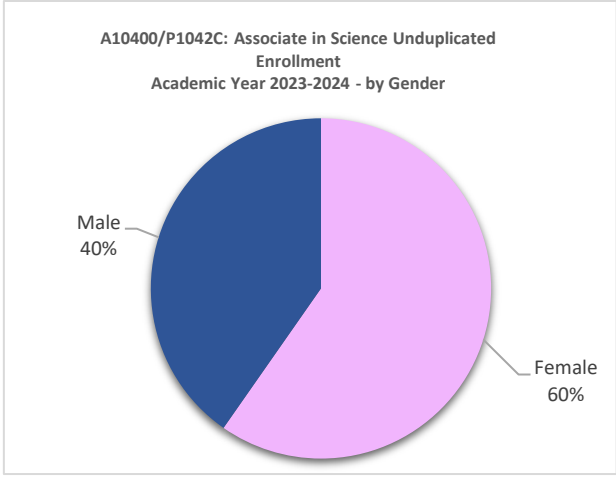

Demographics College-wide during 2023-2024 Academic Year

Percent White 55%
Percent Asian 2%
Percent Black 22 %
Percent Hispanic 15%
Percent Unknown 5%

Pronounced differences exist between several of the Race/Ethnicity categories at the program vs. college level. Some of these differences can be traced to the fact that over 24% of AE students chose not to indicate their race when enrolling to Gaston College, resulting in 24% of AE students being identified as Unknown. However, the percentage of students in the AS who identified as white is 10% less than the overall population, despite Black students being 9%

	less and Hispanic students being 2% less in the AS program than the general population.

<p>Demographic Enrollment Analysis by Age: Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for 2023-2024 as it pertains to age. For example, explain if the age breakout between the different groups is more, less, or the same as the college's overall age breakout.</p> <p>Discuss program actions to enroll and retain underrepresented students or special population students.</p>	<p>The demographics above indicate that enrollment based on age from 18-24 is higher for the Associate in Science program as for the college. The largest group by far consists of traditional college students from 18-24 years old.</p> <p>Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are an early adopter of the North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.</p>
---	---

Progress: Course and Grade Distributions Analysis

	Explanation
<p>Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Course sequencing is a high priority within the Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A course matrix of semester offerings is provided to college program leaders.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p> <p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes</p>

	Explanation
	<p>completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible.</p> <p>Based on current data, the Arts and Sciences course success rate is 89%.</p> <p>Currently, courses with low enrollments within A&S include the following:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>While there are several classes that have low enrollment, most classes have more than 10 students per section. The courses with low enrollment are managed well by providing only one section of that course.</p>
<p>Curriculum/Course Materials</p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements or total credit hours have been reviewed or revised within the last two years. This process is carried out through collaboration of department leads, program chairs, divisional deans, and the Curriculum Committee.</p> <p>One significant curriculum revision that will be enacted in the next two years is the launch of a state-mandated Development English co-requisite class, ENG 045, which will replace the current version of developmental instruction covered in a pre-requisite, ENG 002, and co-requisite, ENG 011. ENG 045 will serve students who have a high school GPA of 2.79 or below. Another curriculum change will occur as the current developmental math process will be replaced by the MAT Department's choice of one of the NCCCS's recommended options during the next assessment cycle.</p> <p>A small number of AE classes are offered in area high schools. Instructors deliver the same content, with no changes in rigor or quality, in classes delivered on high school campuses. This is verified by internal</p>

	Explanation
	audits regularly conducted by departmental leads, program chairs, and Distance Education personnel.
<p>Modality:</p> <p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs and to increase the ability to hold more in-person labs throughout the week. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility and better use of lab space.</p> <p>The Math Department has expanded its online offering of prerequisite and corequisite classes to reduce the number of days a student has to be on campus. The English Department has also reworked schedules to include corequisite ENG 011 classes that occur on the same days as the seated portions of ENG 111 sections to help reduce the number of days a student is required to be on-campus.</p> <p>The Arts and Sciences division has expanded the number of HyFlex options to include ACA, EDU, ENG, PHY, and HIS classes to better meet the needs of students.</p> <p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving instruction in other professional development opportunities, such as QM and ACUE.</p> <p>The following faculty in Arts and Sciences have at least 1 course certified by Quality Matters:</p> <ul style="list-style-type: none"> • Tonia Broome (MAT-152) • Melanie Dekerlegand (ENG-111) • Michele Domenech (ENG-112) • Hisayo Tokura Gallo (PSY 241) • Leslie Huss (MAT-171) • Dr. Lori Metcalf (PSY-150) • Ed Pardue (SOC-210) • Judith Porter (MUS-110)

	Explanation
	<ul style="list-style-type: none"> • Jeff Pruett (HIS 111) • Susan Whittemore (BIO-111) • Dr. Patricia Williams (BIO 275) • Dr. Heather Woodson (EDU-243) • Chris Ziemba-Tolbert (ACA-122) • Jeff Pruett (HIS-111) • Hisayo Tokura-Gallo (PSY-241) <p>The following faculty in Arts and Sciences have received certification to be Certified Peer Reviewers for Quality Matters</p> <ul style="list-style-type: none"> • Dr. Patricia Williams • Ginger Black • Chris Ziemba-Tolbert • Katie Jordan <p>The following faculty in Arts and Sciences has received certification to be a Master Reviewer for Quality Matters</p> <ul style="list-style-type: none"> • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have earned the Full Online Teaching Certification (7-course program) for Quality Matters:</p> <ul style="list-style-type: none"> • Ginger Black • Dr. Patricia Williams • Katie Jordan <p>The following faculty in Arts and Sciences have completed Professional Development in Quality Matters:</p> <ul style="list-style-type: none"> • Marguerite Bishop (IYOC & APPQMR) • Brian Bookout (IYOC & APPQMR) • Tonia Broome (IYOC & APPQMR) • Penny Brower (IYOC & APPQMR) • Heather Bruch (IYOC) • Amy Chaney (IYOC, APPQMR, & 7th Ed Update) • Melanie Dekerlegand (IYOC & APPQMR) • Keith Denson (IYOC & APPQMR) • Gerri Dobbins (IYOC & APPQMR) • Michele Domenech (IYOC & APPQMR) • Hisayo Tokura-Gallo (IYOC & APPQMR & 7th Ed Update) • Mary Gourley (IYOC & APPQMR) • Leslie Huss (IYOC & APPQMR)

	Explanation
	<ul style="list-style-type: none"> • Dr. Shannon Landrum (IYOC) • Dr. Lori Metcalf (IYOC & APPQMR) • Mary Morton (IYOC & APPQMR) • Ed Pardue (IYOC, APPQMR, & 7th Ed Update) • Judith Porter (IYOC) • Jeffery Pruett (IYOC & APPQMR) • Dr. Chris Thurley (IYOC & APPQMR) • Susan Whittemore (IYOC & APPQMR) • Dr. Patricia Williams (DYOC, IYOC, APPQMR, 7th Ed Update) • Dr. Heather Woodson (IYOC & APPQMR) • Chris Ziemba-Tolbert (APPQMR) • Bianca Yavelak (IYOC & APPQMR) • Jodi Valencic-Zieverink (IYOC & APPQMR) • Ginger Black (IYOC, APPQMR, & 7th Ed Update) • Katie Jordan (IYOC, APPQMR, 7th Ed Update) • Michael Boone (IYOC & 7th Ed Update)
<p><u>Student Achievement:</u></p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Currently, courses with low enrollments within A&S:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> • The following courses had success rates lower than the divisional average of 89 - ACA 122; BIO 112, 155, 161, 163; CHM 103/130A, 151; COM 110, 231; EDU 119, 131, 146, 184, 221, 234, 280, 282; ENG 002, 011, 111; MAT 110, 121, 152, 172, 263; MUS 110; PSY 150; PHY 251, 252; REL 110 <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> • The following courses had withdrawal rates that exceeded the divisional average by more than five percent: ACA 122; ART 121; BIO 111, 112, 155, 161, 168, 169; CHM 130/130A, 151, 152, 251, 252; COM 110; EDU 119, 146, 151, 184, 187, 251, 279; ENG 002, 011, 112; HIS 112; MAT 003, 152, 172, 263, 271; MUS 110, 112; PSY 241; REL 110; SOC 225.

	Explanation
	<p>The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and several courses have been identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues.</p> <p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.</p>
<p>Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon Due to course evaluations being administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and in this evaluation cycle were 88-89%. Overall, student feedback for the program is positive. .</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024 academic year,</p>

	Explanation
	guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
A10400 Associate in Science	A10400	45%	66%
P1042C Associate in Science Pathway	P1042C	DNA	DNA

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See SLOs and curriculum map located in the Program review folder for AA, AS, and AE
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	<p>Program Retention A10400</p> <ul style="list-style-type: none"> Fall 2018 to Fall 2019 61% Fall 2019 to Fall 2020 53% Fall 2020 to Fall 2021 38% Fall 2021 to Fall 2022 54% Fall 2022 to Fall 2023 45% Fall 2023 to Spring 2024 66% <p>There was an increase in retention of new students of 21 percentage points from the previous year. Data for this academic program review is from Fall 2022 to Spring 2023.</p> <p>Program Retention P1042C</p> <ul style="list-style-type: none"> Fall 2018 to Fall 2019 52% Fall 2019 to Fall 2020 26% Fall 2020 to Fall 2021 39% Fall 2021 to Fall 2022 74% Fall 2022 to Fall 2023 - DNA Fall 2023 to Spring 2024 - DNA <p>Data is not available for this review cycle for P1042C.</p>

	Explanation
	<p>There remains a barrier to student progress for the P1042C which involves the uniqueness of the high school population. The student's goal may be to take a course or two and not to progress through the pathway. The P1042C pathway is for 11th and 12th-grade students only. If students enroll in the pathway in the fall of their senior year they would no longer be in this pathway or perhaps at Gaston College during the following, fall. Therefore, based on the population of students enrolled in the pathway we do not expect this retention rate to grow significantly in the future. One suggestion for improvement in this area would be to market to students during their senior year about the benefits of staying at Gaston College to complete their A.S degree program before going on to the university. This marketing suggestion could be done through a partnership with GC Marketing, College Now, and the Division of Arts and Sciences.</p>

Credential Earned – Academic Year 2023-2024 (*Achieving the Dream*)

Program Titles	Programs Code	2023SU	2023FA	2024SP	Grand Total
A10400 Associate in Science	A10400	21	19	73	113
P1042C Associate in Science Pathway	P1042C	0	0	0	0
	Grand Total	21	19	73	113

Trend Data - Credential Earned

Program Titles	Programs Code	2020-2021	2021-2022	2022-2023	2023-2024
A10400 Associate in Science	A10400	97	130	121	113

	Grand Total	97	130	121	113

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion?</p>	<p>A10400</p> <p>Headcount – 547</p> <p>Awards – 113</p> <p>Awards at the Highest Level – 113</p> <p>Awards to Headcount Ratio – 20.7%</p> <p>P1042C</p> <p>Headcount – 502</p> <p>Awards – 0</p> <p>Awards at the Highest Level – 0</p> <p>Awards to Headcount Ratio – 0</p> <p>Timely student completion has been a major objective for both the Division and the College. Specific initiatives, such as Completion by Design, Achieving the Dream, and NC-GPS, have provided the framework for improvement strategies. Students in A10500 have diversified goals for attending; completion of a credential is only one preference. Many students plan to transfer before fulfilling degree requirements. One strategy to encourage degree completion is dedicated advising for Arts and Sciences so students have one-on-one advising to help keep them on track within their pathway. In addition, the Watermark student retention system is a tool the Division of Arts and Sciences encourages faculty to use to ensure completion at the course level. This has led to the retention of more students within the Arts and Science division.</p>

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community?	This question is asked below. See below.
<p>Community:</p> <p>How valuable is this program to the community?</p> <p>How have we benefitted from community partnerships and what other opportunities exist for collaboration?</p>	<p>Part of the value of the Associate in Science program is that every student who graduates with an AS degree and then lives and works in the community is better equipped to think critically, communicate effectively through various means, identify and solve problems, and lead successfully because of the training they received at Gaston College. In that way, this program is impacting the Gaston College service area both in the present and potentially in the future.</p>

	Explanation
	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>An annual Transfer Advisory Committee is conducted with representatives from the main senior institutions for our transfer students. Transfer Admission Guarantees (TAGs) Co-Admission Programs have been developed with several public and private institutions in our area. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, judging area high school art competitions, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the community.</p>
<p>Uniqueness: What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>The Arts and Sciences Division effectively promotes the following unique qualities of the college/division, as seen by the trend of increased enrollment and increased FTEs:</p> <p>Gaston College participates in North Carolina Guided Pathways to Success (NC-GPS). As a result of this initiative, we have created streamlined pathways for students in the various degree programs. One of the benefits of NC-GPS is to create greater cost savings and efficiencies for students.</p> <p>Division faculty/staff participate in a robust marketing plan with the high school population as a target audience. This includes information tables at community events like football games and</p>

	Explanation
	<p>participation with partners such as public, charter and private high school at events like the annual Educators Breakfast. We continue to collaborate with senior institutions regarding the Transfer Advising Agreement (TAG) Co-Admission Programs and Baccalaureate Degree Plans (BDPs) to ensure a smooth transfer process.</p> <p>Additionally, student resources for this program are unique. Beyond our traditional learning center, we also have both a Writing Center and Math and Science Center staffed with professional academic coaches who hold a bachelor's degree or higher.</p> <p>Gaston College offers a SPARC Scholars program. This program is a scholarship initiative funded by the National Science Foundation and a private donor to help offset the unmet financial needs of Gaston College students. Scholarships up to \$10,000 per student, per year, are offered to select full-time Associate of Science and Associate of Engineering students, who plan to transfer to a four-year university after graduating from Gaston College; major in Science, Technology, Engineering, or Math (STEM); and who show academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also available to participants of the program. The amount awarded is determined based upon federal financial need.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, attend at least 8 globally designated events, and complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. Students who complete the program receive special recognition on their Gaston College transcript and receive a certificate of completion from UNC - Chapel Hill.</p>

	Explanation
	The first full Honors Program within Gaston College and the Arts and Sciences Division was launched during the 2023-2024 school year.

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Associate in Science (10400)	412.80	385.22	386.66	331.97	300.94
College Transfer Pathway Leading to an Associate in Science (1042C)	250.44	336.02	264.47	265.16	215.72

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
College Transfer (includes CCP Transfer Pathways & Biotech)	\$6,863,459.75	2603.4	\$10,802,789.22	\$3,939,329.47	2648.9	\$10,819,239.89	\$3,955,780.14

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>FTE Count A10400</p> <ul style="list-style-type: none"> 2018-2019 - 391.2 2019-2020 - 412.8 2020-2021 - 385.22 2021-2022 - 386.66 2022-2023 - 331.97 2023-2024 - 300.94 <p>There was a decrease in FTE of 31.03 FTE from 2022-2023 to 2023-2024.</p> <p>FTE Count P1042C</p> <ul style="list-style-type: none"> 2018-2019 - 109.59 2019-2020 - 250.4

	Explanation
	<ul style="list-style-type: none"> • 2020-2021 - 336.02 • 2021-2022 - 264.47 • 2022-2023 - 265.16 • 2023-2024 – 215.72 <p>There was a decrease in FTE of 49.44 FTE from 2022-2023 to 2023-2024.</p> <p>The Arts and Sciences Division consistently earns approximately half of the College FTEs. The return on investment for this program is consistently high; FTE income significantly outweighs the cost for running the program and faculty salaries.</p>

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>The Transfer Advisory Committee meets annually with representatives from the main senior institutions for GC transfer students. Transfer Admission Guarantees (TAGs) have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several of the private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, they must attend at least 8 globally designated events, and they must complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times</p>

	Explanation
	<p>annually. For 2023-2024, the Gaston College Study Abroad program traveled to Ireland and Switzerland. Students who complete the program receive special recognition on their Gaston College transcripts and receive a certificate of completion from UNC Chapel Hill.</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, Educators Breakfast, Science Fairs, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the area community.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	N/A

Program Review - A10400 Associate in Engineering

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Brian Bookout

Associate Dean: Dr. Patricia Williams

Program Code(s)/Name(s): Associate in Engineering

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A10500 Associate in Engineering

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The mission and purpose of the Associate in Engineering (AE) degree at Gaston College is to provide students with a transfer degree which allows for seamless entry to a senior institution engineering program. The degree plan includes required general education and prerequisite courses that are acceptable to all state funded Bachelor of Engineering programs. Students who follow the degree progression plan will meet the entrance requirements at all of the North Carolina public Bachelor of Science Engineering programs. Associate in Engineering graduates may then apply to any of these programs without taking additional and sometimes duplicative courses. Admission to Engineering programs is highly competitive and admission is not guaranteed.

The AE degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit of college transfer courses. Within the degree program, the students have the opportunity to achieve competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The Arts and Sciences Divisional Council (dean, associate deans, and department chairs) serves as the primary program review committee for this degree program. This group meets once or twice monthly depending upon current needs and activities. Additionally, an external Transfer Advisory Committee meets annually to review curricula, transfer issues, and other topics. This committee is composed of representatives of four-year institutions where Gaston College students may transfer.

Since the last program review, briefly discuss program strengths, areas of improvements, program needs, and program actions. If applicable, include program efforts to address recommendations from the last program review.

The following action items from the 2022-2023 program review cycle were addressed.

Meet the North Carolina Community College System Critical Success measures for student success rate in curriculum English and curriculum Math.

Two of the NCCCS critical success measures directly impacted by student success in the Associate in Arts program saw improvement in the NCCCS 2024 Performance Measures for Student Success Report. Relating to the NCCCS second performance measure, Credit English Success, the gateway course of ENG 111 saw improvement from 0.920 in the 2023 report, which put Gaston College in the Baseline category, to 1.039 in

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

the 2024 report, moving Gaston College to the Average Band Minimum category. Relating to the seventh performance measure, Transfer Performance, Gaston College moved from 0.994 (Average Band Minimum) to 1.012 (Average Band Maximum). Relating to the NCCCS third performance measure, College Level Math Success Rates, Gaston College performance decreased from the prior year. During the year, the MAT department formed a committee, Student Success Rate of College Level Math Team, that identified students who needed MAT 100+. These students were contacted and found to either have already completed their program of study, had left the college, or the information in the system was not updated to reflect the math that was needed. This process seemed to confuse the students and the faculty that were making the contacts. For the future, academic advisors need to strongly encourage students to enroll in a MAT 100+ course early in their time at Gaston College to further assist these students in completing College Level Math. The college has stayed in the same NCCCS band width of less than the college average but above the baseline.

Implement strategies to improve online learning and teaching.

Because demand for online classes occurs for all disciplines within the Associate in Arts program, continuing efforts have been made since the last program review to implement strategies to improve online learning and teaching. These efforts include divisional leadership presenting multiple workshops for specific departments, as well as for all faculty in the division.

In addition, several resources and guides for faculty in the Division of Arts and Sciences were created that focused on Regular Substantive Interaction (RSI), such as RSI Overview and Tips, RSI Instructor Self-Assessment for Online Courses, and Credit Hour versus Contact Hour in Online Courses to help faculty see the amount of hours in a given semester to help plan for their Activities and RSI. Divisional leadership also worked one-on-one with specific faculty who sought out individualized assistance throughout the year to address specific issues related to online instruction.

To develop, implement and promote the Gaston College Honors Program, an Honors Committee was created in Summer 2023, which met regularly through Fall 2023 and Spring 2024 to

- articulate a rationale for a revamped GC honors program and communicate that to the GC President's Council for approval,
- review and research honors programs at other community colleges in the NCCCS,
- determine honors program admission requirements,
- consider and determine program pathways to include one tailored for students who intend to transfer to four-year institutions and one for students who intend to graduate and enter the workforce,
- consider and determine requirements for each of the two pathways,
- identify grant opportunities and apply for an ITYC-NSF IUSE grant,
- create both mission and vision statements,
- survey faculty, evaluate survey responses and generate strategies and incentives to encourage more instructors to offer honors options,
- and develop honors program handbooks for both faculty and students.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Promoting transfer opportunities, the purpose on the Transfer Admission Guarantees (TAG) Co-Admission Program, occurred both on-campus and off.

- On-campus outreaches included an engaging bulletin board in a high traffic area of Robinson Classroom Building, the building where most classes related to the Associate in Arts program are held; a table at the GC Student Success Expo; information shared at the Gaston College Educators Breakfast; information included in the GC Leadership Gaston Scavenger Hunt; Fall Transfer Fair; College Now training event; SPARC – C3 interest meeting; GC Open House event; personal contact with SPARC-C3 students; Early College High School TAG Co-Admission event; SGA Spring 2024 welcome event; GECHS TAG Talk; Lincoln County HS 10th grade visit to GC; Rhino Roadmap information; GC Spring Transfer Fair; 49er Next Meeting; GC Spring Fest; and Senior Night.
- Off-campus TAG efforts included maintaining an information-rich website; Zoom meetings with a partner high school's counselor and partner private university to review and discuss aspects of the TAG program; information tables at area high school football games; presentation at a Lincoln County Teacher Cadet event; and campus visits to a local private college.

To meet the demands of higher enrollment and open faculty positions due to previous retirements/resignations, pressing needs for more English, Communications, and Mathematics faculty have been addressed with the addition of **two full-time English instructors, one full-time Communications instructor, and one full-time Mathematics instructor.**

Strengths:

The Associate of Engineering program remains an essential part of Gaston College academic programs, evident from the enrollment statistics. The courses within the Arts and Sciences (A&S) Division play a crucial role in all the degrees offered by the College. The Division continues to be at the forefront of statewide and national improvement initiatives. Given the interdependent nature of the Arts and Sciences Division, fostering collaboration with other programs and divisions at the College is a top priority and a significant strength. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data has been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.

The Division offers numerous valuable academic resources to support students in successfully completing their studies. It actively participates in various campus initiatives and activities, such as CoDE (Co-requisite Developmental Education), Gaston College Study Tours, Writing Center, Learning Center, MASC Center, Transfer Advising Center, Psi Beta, Gamma Beta Phi, Completion by Design, Achieving the Dream, NC College Transfer Program Association, STEM Persistence and Retention via Curricula, Centralization, and Cohorts (SPARC), Inquiry-Based Learning methods, and North Carolina Guided Pathways to Success (NC-GPS).

The Gaston College SPARC Scholars program is a scholarship initiative funded by the National Science Foundation (Grant Nos. 1355569, 1742128, 1833738) and a private donor to help alleviate the unmet financial needs of Gaston College students. Scholarships of up to \$10,000 per student per year are available

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

to selected full-time Associate of Science and Associate of Engineering students who intend to transfer to a four-year university, major in STEM fields (Science, Technology, Engineering, or Math), and demonstrate academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also accessible to program participants, with the awarded amount determined based on federal financial need. In addition to receiving scholarship support for their unmet financial needs, SPARC Scholars are part of a closely-knit learning community with specially designed course schedules, enabling them to collaborate with fellow scholars and faculty members. SPARC Scholars also engage in undergraduate research experiences, extracurricular events, field trips, and benefit from mentorship provided by selected faculty members.

Another noteworthy STEM program is Bridges to Baccalaureate (B2B), a grant program supported by the National Institutes of Health. This collaborative initiative involves Gaston College, Rowan Cabarrus Community College, and the University of North Carolina at Charlotte, providing paid research opportunities to students in A.S and A.E. programs. The program facilitates paid undergraduate research experiences with Gaston College faculty members and allows students to engage in research at UNCC, fostering research relationships with faculty mentors there. Additionally, students receive travel support and financial assistance to present their work at regional and national conferences across the United States.

Areas for Improvement:

The Arts and Sciences Division is always looking to enhance and improve the student experience. With continuous improvement in mind, several areas have been identified for further development. Additionally, divisional leaders will focus on providing further academic support to students in science and math courses, brainstorming ways to increase response rates for course evaluations and graduation surveys, improve seamless transfer to senior institutions, and reduce course withdrawal rates.

Improvement of online and hybrid instruction is an area of improvement throughout the A&S division. The increase in online classes has demonstrated the need for more professional development and training. An audit of all faculty over the past academic year provided insight into areas of strengths as well as areas for improvement. Throughout the academic year, many A&S faculty received specialized professional development for conducting high-quality online courses such as Blackboard and Accessibly Training, Quality Matters Training, MOE certification, ACUE, and A&S discipline-specific professional development. This initiative will be continued and strengthened through the division of Arts and Sciences. One area for improvement that will continue to be addressed in the upcoming academic year is RSI in online and hybrid courses.

Recruiting efforts to enroll students in the SPARC program need improvement. While great strides were made over the last academic year, there are still significant issues getting the word out to talented high school students and their parents. Each year, there are fewer first semester students in the program as students typically find out about the program by word of mouth after starting at the College or because students enter with College Now credits. At the high schools, specific science teachers have been the biggest supporters and recommended the program to students who would benefit from the program; however, the high school counselors do not typically do the same.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Needs:

- Rauch Science Building continues to be in desperate need of a new HVAC system due to dangerously high temperatures in the lab, which is a hazard with storing chemicals and materials in the lab. In addition, the greenhouse attached to Rauch continue to need repairs as it needs to be used for labs and resources.
- Arts and Sciences leadership will provide training for our faculty for the LMS upgrades and implementations.
- As Arts and Sciences continues to expand Lincoln Campus course offerings, leadership will assess, review, and monitor the classrooms to see if they meet student needs.
- Arts and Sciences has a critical need to hire more faculty in a variety of disciplines to meet the increasing number of course sections. This will allow us to provide more sections and times when courses could be offered to meet students' needs.

Actions:

- Continue to improve the North Carolina Community College System Critical Success measures for student success rate in curriculum English
- Meet the North Carolina Community College System Critical Success measure for curriculum Math
- Implement strategies to improve online learning and teaching, including LMS transition to Blackboard Ultra.
- Continue to expand the Honors Program and Transfer Admission Guarantee programs.
- Apply for grants to assist with supporting the Honors Program, Student Success initiatives, development of an online teaching and learning center, consortium with area community colleges and four-year institutions, and new SPARC offerings.

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis:</p> <p>Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>A comparison of the enrollment data from 2022-2023 to 2023-2024 indicates that enrollment is experiencing healthy growth in both A10500 In A10500, the number of individuals enrolled grew from 103 in 2022-23 to 131 in 2023-2024, which indicates an 21.4% percent increase.</p> <p>Both Full-Time and Part-Time pathways are updated and/or reviewed yearly.</p> <p>Like neighboring institutions CPCC, CVCC, and CCC, Gaston College's Associate in Engineering program requires 60 semester hours of approved college transfer courses with a grade of C or better in each course. Like those colleges, the AE degree emphasizes competence in reading, writing, oral communication, fundamental mathematical skills, critical thinking skills and basic computer use.</p> <p>Various strategies have been implemented to improve enrollment goals, improve the program for students, and improve course offerings.</p> <ul style="list-style-type: none"> • All courses within the Associate of Engineering degree pathway are sequenced to allow successful completion of the pathway that is both efficient for student completion and economical in terms of programing cost. • Foundational requirements are provided early in the program and promote completion of pre-requisite courses early in the program to ensure successful completion. • Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible. • Improving course offerings is an important goal within the Arts and Sciences.

				Explanation/Narrative				
				<ul style="list-style-type: none">To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules.Previous semester data has been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The Arts and Science division has created Hyflex course offerings in English and has added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students.				
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments. (Consider program demographic data compared to college wide demographic data.) New Question: Review program enrollment for A10500 at other institutions in our neighboring counties. Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Associate in Engineering at GC? Identify strategies for enrollment growth. When reviewing Spring 2024 student enrollment numbers of new & returning students, review the number of students enrolled at a neighboring institution that resides in our service area (Gaston & Lincoln counties), and determine if the program has effectively marketed the Associate in Engineering to students in and around our service area counties. The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC. Discuss program efforts (past or present) to address possible opportunities of enrollment growth.</p> <p style="text-align: center;">Associate in Engineering</p> <table><tr><td>A10500</td><td># of</td><td>Students</td><td>Students</td></tr></table>				A10500	# of	Students	Students	<p>Program's enrollment growth action(s) and/or comment(s) below: Demographics A10500 during 2023-2024 Academic Year Percent Female 18% Percent Male 82% Percent White 45% Percent Non-White 31% Percent Unknown 24%</p> <p>Compared to the college-wide population, the AE program has a greater number of male students (82% vs. 36% college-wide) and a lesser number of female students (18% vs. 64% college-wide). During the 2023-2024 academic year, more white than non-white students were enrolled in the AE degree program.</p> <p>The Arts and Sciences Division provides academic holistic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center.</p> <p>Cleveland CC had 0 (new and recurring students for Spring 2024).</p> <p>Catawba Valley CC had 48 (new and recurring students for Spring 2024); however, 3 students from Lincoln & 0 from Gaston, the GC service area, enrolled in the Associate in Engineering</p>
A10500	# of	Students	Students					

				Explanation/Narrative
	Students	From Gaston	From Lincoln	<p>program at CVCC. That number represents 6.2% percent of the total number of AE students at CVCC.</p> <p>The opportunity for program growth from CVCC is 3 students.</p> <p>Central Piedmont CC had 424 (new and recurring students Spring 2024); however, 2 students from Lincoln & 11 from Gaston, the GC service area, enrolled in the Associate in Engineering program at CPCC. That number represents 3.1 percent of the total number of AE students at CPCC.</p> <p>The opportunity for program growth from CPCC is 13.</p> <p>Program's enrollment growth action(s) and/or comment(s) below:</p> <p>While the percentage of students from Gaston/Lincoln counties represents 3.3 percent or less of the total number of AE students enrolled at neighboring institutions, these students indicate that Gaston College's AE program still has room to grow in attracting and retaining students from our service area. This may be done through increasing marketing efforts that make residents aware of the transferability of classes earned through the AE degree.</p>

CPCC	424	11	2	

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college *race/ethnicity* data.

Discuss program actions to enroll and retain underserved students or special population students.

Demographics A10500 during 2023-2024 Academic Year

Percent White 45%
Percent Asian 2%
Percent Black 13 %
Percent Hispanic 13%
Percent Unknown 24%

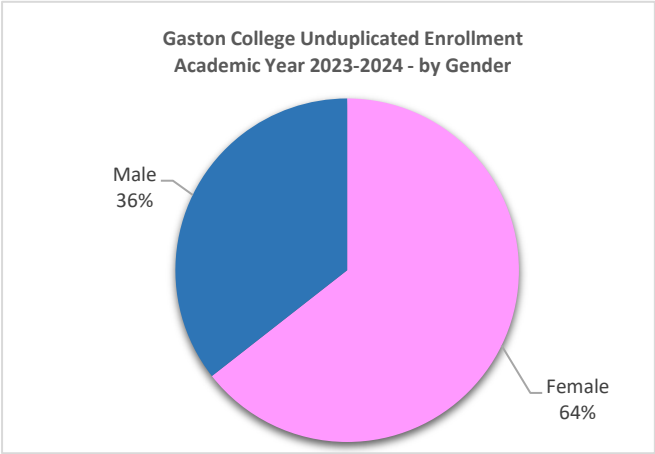

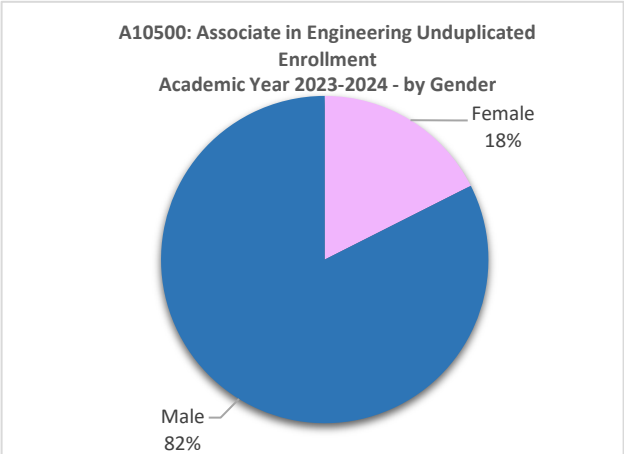

Demographics College-wide during 2023-2024 Academic Year

Percent White 55%
Percent Asian 2%
Percent Black 22 %
Percent Hispanic 15%
Percent Unknown 5%

Pronounced differences exist between several of the Race/Ethnicity categories at the program vs. college level. Some of these differences can be traced to the fact that over 24% of AE students chose not to indicate their race when enrolling to Gaston College, resulting in 24% of AE students being identified as Unknown. However, the percentage of students in the AE who identified as white is 10% less than the overall population,

	despite Black students being 9% less and Hispanic students being 2% less in the AE program than the general population.
--	---

Demographic Enrollment Analysis by Gender:

<p>College Wide – Demographics 2023-2024</p>  <p>Gaston College Unduplicated Enrollment Academic Year 2023-2024 - by Gender</p> <table border="1"> <thead> <tr> <th>Gender</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>Male</td> <td>36%</td> </tr> <tr> <td>Female</td> <td>64%</td> </tr> </tbody> </table>	Gender	Percentage	Male	36%	Female	64%	<p>Program – Demographics 2023-2024</p>  <p>A10500: Associate in Engineering Unduplicated Enrollment Academic Year 2023-2024 - by Gender</p> <table border="1"> <thead> <tr> <th>Gender</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>Male</td> <td>82%</td> </tr> <tr> <td>Female</td> <td>18%</td> </tr> </tbody> </table>	Gender	Percentage	Male	82%	Female	18%
Gender	Percentage												
Male	36%												
Female	64%												
Gender	Percentage												
Male	82%												
Female	18%												

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the gender breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Demographics A10500 during 2023-2024 Academic Year</p> <p>Percent Female 18%</p> <p>Percent Male 82%</p> <p>Demographics College-wide during 2023-2024 Academic Year</p> <p>Percent Female 64%</p> <p>Percent Male 36%</p> <p>During the academic year 2023-2024, there were significantly more male students in the A10500 programs than female, which was inconsistent with the College demographics. Interestingly, the percentage of men in the AE program is 46 percentage points higher than the percentage in the college overall.</p> <p>Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science</p>
---	--

	<p>Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are a participant in the current North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.</p> <p>The division plans to use marketing efforts to ensure all students in our service area understand the value of attending GC. Divisional leadership remains committed to making stakeholders within the service area aware of all A&S programs, including the Associate in Engineering program, through participation in outward facing events such as the GC Student Success Expo; the Gaston College Educators Breakfast; the Fall Transfer Fair; College Now training events; GC Open House events; Early College High School TAG Co-Admission events; SGA welcome events; Lincoln County HS student visits to GC; GC Spring Fest; Lincoln County Apple Festival, and GC Senior Night.</p>

18-24	83%																				
25-44	12%																				
< 18	5%																				
45-64	0%																				

<p>Demographic Enrollment Analysis by Age: Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for 2023-2024 as it pertains to age. For example, explain if the age breakout between the different groups is more, less, or the same as the college's overall age breakout.</p> <p>Discuss program actions to enroll and retain underrepresented students or special population students.</p>	<p>The demographics above indicate that enrollment based on age is 24 percentage points higher for the Associate in Engineering program as for the college. The largest group by far consists of traditional college students from 18-24 years old.</p> <p>Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are an early adopter of the North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.</p>
---	---

Progress: Course and Grade Distributions Analysis

	Explanation
<p>Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Course sequencing is a high priority within the Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A course matrix of semester offerings is provided to college program leaders.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p>

	Explanation
	<p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible.</p> <p>Based on current data, the Arts and Sciences course success rate is 89%.</p> <p>Currently, courses with low enrollments within A&S include the following:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>While there are several classes that have low enrollment, most classes have more than 10 students per section. The courses with low enrollment are managed well by providing only one section of that course.</p>
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements or total credit hours have been reviewed or revised within the last two years. This process is carried out through collaboration of department leads, program chairs, divisional deans, and the Curriculum Committee.</p> <p>One significant curriculum revision that will be enacted in the next two years is the launch of a state-mandated Development English co-requisite class, ENG 045, which will replace the current version of developmental instruction covered in a pre-requisite, ENG 002, and co-requisite, ENG 011. ENG 045 will serve students who have a high school GPA of 2.79 or below. Another curriculum change will occur as the current developmental math process will be replaced by the MAT Department's choice of one of the NCCCS's recommended options during the next assessment cycle.</p>

	Explanation
	<p>A small number of AE classes are offered in area high schools. Instructors deliver the same content, with no changes in rigor or quality, in classes delivered on high school campuses. This is verified by internal audits regularly conducted by departmental leads, program chairs, and Distance Education personnel.</p>
<p>Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs and to increase the ability to hold more in-person labs throughout the week. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility and better use of lab space.</p> <p>The Math Department has expanded its online offering of prerequisite and corequisite classes to reduce the number of days a student has to be on campus. The English Department has also reworked schedules to include corequisite ENG 011 classes that occur on the same days as the seated portions of ENG 111 sections to help reduce the number of days a student is required to be on-campus.</p> <p>The Arts and Sciences division has expanded the number of HyFlex options to include ACA, EDU, ENG, PHY, and HIS classes to better meet the needs of students.</p> <p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving instruction in other professional development opportunities, such as QM and ACUE.</p>

	Explanation
	<p>The following faculty in Arts and Sciences have at least 1 course certified by Quality Matters:</p> <ul style="list-style-type: none"> • Tonia Broome (MAT-152) • Melanie Dekerlegand (ENG-111) • Michele Domenech (ENG-112) • Hisayo Tokura Gallo (PSY 241) • Leslie Huss (MAT-171) • Dr. Lori Metcalf (PSY-150) • Ed Pardue (SOC-210) • Judith Porter (MUS-110) • Jeff Pruett (HIS 111) • Susan Whittemore (BIO-111) • Dr. Patricia Williams (BIO 275) • Dr. Heather Woodson (EDU-243) • Chris Ziemba-Tolbert (ACA-122) • Jeff Pruett (HIS-111) • Hisayo Tokura-Gallo (PSY-241) <p>The following faculty in Arts and Sciences have received certification to be Certified Peer Reviewers for Quality Matters</p> <ul style="list-style-type: none"> • Dr. Patricia Williams • Ginger Black • Chris Ziemba-Tolbert • Katie Jordan <p>The following faculty in Arts and Sciences has received certification to be a Master Reviewer for Quality Matters</p> <ul style="list-style-type: none"> • Dr. Patricia Williams <p>The following faculty in Arts and Sciences have earned the Full Online Teaching Certification (7-course program) for Quality Matters:</p> <ul style="list-style-type: none"> • Ginger Black • Dr. Patricia Williams • Katie Jordan <p>The following faculty in Arts and Sciences have completed Professional Development in Quality Matters:</p> <ul style="list-style-type: none"> • Marguerite Bishop (IYOC & APPQMR) • Brian Bookout (IYOC & APPQMR) • Tonia Broome (IYOC & APPQMR) • Penny Brower (IYOC & APPQMR) • Heather Bruch (IYOC)

<p>Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Currently, courses with low enrollments within A&S:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> • The following courses had success rates lower than the divisional average of 89 - ACA 122; BIO 112, 155, 161, 163; CHM 103/130A, 151; COM 110, 231; EDU 119, 131, 146, 184, 221, 234, 280, 282; ENG

	Explanation
	<p>002, 011, 111; MAT 110, 121, 152, 172, 263; MUS 110; PSY 150; PHY 251, 252; REL 110</p> <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> The following courses had withdrawal rates that exceeded the divisional average by more than five percent: ACA 122; ART 121; BIO 111, 112, 155, 161, 168, 169; CHM 130/130A, 151, 152, 251, 252; COM 110; EDU 119, 146, 151, 184, 187, 251, 279; ENG 002, 011, 112; HIS 112; MAT 003, 152, 172, 263, 271; MUS 110, 112; PSY 241; REL 110; SOC 225. <p>The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and several courses have been identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues.</p> <p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.</p>
<p>Evaluation:</p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon Due to course evaluations being administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and in this evaluation</p>

	Explanation
	<p>cycle were 88-89%. Overall, student feedback for the program is positive. .</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024 academic year, guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.</p>

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
Associate in Engineering (A10500)	A10500	59%	74%

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See SLOs and curriculum map located in the Program review folder for AA, AS, and AE.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	Program Retention A10500 <ul style="list-style-type: none"> Fall 2019 to Fall 2020 62% Fall 2020 to Fall 2021 50% Fall 2021 to Fall 2022 40% Fall 2022 to Fall 2023 78% Fall 2023 to Fall 2024 74% <p>Retention of new students in the AE program decreased four percentage points from Fall 2023 to Fall 2024.</p>

	Explanation
	The Associate in Engineering program experienced a slight decrease in fall-to-fall retention rates. The AE program tends to be a challenging program for students. Barriers include, but are not limited to higher-level math and science requirements and the hurdle to get past pre-req courses.

Credential Earned – Academic Year 2023-2024 (*Achieving the Dream*)

Program Titles	Programs Code	2023SU	2023FA	2024SP	Grand Total
Associate in Engineering (A10500)	A10500	0	2	9	11
	Grand Total	0	2	9	11

Trend Data - Credential Earned

Program Titles	Programs Code	2020-2021	2021-2022	2022-2023	2023-2024
Associate in Engineering (A10500)	A10500	10	8	9	11
	Grand Total	10	8	9	11

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion?</p>	<p>A10500</p> <p>Headcount – 131</p> <p>Awards – 11</p> <p>Awards at the Highest Level – 11</p> <p>Awards to Headcount Ratio – 8.4%</p> <p>Timely student completion has been a major objective for both the Division and the College. Specific initiatives, such as Completion by Design, Achieving the Dream, and NC-GPS, have provided the framework for improvement strategies. Students in A10500 have diversified goals for attending; completion of a credential is only one preference. Many students plan to transfer before fulfilling degree requirements. One strategy to encourage degree completion is dedicated advising for Arts and Sciences so students have one-on-one advising to help keep them on track within their pathway. In addition, the Watermark student retention system is a tool the Division of Arts and</p>

	Explanation
	Sciences encourages faculty to use to ensure completion at the course level. This has led to the retention of more students within the Arts and Science division.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community?	This question is asked below. See answer below
Community: How valuable is this program to the community? How have we benefitted from community partnerships and what other opportunities exist for collaboration?	<p>Part of the value of the Associate in Engineering program is that every student who graduates with an AE degree and then lives and works in the community is better equipped to think critically, communicate effectively through various means, identify and solve problems, and lead successfully because of the training they received at Gaston College. In that way, this program is impacting the Gaston College service area both in the present and potentially in the future</p> <p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>An annual Transfer Advisory Committee is conducted with representatives from the main senior institutions for our transfer students. Transfer Admission Guarantees (TAGs) Co-Admission Programs have been developed with several public and private institutions in our area. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, judging area high school art competitions, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish</p>

	Explanation
	and build strong relationships with the community.
<p>Uniqueness:</p> <p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>The Arts and Sciences Division effectively promotes the following unique qualities of the college/division, as seen by the trend of increased enrollment and increased FTEs:</p> <p>Gaston College participates in North Carolina Guided Pathways to Success (NC-GPS). As a result of this initiative, we have created streamlined pathways for students in the various degree programs. One of the benefits of NC-GPS is to create greater cost savings and efficiencies for students.</p> <p>Division faculty/staff participate in a robust marketing plan with the high school population as a target audience. This includes information tables at community events like football games and participation with partners such as public, charter and private high school at events like the annual Educators Breakfast. We continue to collaborate with senior institutions regarding the Transfer Advising Agreement (TAG) Co-Admission Programs and Baccalaureate Degree Plans (BDPs) to ensure a smooth transfer process.</p> <p>Additionally, student resources for this program are unique. Beyond our traditional learning center, we also have both a Writing Center and Math and Science Center staffed with professional academic coaches who hold a bachelor's degree or higher.</p> <p>Gaston College offers a SPARC Scholars program. This program is a scholarship initiative funded by the National Science Foundation and a private donor to help offset the unmet financial needs of Gaston College students. Scholarships up to \$10,000 per student, per year, are offered to select full-time Associate of Science and Associate of Engineering students, who plan to transfer to a four-year university after graduating from Gaston College; major in Science, Technology, Engineering, or Math (STEM); and who show academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also available to</p>

	Explanation
	<p>participants of the program. The amount awarded is determined based upon federal financial need.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, attend at least 8 globally designated events, and complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. Students who complete the program receive special recognition on their Gaston College transcript and receive a certificate of completion from UNC - Chapel Hill.</p> <p>The first full Honors Program within Gaston College and the Arts and Sciences Division was launched during the 2023-2024 school year.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Associate in Engineering (10500)	79.44	69.03	65.78	70.25	87.47

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
College Transfer (includes CCP Transfer Pathways & Biotech)	\$6,863,459.75	2603.4	\$10,802,789.22	\$3,939,329.47	2648.9	\$10,819,239.89	\$3,955,780.14

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>FTE Count A10500</p> <ul style="list-style-type: none">• 2019-2020 79.44• 2020-2021 69.03• 2021-2022 65.78• 2022-2023 70.25• 2023-2024 87.47 <p>There was an increase in FTE of 17.22 FTE from 2022-2023 to 2023-2024, which represents the highest total since the implementation of the AE program.</p> <p>The Arts and Sciences Division consistently earns approximately half of the College FTEs. The return on investment for this program is consistently high; FTE income significantly outweighs the cost for running the program and faculty salaries.</p>

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>The Transfer Advisory Committee meets annually with representatives from the main senior institutions for GC transfer students. Transfer Admission Guarantees (TAGs) have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several of the private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, they must attend at least 8</p>

	Explanation
	<p>globally designated events, and they must complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. For 2023-2024, the Gaston College Study Abroad program traveled to Ireland and Switzerland. Students who complete the program receive special recognition on their Gaston College transcripts and receive a certificate of completion from UNC Chapel Hill.</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, Educators Breakfast, Science Fairs, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the area community.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	N/A

Program Learning Outcomes – Transfer Programs of Study

Upon successful completion of any associate degree program at Gaston College, students will demonstrate general education competencies in the following areas:

- **Competency 1:** Information Literacy and Educational Technology
- **Competency 2:** Communication
- **Competency 3:** Mathematical and Scientific Reasoning
- **Competency 4:** Humanities and Fine Arts
- **Competency 5:** Social and Behavioral Sciences

Competency 1: Information Literacy and Educational Technology

Students will meet this competency through the completion of both objectives 1a and 1b.

- CCSSE Survey Results

Objective 1a: Access, use, and evaluate information in a variety of formats.

- ACA 122

Objective 1b: Use educational technologies to achieve academic and work-related goals.

- ACA 111 – course was not taught in 2023 – 2024 and currently no longer offered
- ACA 122

Competency 2: Communication

Students will meet this competency through assessments in both ENG 111 and ENG 112, ENG 114, COM 120, or COM 231.

Objective: Communicate effectively through writing, reading, and speaking

- COM 120
- COM 231
- ENG 111
- ENG 112
- ENG 114
- CCSSE Survey Results

Competency 3: Mathematical and Scientific Reasoning

Students will meet this competency through the completion of objectives 3a, 3b, or 3c.

Objective 3a: Analyze mathematical problems and quantitative data to make logical decisions.

- MAT 110
- MAT 121
- MAT 143
- MAT 152
- MAT 171

Objective 3b: Demonstrate knowledge of the natural sciences and use this knowledge to analyze problems and make rational decisions.

- BIO 110
- BIO 111
- BIO 161
- BIO 168
- CHM 130
- CHM 131/131A – course was not taught in 2023 - 2024
- CHM 151
- GEL 111
- PHY 110/PHY 110A- course was not taught in 2023 - 2024

Objective 3c: Demonstrate knowledge of the role and function of computers to solve problems.

- CIS 110
- CIS 115

Competency 4: Humanities and Fine Arts

Students will meet this competency through the completion of objectives 4a, 4b, or 4c.

Objective 4a: Demonstrate knowledge of philosophical beliefs, assumptions, and values.

- PHI 215
- PHI 240

Objective 4b: Demonstrate knowledge of cultural and artistic significance within the fine arts.

- ART 111
- ART 114
- ART 115
- MUS 110
- MUS 112

Objective 4c: Demonstrate knowledge of literary works within a historical and cultural context.

- ENG 231
- ENG 232
- ENG 241
- ENG 242

Competency 5: Social and Behavioral Sciences

Students will meet this competency through the completion of objectives 5a or 5b.

- CCSSE Survey Results

Objective 5a: Demonstrate knowledge of the historical patterns in political, cultural, and economic life and their impact on human societies.

- ECO 251

- ECO 252
- HIS 111
- HIS 112
- HIS 131
- HIS 132
- POL 120

Objective 5b: Demonstrate knowledge of the reciprocal interactions among self, society, and the environment.

- PSY 150
- SOC 210
- SOC 220

The Gaston College General Education Competencies also represent the program learning outcomes for the following degrees within the Arts and Sciences Division

- A10100 Associate in Arts
- A1010T Associate in Arts in Teacher Preparation
- A1040T Associate in Science in Teacher Preparation
- A10300 Associate in General Education
- A1030N Associate in General Education Nursing
- A10400 Associate in Science
- A10500 Associate in Engineering

Overall Assessment of General Education Competencies

The following rubric is used to holistically evaluate general education competencies. The benchmark is an overall score of 3 out of 4 or 75% (a rating of “good”). The rubric scoring range is shown below:

Improvement Needed (1)	Fair (2)	Good (3)	Excellent (4)
0-59% success rate on the course assessment activity	60-74% success rate on the course assessment activity	75-84% success rate on the course assessment activity	85-100% success rate on the course assessment activity

Summary of General Education Competencies	Total Points Achieved
Competency 1: Information Literacy and Educational Technology	8/8 = 100%
Objective 1a. Access, use, and evaluate information in a variety of formats.	4/4
Objective 1b. Use educational technologies to achieve academic and work-related goals.	4/4
Competency 2: Communication	14/16 = 87.5%
Objective: Communicate effectively through writing, reading, and speaking	14/16
Competency 3: Mathematics and Scientific Reasoning	41/56 = 73%
Objective 3a: Analyze mathematical problems and quantitative data to make logical decisions.	12/20
Objective 3b: Demonstrate knowledge of the natural sciences and use this knowledge to analyze problems and make rational decisions.	21/28
Objective 3c: Demonstrate knowledge of the role and function of computers to solve problems.	8/8
Competency 4: Humanities and Fine Arts	28/32 = 87.5%
Objective 4a: Demonstrate knowledge of philosophical and/or religious beliefs, assumptions, and values.	6/8
Objective 4b: Demonstrate knowledge of cultural and artistic significance within the fine arts.	19/20
Objective 4c: Demonstrate knowledge of literary works within a historical and cultural context.	3/4
Competency 5: Social and Behavioral Sciences	38/40 = 95%
Objective 5a: Demonstrate knowledge of the historical patterns in political, cultural, and economic life and their impact on human societies.	28/28
Objective 5b: Demonstrate knowledge of the reciprocal interactions among self, society, and the environment.	10/12
Total Achieved/Total Possible	129/152
Overall Rubric Score	84.86% (3)

Program Review - Associate in Fine Arts in Visual Arts (A10600)

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Brian Bookout

Program Chair: Beth McCall

Program Code(s)/Name(s): Associate in Fine Arts Visual Arts

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A10600 Associate in Fine Arts Visual Arts

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The mission and purpose of the Associate in Fine Arts in Visual Arts (AFAVA) degree at Gaston College is to provide students with a transfer degree which allows for seamless entry to a senior institution offering a Bachelor of Fine Arts (BFA) degree or experience to enter the workforce in an art-related field. The Associate in Fine Arts in Visual Arts to Bachelor of Fine Arts Articulation Agreement (AFAVA to BFA) is an agreement jointly created by the North Carolina Community College System and the University of North Carolina BFA visual arts programs. The AFAVA to BFA is focused on developing seamless transfer for students who begin visual arts studies at a community college and then transfer to one of the UNC BFA visual arts programs. There are seven BFA-granting institutions within the UNC system whose focus is on the visual arts: Appalachian State University – BFA in Studio Art, East Carolina State University – BFA in Art, UNC Asheville – BFA in Art, UNC Chapel Hill – BFA in Studio Art, UNC Charlotte – BFA in Art, UNC Greensboro – BFA in Studio Art, Western Carolina University – BFA in Art. This agreement requires Gaston College graduates to obtain a grade of “C” or better in each course and an overall GPA of at least 2.0 on a 4.0 scale in order to transfer.

The AFAVA degree shall be granted for a planned program of study consisting of a minimum of 60-61 semester hours of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

In addition to transferring to BFA programs, the AFAVA degree program prepares students for many career options in art and design. Each participant receives foundational training for entry into a career as an art professional. Students who transfer from Gaston College pursue majors that include the following: Animation, Architecture, Art Education, Art History, Art Therapy, Computer Art/Design, Commercial Art, Design, Fashion Design, Fine Arts, Graphic Design, Illustration, Interior Design, Museum Studies, Photography, Studio Arts, Visual Communications, and Web Design.

Students completing the AFAVA program meet the following program learning outcomes:

1. Demonstrate use of the elements of art and apply the principles of design to create original compositions.
2. Produce a body of work that demonstrates fundamental competence with traditional and current art methods, processes, and techniques in a variety of art media.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

3. Recognize and analyze the aesthetic, social, and historical context of major and diverse artistic periods and styles.
4. Use the terminology of visual arts to communicate effectively through writing and/or speaking.
5. Demonstrate competence in the preparation of a digital portfolio and a culminating pre-graduation exhibition.

A culminating show of student work will be required for graduation.

The art faculty serve as the primary program review committee for this degree program. This group meets regularly depending upon current needs and activities. Additionally, an external AFAVA Advisory Board meets annually to review curricula, recruitment, and other topics. This committee is composed of representatives from the community, local school systems, graduates, and current faculty.

The following action items from the 2023-2024 program review cycle were addressed.

1. After evaluating the effectiveness of having an AFAVA orientation video created in 2022-2023 professionally edited and distributed to area high schools to aid in student recruitment, the art department ultimately decided against this strategy because the video appeared too staged and lacked the level of engagement the department had hoped to achieve. Despite initial efforts to develop a compelling script and record content, the product did not align with our goal of providing a dynamic and authentic representation of the department. The presentation felt overly rehearsed, which we believed would not resonate well with prospective students, leading to concerns that it would not effectively capture their interest or enthusiasm for our program.
2. In an effort to educate the GC service area about the GC AFAVA program and recruit students to the program, art department instructors attended the on-campus high school art show the art department hosted in Spring 2024 to meet and talk with local high school art students and their families about Gaston College and about the AFAVA program.
3. The Art Department requested the purchase of two more computers for the digital design/digital photography courses, but the request was denied due to institutional budget constraints.
4. While the goal of purchasing a dedicated touchscreen Smartboard for the printmaking studio did not occur in this evaluation cycle, a workaround was found in that the Smartboard used for painting classes is being shared with printmaking.

Strengths

Survey art courses are a vital part of the general education component for most degree programs at the college. There is consistently a high demand for these courses. In addition, most of the studio classes are full, reflecting both the high demand for hands-on, experiential learning opportunities in the arts and the growing interest among students in developing their creative and technical skills within the department. Data analysis of previous semesters has been conducted to determine student demand related to course needs.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The program is housed in a stand-alone art building. Additionally, a student art gallery and a professional art gallery attract local and national exhibiting artists. The program employs faculty with a diverse range of skills. Students receive individual attention from experts in a variety of mediums (computers, sculpture, painting, ceramics, printmaking, etc.).

Numerous impactful academic resources are offered to aid in students' successful completion. The Division remains active in a variety of campus initiatives and activities: NCCCS Developmental Redesign; Gaston College Study Tours; Writing Center; Learning Center, MASC Center, Transfer Advising Center; Psi Beta; Gamma Beta Phi; Completion by Design; Achieving the Dream; NC College Transfer Program Association; STEM Persistence and Retention via Curricula, Centralization, and Cohorts (SPARC); Inquiry Based Learning methods; and North Carolina Guided Pathways to Success (NC-GPS).

Needs

There is a continued need for an enhanced targeted marketing plan for the recruitment to the AFAVA program and awareness of the program-specific scholarship opportunity. While facilities are adequate for current enrollment, growth is limited due to the size of the building and studio spaces.

Actions for 2024-25

The Art Department goal is to update the GC website as a key recruitment tool, introducing art faculty, what each instructor does, and the facilities. The action plan includes several key steps: first, creating faculty pages that feature individual contact information, faculty images, examples of faculty artwork, short bios, and teaching philosophies. The updated website will also showcase the department's facilities with detailed information and images. To further engage prospective students, examples of previous student work, information about the Art Club, and pictures from events will be included. Additionally, information about both the student gallery housed in the D.F Beam Center for Visual Arts and the professional gallery housed in Rauch Science and Fine Arts Building. This update will help present an engaging view of the department, making it an attractive destination for future art students.

Entry – Program Enrollment

	Explanation/Narrative
<p><u>Enrollment Analysis:</u></p> <p>Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining?</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>A comparison of the enrollment data from 2022-2023 to 2023-2024 indicates that enrollment is experiencing steady growth in A10600. The number of individuals enrolled grew from 87 in 2022-23 to 93 in 2023-2024, which indicates a 6.89% percent increase. This growth is consistent with the trend in other Arts and Sciences programs.</p> <p>In an effort to improve, the AFAVA program is evaluated yearly through GC processes such as the Overall Assessment, which documents success and improvement needed in program learning outcomes, and the Program Review process.</p> <p>Neighboring institutions that offer an AFAVA degree include Central Piedmont Community College (CPCC), Cleveland Community College (CCC) and Catawba Valley Community College (CVCC).</p> <p>Just as Gaston College requires 60-61 hours to earn the AFAVA, CPCC's degree requires 60 hours of instruction. While GC's AFAVA requires 25 hours of general education courses, CPCC requires 28 semester hours of general education core courses and 32 semester hours of courses in a wide selection of ART classes, compared to GC's requirement of 30. The remaining five to six hours of GC's requirement are elective hours that allow students to choose from various ART courses, SPA classes or a Work-Based Learning credit.</p> <p>CCC and GC require the same number of hours to earn the AFAVA degree (60-61). The list of/required number of general education courses is the same. These include ENG 111/112, 6 hours of Humanities/Fine Arts, 6 hours of Social/Behavioral Sciences, 4 hours of Natural Sciences, 3-4 hours of Mathematics, and ACA 122. While GC requires six</p>

	Explanation/Narrative
	<p>specific required ART classes, CCC requires five. The other 19 hours of CCC's degree are elective ART classes with MAT 172 as an option. Their published information does not indicate the need for hours in a foreign language.</p> <p>CVCC requires 63-65 hours to complete the AFAVA degree compared to GC's required 60-61 credit hours. Of those 63-65 hours for CVCC students, 30-31 hours are required in general education classes. CVCC has only five required ART classes (ART 114, 115, 121, 122, 131). GC requires those five, but also requires ART 214 (Portfolio and Resume). While GC points AFAVA students to a wide variety of ART classes, SPA 111/112, or a Work-Based Learning credit to complete their elective hours, CVCC points students to 18-20 more hours of general education classes to complete elective hours.</p> <p>The art department regularly hosts artist receptions, in which artists engage with current students and other interested students and community members who attend. Members of the department interact with community art events and high school competitions as judges, which creates opportunities to share GC Art Department information. Each spring, the department hosts an area high school art exhibition, which draws 75-100 students and community members to campus and creates opportunities for conversations between faculty members and prospective students and their families.</p>
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>Review program enrollment for A10600 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Associate in Fine Arts Visual Arts at GC? Identify strategies for enrollment growth.</p>	<p>Demographic Data – A10600 – 2023-2024 Academic Year</p> <p>Percent Female 67% Percent Male 33% Percent White 44% Percent Non-White 36.55% (This percentage included those categorized as Non-US Residents). Percent Unknown 19.45%</p> <p>Compared to the college-wide population, the AFAVA program has slightly fewer male students (33% vs. 36% college-wide) and a slightly greater</p>

	Explanation/Narrative																
<p>When reviewing Spring 2024 student enrollment numbers of new & returning students, review the number of students enrolled at a neighboring institution that resides in our service area (Gaston & Lincoln counties), and determine if the program has effectively marketed the Associate in Fine Arts Visual Arts to students in and around our service area counties.</p> <p>Discuss program efforts (past or present) to address possible opportunities of enrollment growth.</p> <p style="text-align: center;">Associate in Fine Arts Visual Arts</p> <table><tr><th>A10600</th><th># of Students</th><th>Students From Gaston</th><th>Students From Lincoln</th></tr><tr><td>Cleveland CC</td><td>10</td><td>1</td><td>0</td></tr><tr><td>CVCC</td><td>18</td><td>0</td><td>0</td></tr><tr><td>CPCC</td><td>210</td><td>7</td><td>0</td></tr></table> <p>Program’s enrollment growth action(s) and/or comment(s) below:</p>	A10600	# of Students	Students From Gaston	Students From Lincoln	Cleveland CC	10	1	0	CVCC	18	0	0	CPCC	210	7	0	<p>number of female students (67% vs. 64% college-wide). The trend of having more female students than male is consistent with college demographics. During the 2023-2024 academic year, more white than non-white students were enrolled in the AA degree program, which is consistent with college-wide trends.</p> <p>The Arts and Sciences Division provides holistic academic support for all students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center.</p> <p>Cleveland CC had only one student (new and recurring students for Spring 2024) from Lincoln and Gaston counties, the GC service area, enrolled in the Associate in Fine Arts Visual Arts program. That number represents 10% of the total number of AFAVA students at CCC. 1/Opportunity for program growth.</p> <p>Catawba Valley CC had 18 (new and recurring students for Spring 2024) in the AFAVA program; however, no students from Lincoln or from Gaston, the GC service area, enrolled in the Associate in Fine Arts Visual Arts program at CVCC. 0/Opportunity for program growth.</p> <p>Central Piedmont CC had 210 (new and recurring students Spring 2024) in the AFAVA program; however, 7 students from Lincoln and Gaston, the GC service area, enrolled in the Associate in Fine Arts Visual Arts program at CPCC. That number represents 3.3% of the total number of AFAVA students at CPCC. 7/Opportunity for program growth.</p> <p>While the number of students from Gaston/Lincoln counties enrolled at neighboring AFAVA institutions/programs is low, these students indicate that Gaston College’s AFAVA program still has room to grow in attracting and retaining students from our service area. This may be done through increasing marketing efforts that make residents aware of the</p>

	Explanation/Narrative
	transferability of classes earned through the AFAVA degree.

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college *race/ethnicity* data.

Discuss program actions to enroll and retain underserved students or special population students.

Demographics A10600 during 2023-2024 Academic Year

- Percent White 44%
- Percent Asian 3%
- Percent Black 15%
- Percent Hispanic 14%
- Percent Unknown 20%

Demographics College-wide during 2023-2024 Academic Year

- Percent White 55%
- Percent Asian 2%
- Percent Black 22 %
- Percent Hispanic 15%

	<p>Percent Unknown 5%</p> <p>Some racial/ethnicity categories between the AFAVA program and the college are very similar: Asian (3% vs. 2%) and Hispanic (14% vs. 15%). However, some differences exist between several of the Race/Ethnicity categories at the program vs. college level. Less white students enrolled in the AFAVA program than in the college population as a whole (44% vs. 55%) during this assessment cycle; the same is true for Black students (15% vs. 22%). One area that is very different is that 20% of AFAVA students' race/ethnicity is reported as Unknown while, according to this data, only 5% of the total college population is reported as Unknown.</p> <p>Enrolling and retaining underserved students or special population students hinge on ongoing marketing efforts by the GC Department of Marketing and the Arts and Sciences Division providing holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center.</p>

Demographic Enrollment Analysis by Gender:

College Wide – Demographics 2023-2024

Gaston College Unduplicated Enrollment
Academic Year 2023-2024 - by Gender

Program – Demographics 2023-2024

A10600: Associate in Fine Arts Visual Arts
Unduplicated Enrollment
Academic Year 2023-2024 - by Gender

Demographic Enrollment Analysis by Gender:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to gender. For example, explain the if the **gender** breakout between male and female students is more, less, or the same as the college's overall gender breakout.

Discuss program actions to enroll and retain underserved students or special population students.

Demographics A10600 during 2023-2024 Academic Year

Percent Female 67%

Percent Male 33%

Demographics College-wide during 2023-2024 Academic Year

Percent Female 64%

Percent Male 36%

During the academic year 2023-2024, there were more female students in the A10600 programs than male, which was consistent with the College demographics.

Arts and Sciences as a division provides holistic academic support for students, including growth mindset activities in various courses, and individual help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising

	<p>Center. Additionally, the division is a participant in the most current North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.</p> <p>The division plans to use marketing efforts to ensure all students in our service area understand the value of attending Gaston College. Divisional leadership remains committed to making stakeholders within the service area aware of all A&S programs, including the Associate in Fine Arts – Visual Arts, through participation in outward facing events such as the GC Student Success Expo; the Gaston College Educators Breakfast; the Fall Transfer Fair; College Now training events; GC Open House events; Early College High School TAG Co-Admission events; SGA welcome events; Lincoln County HS student visits to GC; GC Spring Fest; Lincoln County Apple Festival, and GC Senior Night.</p>

Progress: Course and Grade Distributions Analysis

	Explanation
<p>Course Sequence/Success:</p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Course sequencing is a high priority within the A&S Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A course matrix of semester offerings is provided to college program leaders.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p> <p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible.</p> <p>Based on current data, the Arts and Sciences course success rate is 89%.</p>

	Explanation
	<p>Currently, courses with low enrollments within A&S include the following:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>While there are several classes that have low enrollment, most classes have more than 10 students per section. The courses with low enrollment are managed well by providing only one section of that course per semester.</p>
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements or total credit hours have been reviewed or revised within the last two years. This process is carried out through collaboration of department leads, program chairs, divisional deans, and the Curriculum Committee.</p> <p>One significant curriculum revision that will be enacted in the next two years is the launch of a state-mandated Development English co-requisite class, ENG 045, which will replace the current version of developmental instruction covered in a pre-requisite, ENG 002, and co-requisite, ENG 011. ENG 045 will serve students who have a high school GPA of 2.79 or below. Another curriculum change will occur as the current developmental math process will be replaced by the MAT Department's choice of one of the NCCCS's recommended options during the next assessment cycle.</p> <p>ART 111, which is taken by many Arts and Sciences students through the College Now program, is offered in area high schools. Instructors deliver the same content, with no changes in rigor or quality, in classes delivered on high school campuses. This is verified by internal audits regularly conducted by departmental leads, program chairs, and Distance Education personnel.</p>
<u>Modality:</u>	<p>Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The</p>

	Explanation
<p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here.</p>	<p>science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs and to increase the ability to hold more in-person labs throughout the week. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility and better use of lab space.</p> <p>The Math Department has expanded its online offering of prerequisite and corequisite classes to reduce the number of days a student has to be on campus. The English Department has also reworked schedules to include corequisite ENG 011 classes that occur on the same days as the seated portions of ENG 111 sections to help reduce the number of days a student is required to be on-campus.</p> <p>The Arts and Sciences division has expanded the number of HyFlex options to include ACA, EDU, ENG, PHY, and HIS classes to better meet the needs of students.</p> <p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving instruction in other professional development opportunities, such as QM and ACUE.</p> <p>The following faculty in Arts and Sciences have at least 1 course certified by Quality Matters:</p> <ul style="list-style-type: none"> • Tonia Broome (MAT-152) • Melanie Dekerlegand (ENG-111) • Michele Domenech (ENG-112) • Hisayo Tokura Gallo (PSY 241) • Leslie Huss (MAT-171) • Dr. Lori Metcalf (PSY-150) • Ed Pardue (SOC-210) • Judith Porter (MUS-110) • Jeff Pruett (HIS 111) • Susan Whittemore (BIO-111) • Dr. Patricia Williams (BIO 275) • Dr. Heather Woodson (EDU-243)

	Explanation
	<ul style="list-style-type: none"> Chris Ziemba-Tolbert (ACA-122) <p>The following faculty in Arts and Sciences have received certification to be Certified Peer Reviewers for Quality Matters</p> <ul style="list-style-type: none"> Ginger Black Michele Domenech Katie Jordan Ed Pardue Dr. Patricia Williams Chris Ziemba-Tolbert <p>The following faculty in Arts and Sciences has received certification to be a Master Reviewer for Quality Matters</p> <ul style="list-style-type: none"> Dr. Patricia Williams <p>The following faculty in Arts and Sciences have earned the Full Online Teaching Certification (7-course program) for Quality Matters:</p> <ul style="list-style-type: none"> Ginger Black Katie Jordan Dr. Patricia Williams <p>The following faculty in Arts and Sciences have completed Professional Development in Quality Matters:</p> <ul style="list-style-type: none"> Marguerite Bishop (IYOC) Brian Bookout (IYOC & APPQMR) Tonia Broome (IYOC & APPQMR) Penny Brower (IYOC & APPQMR) Heather Bruch (IYOC) Amy Chaney (IYOC & APPQMR) Melanie DeKerlegand (IYOC & APPQMR) Keith Denson (IYOC & APPQMR) Gerri Dobbins (IYOC & APPQMR) Michele Domenech (IYOC & APPQMR) Hisayo Tokura-Gallo (IYOC & APPQMR) Mary Gourley (IYOC & APPQMR) Leslie Huss (IYOC & APPQMR) Dr. Shannon Landrum (IYOC) Dr. Lori Metcalf (IYOC & APPQMR) Mary Morton (IYOC & APPQMR)

	Explanation
	<ul style="list-style-type: none"> • Ed Pardue (IYOC & APPQMR) • Judith Porter (IYOC) • Jeffery Pruett (IYOC) • Dr. Chris Thurley (IYOC & APPQMR) • Susan Whittemore (IYOC & APPQMR) • Dr. Patricia Williams (DYOC, IYOC & APPQMR) • Dr. Heather Woodson (IYOC) • Chris Ziemba-Tolbert (APPQMR) • Bianca Yavelak (IYOC) • Jodi Valencic-Zieverink (IYOC)
Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?	<p>Currently, courses with low enrollments within A&S:</p> <p>Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students.</p> <ul style="list-style-type: none"> • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> • The following courses had success rates lower than the divisional average of 89 - ACA 122; BIO 112, 155, 161, 163; CHM 103/130A, 151; COM 110, 231; EDU 119, 131, 146, 184, 221, 234, 280, 282; ENG 002, 011, 111; MAT 110, 121, 152, 172, 263; MUS 110; PSY 150; PHY 251, 252; REL 110 <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> • The following courses had withdrawal rates that exceeded the divisional average by more than five percent: ACA 122; ART 121; BIO 111, 112, 155, 161, 168, 169; CHM 130/130A, 151, 152, 251, 252; COM 110; EDU 119, 146, 151, 184, 187, 251, 279; ENG 002, 011, 112; HIS 112; MAT 003, 152, 172, 263, 271; MUS 110, 112; PSY 241; REL 110; SOC 225. <p>The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and several courses have been</p>

	Explanation
	<p>identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues.</p> <p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.</p>
<p>Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon completion of the semester. Annually, strategies to address student feedback are developed for any areas of concern. Due to course evaluations being administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and in this evaluation cycle were 88-89%. Overall, student feedback for the program is positive.</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024</p>

	Explanation
	academic year, guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
A10600 Associate in Fine Arts Visual Arts	A10600	55%	71%

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	<p>Program Retention A10600</p> <ul style="list-style-type: none"> Fall 2018 to Fall 2019 59% Fall 2019 to Fall 2020 54% Fall 2020 to Fall 2021 44% Fall 2021 to Fall 2022 71% Fall 2022 to Fall 2023 55% <p>There was a 16-percent decrease in the retention rate from the previous assessment cycle; however, retention for the cycle being evaluated remains consistent with years prior to 2020-2021.</p> <p>Divisional administrators track individual course withdrawal and success rates and create strategies to improve. Art faculty implement these strategies to increase the retention rate in identified courses.</p>

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion?</p>	<p>Fifteen students earned credentials in the AFAVA program in the 2023-2024 evaluation cycle. This number indicates a 36.36% increase from the 2022-2023 cycle and continues the steady growth that has occurred in the AFAVA program since 2021-2022.</p> <p>Timely student completion has been a major objective for both the Division and the College. Specific initiatives such as Completion by Design, Achieving the Dream, and NC-GPS have provided the framework for improvement strategies. Students in A10600 have diversified goals for attending, and completion of a credential is only one preference. Many students plan to transfer before fulfilling degree requirements. One strategy to encourage degree completion is a dedicated advising center for Arts and Sciences so students can have one-on-one advising to help keep them on track within their pathway. In addition, the Watermark student retention system is a tool the Division of Arts and Sciences encourages faculty to use to ensure completion at the course level. This has led to the retention of more students within the Arts and Science division.</p> <p>Barriers to timely completion include the fact that the majority of the courses are only offered in a</p>

	Explanation
	traditional, seated format and that many of the courses meet for several hours at a time, which is not conducive to most students' current preference.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community?	(See response to the same question below.)
Community: How valuable is this program to the community? How have we benefitted from community partnerships and what other opportunities exist for collaboration?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>An annual Transfer Advisory Committee is conducted with representatives from the main senior institutions for GC transfer students. Transfer Admission Guarantees (TAGs) Co-Admission Programs have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>College Now is a program offered at Gaston College and is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment program for qualified high school students in the GC service area of Gaston and Lincoln counties to take tuition-free college classes. The Division of Arts and Sciences houses several dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), and ASTP (P1042T).</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, judging area high school art competitions, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs,</p>

	Explanation
	etc.). Each of these outreach events helps establish and build strong relationships with the community.
<p>Uniqueness:</p> <p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>The Arts and Sciences Division effectively promotes the following unique qualities of the college/division, as seen by the trend of increased enrollment and increased FTEs:</p> <p>Gaston College participates in North Carolina Guided Pathways to Success (NC-GPS). As a result of this initiative, the college has created streamlined pathways for students in the various degree programs. One of the benefits of NC-GPS is to create greater cost savings and efficiencies for students.</p> <p>Division faculty/staff participate in a robust marketing plan with the high school population as a target audience. This includes information tables at community events like football games and participation with partners such as public, charter and private high school at events like the annual Educators Breakfast. We continue to collaborate with senior institutions regarding the Transfer Advising Agreement (TAGs) Co-Admission Programs and Baccalaureate Degree Plans (BDPs) to ensure a smooth transfer process.</p> <p>Additionally, student resources for this program are unique. Beyond our traditional learning center, we also have both a Writing Center and Math and Science Center staffed with professional academic coaches who hold a bachelor's degree or higher in their disciplines.</p> <p>Gaston College offers a SPARC Scholars program. This program is a scholarship initiative funded by the National Science Foundation and a private donor to help offset the unmet financial needs of Gaston College students. Scholarships up to \$10,000 per student, per year, are offered to select full-time Associate of Science and Associate of Engineering students, who plan to transfer to a four-year university after graduating from Gaston College; major in Science, Technology, Engineering,</p>

	Explanation
	<p>or Math (STEM); and who show academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also available to participants of the program. The amount awarded is determined based upon federal financial need.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, attend at least 8 globally designated events, and complete 30 hours of intercultural experience. The 30 hours of intercultural experience are usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. Students who complete the program receive special recognition on their Gaston College transcript and receive a certificate of completion from UNC - Chapel Hill.</p> <p>The first full Honors Program within Gaston College and the Arts and Sciences Division was launched during the 2023-2024 school year.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Associate in Fine Arts in Visual Arts (10600)	55.38	49.81	47.5	69.5	70.97

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
College Transfer (includes CCP Transfer Pathways & Biotech)	\$6,863,459.75	2603.4	\$10,802,789.22	\$3,939,329.47	2648.9	\$10,819,239.89	\$3,955,780.14

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>FTE Count - A10600</p> <ul style="list-style-type: none"> • 2019-2020 – 55.38 • 2020-2021 – 49.81 • 2021-2022 – 47.50 • 2022-2023 – 69.50 • 2023-2024 – 70.97 <p>The Arts and Sciences Division, of which all art classes are an essential part, consistently earns approximately half of the College FTEs. The return on investment for this program is consistently high; FTE income significantly outweighs the cost for running the program and faculty salaries.</p>

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>The AFAVA faculty regularly build relationships within the local art community through joint activities with Gaston Art Council, as well as local</p>

	Explanation
	<p>high schools, and through art exhibits and artist talks/receptions to which the public is invited.</p> <p>An annual Transfer Advisory Committee is conducted with representatives from the main senior institutions for GC transfer students. Transfer Admission Guarantees (TAGs) have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to their selected institution if they maintain a certain GPA and follow the established program guidelines. Several of the private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year, such as community art shows, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs, etc. Each of these outreach events helps establish and build strong relationships with the area community.</p>

Program Learning Outcomes - A10600 Associate in Fines Arts in Visual Arts

The following rubric is used to holistically evaluate the Program Learning Outcomes for the Associate in Fines Arts in Visual Arts. The benchmark is an overall score of 3 out of 4 or 75% (a rating of “good”). The rubric scoring range is shown below:

Improvement Needed (1)	Fair (2)	Good (3)	Excellent (4)
0-59% success rate on the course assessment activity	60-74% success rate on the course assessment activity	75-84% success rate on the course assessment activity	85-100% success rate on the course assessment activity

The Associate in Fine Arts in Visual Arts program consists of five expected learning outcomes. Each area is rated according to the appropriate assessment.

The scoring rubric above is used to provide a holistic evaluation of overall student success for each degree program. The total overall success rate for the program learning outcomes as measured by this rubric is 90%.

All program learning outcomes met the 75% benchmark.

Detailed actions to be implemented addressing these outcomes are included in the assessment tables below.

Summary of Associate in Fine Arts in Visual Arts	Total Points Achieved
Program Learning Outcome 1: Demonstrate use of the elements of art and apply the principles of design to create original compositions. 86	4
Program Learning Outcome 2: Produce a body of work that demonstrates fundamental competence with traditional and current art methods, processes, and techniques in a variety of art media. 88	4
Program Learning Outcome 3: Recognize and analyze the aesthetic, social, and historical context of major and diverse artistic periods and styles. 90	4
Program Learning Outcome 4: Use the terminology of visual arts to communicate effectively through writing and/or speaking. 83	3
Program Learning Outcome 5: Demonstrate competence in the preparation of a digital portfolio and a culminating pre-graduation exhibition. 83.5	3
Total Achieved/Total Possible	18/20
Overall Rubric Score	90%

							with all dates listed. Consequences of missing due dates were emphasized, and procedures for communicating possible changes in the class calendar were shared.		
3	Recognize and analyze the aesthetic, social, and historical context of major and diverse artistic periods and styles.	ART 114: Art History Survey I and ART 115: Art History Survey II students will take a comprehensive final exam with questions that will require students to recognize and analyze the aesthetic, social, and historical context of major and diverse artistic periods and styles.	On average, students completing the final exam in ART 114 and ART 115 will earn at least 80% of the available points to demonstrate their ability to recognize and analyze the aesthetic, social, and historical context of major and diverse	Fall 2023 Combined Mean: 90 ART 114: 88.5 ART 115: 92	The assessments provide a comprehensive analysis of the learning objective. The assessments are robust and provide written and visual analysis. The assessments include slide identification of a broad range of art through different periods.	Test item analysis revealed that questions below the benchmark involved slide identification (due in part in students not purchasing the text). Based on class size and instructional time constraints, a greater degree of individualized feedback needs to be given in ART 115.	Changes implemented since the last assessment cycle: A newly adopted text, <i>The History of Art: A Global View: Prehistory to the Present</i> , introduced students to a breadth of artistic traditions, making cross-cultural comparisons possible. Instructor continued to have students access slides via PowerPoint, making sure that the slides appear in both the text and the PowerPoint.	Faculty will continue to emphasize active, immersive learning, to foster a deeper understanding of the aesthetic, social, and historical factors that shape artistic styles and periods. For ART 115, individual student-instructor meetings have been implemented in order to give individualized feedback. This has been necessary as the class size has grown in the last three years, which makes giving feedback in the course of the class more difficult.	4

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Since the last program review, briefly discuss program strengths, areas of improvements, program needs, and program actions. If applicable, include program efforts to address recommendations from the last program review.

The Biotechnology Diploma is a program that focuses on the application of the biological sciences, biochemistry, and genetics to the preparation of new and enhanced agricultural, environmental, clinical, and industrial products, including the commercial exploitation of microbes, plants, and animals. Potential course work includes instruction in general biology, general and organic chemistry, physics, biochemistry, molecular biology, immunology, microbiology, genetics, and cellular biology.

This curriculum will prepare students for careers through the study of principles in science, laboratory techniques and applied processes.

Graduates should be qualified to obtain occupations as process and manufacturing technicians in the life science, food and agricultural sectors. Upon the completion of this program student will be able to:

- Demonstrate comprehension of life at the cellular and molecular level using written communication.
- Illustrate the proper use of a variety of laboratory techniques and procedures with accuracy, precision, and safety.
- Integrate the laboratory and lecture components of the program through the use of an experimental approach.

The following action items from the 2022-2023 program review cycle were addressed.

Meet the North Carolina Community College System Critical Success measures for student success rate in curriculum English and curriculum Math.

Two of the NCCCS critical success measures directly impacted by student success in the Associate in Arts program saw improvement in the NCCCS 2024 Performance Measures for Student Success Report. Relating to the NCCCS second performance measure, Credit English Success, the gateway course of ENG 111 saw improvement from 0.920 in the 2023 report, which put Gaston College in the Baseline category, to 1.039 in the 2024 report, moving Gaston College to the Average Band Minimum category. Relating to the seventh performance measure, Transfer Performance, Gaston College moved from 0.994 (Average Band Minimum) to 1.012 (Average Band Maximum). Relating to the NCCCS third performance measure, College Level Math Success Rates, Gaston College

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

performance decreased from the prior year. During the year, the MAT department formed a committee, Student Success Rate of College Level Math Team, that identified students who needed MAT 100+. These students were contacted and found to either have already completed their program of study, had left the college, or the information in the system was not updated to reflect the math that was needed. This process seemed to confuse the students and the faculty that were making the contacts. For the future, academic advisors need to strongly encourage students to enroll in a MAT 100+ course early in their time at Gaston College to further assist these students in completing College Level Math. The college has stayed in the same NCCCS band width of less than the college average but above the baseline.

Implement strategies to improve online learning and teaching.

Because demand for online classes occurs for all disciplines within the Associate in Arts program, continuing efforts have been made since the last program review to implement strategies to improve online learning and teaching. These efforts include divisional leadership presenting multiple workshops for specific departments, as well as for all faculty in the division.

In addition, several resources and guides for faculty in the Division of Arts and Sciences were created that focused on Regular Substantive Interaction (RSI), such as RSI Overview and Tips, RSI Instructor Self-Assessment for Online Courses, and Credit Hour versus Contact Hour in Online Courses to help faculty see the amount of hours in a given semester to help plan for their Activities and RSI. Divisional leadership also worked one-on-one with specific faculty who sought out individualized assistance throughout the year to address specific issues related to online instruction.

To develop, implement and promote the Gaston College Honors Program, an Honors Committee was created in Summer 2023, which met regularly through Fall 2023 and Spring 2024 to

- articulate a rationale for a revamped GC honors program and communicate that to the GC President's Council for approval,
- review and research honors programs at other community colleges in the NCCCS,
- determine honors program admission requirements,
- consider and determine program pathways to include one tailored for students who intend to transfer to four-year institutions and one for students who intend to graduate and enter the workforce,
- consider and determine requirements for each of the two pathways,
- identify grant opportunities and apply for an ITYC-NSF IUSE grant,
- create both mission and vision statements,
- survey faculty, evaluate survey responses and generate strategies and incentives to encourage more instructors to offer honors options,
- and develop honors program handbooks for both faculty and students.

Promoting transfer opportunities, the purpose on the Transfer Admission Guarantees (TAG) Co-Admission Program, occurred both on-campus and off.

- On-campus outreaches included an engaging bulletin board in a high traffic area of Robinson Classroom Building, the building where most classes related to the Associate in Arts program are held; a table at the GC Student Success Expo; information shared at the Gaston College Educators Breakfast; information included in the GC Leadership Gaston Scavenger Hunt; Fall Transfer Fair; College Now training event; SPARC – C3 interest meeting; GC Open House event; personal contact with SPARC-C3 students; Early College High School TAG Co-Admission event; SGA Spring 2024 welcome event; GECHS TAG Talk; Lincoln County HS 10th grade visit to GC; Rhino Roadmap information; GC Spring Transfer Fair; 49er Next Meeting; GC Spring Fest; and Senior Night.
- Off-campus TAG efforts included maintaining an information-rich website; Zoom meetings with a partner high school's counselor and partner private university to review and discuss aspects of the TAG program;

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

information tables at area high school football games; presentation at a Lincoln County Teacher Cadet event; and campus visits to a local private college.

To meet the demands of higher enrollment and open faculty positions due to previous retirements/resignations, pressing needs for more English, Communications, and Mathematics faculty have been addressed with the addition of **two full-time English instructors, one full-time Communications instructor, and one full-time Mathematics instructor.**

Strengths:

The Foundations of Biotechnology and Basic Biotechnology certificates continue to be popular with the high school CCP population. In addition, the Biotechnology diploma is a popular add on major for many Associate in Science students.

Numerous impactful academic resources are offered to aid in student successful completion. The Division remains active in a variety of campus initiatives and activities, including: CoDE (Co-requisite Developmental Education; Gaston College Study Tours; Writing Center; Learning Center, MASC Center, Transfer Advising Center; Psi Beta; Gamma Beta Phi; Completion by Design; Achieving the Dream; NC College Transfer Program Association; STEM Persistence and Retention via Curricula, Centralization, and Cohorts (SPARC); Inquiry Based Learning methods; and North Carolina Guided Pathways to Success (NC-GPS) as well as the new GC Honors Program that began this FALL 2024.

Areas for Improvement:

The Arts and Sciences Division is always looking to enhance and improve the student experience. With continuous improvement in mind, several areas have been identified for further development. Additionally, divisional leaders will focus on providing further academic support to students in science and math courses, brainstorming ways to increase response rates for course evaluations and graduation surveys, improve seamless transfer to senior institutions, and reduce course withdrawal rates.

Improvement of online and hybrid instruction is an area of improvement throughout the A&S division. The increase in online classes has demonstrated the need for more professional development and training. An audit of all faculty over the past academic year provided insight into areas of strengths as well as areas for improvement. Throughout the academic year, many A&S faculty received specialized professional development for conducting high-quality online courses such as Blackboard and Accessibly Training, Quality Matters Training, MOE certification, ACUE, and A&S discipline-specific professional development. This initiative will be continued and strengthened through the division of Arts and Sciences. One area for improvement that will continue to be addressed in the upcoming academic year is RSI in online and hybrid courses.

Needs:

- Rauch Science Building continues to be in desperate need of a new HVAC system due to dangerously high temperatures in the lab, which is a hazard with storing chemicals and materials in the lab. In addition, the greenhouse attached to Rauch continue to need repairs as it needs to be used for labs and resources.
- Arts and Sciences leadership will provide training for our faculty for the LMS upgrades and implementations.
- As Arts and Sciences continues to expand Lincoln Campus course offerings, leadership will assess, review, and monitor the classrooms to see if they meet student needs.
- Arts and Sciences has a critical need to hire more faculty in a variety of disciplines to meet the increasing number of course sections. This will allow us to provide more sections and times when courses could be offered to meet students' needs.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Actions:

1. Continue to improve the North Carolina Community College System Critical Success measures for student success rate in curriculum English
2. Meet the North Carolina Community College System Critical Success measure for curriculum Math
3. Implement strategies to improve online learning and teaching, including LMS transition to Blackboard Ultra.
4. Continue to expand the Honors Program and Transfer Admission Guarantee programs.
5. Apply for grants to assist with supporting the Honors Program, Student Success initiatives, development of an online teaching and learning center, consortium with area community colleges and four-year institutions, and new SPARC offerings.

SECTION II: PROGRAM DATA

Program Enrollments

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis:</p> <p>Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p>	<p>F TE Count D20100</p> <p>2018-2019 - 9.94</p> <p>2019-2020 - 13.38</p> <p>2020-2021 - 10.25</p> <p>2021-2022 - 35.31</p> <p>2022-2023 – 67.63</p> <p>2023-2024 – 83.81</p> <p>There was an increase in FTE of approximately 16.18 from 2022-2023 to 2023-2024. Despite a slight decrease in FTE during 2020-2021 (possibly due to COVID-19), FTE has steadily increased in the Biotechnology degree and certificate programs.</p>

	Explanation/Narrative
<p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>The C20100B Biotechnology Basic – Foundations of Biotechnology and C20100C Biotechnology Basic – Foundations of Healthcare certificates are the highest-earning FTE certificates within the biotechnology program, with 125 and 222 credentials awarded respectively. The academic year 2023-2024 saw an increase in A20100 A.A.S. degree completion by 600% (0 completers in 2022-2023 to 6 completers in 2023-2024). The certificates remain popular with dual-enrolled students. Biotechnology certificates, especially for the high school population, are typically selected based on the courses students are interested in completing more than the desire to earn the actual credential.</p> <p>All but one course (BTC-181) in Biotechnology are current curriculum courses housed within science and math and does not require any additional planned courses or faculty load outside of the BTC-181 course, making the biotechnology certificates a great benefit in earning FTE without added cost to the college. The return on investment for this program is consistently high; FTE income significantly outweighs the cost of running the program and faculty salaries.</p> <p>One improvement planned for the 2024-2025 year was discussed and planned throughout the 2023-2024 review period. Historically, BTC-181 has been offered online in previous semesters. Both faculty and students have requested that the course be provided in face-to-face format. The course was revised during the 2023-2024 review cycle in order to implement it during Fall 2024. Success measures from this initiative will be discussed in the next program review cycle as FA2024 is the first term BTC-181 is being offered in the face-to-face format.</p>
<p>Enrollment Analysis:</p> <p>Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A20100 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Biotechnology at GC? Identify strategies for enrollment growth.</p>	<p>Cleveland CC had 12 (new recurring students for Spring 2024. however, 0 students from Lincoln & 1 student from Gaston <u>our service area</u> have enrolled in Biotechnology at CCC. Continue monitor for possible opportunities of program growth</p> <p>Catawba Valley CC had 0 (new and recurring students Spring 2024); 0 from Lincoln & 0 from Gaston no students from our service area.</p> <p>Central Piedmont CC had 0 (new and recurring students Spring 2024); 0 students from Lincoln & 0 from students Gaston no students from our service area.</p> <p>While the marketing of the CCP biotechnology pathways has been successful, as the enrollment from the College Now program is the majority of our enrollment, there has</p>

	Explanation/Narrative
	<p>been little marketing of the A.A.S in Biotechnology to traditional students other than the marketing that occurs by science faculty at campus event.</p> <p>Also, one of the biggest reasons students are not enrolling in Biotechnology from Gaston and Lincoln counties is because jobs are not available in this area for students in the biotechnology industry. In addition, the biotechnology degree program at Gaston College does not provide any biotechnology courses to students. They are not prepared to enter the workforce because the biotechnology degree is not offer key employability courses: Biotechnology, Recombinant DNA, Cell Culture Techniques, Bioethics, etc. One such addition of a biotechnology course (BIO-280) is being added as a requirement as soon as the state makes the requested changes to the course contact hours for BIO-280. Currently, the biotechnology program awaits final approval from the state. If approved, the results from that addition will be noted in the next program review cycle. The addition of the Biotechnology course has the potential to increase student enrollment in the biotechnology program.</p> <p>Various strategies have been implemented to improve enrollment goals, improve the program for students, and improve course offerings.</p> <ul style="list-style-type: none"> • All courses within the Associate of Arts degree pathway are sequenced to allow successful completion of the pathway that is both efficient for student completion and economical in terms of programing cost. • Foundational requirements are provided early in the program and promote completion of pre-requisite courses early in the program to ensure successful completion. • Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible. • Improving course offerings is an important goal within the Arts and Sciences. • To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. • Previous semester data has been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The Arts and Science division has created Hyflex course

	Explanation/Narrative
	offerings in English and has added online and online-synchronous options of prerequisite and co-requisite classes in Math and English to better serve the needs of students.

Demographic Enrollment Analysis by Race/Ethnicity:

<p>College Wide – Demographics 2023-2024</p>  <p>Gasaton College Unduplicated Enrollment Academic Year 2023-2024 - by Race</p> <table border="1"> <thead> <tr> <th>Race/Ethnicity</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>White</td> <td>55%</td> </tr> <tr> <td>Black</td> <td>22%</td> </tr> <tr> <td>Hispanic</td> <td>15%</td> </tr> <tr> <td>Asian</td> <td>2%</td> </tr> <tr> <td>Unknown</td> <td>5%</td> </tr> <tr> <td>Two or More Races</td> <td>1%</td> </tr> <tr> <td>Alaskan Indian/American Native</td> <td>0%</td> </tr> <tr> <td>Non-U.S. Resident</td> <td>0%</td> </tr> </tbody> </table>	Race/Ethnicity	Percentage	White	55%	Black	22%	Hispanic	15%	Asian	2%	Unknown	5%	Two or More Races	1%	Alaskan Indian/American Native	0%	Non-U.S. Resident	0%	<p>Program – Demographics 2023-2024</p>  <p>A20100: Botechnology Unduplicated Enrollment Academic Year 2023-2024 - by Race</p> <table border="1"> <thead> <tr> <th>Race/Ethnicity</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>White</td> <td>32%</td> </tr> <tr> <td>Unknown</td> <td>46%</td> </tr> <tr> <td>Black</td> <td>12%</td> </tr> <tr> <td>Hispanic</td> <td>7%</td> </tr> <tr> <td>Asian</td> <td>1%</td> </tr> <tr> <td>Two or More Races</td> <td>0%</td> </tr> <tr> <td>American Indian/Alaska Native</td> <td>0%</td> </tr> <tr> <td>Non-U.S. Resident</td> <td>2%</td> </tr> </tbody> </table>	Race/Ethnicity	Percentage	White	32%	Unknown	46%	Black	12%	Hispanic	7%	Asian	1%	Two or More Races	0%	American Indian/Alaska Native	0%	Non-U.S. Resident	2%

<p>Demographic Enrollment Analysis by Race/Ethnicity:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college <i>race/ethnicity</i> data.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Demographics D20100 2023-2024</p> <p>Percent White - 32%</p> <p>Percent Non-White – 22%</p> <p>Percent Unknown – 46%</p> <p>Within the program, 32% of the students were white, while 22% of the students were non-white. It is important to note that 46% of the student population listed as an unknown race. Compared to the overall college-wide demographics, only 5% of the student population identified as “unknown”.</p> <p>We continue to strive to serve broader demographics, including minorities, low-income students, working adults, returning students, and students with low academic achievement. We provide academic holistic support for students, including growth mindset activities in various courses, and individualized help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are an early adopter of the North Carolina Community College System</p>
--	---

	developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model.
--	---

Demographic Enrollment Analysis by Gender:

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the gender breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Demographics D20100 2023-2024</p> <p>Percent Female 87%</p> <p>Percent Male 13%</p> <p>Throughout academic year 2023-2024, 87% of the students in D20100 were females, 13% were male within the program. The overall population for GC is 64% female and 36% male. More females are engaging in the biotechnology program than males, despite biotechnology fields traditionally being male-dominated.</p> <p>We continue to strive to serve broader demographics, including minorities, low-income students, working adults, returning students, and students with low academic achievement. We provide academic holistic support for students, including growth mindset activities in various courses, and individualized help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are an early adopter of the North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model</p>
---	---

Demographic Enrollment Analysis by Age:

<p>Demographic Enrollment Analysis by Age:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to age. For example, explain if the age breakout between the different groups is more, less, or the same as the college’s overall age breakout.</p> <p>Discuss program actions to enroll and retain underrepresented students or special population students.</p>	<p>Demographics D20100 2023-2024</p> <p>Percent less than 18 years – 2%</p> <p>Percent 18-24 years - 59%</p> <p>Percent 25-44 years - 13%</p> <p>Percent 45-64 years – 6%</p> <p>Percent 65+ years – 0%</p> <p>The age demographics match the provided college-wide demographic data. There are no differences between the age populations at the college or biotechnology program levels. This is difficult to understand because we would expect a higher percentage of under 18 since this program is largely enrolled with College Now students.</p> <p>We continue to strive to serve broader demographics, including minorities, low-income students, working adults, returning students, and students with low academic achievement. We provide holistic academic support for students, including growth mindset activities in various courses, and individualized help in the Writing Center, Math and Science Center, Learning Center, TRIO, and the Transfer Advising Center. Additionally, we are an early adopter of the North Carolina Community College System developmental redesign, which has a goal of accelerating the progression of underprepared students using a corequisite model</p>

Progress: Course and Grade Distributions Analysis

	Explanation
<p>Course Sequence/Success:</p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Course sequencing is a high priority within the Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A course matrix of semester offerings is provided to college program leaders.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p> <p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible.</p> <p>Based on current data, the Arts and Sciences course success rate is 89%.</p>

	Explanation
	<p>Currently, courses with low enrollments within A&S include the following:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>While there are several classes that have low enrollment, most classes have more than 10 students per section. The courses with low enrollment are managed well by providing only one section of that course.</p> <p>Within the biotechnology programs, course enrollment growth has increased in both BTC-181 and BIO-250. In the past, these courses have historically been low enrolled (less than 10 students), but over the past 3 years, there has been an increase in enrollment in these courses. BIO-250 is now offered in both fall and spring semesters (in the past, it was just offered one semester in the academic year). Seated sections are also being offered for both BTC-181 and BIO-250, which was in response to student need for these courses. Currently, there are no courses in the biotechnology programs that would be considered low-enrolled courses.</p>
<p>Curriculum/Course Materials</p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>Does the program offer clinical, WBL, or Apprenticeship opportunities?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>Yes, the core course requirements have been reviewed and is undergoing a revision as of Fall 2024. A proposal to add a course to the Biotechnology A.A.S program has been sent to the state and is already supported by all other community colleges in the state with a Biotechnology program.</p> <p>In addition, Spring of 2023, the Science department was tasked with creating a new certificate in Biotechnology: Foundations of Biotechnology which includes 4 courses (Soil Science, Plant Science, Animal Science, and Introduction to Sustainability Studies). The program will be implemented in the FA of 2024 and data relating to the program will be in the next program review cycle. This certificate is taught at the Gaston College Lincoln Campus.</p> <p>This program provides options for our CCP students. Students in this program are co-enrolled with traditional college students and there is no difference between the rigor of the CCP program versus the traditional campus program as they are taught together</p>
<p>Modality:</p> <p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p>	<p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving instruction in other</p>

<p>Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Currently, courses with low enrollments within A&S:</p> <ul style="list-style-type: none"> • Several ART courses (ART 132, 171, 214, 231, 232, 240, 241, 244, 264, 265, 271, 275, 283, 284, 285) all have less than 10 students. • Several EDU courses (EDU 243, 251, 261, 262) have less than ten students per section. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> • The following courses had success rates lower than the divisional average of 89 - ACA 122; BIO 112, 155, 161, 163; CHM 103/130A, 151; COM 110, 231; EDU 119, 131, 146, 184, 221, 234, 280, 282; ENG 002, 011, 111; MAT 110, 121, 152, 172, 263; MUS 110; PSY 150; PHY 251, 252; REL 110 <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> • The following courses had withdrawal rates that exceeded the divisional average by more than five percent: ACA 122; ART 121; BIO 111, 112, 155, 161, 168, 169; CHM 130/130A, 151, 152, 251, 252; COM 110; EDU 119, 146, 151, 184, 187, 251, 279; ENG 002, 011, 112; HIS 112; MAT 003, 152, 172, 263, 271; MUS 110, 112; PSY 241; REL 110; SOC 225. <p>The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and</p>

	Explanation
	<p>several courses have been identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues.</p> <p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.</p>
<p>Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon Due to course evaluations being administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and in this evaluation cycle were 88-89%. Overall, student feedback for the program is positive.</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024 academic year, guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.</p>

Completion/Credentials Earned

	Explanation
Graduation: Using the data in the above tables, discuss the student completion data and any identified trends? Identify any known barriers to timely student completion and how they can be addressed. What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?	A20100 Headcount – 98 Awards – 6 Awards at the Highest Level – 6 Awards to Headcount Ratio –6.122% C20100C Headcount – 233 Awards – 222 Awards at the Highest Level – 222 Awards to Headcount Ratio – 95.26% Overall Enrollment of all Biotech Certificates Headcount – 747 Awards – 404 Awards at the Highest Level – 404 Awards to Headcount Ratio – 54.08% Timely student completion has been a major objective for both the Division and the College. Specific initiatives, such as Completion by Design, Achieving the Dream, and NC-GPS, have provided the framework for improvement strategies. Students in A20100 and C20100C have diversified goals for attending; completion of a credential is only one preference. Many students plan to transfer before fulfilling degree requirements. One strategy to encourage degree completion is dedicated advising for Arts and Sciences so students have one-on-one advising to help keep them on track within their pathway. In addition, the Watermark student retention system is a tool the Division of Arts and Sciences encourages faculty to use to ensure completion at the course level. This has led to the retention of more students within the Arts and Science division.

Job Outlook

About this section

Employment of clinical laboratory technologists and technicians is projected to grow 5 percent from 2023 to 2033, about as fast as the average for all occupations.

About 24,200 openings for clinical laboratory technologists and technicians are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

An increase in the population of older adults is expected to lead to a greater need for diagnosing medical conditions, such as cancer or type 2 diabetes, through laboratory procedures. Prenatal testing for various types of genetic conditions also is increasingly common. Clinical laboratory technologists and technicians will be in demand to use and maintain the equipment needed for diagnosis and treatment.

Medical and Clinical Laboratory Technologists

Description: what do they do?

Perform complex medical laboratory tests for diagnosis, treatment, and prevention of disease. May train or supervise staff.

Also known as:

Clinical Laboratory Scientist (CLS), Clinical Laboratory Technologist, Histologist Technologist, Medical Laboratory Technologist (Medical Lab Tech), Medical Technologist (MT), Microbiology Technologist

Transition/Employment Outcomes

	Explanation
<p>Job Placement/Transfer:</p> <p>Share the graduation outcome data regarding job placement or transfer.</p> <p>(Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)</p>	<p>Currently, the Biotechnology program and its certificates are not being utilized for employment. Many students are enrolling in the biotechnology certificates as a secondary degree to their degree program or are dual-enrolled students. Given the scientific nature of the biotechnology program, students pursuing a certificate in biotechnology</p>

	Explanation
	<p>have career goals that require further education as opposed to direct preparation for the workforce.</p> <p>Statewide, health care careers are growing and are expected to increase by over 15% in the next 10 years.</p>

SECTION III: CONNECTION

	Explanation
<p>How valuable is this program to the community?</p> <p>(Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)</p>	<p><u>FTE Count D20100</u></p> <p>2018-2019 - 9.94 2019-2020 - 13.38 2020-2021 - 10.25 2021-2022 - 35.31 2022-2023 – 67.63 2023-2024 – 83.81</p> <p>There was an increase in FTE of approximately 16.18 from 2022-2023 to 2023-2024. Despite a slight decrease in FTE during 2020-2021 (possibly due to COVID-19), FTE has seen a steady increase in FTE in the Biotechnology degree and certificate programs.</p> <p>The C20100B Biotechnology Basic – Foundations of Biotechnology and C20100C Biotechnology Basic – Foundations of Healthcare certificates are the highest-earning FTE certificates within the biotechnology program. While there are no completers in the AAS degree, this can be due to many students' interest in adding certificates as a secondary degree program in addition to their AS degree pathway. In addition, many students enrolled in the certificates are also dual-enrolled students. The Biotechnology certificates, especially for the high school population, are typically selected based on the courses students are interested in completing more than the desire to earn the actual credential.</p> <p>All but one course (BTC-181) in Biotechnology are current curriculum courses housed within science and math and does not require any additional planned courses or faculty load outside of the BTC-181 course, making the biotechnology certificates a great benefit in earning FTE without added cost to the college. The return on investment for this program is consistently high; FTE income significantly outweighs the cost of running the program and faculty salaries.</p>
<p>Community:</p> <p>How does this program lead to employment opportunities in the local community or prosperity zone?</p>	<p>Part of the value of the Associate in Arts program is that every student who graduates with an AA degree and then lives and works in the community is better equipped to think critically, communicate effectively through various means, identify and solve problems, and lead successfully because of</p>

	Explanation
<p>How have we benefitted from community partnerships and what other opportunities exist for collaboration?</p> <p>What is the advisory committee feedback?</p>	<p>the training they received at Gaston College. In that way, this program is impacting the Gaston College service area both in the present and potentially in the future.</p> <p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>An annual Transfer Advisory Committee is conducted with representatives from the main senior institutions for our transfer students. Transfer Admission Guarantees (TAGs) Co-Admission Programs have been developed with several public and private institutions in our area. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>College Now is a program offered at Gaston College and is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment program for qualified high school students, in the GC service area of Gaston and Lincoln counties, to take tuition-free college classes. The Division of Arts and Sciences houses several dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), and ASTP (P1042T).</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, judging area high school art competitions, Legislative Breakfast, Educators Breakfast, Science Fair Judging, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the community.</p>
<p>Uniqueness:</p> <p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>The Arts and Sciences Division effectively promotes the following unique qualities of the college/division, as seen by the trend of increased enrollment and increased FTEs:</p> <p>Gaston College participates in North Carolina Guided Pathways to Success (NC-GPS). As a result of this initiative, we have created streamlined pathways for students in the various degree programs. One of the benefits of NC-GPS is to create greater cost savings and efficiencies for students.</p> <p>Division faculty/staff participate in a robust marketing plan with the high school population as a target audience. This includes information tables at community events like</p>

	Explanation
	<p>football games and participation with partners such as public, charter and private high school at events like the annual Educators Breakfast. We continue to collaborate with senior institutions regarding the Transfer Advising Agreement (TAG) Co-Admission Programs and Baccalaureate Degree Plans (BDPs) to ensure a smooth transfer process.</p> <p>Additionally, student resources for this program are unique. Beyond our traditional learning center, we also have both a Writing Center and Math and Science Center staffed with professional academic coaches who hold a bachelor's degree or higher.</p> <p>Gaston College offers a SPARC Scholars program. This program is a scholarship initiative funded by the National Science Foundation and a private donor to help offset the unmet financial needs of Gaston College students. Scholarships up to \$10,000 per student, per year, are offered to select full-time Associate of Science and Associate of Engineering students, who plan to transfer to a four-year university after graduating from Gaston College; major in Science, Technology, Engineering, or Math (STEM); and who show academic merit. Transition scholarships of up to \$7,500 for at least the first year after transfer are also available to participants of the program. The amount awarded is determined based upon federal financial need.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, attend at least 8 globally designated events, and complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. Students who complete the program receive special recognition on their Gaston College transcript and receive a certificate of completion from UNC - Chapel Hill.</p> <p>The first full Honors Program within Gaston College and the Arts and Sciences Division was launched during the 2023-2024 school year.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Biotechnology (20100)	13.38	10.25	35.31	67.63	83.81

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
College Transfer (includes CCP Transfer Pathways & Biotech)	\$6,863,459.75	2603.4	\$10,802,789.22	\$3,939,329.47	2648.9	\$10,819,239.89	\$3,955,780.14

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>The biotechnology program data is included in the College Transfer Financial data. Revenue of college transfer is listed as \$3,955,780.14 and has an FTE value of \$10,819,239.89.</p> <p>Specifically, biotechnology generated 83.81 curriculum FTE's which higher than the previous year at 67.63.</p>

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Division of Arts and Sciences is involved in several educational and community partnerships. Educational partnerships include partnerships with public and private universities across North Carolina as well as local partnerships with area high schools through College Now.</p> <p>The Transfer Advisory Committee meets annually with representatives from the main senior institutions for GC transfer students. Transfer Admission Guarantees (TAGs) have been developed with several public and private institutions throughout North Carolina. Students are guaranteed admission to the selected institution if they maintain a certain GPA and follow the established program guidelines. Several of the private institutions offer specific scholarship opportunities to Gaston College transfer students.</p> <p>Gaston College also partners with UNC World View to offer robust global programming and opportunities for student recognition as a Scholar of Global Distinction. Students must complete 15 Semester Hours Credit in courses designated as globally intensive, they must attend at least 8 globally designated events, and they must complete 30 hours of intercultural experience. The 30 hours of intercultural experience is usually obtained through global travel. Gaston College has a study abroad program that travels internationally 2-3 times annually. For 2023-2024, the Gaston College Study Abroad program traveled to Ireland</p>

	Explanation
	<p>and Switzerland. Students who complete the program receive special recognition on their Gaston College transcripts and receive a certificate of completion from UNC Chapel Hill.</p> <p>College Now, a program offered at Gaston College, is one of our biggest collaborative efforts within Arts and Sciences. College Now is a dual enrollment program for qualified high school students to take tuition-free college classes. The Division of Arts and Sciences houses several dual-enrollment degree programs, including but not limited to AA (P1012C), AS (P1042C), AATP (P1012T), ASTP (P1042T), as well as in biotech which includes but is not limited to C20100A, C20100AP, C20100B, C20100BP, C20100C, C20100CP/</p> <p>In addition, the Division of Arts and Sciences participates in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, Educators Breakfast, Science Fairs, Stampede for Success, Transfer Fairs, etc.). Each of these outreach events helps establish and build strong relationships with the area community.</p>

Program Learning Outcomes - A20100 Biotechnology

The following rubric is used to holistically evaluate the Program Learning Outcomes for the Biotechnology Diploma. The benchmark is an overall score of 3 out of 4 or 75% (a rating of “good”). The rubric scoring range is shown below:

Improvement Needed (1)	Fair (2)	Good (3)	Excellent (4)
0-59% success rate on the course assessment activity	60-74% success rate on the course assessment activity	75-84% success rate on the course assessment activity	85-100% success rate on the course assessment activity

The Biotechnology Diploma program consists of three expected learning outcomes. Each area is rated according to the appropriate assessment.

The scoring rubric above is used to provides a holistic evaluation of overall student success for each degree program. The total overall success rate for the program learning outcomes as measured by this rubric is 83%.

Two out of three of the learning outcomes met the 75% benchmark. One learning outcome was below the 75% benchmark.

Detailed actions to be implemented addressing these outcomes are included in the assessment tables below.

Summary of Associate in Fine Arts in Visual Arts	Total Points Achieved
Program Learning Outcome 1: Demonstrate comprehension of life at the cellular and molecular levels. 62%	3
Program Learning Outcome 2: Illustrate the proper use of a variety of laboratory techniques and procedures with accuracy, precision, and safety. 94%	4
Program Learning Outcome 3: Integrate the laboratory and lecture components of the program through the use of an experimental approach. 96%	4
Total Achieved/Total Possible	11/12
Overall Rubric Score	91.667%

Program Review – A55220 Early Childhood Education

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Brian Bookout

Program Chair: Erin Brassell

Program Code(s)/Name(s): Early Childhood Education

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A55220 Early Childhood Education
- A55220T Early Childhood Education – Transfer
- A55220TL Early Childhood Education – Transfer with Licensure
- A55220CR Early Childhood Education – Career Ready
- C55220C Early Childhood Education – Early Childhood
- C55220E Early Childhood Education – Special Needs
- C55220F Early Childhood Education – Early Literacy
- C55220G Early Childhood Education – Preschool
- C55220P Early Childhood Education – CCP
- C55850 Early Childhood Administration Certificate

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Since the last program review, briefly discuss program strengths, areas of improvements, program needs, and program actions. If applicable, include program efforts to address recommendations from the last program review.

The following action items from the 2021-2022 program review cycle were addressed.

Referrals for campus resources and advising will be made by each faculty in the program, as needed

- Each ECE faculty member has communicated with the EDU advisor when issues arise regarding students' program of studies. Faculty members also have regular communication with Persistence and Retention, Trio, the Writing Center, and Counseling as needed.

Inactive students will be contacted via Watermark notes/alerts, BB reminder, email and/or phone within 3 absences and/or within 3 missed/failed assignments

- Each ECE faculty member has continued to use Watermark to communicate with low performing students, as needed. Faculty members are in the regular habit of communicating with students when they have missed classes/assignments.

Regular Zoom meetings with online student as well as seated and hybrid ones

- ECE faculty members have continued to offer Zoom meetings to all students, including online ones. We have regularly scheduled meetings for groups of students and we also offer individual Zoom (or in-person) meetings upon request.

At least three recruitment and/or community events will be held annually

- During the last school year, the ECE faculty helped to organize another annual Spring Conference for teachers in Gaston and Lincoln Counties. We also promoted the need for volunteers in programs like Spooktacular and America Reads.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

ECE faculty will serve on relevant Partnership for Children of Lincoln & Gaston Counties and will work closely with local schools, centers, and homes

- The Program Lead is currently serving as a Board member at the Partnership for Children. In addition, another ECE faculty member served on the Raising a Reader committee for the Partnership for Children. In order to place students into early childhood settings to log required Lab Hours in EDU 184 and EDU 284, ECE faculty work closely with Directors of area programs and our Advisory Board members.

Strengths:

We have continued with Saturday course offerings which are at or almost at capacity. Our instructors conduct numerous voluntary Zoom sessions to support student success. Our instructors also teach remote courses that have mandatory weekly meetings, via Zoom, which are reported to be very helpful. In addition, we are teaching an Introduction to Early Childhood course at a high school site and we have partnered with various school systems to boost enrollment of CCP students in many of our other courses. Lastly, we successfully recruited/hired a tutor to assist our Early Childhood Education students in the Learning Center.

Areas for Improvement:

We are continuing with course development. We have revamped several courses that did not have complete assignment descriptions and/or grading rubrics. We have begun to develop Course Activity Plans that could be used by current or future Instructors. Finally, our retention efforts must continue to include additional strategies for supporting all of our learners. Many of our students struggle to balance academic, professional, and personal issues. They require additional clarification on readings, assignments, etc.; they benefit from in person meetings and referrals to campus/community resources. Some of our students are English Language Learners and the resources for such learners are lacking and therefore, their success and retention is as well.

Needs:

1. We need to consider ways to market the program to eligible student populations. The program can lead to gainful employment opportunities for many individuals. However, students who struggle with literacy, criminal backgrounds, and/or immigration status ought not to be funneled into our program since employability will be an ongoing issue.
2. We need to continue to boost enrollment/retention of student populations that are not well represented. Compared to the general population, we have a small percentage of students in some racial/ethnic groups and we have a very small percentage of male students.

Actions:

1. The ECE faculty plan to increase readiness as well as retention/completion. We have reached out to Advising and Admissions to inform them of our program's specific requirements in an attempt to enroll a better equipped student population. We will work to support students as they work towards their academic goals by continuing to use Watermark to reach out to low performing students. We also will continue to plan an annual Pinning Ceremony to help students celebrate completion of their program.
2. The ECE faculty plan to explore alternate modalities of teaching to maximize student learning. For the last year, we have offered various courses through the HYFLEX model. In the Spring, we plan to offer courses through a more traditional HYBRID model. We seek to find the best combination of in-person instruction and remote instruction that will enable more students to meet their academic goals.
3. The ECE faculty will continue to utilize Watermark for communication and referrals as well as Blackboard and email. Regular communication with students (and other interested parties) can help facilitate completion of courses and programs. Documentation of these processes can help identify patterns of behavior that may need to be addressed.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

4. The ECE faculty plan to continue to work closely with Admissions and/or Advising to ensure student success. Ongoing conversations about individual students as well as general student populations need to occur to ensure higher levels of student completion.
5. The ECE faculty plan to continue to work with the Partnership for Children to plan events like the Spring Conference. In addition, we will need to continue to work with local school systems and early childhood programs to help with access to placements for ECE students.

Progress: Course and Grade Distributions Analysis

	Explanation
<p>Course Sequence/Success:</p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Course sequencing is a high priority within the Division. Collaboration with other divisions and programs occurs each semester to meet the general education needs of all programs college wide. A course matrix of semester offerings is provided to college program leaders. This is true for Early Childhood Education as course sequencing is extremely important for student success and completion.</p> <p>Data analysis of fill rates and course demands of prior semesters is used to create the schedule for each upcoming semester. Course fill rates are closely monitored during registration periods to maximize efficiency in course offerings. Improving course offerings is an ongoing goal within Arts and Sciences. To enhance course enrollment and maintain consistent course offerings, A&S has diligently streamlined semester schedules. Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The science curriculum schedule now includes lab sessions in both morning and afternoon slots to accommodate students' scheduling needs. Multiple lab sessions throughout the day have been introduced to provide students with greater flexibility.</p>
<p>Curriculum/Course Materials</p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>Does the program offer clinical, WBL, or Apprenticeship opportunities?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements or total credit hours have been reviewed or revised within the last two years. This process is carried out through collaboration of department leads, program chairs, divisional deans, and the Curriculum Committee.</p> <p>Opportunities to meet foundational requirements, such as gateway English and math classes, are provided early in the program, which promotes completion of pre-requisite courses early in the program to ensure successful completion. Students are encouraged, through advising and discussion with faculty and staff, to take Math and English (including prerequisite and/or corequisite courses) as early in their academic program as possible. One significant curriculum revision that will be enacted in the next two years is the launch of a state-mandated Development English co-requisite class, ENG 045, which will replace the current version of developmental instruction covered in a pre-requisite, ENG 002, and co-requisite, ENG 011. ENG 045 will serve students who have a high school GPA of 2.79 or below. Another curriculum change will occur as the current developmental math process will be replaced by the MAT Department's choice of one of the NCCCS's recommended options during the next assessment cycle.</p>

	Explanation
	EDU courses are or have been offered in local high schools. Instructors deliver the same content, with no changes in rigor or quality, in classes delivered on high school campuses. This is verified by internal audits regularly conducted by departmental leads, program chairs, and Distance Education personnel.
<p>Modality:</p> <p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Previous semester data have been analyzed to ascertain student demand based on course, modality, time of day, and campus location. The Arts and Sciences division has expanded the number of HyFlex options to include ACA, EDU, ENG, PHY, PS, SOC, and HIS classes to better meet the needs of students. This helps ECE students progress through the requirements for graduation more smoothly.</p> <p>ECE course, with the help of our instructional designers, have begun the process of moving all of the courses into Blackboard Ultra. This will help ensure student success and an easier transition for faculty. All course are mandated to move to BB Ultra by Fall 2025.</p> <p>The division has also worked to offer online teaching and instructional design training in a variety of ways. Some trainings have been and will continue to be offered in-house by the Dean and Associate Deans. In addition, many faculty are working toward improving instruction in other professional development opportunities, such as QM and ACUE.</p> <p>The following faculty in Arts and Sciences have at least 1 course certified by Quality Matters:</p> <ul style="list-style-type: none"> • Tonia Broome (MAT-152) • Melanie Dekerlegand (ENG-111) • Michele Domenech (ENG-112) • Hisayo Tokura Gallo (PSY 241) • Leslie Huss (MAT-171) • Dr. Lori Metcalf (PSY-150) • Ed Pardue (SOC-210) • Judith Porter (MUS-110) • Jeff Pruett (HIS 111) • Susan Whittemore (BIO-111) • Dr. Patricia Williams (BIO 275) • Dr. Heather Woodson (EDU-243) • Chris Ziemba-Tolbert (ACA-122) • Jeff Pruett (HIS-111) • Hisayo Tokura-Gallo (PSY-241)

	Explanation
	<ul style="list-style-type: none"> • Katie Jordan (IYOC, APPQMR, 7th Ed Update) • Michael Boone (IYOC & 7th Ed Update)
Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?	<p>EDU 243, 251, 261, 262) have less than ten students per section.</p> <p>EDU 119, 131, 146 have lower success rates than the divisional average.</p> <p>EDU 119, 146, 151, 184, 187, 251, 279 had withdrawal rates that exceeded the divisional average by more than five percent.</p> <p>Many students come into the ECE program not ready for success; others are unaware of all course requirements and unable to attend some in-person meetings such as evening, etc. In many EDU courses, students are required to complete work at an off-campus location such as a school. This may result in higher withdrawal rates for some sections. Some solutions might be to have better or clearer notification in Self Service and/or advising on EDU courses that have on-campus and other in-person requirements (e.g., lab hours in EDU 184 and EDU 284). We feel that requiring more college readiness skills (e.g., technology, writing, etc.) requiring ACA first, requiring students to follow the suggested scope and sequence would likely result in student success.</p> <p>The divisional average success rate is 89%, and several courses fall near or below this success rate. In addition, the average withdrawal rate for Arts and Sciences is 9%, and several courses have been identified that exceed that number by more than five percent. The Division of Arts and Sciences makes use of the Watermark system to catch students who are struggling as early as possible. Instructors communicate with students regarding absences and raise alerts with advisors to address student withdrawal and success issues.</p> <p>In addition, course audits are conducted to ensure faculty are meeting grading deadlines and are designing their courses with student success in mind. In-house divisional training is offered throughout the year to help faculty improve their instructional design approaches, and department leads work with individual instructors to identify and correct course design or class policy issues that may impact student withdrawals.</p>
Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.	<p>Course evaluations are conducted each fall and spring semester for every faculty member and every class. Faculty members, along with their department chairs, have access to course evaluations upon Due to course evaluations being</p>

	Explanation
Explain how the student feedback is being used to improve the course(s).	<p>administered online and students having the perception that they must finish the form to have access back into the Blackboard class, evaluation completion rates are strong and in this evaluation cycle were 88-89%. Overall, student feedback for the program is positive.</p> <p>During the 2023-2024 academic year, a pilot was conducted in two departments (Science and Math) in the Division of Arts and Sciences requiring faculty to add a self-reflection to their annual evaluation. Faculty reviewed each of their course evaluations, documented scores on specific questions, discussed specific positive and negative comments from students, and created a plan for change or improvement. The divisional leadership team felt this produced meaningful self-evaluation, and many faculty commented on how helpful it was in terms of their student evaluations. Each department in the Division of Arts and Sciences adopted this process for the remainder of the 2023-2024 academic year, guaranteeing that faculty reviewed course evaluations and analyzed student feedback, with the goal of making changes as needed to classes based on student responses.</p>

Completion/Credentials Earned

	Explanation
Graduation: Using the data in the above tables, discuss the student completion data and any identified trends? Identify any known barriers to timely student completion and how they can be addressed. What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?	Total headcount (enrolled in degree): 215 Total awards (degree/diploma):29 Award to Headcount ratio: 13.4 The barriers remain due to a systemic challenge. Throughout the field of Early Education there are ongoing issues with low wages, high amounts of burnout, and low levels of job satisfaction. The potential earnings for our students and graduates is drastically falling because of the pandemic-era Stabilization Grants going away. Timely student completion has been a major objective for both the Division and the College. Specific initiatives, such as Completion by Design, Achieving the Dream, and NC-GPS, have provided the framework for improvement strategies. The ECE program continues to make referrals for campus resources for students as needed and meets regularly with college advisors as a best practice.

Job Outlook

About this section ?

Employment of preschool and childcare center directors is projected to decline 2 percent from 2023 to 2033.

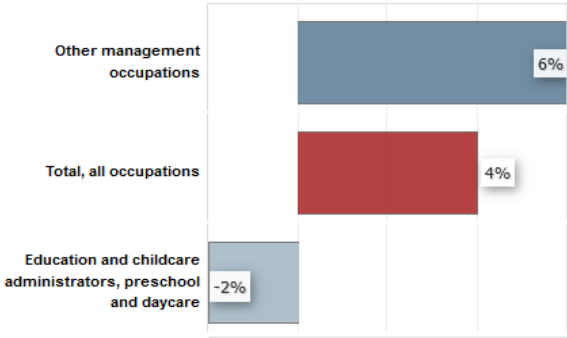

Despite declining employment, about 5,100 openings for preschool and childcare center directors are projected each year, on average, over the decade. All of those openings are expected to result from the need to replace workers who transfer to other occupations or exit the labor force, such as to retire.

Employment

Early childhood education is widely recognized as important for a child's intellectual and emotional development. However, the rising cost of childcare may limit the demand for preschool and childcare center directors over the projections decade.

Job Outlook

[About this section](#)

Employment of preschool teachers is projected to grow 4 percent from 2023 to 2033, about as fast as the average for all occupations.

About 61,400 openings for preschool teachers are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

Early childhood education is important for a child's intellectual and social development. More preschool teachers should be needed to meet the demand for early childhood education.

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	There are 2,010 projected jobs openings in early childhood projected for the state of North Carolina in 2024. Nationwide, there are over 61,000 projected job openings for early childhood educators. This suggests a real and viable need for more early childhood educators. This trend is not expected to change through the next five years.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	<p>As demonstrated during the pandemic, teachers are essential workers. Our country cannot work unless and until children have adequate care and education.</p> <p>We are continuing to experience a teacher shortage throughout the United States including right here in North Carolina. Our students and graduates are well-poised to be gainfully employed upon graduation as there is a desperate need for highly qualified Early Childhood Professionals.</p>
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	<p>Starting with our introductory course, EDU 119, successful students can earn their NCECC which allows them to be employed in licensed/regulated facilities. Almost 100% of our graduates are gainfully employed in the field by the time they enroll in the capstone course, EDU 284. The knowledge, skills, and Lab Hours they have gained help them to be quite marketable in the field. As they earn more college credits, the programs in which they are employed benefit from higher ERS ratings.</p> <p>Our program is helped by our partnerships in many ways, such as with local stakeholders on our Advisory Board, whom we ask to host our students in their programs for field work and observations. The Partnership is a means of staying abreast of current community issues as well as sharing our program news with all local directors.</p> <p>Another opportunity for collaboration was the statewide ACCESS, in which we have renewed our engagement.</p> <p>Our Advisory Board completely supports our program, including our decision to not renew our NAEYC accreditation, as it cost much in time, energy, and money and not is needed or specifically advantageous to our students or graduates.</p>

	Explanation
	As part of the Division of Arts in Sciences we participate in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, etc.). Each of these outreach events helps establish and build strong relationships with the area community.
Uniqueness: What do we do that sets us apart from neighboring institutions? How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?	More hyflex and hybrid course offerings, which nearby colleges do not. We are hopeful that this meets all students' needs. Most neighboring institutions do not have Saturday or evening course offerings. These are offered in a way that meets the work/life balance of students. Our marketing efforts need to improve to highlight our uniqueness in our offerings. Marketing Efforts include – Gaston Spotlight, Open House, Child Care Center Recruitment efforts, Directors Forum

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Early Childhood Education (55220)	DNA	DNA	1.09	0.78	0.56
Early Childhood Administration (55850)	74.93	66.03	46.41	53.97	53.88

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Early Childhood Education	\$170,841.05	63.5	\$248,408.83	\$77,567.78	54.4	\$212,810.08	\$41,969.03

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	Data shows that revenue from FTEs in EDU exceed costs by \$77,567.78 which suggests the ECE program is healthy and viable.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The ECE program is helped by our partnerships in many ways, such as with local stakeholders on our Advisory Board, whom we ask to host our students in their programs for field work and observations. The Partnership is a means of staying abreast of current community issues as well as sharing our program news with all local directors.</p> <p>Another opportunity for collaboration is the statewide ACCESS, in which we have renewed our engagement.</p> <p>Our Advisory Board is made up of individuals from our local stakeholders who fully support the ECE program and offer guidance on hiring, fieldwork, and course yearly.</p> <p>As part of the Division of Arts in Sciences we participate in several community outreach events throughout the year (such as community art shows, Legislative Breakfast, school district visits, and CTE Tuesdays, etc.). Each of these outreach events helps establish and build strong relationships with the area community and help recruit new students to the program.</p> <p>Marketing Efforts include – Gaston Spotlight, Open House, Child Care Center Recruitment efforts, Directors Forum</p>

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The Gaston College Cosmetology Program's curriculum is a competency-based curriculum that is designed around competencies needed in the cosmetology industry. The curriculum provides a simulated salon environment which enables students to develop hands-on skills under the supervision of licensed, certified cosmetology instructors. Program graduates are prepared to sit for the North Carolina Board of Cosmetic Arts' licensure examinations. Eligible graduates who sit for and successfully pass the State Board licensure exams will be issued a license to conduct cosmetic services in beauty salons and related businesses.

STRENGTHS

The program is licensed by the North Carolina Board of Cosmetic Art Examiners and is inspected each semester by the Board. For the last four semesters, the program has maintained a 97% rating.

Program graduates are required to pass the state licensure examinations with a grade of 75% or higher before applying to become licensed to practice cosmetology. The pass rate of program graduates sitting for the state licensure exam is above the required score, with an average score of 79% on the theory portion of the exam and 98% on the practical portion.

Graduate satisfaction and job placement are positive and the program attributes its success to knowledgeable faculty and a rigorous curriculum.

The total cost for attending the associate degree program, at approximately \$9,500, is much more affordable than cosmetology programs in proprietary schools in the college's service area.

As part of their training, advanced level students participate in a "Student Salon," under the supervision of licensed cosmetology educators. Through participating in the salon students have the opportunity to perfect their cosmetology skills while offering a variety of beauty services to the community at very affordable prices. Due to the excellent quality of the students' work, under the guidance of program faculty, the Student Salon has built a large, long-standing clientele through the years. The "Student Salon" serviced over 1600 clients throughout the 23/24 year.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

AREAS OF IMPROVEMENT

The program is staffed with 5 full-time faculty and numerous adjunct faculty members. Because the program relies on employing numerous adjunct faculties, there can be inconsistencies in curriculum teachings which is confusing for students when learning theory and skills. The program needs to ensure more consistency in teaching the curriculum by all faculty employed in the program.

NEEDS

- The program would benefit with one to two additional full-time faculty.
- The program would benefit with more storage space for instructional products and additional computers/iPad in the salon clinic area for instructional demonstrations.
- With the growth of the program, Cosmetology would benefit with more classroom and student clinic areas.
- Faculty would benefit by attending continuing education/professional development activities to stay abreast of trends in the industry and State Board requirements.
- The program would benefit with additional salon equipment such as salon chairs, hooded dryers, and wig dryers.

ACTIONS

The program will initiate monthly faculty meetings to ensure consistency in teaching the curriculum among full-time and adjunct faculty.

SECTION II: PROGRAM DATA

Program Enrollments

White	27	9	28
Grand Total	63	36	41

Entry – Program Enrollment

Entry – Program Enrollment	Explanation/Narrative
<p>Enrollment Analysis:</p> <p>Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>The Cosmetology program enrollment is growing.</p> <p>Changes were implemented to improve enrollment and improve the program for the students, from a 5-day week to a 4-day week. This will allow students more time for studying, family, and work.</p> <p>In comparison to neighboring schools the Cosmetology Program offers a full-time day-time adult program and a part-time program for high school students. The program offered a part time evening program in the past that was not successful. The part time evening program required 8 semesters for student completion compared to the 4 semesters in the full-time program. For an evening program to be as successful as the morning cohort, it will require full time hours. To offer an evening program the department would need additional qualified faculty.</p> <p>Marketing the program through open houses, social media, word of mouth, career fairs, and on-campus tours has been very successful in highlighting the program and attracting students.</p> <p>The COS program will be looking to add online hours to help students with the amount of clock hours required.</p>
<p>Enrollment Analysis:</p> <p>Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A55140 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the COS program at GC? Identify strategies for enrollment growth.</p>	<p>Cosmetology is a very diverse program based on demographic data. Based on the most recent demographic data, the student population is 46% White, 17% Black/African American, 3% Hispanic/Latinx, and 24% Unknown. Women make up 99% of students enrolled in the program.</p> <p>The college has many support programs for all its students but those in particular that would support underserved populations financially include college scholarships, financial aid, and TRIO. Strategies for academic support include TRIO/Student Support Services, peer tutoring, Counseling, and the Writing Center.</p> <p>The Cosmetology program will partner with the marketing dept. to help with the growth of the underserved and male populations.</p> <p>Students enroll in other colleges due to their location in counties.</p> <p>Cleveland CC had 77 (new and recurring students for Spring 2024). In spring 2024, COS had experience growth at Cleveland CC with 0 from Lincoln & 5 students from Gaston</p>

	Explanation/Narrative
	<p>from our service area. This could be an opportunity for program growth.</p> <p>The program may want to consider reaching out to Cleveland CC and get permission to contact students in the county to share program information/marketing campaign to students.</p> <p>Catawba Valley CC had 58 (new and recurring students for Spring 2024); however, 2 from Lincoln & 0 from Gaston students <u>from our service area</u> have enrolled in the COS program at CVCC. $2+0=2$ This maybe an opportunity for program growth.</p> <p>Central Piedmont CC had 98 (new and recurring students Spring 2024); however, 0 from Lincoln & 3 from Gaston totaling 3 students from our service area. $0 + 3 = 3$/This shows a possible opportunity for program growth. May want to discuss further with other program personnel.</p> <p>When reviewing these numbers, determine if the program has effectively marketed the Cosmetology program to students in and around our service area counties.</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for **2023-**

The Cosmetology Program is a truly diverse program based on demographic data. In comparison to the college, the

2024 as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college ***race/ethnicity*** data.

Discuss program actions to enroll and retain underserved students or special population students.

Cosmetology program is 46% White, 17% Black, 10% Hispanic, 3% Two or more races, and 24% Unknown.

The Cosmetology program will partner with the marketing dept. to help with the growth of the underserved.

Demographic Enrollment Analysis by Gender:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Gender:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to gender. For example, explain the if the ***gender*** breakout between male and female students is more, less, or the same as the college's overall gender breakout.

Discuss program actions to enroll and retain underserved students or special population students.

Females make up 99% and 1% males make up students enrolled in the program. Cosmetology is a female dominated field.

The Cosmetology program will partner with the marketing dept. to help with the growth of male students.

Demographic Enrollment Analysis by Age:

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

In the Cosmetology program, the student age range is similar to the college. 18-24 is 78%, 25-44 is 22%, and 45-64 is 0%.

Cosmetology will work with marketing to help with the growth of the age group 45-64.

Program Course Information (Fall 2023 and Spring 2024)

Progress: Course and Grade Distributions Analysis

	Explanation
Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year) How do Course Success Rates compare to the College success rate? Are the courses that are being offered for the program meet enrollment needs? Share/Identify courses that have low enrollment.	Courses are sequenced in a way that students build upon previously learned knowledge and skills from the simple to the complex. General Education courses such as English and Psychology are sequenced for the first year to help students with the completion of the Diploma and associate's degree. The Cosmetology Program enrolls a new cohort of students each Fall and each Spring semester. Due to the nature of COS courses and skills taught, each course can only have a ratio of 20 students/1 instructor. Course success rates meet and exceed the college success rate.

	Explanation
	<p>The low enrollment classes are the second-year high school classes. Students will realize after one to two semesters that cosmetology is not their interest anymore.</p> <p>Students need a clearer understanding of the strict requirements of the program.</p> <p>The courses offered meet enrollment needs.</p>
<p>Curriculum/Course Materials</p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>Does the program offer clinical, WBL, or Apprenticeship opportunities?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>Course credit hours and requirements have not been reviewed in the last two years.</p> <p>No significant curriculum revisions are anticipated in the next two years.</p> <p>The program offers a student clinic, open to the public, that provides services to the public at an affordable price. The student clinic allows the students to practice live models to prepare them for the industry.</p>
<p>Modality:</p> <p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Courses in the Cosmetology Program are traditionally seated; however, the program tried to integrate theory content online but wasn't as successful as seated theory classes. The program is required by the NC Board of Cosmetic Arts to operate on a system of counting in-class "clock hours." Students in the program are required by the NC Board of Cosmetic Arts to obtain 1500 clock hours and 480 performances, under the supervision of a certified cosmetology instructor, before completing the program.</p> <p>Traditionally seated is the best delivery mode for this hands-on program.</p>
<p>Student Achievement:</p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Courses with Low Enrollment</p> <ul style="list-style-type: none"> COS 113AB, COS 113BB, COS 114AB, COS 114BB <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> NA <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> COS 111, COS 112 <p>The courses with low enrollment are the part time high school classes. Cosmetology is planning on being involved in more high school and middle school career fairs/job fairs.</p> <p>The course with low success rates is the first semester theory classes. Cosmetology plans to have more student led study sessions for students after class.</p> <p>The courses with the highest withdrawal rate are the first semester courses. Students do not understand coming into the program the rigorous requirements of Cosmetology. Cosmetology will need to come up with an action plan to</p>

	Explanation
	help introduce students to the requirements of the program during scheduled orientations.
Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated. Explain how the student feedback is being used to improve the course(s).	End-of-Course evaluations are overall very positive. Some evaluations may give feedback that the cosmetology instructors are too strict or that instructors don't have enough time to provide more individual instruction with each student. The program tries to schedule as many instructors in the clinical setting and in the classrooms as possible. If negative student feedback about an instructor is a legitimate concern, the concern is addressed through a coaching session with the instructor. If the feedback is a suggestion for improvement in the program or a concern about program guidelines, etc. then it is addressed at the level of the associate dean, and the divisional dean if necessary, and the appropriate action warranted is taken.

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
A55140 Cosmetology	A55140	30%	63%
D55140 Cosmetology – Diploma	D55140	20%	77%
C55140P Cosmetology – CCP	C55140P	DNA	DNA
C55160 Cosmetology – Cosmetology Instructor	C55160	DNA	DNA

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	<ul style="list-style-type: none"> In 22/23 the Associate's Degree program retention rate was 30% but increased in 23/24 to 63%. In 22/23 the Diploma program retention rate was 20% and increased in 23/24 to 77% <ul style="list-style-type: none"> Barriers for timely student completion in the Cosmetology Program may be due to difficult financial situations, too many personal/family responsibilities outside of school, and/or the student cannot successfully complete the required general ed classes in the program's curriculum. Cosmetology students are required to be in class Monday-Thursday, 8am-3pm in order to obtain the required clock hours by the

	Explanation
	NC Board of Cosmetic Arts to complete the program. The amount of time required to complete the program doesn't allow some students enough time needed outside of class to meet other obligations such as caring for families or working jobs. A large percentage of students would like seated classes in the evening due to working or caring for families during the day, but not all courses required in the cosmetology curriculum are offered in the evening or all the available seats fill up quickly. Also, some students have been out of school for many years and become overwhelmed with returning to school and the coursework required and get discouraged and quit.

Credential Earned – Academic Year 2023-2024

Completion/Credentials Earned

	Explanation
Graduation: Using the data in the above tables, discuss the student completion data and any identified trends? Identify any known barriers to timely student completion and how they can be addressed.	Graduation rates have decreased over the last few years. Students are not interested in completing the diploma or degrees once the completion of clock hours. The Cosmetology program will work with other divisions to request more evening classes for the needs of the students.

What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?	Students will also be advised to complete courses before completing the core classes to help ensure completion.

Job Outlook

About this section

Overall employment of barbers, hairstylists, and cosmetologists is projected to grow 8 percent from 2022 to 2032, faster than the average for all occupations.

About 89,400 openings for barbers, hairstylists, and cosmetologists are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

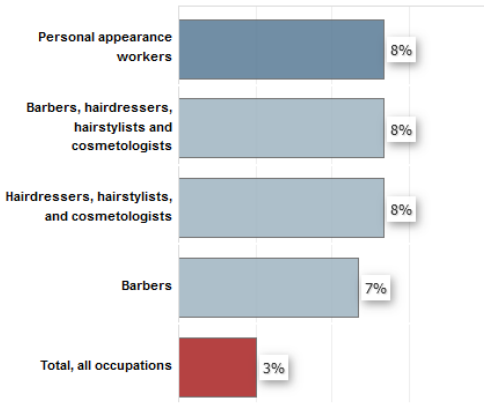

Employment

The need for barbers and hairdressers will stem primarily from demand for basic hair care services. In addition, an increased demand for hair coloring, hair straightening, and other advanced hair treatments is expected to continue over the projections decade.

Hairdressers, hairstylists, and cosmetologists will continue to compete with providers of specialized services, such as nail and skin care. Consumers often choose manicurists and pedicurists and skincare specialists for these services, rather than to visit hairdressers, hairstylists, and cosmetologists for them. Still, employment is expected to grow to meet increased demand for personal appearance services.

Barbers, Hairstylists, and Cosmetologists

Percent change in employment, projected 2022-32

Occupation	Percent change in employment, projected 2022-32
Personal appearance workers	8%
Barbers, hairdressers, hairstylists and cosmetologists	8%
Hairdressers, hairstylists, and cosmetologists	8%
Barbers	7%
Total, all occupations	3%

Note: All Occupations includes all occupations in the U.S. Economy.

Transition/Employment Outcomes

Explanation

Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	Cosmetology is projected to grow 8% over the next ten years. 85% of the students that graduate from the COS program has jobs in a salon by the time they graduate. Cosmetology has partnered with many salons to hire our graduates such as William & Henry, Smart Styles, Fantastic Sam's, Sports Clips, Great Clips, Church and Co., and Cosmo Prof.
--	---

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	The Cosmetology Program offers a full-time daytime adult program and a part-time program for high school students, each program has high enrollment. Over the next few years, the industry is projected to grow 8%. With an average salary of \$30,000 to \$45,000.
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	<p>The Cosmetology Program offers hands on education that will prepare students to sit for the NC Cosmetic Arts licensing exam. The Cosmetology program provides education to prepare students for entry level jobs in the cosmetology industry. The Cosmetology program partners with salons in Gaston and Lincoln County to provide employment information to graduates. Salons such as; William Henry, Great Clips, Sports Clips, Fantastic Sams, Smart Styles, and many other self-owned salons. The Cosmetology Program invites salons to be guest speakers to provide students with information about the salon and how to apply for a job.</p> <p>The Cosmetology Program has collaborated with local organizations for the purpose of teaching students the importance, as a professional in their career field, of giving back to the community. Students work with The Woman in Pink, a nonprofit organization, that provides wigs to cancer patients. Students in the Cosmetology Program raised money to give to The Women in Pink organization during Breast Cancer Awareness month to help with the purchase of wigs. Every November the Cosmetology Program partners with Christian Ministries to collect food to help feed families in need over the holidays. Students and faculty in the program partner with Phoenix House, Christian Ministries, Hesad House, and Amy's House to provide free/low-cost services to their residents in need. For the last two years, Amy's</p>

	Explanation
	<p>House has held a fashion show for all proceeds to be given to help Amy's House. The cosmetology students provide hair and makeup services to the model participants.</p> <p>Representatives from Pretty in a Minute, Absolute Edge, Salon Centric, and Matrix, manufacturers of beauty salon products, meet with the cosmetology students each year to provide product and salon tool knowledge.</p> <p>Cosmetology will collaborate with the Esthetics and Manicuring programs to provide specials to the public for services provided at a discounted rate.</p> <p>The Cosmetology Program partners with salons, such as, William Henry, Great Clips, Sports Clips, Artful Strands, Rooted & Co., to provide additional hands-on education to the students.</p> <p>The Advisory Committee for the Cosmetology Program provides valuable feedback in helping to identify the program's strengths - graduates have excellent entry-level skills, a strong work ethic, are dependable, and skilled in client consultations, and the program's weaknesses – graduates are weak in knowing how to build clientele, perform clipper cuts, and finishing the final details of a style.</p>
<p>Uniqueness:</p> <p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>The Gaston College Cosmetology Program is set apart from neighboring institutions by the beautiful facilities in which the program is housed and through providing a very affordable education in cosmetology. Due to the quality of instruction by the Cosmetology Program faculty, its graduates are highly skilled, exhibit excellent work ethics, and are highly sought after by many of the area salons.</p> <p>Marketing the program through open houses, social media, word of mouth, career fairs, and on-campus tours has been very successful in highlighting the program and attracting students.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Cosmetology (55140)	117.89	104.41	105.44	109.09	123.13
Cosmetology Instructor (55160)	DNA	1.25	DNA	DNA	DNA

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Cosmetology & Esthetics	\$733,104.96	167.9	\$656,894.34	(\$76,210.62)	167.3	\$654,469.24	(\$78,635.73)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	The Cosmetology Program is a very viable program at Gaston College. The Cosmetology Program generated 146.58 FTEs in 2018 and 117.89 on 20/21. The program has seen a decrease since the pandemic in 2020. The FTEs for 22/23 were 109.09, but in 23/24 experienced growth to 123.13 FTEs due to industry growth.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Cosmetology Program has collaborated with local organizations for the purpose of teaching students the importance, as a professional in their career field, of giving back to the community. Students work with The Woman in Pink, a nonprofit organization, that provides wigs to cancer patients. Students in the Cosmetology Program raised money to give to The Women in Pink organization during Breast Cancer Awareness month to help with the purchase of wigs. Every November the Cosmetology Program partners with Christian Ministries to collect food to help feed families in need over the holidays. Students and faculty in the program partner with Phoenix House, Christian Ministries, and Amy's House to provide free services to their residents in need. Every year, the Webb Street school has a prom for their special needs students and the cosmetology students provide hair and makeup services to the prom attendees.</p> <p>Representatives from GC Small Business Dept. and Job Placement work with Cosmetology students to prepare them for the future.</p> <p>Representatives from Pretty in a Minute, Absolute Edge, Salon Centric, and Matrix, manufacturers of beauty salon products, meet with the cosmetology students each year to provide product and salon tool knowledge.</p>

	Explanation
	Cosmetology will collaborate with the Esthetics and Manicuring programs to provide specials to the public for services provided at a discounted rate.

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	Cosmetology will be starting a new program inside Hunter Huss High School for the 24/25 academic year.

Program Progress: PLO/SLOs and Curriculum Map

	Explanation
PLO/SLOs and Curriculum Map: Review and update the curriculum mapping information for Program Learning Outcomes (PLOs) listed below. Also upload the updated Curriculum Map document to the program's folder on OneDrive.	

Curriculum Map - A55140 Cosmetology / C55160 Cosmetology Instructor

Course	PLO1	PLO2	PLO3
	Demonstrate the use of safety and infection control practices as they perform client services.	Develop cosmetology skills including hairstyling, haircutting, chemical applications, various hair color services, wet setting, thermal styling, ethnic hairstyling, manicures, pedicures, artificial nails, artificial hair, and skin care services.	Pass a mock final examination of the North Carolina Board of Cosmetic Arts examination prior to completing the program.

Program Review – C55230 Esthetics Technology

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Breanne Walker

Program Code(s)/Name(s): Cosmetology/Esthetics

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- C55230 Esthetics Technology - Certificate
- C55230P Esthetics Technology Certificate-CCP
- C55270 Esthetics Instructor

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

The Gaston College Esthetics Technology Program's curriculum is a competency-based curriculum that is designed around competencies needed in the esthetics industry. The curriculum provides a simulated salon environment which enables students to develop hands-on skills under licensed esthetics instructors' supervision. Program graduates are prepared to sit for the North Carolina Board of Cosmetic Arts Licensing Exam for Estheticians. Eligible graduates who sit for and successfully pass the State Board licensure exam will be issued an esthetics license.

STRENGTHS

The Esthetics program started in 2013 with 8 students on the Kimbrell Campus. Within 8 years, the program grew to 3 sections of 10 students for 30 students. Due to the growth of the program, a beautiful new facility was built on the Lincoln Campus in 2022. The new facility provided space for 3 sections of 15 for 45 students. Fall 2023 was the first semester in the new facility with an enrollment of 44 students.

The Esthetics Program is licensed by the North Carolina Board of Cosmetic Art Examiners and is inspected each semester by the Board. Gaston College Esthetics Program was the first esthetics program in 20 years to receive a rating of 100% by a state inspector. The program maintained a 100% rating for seven continuous semesters, and currently maintains a 97% rating.

Program graduates are required to pass the state licensure theory and practical examinations with a grade of 75% or higher before applying to become a licensed esthetician. The pass rate of program graduates sitting for the state licensure exam is above the required score, with an average score of 86% on the theory portion of the exam and 98% on the practical.

The new physical space located on the Lincoln Campus will allow for the growth of enrollment and clientele.

Interest and enrollment in the esthetics program continues to remain high. The program offers three sections of classes, morning, afternoon, and evening, to accommodate the needs of students. Based on new physical space available to the program, each section can accept 15 students for a total enrollment of 45 students.

As part of their training, esthetic students participate in a "Student Salon" under the supervision of licensed esthetics educators. Through participating in the clinic, students can further develop their skills in skin care while offering a variety of esthetic services to the community at affordable prices. Due to the excellent quality of the students' work, under the guidance of program faculty, the Student Salon has built a large, long-standing clientele through the years.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Program implemented a new curriculum with Pivot Point Education that has been very successful for all new students.

AREAS OF IMPROVEMENT

Provide more opportunities for professional development for program faculty.

Training for new hires.

NEEDS

- Additional office space for faculty due to the growth of the program.
- Qualified Esthetics instructors to meet the need of enrollment growth.

Additional full-time faculty.

ACTIONS

- Research continuing education opportunities for esthetic faculty.
- Advertise more for Esthetics instructors.

SECTION II: PROGRAM DATA

White	13	0	2
Grand Total	45	0	2

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis:</p> <p>Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>In 2023 the Esthetics program moved to a new facility on the Lincoln campus that will give the space needed for growth to 45 students. The program's enrollment has increased due to being able to enroll more students due to the larger space.</p> <p>Courses are sequenced in a way that students build upon previously learned knowledge and skills from the simple to the complex.</p> <p>Esthetics has been successful with enrollment. In 2023 the Esthetics program filled all 43 of the 45 spots available.</p> <p>Other changes implemented to improve enrollment and the program for the students was changing it from a 5-day week to a 4-day week. This will allow students more time for studying, family, and work.</p> <p>The program will look at adding online hours to help students with the amount of in person class time needed.</p>
<p>Enrollment Analysis:</p> <p>Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for C55230 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the EST program at GC? Identify strategies for enrollment growth.</p>	<p>The Esthetics Program is a truly diverse program based on demographic data. Based on the most recent demographic data, the student population is 37% Black/African American, 31% White, 0% American Indian/Alaska Native, 16% Hispanic/Latino, 3% Asian, and 7% Unknown. Females make up 100% of students enrolled in the program.</p> <p>The college has many support programs for all its students, but those that would support underserved populations financially include college scholarships, financial aid, and TRIO. Strategies for academic support include TRIO/Student Support Services, DEI services, Counseling, peer tutoring, and the Writing Center.</p> <p>The Esthetics program will partner with the marketing dept. to help with the growth of the underserved and male populations.</p> <p>Students enrolling in other colleges is due to not having enough space for the number of applications received. Esthetics received 60 applications for the 45 available spots.</p> <p>Cleveland CC had 26 (new recurring students for Spring 2024. In spring 2024, EST had experience growth at Cleveland CC with 7 students enrolled in the EST program from Gaston. The program should consider reaching out to</p>

	Explanation/Narrative
	<p>Cleveland CC and get permission to contact students in the county to share program information/marketing campaign to students.</p> <p>Catawba Valley CC had 0 (new and recurring students for Spring 2024); however, 0 from Lincoln & 0 from Gaston students have enrolled in the EST program at CVCC. $0+0=0$ An opportunity for program growth.</p> <p>Central Piedmont CC had 0 (new and recurring students Spring 2024); however, 0 from Lincoln & 0 from Gaston totaling 0 students from our service area. $0+0=0$/This show an opportunity for program growth.</p> <p>When reviewing these numbers, determine if the program has effectively marketed the Esthetics Technology program to students in and around our service area counties.</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the <i>gender</i> breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Females make up 100% of students enrolled in the program. Esthetics is a female dominated field.</p> <p>The Esthetics program will partner with the marketing dept. to help with the growth of male students.</p>
--	--

Demographic Enrollment Analysis by Age:

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

In the Esthetics program, the student age range is like the college. 18-24 is 63%, 25-44 is 31%, and 45-64 is 6%.

Esthetics plans to work with the College Now program to advertise the Esthetics program to the high school population.

Program Course Information (Fall 2023 and Spring 2024) Cosmetology/Esthetics share the same course data.

Dept-Course	Students	Sections	Students/Section	FTE	FTE Value

Progress: Course and Grade Distributions Analysis

	Explanation
Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year) How do Course Success Rates compare to the College success rate? Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.	Courses are sequenced in a way that students build upon previously learned knowledge and skills from the simple to the complex. The Esthetics Program enrolls a new cohort of students each Fall semester. The program offers 3 sections, morning, afternoon, and evening, with 15 available seats available in each section. Twelve to fifteen seats are filled in each section. Course success rates meet and exceeds the college success rate.

	Explanation
	The courses offered meet enrollment needs.
Curriculum/Course Materials Have the program's core course requirements or total credit hours been reviewed or revised within the last two years? Are significant curriculum revisions anticipated in the next two years? Does the program offer clinical, WBL, or Apprenticeship opportunities? If the program offers Career and College Pathways (CCP) at one or more service area high schools, how is faculty instruction in CCP Pathways of equal quality and rigor as the college campus program?	Course credit hours and requirements have not been reviewed in the last two years. No significant curriculum revisions are anticipated in the next two years. The program offers a student clinic, open to the public, that provides services to the public at an affordable price. The student clinic allows the students to practice on live models to prepare them for the industry.
Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality. Include Quality Matters and online training information here	Courses in the Esthetics Program are traditionally seated courses. Three sections are offered: 8am-12:30pm, 12:30pm-5pm, and 5pm-10:30pm to provide as many student options for enrollment as possible. Course delivery options are limited as the North Carolina Board of Cosmetic Arts requires that a certain number of hours and skill competencies be performed in class under the supervision of a licensed esthetic instructor.
Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?	Courses with Low Enrollment <ul style="list-style-type: none"> • NA Courses with Low Success Rates <ul style="list-style-type: none"> • NA Courses with High Withdrawal Rates <ul style="list-style-type: none"> • NA
Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated. Explain how the student feedback is being used to improve the course(s).	<ul style="list-style-type: none"> • End-of-Course evaluations are overall positive regarding the program and faculty instruction. If student feedback ever relays a legitimate concern about a faculty member, the concern is addressed through a coaching session with the faculty member. If the feedback is a suggestion for improvement in the program or a concern about program guidelines, etc. then it is addressed at the level of the associate dean, and the divisional dean if necessary, and the appropriate action warranted is taken.

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
C55230 Esthetics Technology (Certificate)	C55230	0%	94%
C55230P Esthetics Technology– CCP	C55230P	DNA	DNA
C55270 Esthetics Instructor (Certificate)	C55270	0%	100%

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	<ul style="list-style-type: none"> In 2023/2024 the program retention rate was 94%. Most of the barriers to students successfully completing the program tend to be personal/life issues. Students withdraw for reasons such as personal finances, lack of childcare, lack of transportation, and family issues.

Credential Earned – Academic Year 2023-2024 (*Achieving the Dream*)

Program Titles	Programs Code	2023SU	2023FA	2024SP	Grand Total

C55270 Esthetics Instructor (Certificate)	C55270	0	0	0	0
	Grand Total	22	25	28	35

Completion/Credentials Earned

	Explanation
Graduation: Using the data in the above tables, discuss the student completion data and any identified trends? Identify any known barriers to timely student completion and how they can be addressed. What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?	In 2023/2024 academic year the retention in the Esthetics program was good. Barriers for timely student completion in the Esthetics Program may be due to difficult financial situations, too many personal/family responsibilities outside of school and or health.

Job Outlook

About this section ?

Employment of skincare specialists is projected to grow 10 percent from 2023 to 2033, much faster than the average for all occupations.

About 12,800 openings for skincare specialists are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

The projected increase in employment reflects demand for services being offered, such as mini-sessions (quick facials at a lower cost) and mobile facials (making house calls) directly from skincare specialists rather than hairdressers, hairstylists, and cosmetologists. Employment growth also should result from the desire among many women and a growing number of men who seek out skincare services to reduce the effects of aging, to look good on social media platforms, and to lead a healthier lifestyle through better grooming.

Transition/Employment Outcomes

	Explanation
<p>Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer.</p> <p>(Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)</p>	<p>With a 2-3% employment growth, graduates of the Esthetics Program are remarkably successful in finding employment. Many of the graduates are small business owners and have opened their own spas. The program partners with several salons/spas in surrounding counties to help with job placement. Also, some graduates are employed as estheticians in the medical field. Overall, graduates of the program have not had difficulty in finding employment.</p>

SECTION III: CONNECTION

	Explanation
<p>How valuable is this program to the community?</p> <p>(Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports,</p>	<p>The Esthetics program offers three different enrollment sections, morning, afternoon, and evening, to meet the needs of adult and high school students. Over the next few</p>

	Explanation
https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272	<p>years, the industry is projected to grow 3-5%. With an average salary of \$50,000-\$63,000.</p>
<p>Community:</p> <p>How does this program lead to employment opportunities in the local community or prosperity zone?</p> <p>How have we benefitted from community partnerships and what other opportunities exist for collaboration?</p> <p>What is the advisory committee feedback?</p>	<p>By offering three different enrollment sections, morning, afternoon, and evening, the scheduling needs of adult and high school students are met.</p> <p>The Esthetics Program has collaborated with local organizations to teach students the importance, as a professional in their career field, of giving back to the community. Every year, the Webb Street school has a prom for their special needs students and the esthetic students provide skin and makeup services to the prom attendees. Students work with Christian Ministries to collect food to help feed families in need over the holidays.</p> <p>Representatives from Dermalogica meet with the students to provide hands-on education and product knowledge.</p> <p>The Esthetics program will be collaborating with the Cosmetology and Manicuring programs to provide specials to the public for services provided at a discounted rate.</p> <p>The Advisory Committee for the Esthetic Program provides valuable feedback in helping to identify the program's strengths, weaknesses, and suggestions for program improvement. Feedback from the Advisory Committee guided the program in streamlining its application process using a points system. The committee also states that the Gaston College Esthetics Program fosters a strong work ethic in its students and program graduates are well-prepared for entry level positions.</p>
<p>Uniqueness:</p> <p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>The Gaston College Esthetics Program provides excellent instruction at an affordable cost for students. The quality of instruction is evident through the graduate pass rates on the state licensure exam. Having a brand-new state-of-the-art facility is a bonus for incoming students.</p> <p>Marketing for the program has been successful through tours, career fairs, open houses, word of mouth, and social media.</p>

SECTION IV: CONNECTION**Curriculum FTEs by Students' Primary Major**

FTE	19-20	20-21	21-22	22-23	23-24
Esthetics Instructor (55270)	DNA	DNA	1.25	1.31	1.34
Esthetics Technology (55230)	32.81	27.34	29.41	33.75	42.81

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Cosmetology & Esthetics	\$733,104.96	167.9	\$656,894.34	(\$76,210.62)	167.3	\$654,469.24	(\$78,635.73)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	The Esthetics Program is a very viable program at Gaston College. The Esthetics Program generated 167.3 FTEs in 23/24. The enrollment in the Esthetics Program is excellent. The program started in 2013 with one section of only 8 students. In 2021-2022 with three sections, the program received 75 applications for 30 available spots and 70 applications in 2022. In the Fall of 2023, the program started in the new facility and enrolled 43 of the 45 available spots.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	The Esthetics Program has collaborated with local organizations to teach students the importance, as a professional in their career field, of giving back to the community. Every year, the Webb Street school has a prom for their special needs students and the esthetic students provide skin and makeup services to the prom attendees. Students work with Christian Ministries to collect food to help feed families in need over the holidays. Representatives from GC Small Business Dept. and Job Placement work with Cosmetology students to prepare them for the future.

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	N/A

		performance rubrics.						
5.	Sit for the North Carolina Board of Cosmetic Arts Esthetics Licensing Exam for Estheticians	COS 120 Fall Semester COS 126 Spring Semester Assessment Means: Students will take a mock practical final exam that mirrors the North Carolina Board of Cosmetic Arts licensing examination in preparation for sitting for the licensing exam.	On average, students will earn a grade of at least 75% out of 100% on the mock exam.	COS 120 Fall 2023 Mean: 85 Mean of Completers:85 Range: 0-100 n:43 COS 126 Spring 2024 Mean:93 Mean of Completers:93 Range:50-100 n:42	Assessment results demonstrated: Students met the 75% standard and scores improved on the students second mock exam.	None at this time as on average, students scored well above the standard.	N/A	No change needed

Program Review – A45340 Emergency Medical Science

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Kimberly Parsley

Program Code(s)/Name(s) Emergency Medical Science

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A45340 Emergency Medical Science
- A45340B Emergency Medical Science – Paramedic Bridging Track

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Strengths:** During the 2023-2024 academic year, The Emergency Medical Science (EMS) program was successful in meeting the needs of both our students and local service partners. Local EMS agencies recruit and employ graduates of the program. The EMS program continues to produce successful entry level paramedics that are knowledgeable, skillful, and confident. Graduates of the 2023-2024 year obtained a 100% pass rate on paramedic credentialing exams through the NC Office of EMS. The graduates of the program also had a 100 % employment rate upon graduation.

Even though enrollment numbers continue to increase only slightly, the number of students is still lower than pre-covid registrations. These overall lower enrollment numbers are in line with paramedic programs nationwide. Student retention did increase for the academic year to 50%. The EMS Education Department made recruitment plans alongside EMS agencies and developed classes that try to meet their needs. Since the EMS Education program joined the Health and Human Services division in January 2021, the goal has been to increase the quality of patient simulation and to upgrade aging equipment. Moving to the HHS division has given students and instructors additional classroom space and the ability to utilize other assets owned by the HHS division. The program was given the opportunity to move the physical classrooms and labs from the David Belk Cannon building to the Pearson Life Skills building. Even though the move was not completed before the academic year's end, the students used the larger classroom and participated in creating plans for future labs.

The American Heart Association Training Center, which is an extension of the EMS Education program, also benefitted from the move to Pearson Life Skills by gaining exclusive classroom space. The training center generates thousands of AHA certifications each year, both on and off campus. The AHA Training Center has a partnership with the Caromont Healthcare System to provide all AHA training for all employees. The department employs a Health Education Training Specialist that is a full-time faculty member.

Some updated equipment was obtained through the partnership with Caromont Health Care. Two Physio-Control LikePak Heart Monitors with defibrillators were secured and were in use by the end of the 2024 school year. These heart monitors are state-of-the-art monitors that allow the students to train and become familiar with the most up to date equipment. After the department was awarded the NC Expansion Grant in February 2024, the department made plans to use the funds to provide updated lab equipment that will benefit the current students and allow for program growth.

- **Areas for Improvement:** As last academic year, and reflecting the years past, the diversity of the program needs improvement. 75% of students for the year 2023-2024 were white. Local service partners and EMS

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

agencies have made plans to implement recruitment programs to increase the diversity within their agencies while the college educates and trains those same employees.

The department needs to continue working to improve the lab spaces for simulation. Some equipment is outdated or past the useful life. Overall, simulation labs are adequate for learning and instruction, but some items need to be replaced.

The program needs to improve recruitment for all demographics. Local EMS agencies currently need EMTs and paramedics to keep them at adequate staffing levels.

- **Needs:** The needs of the department at the end of the 2024 school year included plans to continue updates to the Pearson Life Skills Building while the program works to secure classrooms and student labs. The department needs to plan for the replacement of some outdated simulation equipment. The department should create a plan to address the use of Artificial Intelligence by students, both inside the classroom and during clinical rotations. Faculty and staff should continue to seek training in AI, both as a threat to the classroom integrity and as training tools in the classroom.

The EMS Education department needs to increase the number of qualified adjunct instructors. Subject matter experts and instructors in specialties are the biggest need so the department can offer critical care classes and state-level anatomy and physiology classes.

- **Actions:** The EMS Education department is now planning to partner with local EMS agencies to determine the best practices for recruitment and retention of students and adjunct faculty. The department is also in the planning stages to offer EMS training to fire cadets that finish school in April 2025. This would be the first collaboration for classes with the Fire Education Department. Marketing opportunities should be increased with social media and the use of state databases for education.

The Apprenticeship 321 programs will continue to allow new opportunities for recruitment. This program gives employers the chance to partner alongside the EMS Education Department along with the student to build an educational pathway and timeline that is beneficial to all.

The EMS Education Department is actively seeking durable medical equipment to improve the scenario labs, utilizing funds from the NC Expansion grant.

The department has plans to offer increased opportunities for professional development for credentialed care providers. In early 2024, the department hosted and facilitated over 120 employees of Gaston Emergency Medical Services with required training that generated over 11 FTE. Planning is underway for several NC State OEMS classes that will bring students from surrounding counties to the Dallas campus.

SECTION II: PROGRAM DATA

Enrollment

	Explanation/Narrative
<p>Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>Overall enrollment for the programs increased slightly for the 2023-2024 academic year. Enrollment levels are still below the averages before 2020.</p> <p>In 2023-the EMS Advisory Council reviewed all core classes and voted to remove EMS 210 from the degree. All sections were reviewed, and the degree was set at 68 credit hours. There are now no part-time pathways due to the rigor and intensity of the clinical rotations.</p> <p>In comparison to neighboring institutions, the degree hours are similar. The major courses, or core curriculum, are set by the state of North Carolina Office of EMS and have insignificant variation. The differences in programs are clinical sites, simulation opportunities and quality faculty.</p> <p>The removal of EMS 210-Advance Patient Assessment lowered the required credit hours from 70 to 68. The enrollment goals will be implemented along with the recruitment plans of service partners.</p>
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>Review program enrollment for A45340 at other institutions in our neighboring counties.</p>	<p>The EMS Education program is a selective-admission program due to state mandated prerequisites. There are few, if any, non-traditional enrollment students, however, the department does work to assist any student that comes from an underserved demographic. All student resources are utilized including tutoring, financial aid and special assistance from EAP and counseling.</p> <p>Students enrolled at Cleveland CC are part of an agency class offered at Cleveland CC after Gaston College was unable to make the same offer due to the lack of full-time faculty. After the award of the NC Expansion Grant, Gaston College made plans to hire an additional full-time</p>

	Explanation/Narrative
<p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the EMS program at GC? Identify strategies for enrollment growth.</p>	<p>instructor, and at the time of graduation, interviews were in progress. Once an instructor is hired, the plans for an agency sponsored paramedic class can move forward.</p> <p>Cleveland CC had 5 (new and recurring students Spring 2024) 1 student from Lincoln & 1 student from Gaston & <u>our service area</u> has enrolled in the EMS program at CVCC. $1+1 = 2$</p> <p>The program should consider reaching out to Cleveland CC and get permission to contact students in the county to share program information/marketing campaign to students.</p> <p>**the students attending Cleveland CC are part of an agency sponsored class. In May 2024, Cleveland CC did not have a full-time program director**</p> <p>Catawba Valley CC had 24 (new and recurring students for Spring 2024); however, 4 from Lincoln & 0 from Gaston student <u>from our service area</u> have enrolled in the EMS program at CVCC. $4+0 = 4$. An opportunity for program growth.</p> <p>Central Piedmont CC had 18 (new and recurring students Spring 2024); however, 0 from Lincoln & 0 from Gaston totaling 0 students from our service area. $0 + 0 = 0$</p> <p>When reviewing these numbers, determine if program personnel has effectively marketed the Emergency Medical Science program to students in and around our service area counties.</p> <p>**Personnel for the EMS Education program at Gaston College actively recruit students from local agencies and special events. Some of the events have been high school and college job fairs, local festivals and sporting events.**</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p> <p>**The Apprenticeship 321 program is an effective recruitment tool, and the department takes every possible opportunity to present Apprenticeship to agencies and students. **</p>

Demographic Enrollment Analysis by Race/Ethnicity:

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college *race/ethnicity* data.

Discuss program actions to enroll and retain underserved students or special population students.

The EMS Education department is lower in percentages for black and Hispanic students and is in line with employees from local EMS agencies. Nationally, Public Safety professions lag other professions in diversity. The college’s service partners, as well as other local EMS agencies, are making recruiting diverse students a priority.

The department plans to recruit and retain students from all backgrounds by emphasizing the benefits of paramedic medicine jobs, including increased wages and benefits, flexible work schedules and tuition that may be paid by an employer or exempt.

Demographic Enrollment Analysis by Gender:

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the gender breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>The EMS Education Department had an increase in female students for the 2023-2024 school year. Historically, the public safety programs are male dominated. This school year looks to be an anomaly, and the program expects a more equal class division in the future.</p>
---	--

Demographic Enrollment Analysis by Age:

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

The age demographics for the EMS Education program is the same as the college. There are few, if any, students in the age groups 45+ due to the rigor and intensity of the job. Paramedic students in the 25-44 age group are most probably part of the Bridge program that allows working paramedics to elevate their career options once they obtain a degree. As expected, most initial paramedic students are younger age. Students now can obtain their Basic EMT certification in high school, so they are able to begin paramedic classes at an even earlier age. NC Office of EMS restricts the youngest providers to age 18.

Program Course Information (Fall 2023 and Spring 2024)

Dept-Course	Students	Sections	Students/Section	FTE
EMS	82	17	19.156	\$86,178.99

Progress: Course and Grade Distributions Analysis

	Explanation
<p><u>Course Sequence/Success:</u></p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>The classes for A45340 Emergency Medical Science are sequenced in a way that makes sense. The EMS 210 class will be removed from future catalogs due to poor sequencing and the content is duplicated in many other classes. Courses are sequenced so that concepts are presented from basic to advanced. Cognitive and psychomotor skills are tested are several points during the program. The program is reviewed annually as trends in emergency medicine change. All class changes must be approved by the curriculum committee.</p> <p>The overall course success rates are higher than the college rates. The course being offered does meet enrollment needs, however, recruiting additional students for any paramedic medicine class is a priority. Service partners need qualified, credentialed care providers to keep them minimally staffed.</p>
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>Does the program offer clinical, WBL, or Apprenticeship opportunities?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>The EMS Education programs have been reviewed by the EMS Advisory Council and monitored by the NC Office of EMS and the program Medical Director.</p> <p>There are no significant changes expected in the next two years.</p> <p>The EMS Advisory Council discussed adding a class to the curriculum that educates students on the benefits of physical and mental fitness. The subject will be revisited by the curriculum committee.</p> <p>As mentioned above, the EMS 210 Advance Patient Assessment class was removed from the catalog beginning 2024 school year. All patient assessment content is offered throughout the core classes.</p> <p>The program does offer clinical, WBL and Apprenticeship opportunities.</p> <p>The are no CCP for this program</p>
<p><u>Modality:</u></p> <p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>All EMS education classes are evaluated annually by the EMS Advisory Council to ensure delivery methods are appropriate for the content. Most content is regulated by the NC Office of EMS and required to be face to face instruction. At the end of the year 2024, all EMS core classes were either face to face or hybrid delivery. Each class has a lab component that requires face to face instruction.</p>
<p><u>Student Achievement:</u></p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Courses with Low Enrollment</p> <ul style="list-style-type: none"> The EMS Education Program has suffered low enrollment since 2020 due to challenges for pre-hospital emergency medical care providers having increased work hours and difficult working environments. The program leaders plan to continue

	Explanation
	<p>to work alongside agency partners to recruit students by showing the rewards of an EMS career. Some examples are flexible work schedule, paid education advancement, paid professional development, increased wages and benefits, improved career ladders and mentorships.</p> <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> Continue to support all students through the resources available at Gaston College such as the Learning Center, EAP, SEAF and other programs. Students are often referred to the SOS agencies. Also, students are urged to reach out to their academic advisors for guidance to look for resources that may have been missed by faculty. <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> EMS 110 Basic Initial EMT has the highest withdrawal rate. That class is a student's first introduction to emergency medicine and the intense pace of the education. The program needs to prepare students ahead of the start of class by being clearer about expectations. It may be necessary to have the academic advisors set up interviews with faculty so they can meet the potential student and discuss the expectations before class begins. Also, faculty and staff need to find ways to retain the students that withdrawal for reasons other than academic performance. Faculty uses Watermark to send alerts so that students and their advisors are aware of the progress and potential for drops or withdrawals.
<p>Evaluation:</p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>End-of-course evaluations remain positive. Some of the comments by students indicated a desire for more hands-on lab experience in addition to instructors that are subject matter experts in critical areas such as cardiology and trauma.</p> <p>The department is using information from students and from evaluations when determining the equipment to purchase for simulation and clinical practice. Also, the department has plans to partner with Caromont Health and Dr. Andrew Matthews to provide increased opportunities to study and learn from experts in cardiology, maternal and child health and neurology.</p>

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	The greatest barrier to student retention is the intense pace of the paramedic cohorts. Often, students are working as an EMT with an agency, attending classes face to face or online, and attending clinical sites either in hospital or on an ambulance all simultaneously. The increased workloads while working on ambulances are due to short staffing and increased call volumes as suburban and rural communities grow and populations expand. Students become overwhelmed with work/school/life imbalance and begin to perform poorly on assignments. The program has partnered with employers to remedy the workloads and allow employed students to work less on the ambulances, so they have opportunities to study, prepare for class and participate in clinical rotations while well rested and healthy.

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?</p>	<p>The credential earned data for Paramedic Bridging Track A45340B is directly affected by the levels of personnel staffing by local agencies. These students often work overtime on their jobs and do not commit to completing the degree due to extended work hours. Also, the Apprenticeship 321 grant monies were suspended, and some students felt the program should be paid for by their employer instead of out-of-pocket or financial aid. The department is working closely with Academic Advisors to make sure the Bridge program students are aware of the classes needed to obtain the degree and help the students map a successful completion.</p> <p>The number of students in the degree program remains low after the Covid pandemic when many classes were moved from face to face to on-line and clinicals were moved to simulation. The college and the EMS Education program continues to recover from the 2021 pandemic. Low enrollment is the trend statewide, and the NC Office of EMS is working to find ways to increase enrollment. Local agency partners are also studying ways to increase paramedic class participation.</p>

Job Outlook

About this section

Overall employment of EMTs and paramedics is projected to grow 6 percent from 2023 to 2033, faster than the average for all occupations.

About 19,200 openings for EMTs and paramedics are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

Emergencies, such as car crashes, natural disasters, drug abuse incidents, and acts of violence, will continue to require the skills of EMTs and paramedics.

Growth in the middle-aged and older population will lead to an increase in age-related health emergencies, such as falls, heart attacks, and strokes. This increase, in turn, will support demand for EMT and paramedic services.

EMTs and Paramedics

Percent change in employment, projected 2023-33

Occupation	Percent change
Health technologists and technicians	7%
Emergency medical technicians	6%
Emergency medical technicians and paramedics	6%
Paramedics	6%
Total, all occupations	4%

Note: All Occupations includes all occupations in the U.S. Economy.

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	The EMS education programs at Gaston College have a 100% hire rate upon graduation. The local EMS agencies actively recruit students early in the programs and other times during instruction. Paramedics are in high demand in the region and a statewide shortage remains. The date reflected in the Career Onestop is not currently accurate and does not describe the shortage of EMS personnel in North Carolina or nationwide. The need for credentialed EMS Providers is at critical levels with some EMS agencies taking crews and trucks out of service because of the lack of personnel.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	The EMS Education programs at Gaston College produces a healthy revenue that covers programs costs via FTE. Operations costs were \$572K with over 123 FTE. Per NCWorks, there are more than 50 paramedic jobs open in the Charlotte region, with the actual total even higher. With salaries as high as \$75,000 the demand for skilled, knowledgeable providers remains high.
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	Community partnerships with local EMS agencies and the Caromont Health and Atrium Hospital systems are necessary to train students that are successful and graduate from the programs. Clinical practicum sites and EMS agencies provide hands on training, patient care experience and clinical ambulance ride times. Partnership is pivotal to student success. Professionally qualified adjunct instructors are recruited from clinical sites. Trained, skilled clinical preceptors are available at each clinical site, allowing the students to participate in patient care and become proficient

	Explanation
	<p>in skills. Gaston College hosts a specialized training session for preceptors to ensure compliance in skills documentation and evaluations.</p> <p>A partnership that began in 2023 with Caromont Health resulted in equipment sharing that allows for students to train with the same equipment that is used in-hospital on the ambulances.</p> <p>The EMS Advisory Council consists of agency partners and hospital representatives. Because of the close working relationship, the advisory council is receptive to ideas to change or improve the program to meet the needs of the partners. It is understood and expected that medical trends change and evolve. The local leaders in emergency medicine sit on the advisory council, keeping Gaston College's EMS Education program current and relevant.</p> <p>The Apprenticeship 321 programs remained important and resulted in several Paramedic to AAS Bridge students in the program code A45340B. Each of the graduates was employed by service partner agencies of Gaston College.</p>
<p>Uniqueness:</p> <p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>Paramedic graduates are eligible to sit for the National Registry exam, which continues to be the gold standard of testing in the EMS and paramedic professions. The lab experiences at Gaston College are improved and make the hands-on training more beneficial than other surrounding schools that have limited lab spaces.</p> <p>Some neighboring institutions do not have full-time faculty. At Gaston College, the level of field experience of instructors is unique, with more than 100 years of paramedic experience between all full-time faculty.</p> <p>The effectiveness of promotional and outreach efforts is unclear currently due to the statewide decrease in enrollment for EMS programs. We plan to increase social media outreach to highlight the programs.</p>

SECTION IV: CONNECTION**Curriculum FTEs by Students' Primary Major**

FTE	19-20	20-21	21-22	22-23	23-24
Emergency Medical Science (45340)	41	51.8	43.34	36.69	38

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
EMS - Curriculum & Con. Ed.	\$572,068.55	107.0	\$366,143.64	(\$205,924.91)	123.4	\$555,144.52	(\$16,924.03)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	<p>The EMS Education Program produces a revenue that covers the cost of the program. The increased total costs of the year 2023-2024 were due to the increased costs of equipment that was replaced and the beginning of the move to Pearson Life Skills. Total FTE 123.</p> <p>The program continues to increase enrollment and future FTEs should increase.</p>

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The EMS Education Program has partnerships with several surrounding agencies, as well as Atrium Health and Caromont Healthcare Systems. Students are posted at clinical sites and EMS agencies in Gaston, Lincoln, Cleveland, Cabarrus, Catawba, and Iredell counties. Students attend special clinical days at the NC Burn Center at Wake Forest University to study specialized burn care. Students use Atrium Lincoln for operating room rotations to gain hands-on experience in airway control and video-assisted laryngoscopy.</p> <p>In 2023, the EMS Education department partnered with Gaston College Athletics to complete student athlete physicals and provide baseline health information, including cardiac EKGs. The program identified two students that needed further medical evaluation to compete in athletic sports.</p> <p>The department partnered with Gaston Emergency Medical Services to assist with the annual "Kids Camp" that</p>

	Explanation
	introduces children to the EMS Profession. Children in grades 3-7 participate in the camp each year in June.

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	<p>The 2021 Annual Report was submitted in May 2023 for CAAHEP Accreditation.</p> <p>The CoAEMSP Accreditation review began. The Self Study was submitted in July and the Executive analysis was received in January 2024. The site visit date is not yet set.</p>

Program Review – A45630 Health and Fitness Science

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Brett LaFemina

Program Code(s)/Name(s): A45630-Health and Fitness Science

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A45630 Health & Fitness Science
- C45630A Health & Fitness Science – Group Exercise Instructor Certificate
- C45630 Health & Fitness Science – Health and Wellness Coach Certificate
- C45630B Health & Fitness Science – Foundations of Health & Fitness Science

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Strengths:** The Health and Fitness Science program continues to have a 100% pass rate for our students in the American Council on Exercise's Certified Personal Training certification exam for seven consecutive years. We also prepare our students for transfer into 4-year institutions to pursue a bachelor's degree. Our program includes four articulation agreements with state universities: Appalachian State University, Gardner-Webb University, Lenoir-Rhyne University, and UNC Charlotte. We continue to have the Health and Fitness Science pathway at East Gaston High School's CaroMont Health Academy, which may potentially act as a feeder for the main program. Our department as a whole, including all HFS, HEA, and PED courses, continues to provide a substantial number of FTEs. This past Fall and Spring resulted in 683 total course registrations, with an FTE of 66.7 and a net FTE value of \$260,878.17. We also continue to manage and staff the DBC Fitness Center for both open hours for students and employees, as well as access for the athletic teams. Graduates (in addition to earning the HFS AAS Degree) earn the following:
 - ACE Personal Trainer Certification
 - Gaston College Health & Wellness Coach Certificate
 - Gaston College Group Exercise Instructor Certificate
- **Areas for Improvement:** Since we will be moving to a diploma with the intention of having the curriculum pathway completed within one academic year, we may see that a quicker completion time is attractive to potential students and improve retention due to academic momentum.
- **Needs:** We need marketing of the program to inform the community that the program will be a diploma and can be completed within one year (Fall, Spring, and Summer) and that the ACE CPT exam will still be the culmination of the program and covered by lab fees.
- **Actions:** We will continue to prepare for the transition to a diploma and guide our students during the process. We will also begin to move several courses to 8-week deliveries and determine which other courses may be moved to this shorter time frame as well. For marketing, we will consider potentially holding an annual continuing education credit workshop to expand awareness of the program.

SECTION II: PROGRAM DATA

Program Enrollments

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>Our incoming cohort sizes were 13 (2020), 12 (2021), 12 (2022), and 10 (2023). Though we began the academic year with fewer students, we retained 7 into the spring and gained 5 more students.</p> <p>Our curriculum currently recommends a full-time pathway to keep with the intentions of Guided Pathways to Success. Students who opt to stray from the suggested sequence are advised to ensure they complete the HFS courses each semester and to take several general education courses during the summers to complete the program in a timely fashion.</p> <p>Other community colleges with HFS programs within the state follow similar curriculum pathways. Neighboring institutions differ. Cleveland CC no longer has an HFS program. Catawba Valley CC requires more credits (71-71). Central Piedmont CC runs its program through Con Ed and has its students complete a personal training exam that is not as widely accepted as ACE.</p> <p>We are transitioning from an AAS program to a diploma. Once the AAS program has been transitioned out, the diploma curriculum will be structured to be completed within one academic year (Fall, Spring, Summer).</p>
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p>	<p>Our program has good diversity, with more students aged 45-64 than the college average. Our program provides an excellent environment for the interaction of all students, which we believe is a strength of ours.</p>

	Explanation/Narrative
<p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A45630 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Health and fitness Science program at GC? Identify strategies for enrollment growth.</p>	<p>We currently have 22 active students (those who have completed or are presently taking an HFS course) in both academic years. Though we have 50 total declared, some are Health Academy students, as well as students who have worked on general education courses and have not completed an HFS course yet. These latter students will help bolster the next first-year cohort.</p> <p>Cleveland CC had 32 (new and recurring students for Spring 2024); however, 1 from Lincoln & 8 from Gaston students were <u>from our service area</u> have enrolled in the HFS program at CCC. $1+8 = 9$. An opportunity for program growth.</p> <p>The program should consider reaching out to Cleveland CC and get permission to contact students in the county to share program information/marketing campaign to students.</p> <p>Catawba Valley CC had 0 (new and recurring students for Spring 2024); however, 0 from Lincoln & 0 from Gaston students were <u>from our service area</u> have enrolled in the HFS program at CVCC. No Health and Fitness Science program at CVCC. A possible opportunity for program growth.</p> <p>Central Piedmont CC had 18 (new and recurring students Spring 2024); however, 1 from Lincoln & 1 from Gaston totaling 2 students from our service area. $1 + 1 = 2$</p> <p>When reviewing these numbers, determine if the program has effectively marketed the Health and Fitness Science program to students in and around our service area counties.</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

<p>Demographic Enrollment Analysis by Race/Ethnicity:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college <i>race/ethnicity</i> data.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Data shows that our program has a greater proportion of unknown demographic students than the college average. Having reviewed the Watermark data for the current first-year cohort, several students did not disclose their race, which would have improved the program’s reported diversity.</p> <p>We continue to welcome any and all students interested in our program and accommodate them so they can progress through the program.</p>
--	---

Demographic Enrollment Analysis by Gender:

Demographic Enrollment Analysis by Gender:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to gender. For example, explain the if the **gender** breakout between male and female students is more, less, or the same as the college's overall gender breakout.

Discuss program actions to enroll and retain underserved students or special population students.

Our program currently is very close to the college average and has been for several academic years.

Demographic Enrollment Analysis by Age:

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

Our program's traditional student population is almost identical to the college average. However, we do have a more significant 45-64-year-old population. We have had several students in this population wanting to change careers, establish a career in fitness, or use the program for personal enrichment, and this will likely continue into future cohorts.

Progress: Course and Grade Distributions Analysis

	Explanation
Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year) How do Course Success Rates compare to the College success rate? Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.	Our current AAS curriculum is well-designed and utilizes feedback from students in several prior academic years. We reduced the curriculum several years ago to follow GPS recommendations. The success rates for the majority of our courses are higher than the college average. The course with the lowest success rate this past academic year, HFS 118 with 67%, will run for the last time this spring as we transition to a diploma, which will increase the program's overall success rate.
Curriculum/Course Materials Have the program's core course requirements or total credit hours been reviewed or revised within the last two years? Are significant curriculum revisions anticipated in the next two years? Does the program offer clinical, WBL, or Apprenticeship opportunities? If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?	We critique the program's curriculum each year and have made changes, such as adding HFS 121 and terminating PED 113, to improve students' success and registration. The program will transition to a diploma, the pathway of which was created with intention, as well as the guidance of academic affairs. The program currently has WBLP as a requirement but will remove this once the diploma is active. Program courses delivered at the Health Academy are taught by the same instructors as their traditional sections, using the same material and lesson plans.
Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality. Include Quality Matters and online training information here	Most HFS courses have at least a seated component due to the required labs and hands-on learning. Courses that can run online are delivered in this modality to improve student access and participation, as well as improved enrollment in HEA and PED college-wide. HEA 110 is currently completing QM formatting and should be awarded this spring.
Student Achievement:	Courses with Low Enrollment

	Explanation
What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?	<ul style="list-style-type: none"> HFS courses were marketed as part of an overall recruitment effort for the program through local community events, such as Crowder's Mountain State Park. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> The adjunct for HFS 118 was advised to change the assignment load and intensity, but the course will also be removed from the diploma curriculum. <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> Our courses do not have high withdrawal rates. Our faculty does well in reaching out to struggling students and utilizing alerts to increase support.
<p>Evaluation:</p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Our courses result in an average evaluation score of 6.40 for the fall and 6.39 for the spring.</p> <p>Evaluations and student comments are addressed to faculty to show areas for improvement and improve faculty performance.</p>

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
A45630 Health & Fitness Science	A45630	33%	58%
C45630 Health & Fitness Science – Health and Wellness Coach Certificate	C45630	DNA	100%
C45630A Health & Fitness Science – Group Exercise Instructor Certificate	C45630A	DNA	DNA

Program Progress: Retention and Progression

	Explanation
<u>SLOs and Curriculum Map:</u> Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
<u>Retention and Progression:</u> Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	Our retention continues to be one of our main focus points. Several of our students transfer to other majors or stop after the first or second semesters. It appears that they may be underestimating how much anatomy, physiology, and science are within the learning material. We also have several students each year struggling in some general education courses, such as BIO 168 and 169, which may be a demotivating factor.

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?</p>	<p>The A45630 data is correct. However, I am surprised by the certificates. Since they are daughters of the parent program, and all AAS students complete the courses within them, they should be awarded both the C45630 and C45630A certificates. I reached out to Alisa to find out why. Two C45630 eligible students were missed and will be awarded, and C45630A still has aerobics listed as a requirement in the system. I will submit course subs for eligible students to have these awarded. C45630B was built as a track for the Early College within the LSB building. If they are no longer utilizing that track, we can terminate that certificate.</p> <p>We are moving to a diploma, which will be structured to be completed within one academic year. This should improve academic momentum and retention.</p>

Job Outlook

About this section

Employment of fitness trainers and instructors is projected to grow 14 percent from 2023 to 2033, much faster than the average for all occupations.

About 73,700 openings for fitness trainers and instructors are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

Strong demand for exercise trainers and group fitness instructors is expected to continue due to widespread participation in a variety of fitness classes and sizable membership at gyms and recreation centers or studios.

As employers continue to recognize the benefits of health and fitness programs for their employees, incentives to join gyms or other types of health clubs are expected to increase the need for fitness trainers and instructors. For example, some organizations may open their own exercise facilities onsite to promote employee wellness.

Other employment growth will come from the continuing emphasis on exercise to combat obesity and encourage healthier lifestyles for people of all ages. As the share of older Americans grows, more people will likely seek to remain active to help prevent common injuries and illnesses associated with aging.

Participation in yoga and Pilates is expected to continue to increase, driven partly by older adults who want low-impact forms of exercise and relief from arthritis and other ailments.

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	Most of our students reported on GradCast that they are not currently employed in the field. Several have either gone on to pursue their bachelor's in a related field or expressed interest in doing so in the future. They also have the opportunity to work as self-employed if they so choose. The field is projected to grow ~14% over the next decade.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	There are many reported job availability within our counties, with a projected growth of 2-3%. The fitness and wellness field provides various employment opportunities, including training, group exercise instruction, and health coaching.
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	The Health and Fitness Science program provides students with practical experience and essential skills for the fitness and wellness industry. This hands-on approach helps students stand out from other candidates, as many certifications only require a passing score on a written test without any assessment of practical skills. Fitness and wellness continue to be an increasingly in-demand area for employment, and we should continue to see growth as projected by the US Labor Bureau of Statistics. Our WBLP sites serve as both a hands-on experience for our students and a potential employment site or networking opportunity. Leaders from these organizations are also often invited to speak in our classes to program students. Our advisory committee recommends working with area high schools more, though I informed them we have tried in the past with limited results. Instead, we sent posters highlighting our program to be displayed in physical education areas and counseling departments.
Uniqueness: What do we do that sets us apart from neighboring institutions?	We have great success in preparing our students for the ACE CPT examination and provide hands-on skills and experience with training clients in our HFS 210 lab. Our program is attractive to students who may not want to spend four years

	Explanation
How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?	<p>at a baccalaureate-granting institution or pay the higher tuition. The program is also a great gateway to inspiring students to seek a 4-year degree if they wish.</p> <p>Both Dr. Martineau and I have spread awareness of the program in several community events and high-traffic areas, such as Crowders Mountain State Park. We are also seeking to host an ACE CEU workshop annually to bring local professionals and students onto campus and increase awareness of the program. Our students' participation in the warm-up at the Stamped for Student Success annually is also an excellent means of raising in the community.</p>

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Health and Fitness Science (45630)	22.41	24.72	30.66	30.81	33.94

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Health and Fitness Science	\$314,121.70	66.1	\$258,433.20	(\$55,688.50)	33.9	\$132,615.11	(\$181,506.60)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	We have improved our FTE over several academic years and have cut spending to improve revenue-cost. We will continue to focus on improving enrollment and retention and decreasing purchases as much as possible.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	Our WBLP sites, the annual Health Fair on campus, and Crowders Mountain State Park recruiting events.

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	Although the HFS program is not accredited, the American Council on Exercise, whose certification exam and instructional material are utilized throughout our program, is.

	fitness facility management.		85% in HFS 118.	n: 10		some assignments.	facilities are managed.	overall assignments as students find this course to be more difficult than needed, given that it is supplementary to the personal training curricula.

Program Review – A45380 Human Services Technology

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Dana Rudisill

Program Code(s)/Name(s): Human Services Technology

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A45380 Human Services Technology
- A4538E Human Services Technology – Addiction and Recovery Studies
- D45380 Human Services Technology – Diploma
- C45380A Human Services Technology – At-Risk Youth Certificate
- C45380C Human Services Technology – Gerontology Certificate
- C45380 Human Services Technology – Certificate

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Strengths:**

Gaston College ranks 7th out of 38 Community Colleges offering the Human Services Technology program.

Gaston College offers two Scholarships, *Remembering Austin Memorial Annual Scholarships*.

Human Services Technology enrollment increased from -3% in Fall 2022 to 35% in Fall 2023.

All classes are offered online including HSE 123 and HSE 225, providing students with flexible scheduling options.

- **Areas for Improvement:**

4% of the students enrolled take more than 16 credit hours, a 1% increase from Fall 2022.

19% of the students enrolled take 12 to 16 credit hours, a 5% decrease from fall 2022.

53% of enrolled students are taking 6 to 11 credit hours, marking a 19% increase from Fall 2022. Meanwhile, 25% of students are enrolled in fewer than 6 credit hours, reflecting a 14% decrease from the previous fall. This decline in students taking fewer than 6 credit hours could be a contributing factor to the 19% increase in enrollment among those taking 6 to 11 credit hours.

- **Needs:**

Continue to explore CCP programs.

Explore Early College program. Consider implementing an Early College program that offers an Associate of Applied Science (AAS) degree rather than a college diploma. Allowing students to graduate with an AAS in four years could be a more appealing and motivating option.

- **Actions:**

Implement the new curriculum State Alignment Project for Fall 2025.

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p>	<p>The program has increased in enrollment from 2022-2023, as reflected in the most recent data above.</p> <p>At this time the full-time and part-time pathways have not been updated. However, they have been reviewed, and in Fall 2025 a new curriculum program will be implemented. The Human Services program is dedicated to delivering an exceptional education and experience for our students. Through ongoing review and evaluation, we are focused on aligning our full-time pathway more closely with student needs. While we currently do not offer a part-time pathway, we are committed to exploring new opportunities to expand options in the future, especially with the new curriculum realignment.</p> <p>Compared to neighboring institutions, the program hours at Gaston College are lower. While courses are similar across institutions, others offer more course options. For instance, GC students take biology in place of math, office applications instead of computer courses, and complete fewer sociology courses than students in comparable programs. With the State realignment curriculum changes will be implemented in Fall 2025.</p>

	Explanation/Narrative
<p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>To improve enrollment and enhance the program for our students, several strategies will be implemented:</p> <ol style="list-style-type: none"> 1. Enrollment Growth: Our Human Services Technology program has recently undergone a name change to <i>Social and Human Services</i>. This rebranding aims to reach a broader pool of prospective students by better reflecting the diverse skill sets and career paths available within the field. Alongside this change, we are expanding our partnerships with local high schools and community organizations to build awareness and interest in the program, ensuring that students understand the range of impactful career opportunities available to them. 2. Program Improvement: Regular feedback from students and faculty refines the curriculum and support services continuously. We are also incorporating more hands-on learning experiences through Blackboard courses, including Work-Based Learning and community-based projects, to enhance the practical skills students gain. 3. Course Offerings: In response to industry trends, new elective courses are being developed to provide more specialized knowledge in the key subject areas. A full review of the curriculum is in progress to identify gaps and ensure course options are aligned with academic and career pathways. The revised course offerings will be included in the Fall 2025 curriculum.
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments. (Consider program demographic data compared to college wide demographic data.) New Question: Review program enrollment for A45380 at other institutions in our neighboring counties. Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Human Service Technology program at GC? Identify strategies for enrollment growth.</p>	<p>To support underserved populations and encourage non-traditional enrollments, we implement several targeted strategies: Community Partnerships: We collaborate with local organizations, high schools, and community centers to build awareness about the program and its relevance to a broad range of career paths, especially for those who may not typically pursue human services. Flexible Learning Options: Recognizing that many non-traditional students juggle multiple responsibilities, we offer flexible online courses, making it more accessible for working adults and caregivers to participate. Scholarship and Financial Aid Resources: To alleviate financial barriers, we provide guidance on accessing scholarships, grants, and other financial aid resources specifically supporting underserved and non-traditional students. Mentorship and Support</p>

	Explanation/Narrative
	<p>Programs: We have mentorship initiatives that connect with students, offering guidance and a support network. Support programs include Student Ambassadors, Student Government Association (SGA) programs, Community Resource Finder, Counseling and Career Services, Emergency Assistance Funding, Food Bank, Men of Excellence, Student Outreach Services (SOS), Success Coaches, TRiO, and Upward Bound. The Gaston College library has many electronic and print resources available for students to be able to adequately research and learn for their online courses. Program retention outreach includes face-to-face, telephone, and email contacts through Watermark. Career-Focused Learning: Through our Work-Based Learning program, students gain hands-on experience while earning college credits, which helps to attract individuals seeking career advancement or transitions into the human services field. These strategies are central to our mission of supporting a diverse student body and ensuring all students have the resources and flexibility needed to succeed in Social and Human Services.</p> <p>Cleveland CC had 0 (new and recurring students for Spring 2024); however, 0 students from Lincoln & 0 from Gaston <u>our service area</u> have enrolled in the HST program at CCC. An opportunity for program growth.</p> <p>The program is exploring the possibility of seeking permission from Cleveland Community College to connect with students in the county and share information about our program through a targeted marketing campaign. Before proceeding, this initiative would need to be reviewed and discussed with the Allied Health Team.</p> <p>Catawba Valley CC had 23 (new and recurring students for Spring 2024); however, 3 students from Lincoln & 0 students from Gaston <u>our service area</u> have enrolled in the HST program at CVCC. No Human Service Technology program at CVCC. $3 + 0 = 3$ A possible opportunity for program growth.</p> <p>Central Piedmont CC had 98 (new and recurring students Spring 2024); however, 0 students from Lincoln & 5 students from Gaston totaling 5 students from our service area. $0 + 5 = 0$</p> <p>When reviewing these numbers, determine if the program has effectively marketed the Human Service Technology program to students in and around our service area counties.</p>

	Explanation/Narrative
	<p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p> <p>Several factors may contribute to the low enrollment of students in Lincoln and Gaston counties in the Human Services Technology program at GC: Limited Awareness: Students and community members may not be fully aware of the career opportunities available through the Human Services Technology program. Perceptions of the Field: There may be a misconception that human services careers are limited in scope or financial viability, deterring potential students from considering it a career path. Competing Interests: Students might opt for other programs that are perceived as offering more lucrative or immediate job prospects, particularly in fields like healthcare, business, or technology. Accessibility and Scheduling: Non-traditional or working students may find it challenging to fit into their schedules.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

<p>Demographic Enrollment Analysis by Race/Ethnicity:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to race/ethnicity. For example,</p>	<p>College wide: 5% Unknown Human Services: 22% Unknown</p> <p>College wide: 22% Black Human Services: 20% Black</p>
--	--

<p>explain the race/ethnicity group with the most difference compare to the college <i>race/ethnicity</i> data.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>This significant disparity suggests potential issues with data collection or reporting within the Human Services program. Addressing this could provide clearer insights into the representation and effectiveness of outreach and support strategies. The gap might indicate that a substantial portion of students' racial/ethnic data is not being captured, which could mask trends and impact targeted support and retention efforts.</p> <p>Our outreach efforts may involve forming partnerships with community organizations that primarily support Black and underserved populations to build trust and engagement. We could also host informational sessions to showcase the relevance and support systems of the Human Services program. Such practices align with effective strategies for enhancing diversity and retention in specialized college programs. By focusing on these areas, the demographic composition of the Human Services program could better reflect that of the broader college population.</p>
--	---

Demographic Enrollment Analysis by Gender:

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the <i>gender</i> breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p>	<p>The Social and Human Services program is encouraged by the increase in male enrollment from 10% in Fall 2022 to 11% in Fall 2023. This shift reflects our ongoing efforts to create a more inclusive and diverse learning environment.</p> <p>The Human Services program has a significantly larger proportion of female students (86%) compared to the college-wide average of 64%. Conversely, the male representation in the program (14%) is much lower than the</p>
--	---

<p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>college-wide average of 36%. This indicates that the gender distribution in the Human Services program is more skewed toward female students compared to the college's overall student body.</p> <p>The substantial gender gap in the Human Services program suggests that it may be more appealing to or better aligned with the interests and career goals of female students. However, this imbalance also signals the need to assess whether the program could enhance its appeal and support for male students to create a more balanced enrollment.</p> <p>These actions could help bridge the gender gap in the Human Services program, supporting the recruitment and retention of male students to create a more balanced and diverse learning environment:</p> <ol style="list-style-type: none"> 1. Showcase Male Role Models: Highlight the achievements of successful male graduates or professionals in human services through guest lectures, webinars, or alumni stories. These initiatives can provide relatable role models and inspire potential male students by showing them tangible career paths and successes in the field. 2. Support Groups and Mentoring: Coordinate with our Gaston College mentorship programs and support networks to tailor the male students, connecting them with peers or experienced professionals. These initiatives can offer valuable guidance, foster a sense of belonging, and help male students navigate their academic and career journeys effectively.
--	---

Demographic Enrollment Analysis by Age:

Demographic Enrollment Analysis by Age:
Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college’s overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

The **Human Services program** exhibits significant differences in age distribution when compared to the overall college demographics:

- **Under 18:** The Human Services program has 8% of students under 18, which is higher than the college-wide average of 2%. This indicates that the program attracts a relatively larger proportion of younger, potentially dual-enrollment or early-start students.
- **Ages 18 to 24:** The program has a lower proportion (36%) compared to the college-wide average of 59%. This suggests that traditional college-age students are underrepresented in the program.
- **Ages 25 to 44:** The Human Services program shows a substantially higher proportion (56%) compared to the college-wide average of 33%. This reflects a strong presence of non-traditional, adult learners who may be seeking career changes or additional qualifications.

Overall, the **Human Services program** attracts a higher proportion of students under 18 and adult learners aged 25 to 44, while it has fewer students in the 18 to 24 age group compared to the college average.

The following targeted initiatives aim to attract and retain adult learners (ages 18 to 24 years old) by creating a supportive, career-oriented learning environment that values their unique backgrounds and needs. **Flexible Course Offerings:** Continue to enhance the range of online course options to provide greater flexibility. This strategy

	<p>allows working adults and those with family obligations to continue their education without compromising other responsibilities, promoting continuous learning and increasing accessibility.</p> <p>Renaming the program to Social and Human Services can better resonate with students aged 18 to 24 by emphasizing the broad and meaningful career paths within this field. This name highlights the combination of social impact and direct human services, which can appeal to students who seek a purpose-driven career.</p> <p>Career Path Promotion: Enhance outreach efforts by showcasing the diverse and impactful career options available in social and human services. Use campus events and digital campaigns to illustrate the real-world applications and rewarding nature of these careers, making the program more appealing to younger students.</p> <p>Peer Ambassador Programs: Consider implementation of a peer ambassador initiative where current students share their firsthand experiences and discuss the advantages of the program. This peer-to-peer approach can make the program more relatable and engaging for the 18 to 24 age group, helping to build interest and trust among prospective students.</p>

Progress: Course and Grade Distributions Analysis

	Explanation
<p><u>Course Sequence/Success:</u></p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Currently, the selection and sequencing of courses, including general education and elective courses, do not fully support a logical progression. For example, foundational courses such as Biology and English are not consistently positioned in the first semester or year, which can lead to gaps in students' skill development as they advance through the program.</p> <p>However, with the planned curriculum of the State alignment for Fall 2025, the program aims to better integrate general education courses alongside core courses. This alignment will ensure that essential subjects like English and Biology are taken early, providing students with the foundational skills necessary for success in subsequent, more specialized courses. This change will support a more cohesive and supportive learning journey, helping students build competencies in a logical sequence and better prepare them for the demands of their core human services studies.</p>
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>Does the program offer clinical, WBL, or Apprenticeship opportunities?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>Yes, the Social and Human Services program has undergone a review of its core course requirements and total credit hours within the past two years. With the upcoming changes set for Fall 2025, the program's total credit hours will be reduced from 67 to 65. This revision aims to streamline the curriculum while maintaining comprehensive education in social and human services.</p> <p>Significant curriculum changes are indeed expected over the next two years. These adjustments are driven by the State Alignment program, which mandates that the new curriculum be in place by Fall 2025 to meet state requirements. This alignment will likely ensure that general education and core courses are better integrated, enhancing the program's structure and educational outcomes.</p> <p>The Social and Human Services program continues to offer practical, hands-on learning experiences through courses</p>

	Explanation
	<p>such as WBL 111, WBL 121, and WBL 125. Notably, WBL 115 has been removed from the new alignment program to reduce the total credit hours, with its essential assignments now integrated into WBL 125 to ensure a well-rounded learning experience in the associate degree. Additionally, the WBL department plans to collaborate closely with the program lead to enrich WBL 111 and WBL 121 with more meaningful assignments, enhancing the practical training component of the program.</p> <p>Faculty Training and Qualifications: Faculty teaching in CCP Pathways is required to meet the same qualification standards as those teaching on the college campus. This ensures that instructors possess the necessary credentials and subject matter expertise to deliver high-quality instruction.</p> <p>Standardized Curriculum: The curriculum taught in CCP Pathways is aligned with the college's course outlines and learning objectives. This ensures that students receive instruction that meets the same academic standards and covers the same material as the courses offered on campus.</p> <p>Consistent Assessment Methods: Faculty use similar assessment tools, exams, and grading rubrics as those employed in the college campus program. This helps maintain consistent expectations and ensures that students in CCP Pathways are evaluated with the same rigor.</p> <p>Faculty Collaboration: Faculty members teaching in CCP Pathways collaborate with their college campus counterparts to share resources, teaching strategies, and feedback. This ongoing communication supports consistency in instructional quality and course delivery.</p> <p>By implementing these measures, the Social and Human Services program can ensure that CCP Pathways maintain the same quality and rigor as the courses offered on the college campus, providing high school students with a true college-level learning experience.</p>
<p>Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>The program selects the most effective delivery methods by assessing course success rates, incorporating student feedback, and analyzing key metrics such as completion rates, grades, and student surveys. Notably, SAB 110 experienced the highest drop rate at 50%, attributed to the course's heavy assignment load. This issue is currently under review as part of the upcoming curriculum alignment revisions. HSE 110 experienced a 48% drop rate, primarily</p>

	Explanation
	<p>because it serves as an introductory course for both high school and adult students to assess their interest in the Social and Human Services program. Acting as a gatekeeper course, it helps students determine whether the program aligns with their career goals. Many students initially underestimate the course, expecting it to be straightforward, but are often surprised by its focus on mental health. The class requires significant self-analysis and reflection on one's own mental health, which can be more challenging and demanding than students anticipate.</p> <p>HSE 110 is under reviewed according to QM's rigorous rubric, which focuses on course objectives, assessment alignment, engagement, and accessibility. However, faculty are encouraged to participate in ongoing professional development, including workshops and certification programs related to online and hybrid instruction. This ensures they remain up-to-date with current trends and technologies in education.</p>
<p>Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Courses with Low Enrollment</p> <ul style="list-style-type: none"> The Human Services Technology program has been revised and rebranded as Social and Human Services to enhance its appeal and align with current market trends and student interests. This modernization includes not only the program's new name but also updated course content that reflects the latest industry trends. Additionally, program descriptions have been adjusted to highlight career outcomes and job placement rates, making the program more relevant and attractive to prospective students. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> With the new curriculum alignment, the program will ensure that course content and expectations are consistent and aligned with students' foundational knowledge. This process has involved revising the course sequence to place general education and core courses in a logical order. By structuring the curriculum in this way, students can develop essential skills at the beginning of their academic journey, equipping them for more advanced topics and coursework as they progress through the program. <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> To address high withdrawal rates in program courses, the following strategies will be implemented as part of the new curriculum. This will be an ongoing effort, as the program also plans to integrate Online Educational Resources (OER) in place of traditional textbooks.

	Explanation
	<ul style="list-style-type: none"> • Course Load and Assignment Review: Evaluate and adjust the workload and assignment complexity in courses with high withdrawal rates. This includes balancing the rigor of assignments to make them challenging yet manageable, ensuring that students do not feel overwhelmed. • Enhanced Student Support Services: Continue to increase the availability of academic support, such as tutoring, study sessions, and supplemental instruction. Providing students with more resources can help them stay engaged and handle difficult material. • Improved Orientation and Advising: Strengthen orientation programs and academic advising to better prepare students for the expectations of specific courses. • Continue with the Early Alerts and Intervention Systems: Improve implementing early warning alerts to track student performance and engagement throughout the semester. Encourage faculty to focus on this data to identify at-risk students and connect them with support services before they choose to withdraw. • Interactive and Engaging Course Design: Redesign courses to include interactive learning methods such as group projects, case studies, and multimedia resources. Engaging course formats can help maintain student interest and motivation. • Regular Student Feedback: Collect feedback from students to understand the reasons behind high withdrawal rates and make necessary course adjustments based on their insights. <p>These strategies aim to reduce withdrawal rates by creating a supportive and adaptable learning environment that meets students' academic and personal needs.</p>
<p>Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>HSE 110 Fall 2023/Spring 2024: The Positive Statements:</p> <ul style="list-style-type: none"> • Organized, well structured activities. • Communication was a strong suit; she was quick to respond to any questions or concerns. • She shows genuine concern when something is wrong • Very reasonable with late work and emails you back in a timely manner if you have questions about something • I think that one of the main strengths of this instructor is her reliability in posting announcements. There are pretty regular

	Explanation
	<p>announcements left in blackboard that help me keep up to date with the</p> <ul style="list-style-type: none"> • course. • She does a great job posting announcements and telling us when things are due. • Her feedback on our assignments was very clear and direct and she also gave us more information in our feedback to help us better understand the goal of the assignment. • The instructor gives good feedback to the work I do and provides me with advice or corrections for a mistake made or something that I may overthink or overlook. • Provides positive feedback on assignments, timely in email response, willingness to help, offers good advice on how to succeed • She is a caring instructor who wishes for success for all of her students. • Communicates very well keeping students updated on their progress • Communication <p>The Negative Statements:</p> <ul style="list-style-type: none"> • Too many assignments in a short period of time. • The only thing I would want to be different is getting my grades for my assignments sooner so I could know how well I've done or not done. Some assignments allow multiple attempts, and if my first attempt was not successful, I would like an opportunity to retake it before the due date. • One weakness I can think of for the instructor is her availability. I believe I only emailed her once during the course but when I did it took a while for me to get a response. This wasn't a huge deal • but it was something I noticed that could cause issues in some situations. • She isn't good at grading things on time, but I feel it's because there are a lot of students in this course for her to grade it on time. • As of right now, I believe that I cannot give that information because I am very happy with my instructor. • Sometimes I feel that the grading in this course can be slightly slower than I'd like it to be, and some of the instructions on questions and tests can be a bit blunt and indirect but I'm still able to • understand overall. • None. • N/A • None

	Explanation
	<ul style="list-style-type: none"> • she doesn't respond to emails fast enough <p>HSE 123 Fall 2023/Spring 2024:</p> <p>The Positive Statements:</p> <ul style="list-style-type: none"> • Response time. • She is always on top of things! • Organization • Allows late work and replies to emails quickly. • Easy to work with • Mrs. Rudisill is very supportive and knowledgeable. • She's kind. • She is a very good instructor. She has a lot of patience. If i need help with assignment she explains it and helps me to understand. • Always being there to help when you need it • very good professor we need more people like her • Teaching content. • She is dedicated to her students and the human services program <p>The Negative Statements:</p> <ul style="list-style-type: none"> • How long we are given to complete assignments. • Responding • I would like to see my grades sooner on my assignments to determine if I should retake it to receive a better grade. • none • Constructive response to confusion. • Communication and clear instructions. • N/A <p>HSE 225 Fall 2023:</p> <p>The Positive Statements:</p> <ul style="list-style-type: none"> • She really tries to engage with her students. She emails you to motivate them. Her assignments are clear and concise. She responds in a timely manner. <p>The Negative Statements:</p> <ul style="list-style-type: none"> • None <p>Student feedback is actively used to enhance the course by identifying areas where adjustments can create a more engaging and effective learning experience. Based on feedback, we evaluate the workload to ensure assignments are challenging yet manageable, potentially restructuring tasks to foster deeper learning. With the revision of classes, the workload of assignments will be reviewed to potentially expand assignments or incorporate smaller tasks into more comprehensive projects. Additionally, revising assignment instructions for clarity and detail may help avoid misunderstandings. Holding brief Q&A sessions before major assignments might also help clarify expectations.</p>

	Explanation
	<p>According to Gaston College and program policy, emails are typically answered within 24 business hours; however, occasional oversights may occur due to human error. Communication concerns highlighted by students will be explored and for classes with larger student numbers, utilizing a student support platform could aid in managing high volumes of communication.</p> <p>Additionally, feedback on timing and expectations informs the scheduling of Q&A sessions before major assignments, giving students a chance to address questions upfront. By incorporating these insights, we continuously adapt the course to better meet students' needs and improve their overall educational experience. A detailed schedule is provided to students at the start of the semester to support effective time management.</p>

Program Retention Data

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	The program's retention rate for Human Services has shown a notable improvement, increasing from 33% in Fall 2022 to 50% in Fall 2023. This rise suggests that recent adjustments to support student success and engagement are positively

	Explanation
	<p>impacting retention. However, despite this progress, barriers to student retention and progression remain.</p> <p>Course Success and Withdrawal Trends: Course success rates and withdrawal data indicate that while more students are completing their courses, some still struggle to persist due to several key challenges:</p> <ol style="list-style-type: none">1. Academic Preparedness: Some students face academic challenges that can hinder their success, particularly if they lack foundational skills in core areas relevant to their coursework. This can lead to lower grades or even course withdrawal if they feel unprepared to meet the demands of the curriculum.2. Work-Life Balance: Many students in the Human Services program juggle coursework with work and family responsibilities. Balancing these commitments with the demands of their studies can lead to stress and difficulty in maintaining consistent engagement, potentially resulting in course withdrawals.3. Access to Support Resources: While support services are available, students may not be fully aware of how to access these resources or may be hesitant to reach out for help. Limited access to academic support and advice can pose an obstacle for students needing additional assistance. <p>Ongoing Strategies to Address Barriers:</p> <ul style="list-style-type: none">• Clear Communication of Expectations: By regularly revising assignment instructions and providing clear, structured schedules, we aim to reduce misunderstandings and support students in managing their workload effectively.• Increased Awareness of Support Services: Promoting available student support services can help students feel more connected to the resources that can aid their success. <p>Overall, while the increase in retention from Fall 2022 to Fall 2023 is promising, continued efforts to identify and mitigate these barriers are essential to further improve student progress and success in the program.</p>

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?</p>	<p>The majority of credentials for the year 2023-2024 were awarded in the spring semester, with 57% (13 out of 23) of all credentials conferred in spring 2024. This trend suggests that students may be aligning their graduation goals with the academic year's end or completing program requirements at a pace that culminates in spring. It may also indicate that some students are taking advantage of the additional time between fall and spring semesters to complete their coursework.</p> <p>Over the past four academic years, data reveals that the Human Services Technology Certificate (C45380) consistently had the highest number of graduates, outperforming both the associate in applied science (AAS) degree and diploma options. This trend suggests that the certificate programs may be more accessible or appealing to students due to shorter completion times or a more focused curriculum. Certificates offer students a targeted education that may better meet the immediate needs of those seeking entry into the workforce or a quick skill upgrade.</p> <p>Many students in the program juggle responsibilities outside of school, such as work and family. This can create scheduling conflicts, reduce available study time, and impact their ability to complete coursework on time.</p> <p>With the upcoming program revision, which includes the development of clear course maps and structured schedules, is designed to guide students along the most efficient pathway to degree completion. This streamlined approach, coupled with proactive and consistent advising, will help prevent students from enrolling in unnecessary courses or facing scheduling conflicts that could delay their progress. Academic advisors are also available to collaborate with students in creating personalized completion plans, tailored to individual needs and career goals, ensuring each student can effectively navigate the program with confidence.</p> <p>In addition, the program now offers targeted micro-credentials and certifications within the degree pathway, focusing on specialized areas such as at-risk youth and gerontology. However, with the revision there be no certificates. These credentials have provided students with in-depth knowledge and practical skills in niche areas of</p>

	Explanation
	<p>human services, enhancing their employability and distinguishing them in the job market. By adding these specialized qualifications to their resumes, students have entered the workforce as competitive candidates, equipped with skills that are highly valued by employers.</p> <p>Real-world experience remains a cornerstone of career readiness. Through ongoing collaboration with the Work-Based Learning (WBL) Division, the program connects students with local organizations and agencies to offer meaningful internships and field placements. These opportunities allow students to apply theoretical knowledge in practical settings, develop essential skills, and establish professional connections within the human services field. WBL specialists further support students with one-on-one career guidance, assisting them in job searches, resume building, and interview preparation, ultimately positioning them for success as they transition from education to employment.</p> <p>This comprehensive approach not only accelerates students' time to completion but also ensures they graduate with the specialized expertise, hands-on experience, and personalized support needed to thrive in human services careers.</p>

Job Outlook

About this section

Employment of school and career counselors and advisors is projected to grow 4 percent from 2023 to 2033, about as fast as the average for all occupations.

About 29,100 openings for school and career counselors and advisors are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

Schools are expected to hire more counselors and advisors to respond to the developmental, academic, and career-planning needs of their students. Demand for career counselors is projected to increase as a growing number of colleges and universities open career centers that focus on helping students prepare to enter the workforce.

Career counselors and advisors also will be needed to assist jobseekers, such as those changing careers, laid-off workers looking for jobs, and military veterans transitioning into the civilian labor market.

School and Career Counselors and Advisors

Percent change in employment, projected 2023-33

Counselors, social workers, and other community and social service specialists	9%
Educational, guidance, and career counselors and advisors	4%
Total, all occupations	4%

Transition/Employment Outcomes

	Explanation
<p>Job Placement/Transfer:</p> <p>Share the graduation outcome data regarding job placement or transfer.</p> <p>(Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)</p> <p>Review data in the tables above from the U.S. Bureau of Labor of Statistics and Career Onestop and discuss the national and statewide job outlook data.</p>	<p>The human services sector encompasses a variety of professions dedicated to assisting individuals and communities in improving their quality of life. Key roles within this sector include social workers, community service managers, and human service assistants. Analyzing data from the U.S. Bureau of Labor Statistics (BLS) and CareerOneStop provides insight into the national and North Carolina-specific job outlooks for these occupations.</p> <p>National Job Outlook</p> <p>According to the BLS, employment in community and social service occupations is projected to grow faster than the average for all occupations from 2023 to 2033. Specifically:</p> <ul style="list-style-type: none">• Social Workers: Employment is expected to increase by 7% from 2023 to 2033, with approximately 67,300 job openings each year due to growth and replacement needs. Bureau of Labor Statistics• Social and Community Service Managers: An 8% growth is projected from 2023 to 2033, translating to about 17,800 annual job openings. Bureau of Labor Statistics• Social and Human Service Assistants: Employment is anticipated to grow by 8% over the same period, with around 48,400 job openings each year. Bureau of Labor Statistics <p>These growth rates are faster than the average for all occupations, indicating a robust demand for human services professionals nationwide.</p> <p>Job Outlook in North Carolina</p> <p>In North Carolina, the human services field is also experiencing significant growth. Data from CareerOneStop highlights several fast-growing occupations within the state:</p> <ul style="list-style-type: none">• Medical and Health Services Managers: Employment is projected to increase by 39%, from 12,880 positions in 2022 to 17,860 by 2032. CareerOneStop• Social and Community Service Managers: This role is expected to see a 25% growth, with employment rising from 3,470 positions in 2022 to 4,340 by 2032. CareerOneStop

	Explanation
	<ul style="list-style-type: none"> • Social and Human Service Assistants: A 20% increase is anticipated, with positions growing from 10,470 in 2022 to 12,570 by 2032. CareerOneStop <p>These figures underscore a strong demand for human services professionals in North Carolina, aligning with national trends.</p> <p>Conclusion</p> <p>Both nationally and within North Carolina, the human services sector is poised for substantial growth in the coming decade. This expansion reflects an increasing need for professionals dedicated to supporting individuals and communities, offering promising career opportunities for those interested in this field.</p>

SECTION III: CONNECTION

	Explanation
<p>How valuable is this program to the community?</p> <p>(Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)</p>	<p>The Human Services program plays a crucial role in enhancing community well-being by preparing professionals to address various social challenges. Analyzing data from JobsEQ and the North Carolina Department of Commerce's Labor Market Data Tools & Reports underscores the program's significant value to the community.</p> <p>Employment Projections</p> <p>According to the North Carolina Department of Commerce, the state is projected to add over 500,000 new jobs between 2022 and 2032, with the Health Care and Social Assistance sector expected to contribute significantly to this growth. This sector, encompassing many human services roles, is anticipated to add approximately 101,500 new jobs by 2032, reflecting a 16.66% increase.</p> <p>Community Impact</p> <p>Graduates of the Human Services program are equipped to work in various settings, including social service agencies, healthcare facilities, and community organizations. Their roles often involve providing support to vulnerable populations, facilitating access to essential services, and implementing programs that promote social well-being. The increasing demand for such professionals underscores the program's value in fostering a healthier, more resilient community.</p>

	Explanation
	<p>Conclusion</p> <p>The Human Services program is invaluable to the community, addressing critical social needs and contributing to the state's economic growth. As the demand for human services professionals continues to rise, the program's role in preparing qualified individuals becomes increasingly vital.</p>
<p>Community:</p> <p>How does this program lead to employment opportunities in the local community or prosperity zone?</p> <p>How have we benefitted from community partnerships and what other opportunities exist for collaboration?</p> <p>What is the advisory committee feedback?</p>	<p>Pursuing a degree in social and human services opens various employment opportunities within Gaston and Lincoln counties, as well as the broader Southwest Prosperity Zone of North Carolina. This field encompasses roles in social work, case management, counseling, and community outreach, all of which are integral to the well-being of local communities.</p> <p>Employment Opportunities in Gaston and Lincoln Counties</p> <p>Both Gaston and Lincoln counties offer numerous positions in social and human services:</p> <ul style="list-style-type: none"> • Gaston County Department of Social Services: This department frequently seeks professionals for roles such as Social Worker III in Foster Care, with salaries ranging from \$23.74 to \$40.36 per hour. These positions involve providing intensive social work services in complex cases, requiring a flexible use of a wide range of social work skills. Government Jobs • Lincoln County Department of Social Services: Opportunities are available for various social services roles, including positions in adult and child protective services, foster care, and adoptions. The department's website provides a comprehensive list of current job openings. Lincoln County, NC <p>Regional Employment Outlook</p> <p>The Southwest Prosperity Zone, which includes Gaston and Lincoln counties, is experiencing growth in the human services sector. According to the North Carolina Department of Commerce, the Health Care and Social Assistance sector is projected to add approximately 101,500 new jobs statewide by 2032, reflecting a 16.66% increase. NCDHHS</p> <p>Educational Pathways and Career Advancement</p> <p>Local educational institutions offer programs in social and human services, providing the necessary training and credentials for these roles. Graduates can pursue careers in various settings, including government agencies, non-profit</p>

	Explanation
	<p>organizations, healthcare facilities, and educational institutions. These positions often offer competitive salaries and benefits, contributing to personal career growth and the overall prosperity of the community.</p> <p>Conclusion</p> <p>A background in social and human services leads to diverse employment opportunities in Gaston and Lincoln counties. The growing demand for professionals in this field underscores the importance of these roles in fostering community well-being and economic development within the region.</p> <p>Community partnerships have significantly enhanced the Human Services program at Gaston College, providing students with practical experience and fostering community well-being. These collaborations have led to initiatives such as the Lincoln County and Gaston County Schools, a partnership offering high school students a pathway into these careers.</p> <p>To further enrich the program, opportunities for collaboration include:</p> <ul style="list-style-type: none"> • Enhanced Practical Training: Partnerships with local agencies offer students hands-on experience, bridging theoretical knowledge with real-world application. • Service-Learning Projects: Integrating service-learning into the curriculum allows students to apply content knowledge to real-world challenges, benefiting both their education and the community. <p>By expanding these collaborative efforts, Gaston College can continue to prepare students effectively while addressing the evolving needs of the community.</p> <p>The advisory committee provided several valuable insights and recommendations for the Human Services program at Gaston College:</p> <p>Human Services Needs in the Community</p> <ul style="list-style-type: none"> • Student Support: Emphasize monitoring students closely, especially regarding financial stress. • Narcan Training: Suggest adding Narcan administration training to the program, aligning with community health needs.

	Explanation
	<p>Field Placement and Professional Development</p> <ul style="list-style-type: none"> • Field Placement Opportunities: Explore additional sites for field placements in the human services field. • Training and Mentorship: Offer free or low-cost professional development, including bringing in prior students as speakers at orientation to share real-world experiences. <p>Work-Based Learning (WBL) Internship</p> <ul style="list-style-type: none"> • Continue and potentially expand WBL internship opportunities for hands-on experience. <p>Current Trends and Future Directions</p> <ul style="list-style-type: none"> • Partnerships: Consider collaborating with NC Health and Human Services to enhance program offerings and align with state initiatives. • Technology and Student Support: Provide technology support for struggling students and introduce a buddy system to promote accountability and support among peers. <p>These recommendations highlight a focus on practical skills, community health, mentorship, and innovative student support to better prepare graduates for the evolving demands of the human services field.</p>
<p>Uniqueness:</p> <p>What do we do that sets us apart from neighboring institutions?</p> <p>How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?</p>	<p>Currently, Gaston College's Human Services program offers several distinctive features that set us apart from neighboring institutions like Catawba Valley Community College (CVCC) and Central Piedmont Community College (CPCC):</p> <p>1. Specialized Certificate Programs</p> <p>Gaston College provides unique certificate options within its Human Services curriculum, including:</p> <ul style="list-style-type: none"> • At-Risk Youth Certificate: This program focuses on preparing students to work effectively with vulnerable youth populations, addressing specific challenges and interventions. • Gerontology Certificate: This certificate equips students with the skills to serve the aging

	Explanation
	<p>population, a growing demographic in need of specialized care.</p> <p>These specialized certificates offer targeted education, enhancing employability in niche areas of human services.</p> <p>2. Comprehensive Work-Based Learning (WBL) Opportunities</p> <p>The program emphasizes practical experience through structured WBL courses, such as:</p> <ul style="list-style-type: none"> • WBL 111 Work-Based Learning I: An introductory course providing hands-on experience in human services settings. • WBL 115 Work-Based Learning Seminar I: A seminar complementing the WBL experience, facilitating reflection and integration of practical skills. <p>These courses ensure that students gain real-world experience, bridging the gap between theoretical knowledge and practical application.</p> <p>3. Flexible Learning Options</p> <p>Gaston College offers flexible scheduling with online classes, accommodating students who may be working or have other commitments. This flexibility allows a diverse student body to pursue education without compromising other responsibilities.</p> <p>4. Strong Community Partnerships</p> <p>The program maintains robust connections with local agencies and organizations, facilitating:</p> <ul style="list-style-type: none"> • Field Placements: Providing students with diverse environments to apply their skills. • Professional Networking: Connecting students with professionals in the field, enhancing career prospects. <p>These partnerships enrich the educational experience and improve employment opportunities post-graduation.</p> <p>By offering specialized certificates, comprehensive work-based learning, flexible scheduling, and strong community ties, Gaston College's Human Services program provides a distinctive and practical education tailored to the needs of its students and the community.</p>

	Explanation
	The Human Services program's promotional and outreach efforts are promising but could be enhanced to better showcase its unique strengths and attract more students. Future messaging should focus on the program's name change, distinctive general track, and strong community partnerships, which may currently be under-emphasized. Increasing engagement through targeted outreach to high schools, community events, and a strong digital presence—featuring alumni testimonials—could boost visibility and interest. Additionally, gathering feedback from students on what draws them to the program would further refine these efforts, aligning outreach with student interests in community-focused careers.

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Human Services Technology (45380)	39.34	33.63	34.88	34.63	44.34
Human Services Technology Developmental Disabilities (4538A)	2.54	2.25	1	DNA	DNA
Human Services Technology Substance Abuse (4538E)	25.54	19.59	15.18	8.69	15.81

Program Financial Viability – Practical Nursing included in Nursing data below.

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Human Services Technology	\$32,013.30	41.7	\$162,957.17	\$130,943.87	60.2	\$235,499.39	\$203,486.09

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	The Human Services program is financially viable, with revenues significantly exceeding total costs. By major prefixes, revenue (\$130,943.87) surpasses the total program cost of \$32,013.30, yielding a positive financial outcome. Similarly, by program of study, revenue (\$203,486.09) exceeds costs by a large margin, supported by strong FTE values (41.7 by major prefixes and 60.2 by program of study). These figures indicate that the program is financially stable and effectively funded, suggesting potential for sustained success or expansion.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The Human Services Technology Program partners with Belmont Abbey, Gardner-Webb University, and Lees-McRae College through formal articulation agreements. Additionally, it engages in community outreach by participating in the Gaston College Annual Faculty Benefits Fair, and the Annual Health Fair.</p> <p>Recently, Gaston College contributed to the North Carolina State alignment project, resulting in significant curriculum updates for the Social and Human Services program. These updates include a revised program title and description, updated core courses, and seven specialized subject areas, with the addition of Child Advocacy Studies. The program also revised 55 courses and introduced six new ones; it is set for implementation in the Fall 2025.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	<ul style="list-style-type: none">• The Human Services Technology and HST – Addiction and Recovery Studies programs are not accredited.• The Human Services Technology program is a member of the Council for Standards in Human Service Education (CSHSE).• The program prepares students for the Human Services-Board Certified Practitioner (HS-BCP) credentialing exam, though students do not currently take this exam before graduation.• Recommendation: Evaluate options for students to complete the credentialing exam prior to graduation.• Work-Based Learning 320 hours (WBL 111 and WBL 125) in the Human Services Technology program count toward the professional education hours required for both the HS-BCP and Alcohol and Drug Counselor (CADC) credentials.

Curriculum Map - A45380 Human Services Technology

Course	PLO1	PLO2	PLO3	PLO4	PLO5	PLO6
	Identify the knowledge, skills, and roles of a human service worker.	Analyze experiential learning in small groups and identify and explain the interactions of group members in group settings.	Perform basic interviewing skills needed to function in a helping relationship using the Microskills Model.	Demonstrate performance of counseling techniques.	Demonstrate an integration of knowledge, skills, and experiences gained in classroom and clinical experiences with emerging trends in the field.	Assess crisis situations and respond with the appropriate differential techniques applicable to various crisis situations.

Program Learning Outcomes - A45380 Human Services Technology

PLO #	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1	Identify the knowledge, skills, and roles of a human service worker.	Direct Measure: Students will complete a Term Project in HSE 110 to gain knowledge and skills in the human services profession to align with the recommended standards for direct service workers in the human services discipline as published by the Human Services Research Institute.	On average, students will earn at least 80% on this artifact.	<p>Spring 2024</p> <p>Mean: 69.3% Mean of Completers: 14/15 = 93.3% Range: 0 to 85 n: 15</p> <p>Five out of the fifteen students were high school students.</p>	Assessment results demonstrated: a.) Comprehension of the roles and functions of the human services profession.	<p>a). Benchmark was not achieved.</p> <p>One student did not complete the term project, and 7 students scored less than 80%.</p>	a). A new assessment tool was implemented as a better means to evaluate students' understanding of direct service workers. The benchmark was not achieved due to 46% of the students scoring before the success rate.	The Term Project was a new assessment knowledge. Actions to be implemented: Create a clear breakdown of the assessment requirements, using a rubric. Complete regular check-ins and formative assessments to ensure that students are on track and understand expectations.
2	Analyze experiential learning in small groups and identify and explain the interactions of group members in group settings.	Direct Measure: Students will complete a Term Project in HSE 112 that requires an analysis of small-group experiential learning and a comparison of the group interactions	On average, students will earn at least 80% on this artifact.	<p>Fall 2023</p> <p>Mean: 82.76% Mean of Completers: 21/21 = 100% Range: 52 to 110 n: 21</p>	Assessment results demonstrated: a.) Benchmark met and exceeded by 2.76%.	<p>a.) Benchmark was achieved.</p> <p>b.) Benchmark was achieved.</p>	a.) No changes are recommended due to the State Alignment changes.	Future actions to be implemented will be determined by the State Alignment as the class has been deleted and archived at the State level.

		with Yalom's Stages of Group Dynamics and Therapeutic Factors.			<p>b.) Comprehension of leadership skills in group interaction (Lab Participation) : 88.85% achievement.</p> <p>c.) Comprehension of Yalom's Stages: 61.9% achievement (Module 4 #2).</p>	c.) Benchmark was not achieved.		
3	Perform basic interviewing skills needed to function in a helping relationship using the Microskills Model.	Direct Measure: Students will conduct an interviewing role-play (Term Project) incorporating the HSE 123 Microskills of attending behavior: open and closed questions; encouraging; paraphrasing and summarizing; reflection of feeling; the five-stage interview structure; confrontation; focusing and	On average, students will earn at least 85% on this artifact.	<p>Spring 2024</p> <p>Mean: 72.75%</p> <p>Mean of Completers: 8/8 = 100%</p> <p>Range: 53 to 90</p> <p>n: 8</p> <p>Five out of the eight students were high school students.</p>	<p>Assessment results demonstrated:</p> <p>a.) Comprehension of paraphrase skills: 87.5% excellent rating</p> <p>b.) Benchmark was not achieved benchmark; 12.25% below benchmark.</p>	<p>Areas for improvement needed:</p> <p>a.) Encouragers: 100% rating</p> <p>b.) Self-disclosure: 50%; four students did not complete this part of the term project.</p>	a.) No changes are recommended due to the State Alignment changes.	Future actions to be implemented will be determined by the State Alignment as the class will be revised.

		influencing skills and strategies.						
4	Demonstrate performance of counseling techniques.	Direct Measure: Students will complete an attending skills role play (Term Project) in HSE 125, incorporating listening skills, exploration skills, and action skills.	On average, students will earn at least 80% on this artifact.	Spring 2024 Mean: 78.05% Mean of Completers: 17/19 = 89.47% Range: 0 - 100 n: 19	Assessment results demonstrated: Benchmark was not achieved; 1.95% below the benchmark a.) Comprehension of Listening skills: 80.5% achievement by completers. b.) Comprehension of explorations skills: 72% achievement by completers. c.) Comprehension of action skills: 83.78%	Areas for improvement. a.) Listening skills were achieved by completers; two students received a zero for this skill. b.) Explorations skills were not achieved by completers. Four students received a zero for this skill. c.) Action skills were achieved by completers; two students received a zero for this skill.	a.) No changes are recommended due to the State Alignment changes	Future actions to be implemented will be determined by the State Alignment as the class has been deleted and archived at the State level.

					achievement by completers.			
5	Demonstrate an integration of the knowledge, skills, and experiences gained in classroom and clinical experiences with emerging trends in the field.	Direct Measure: Students will complete a cumulative portfolio in HSE 210 that covers current issues and trends in the field of human services, including contemporary topics with relevance to special issues in a multi-faceted field.	On average, students will earn at least 80% on this artifact.	Spring 2024 Mean: 74.83% Mean of Completers: 12/12 = 100% Range: 58 to 103 n: 12	<p>Assessment results demonstrate d:</p> <p>a.) Benchmark was not achieved by 5.17% below goal.</p> <p>b.) Comprehension includes: Fact Sheets – 63.33% Brochure - 85.41% Legislative – 55.53% Reflection – 75.83%</p> <p>Students achieved good to fair ratings; however, 11 students scored good on the Fact Sheets; 7 students</p>	a.) Benchmark was not met.	a.) No changes are recommended due to the State Alignment changes.	Future actions to be implemented will be determined by the State Alignment as the class will be revised.

					scored good the Brochure; 8 students scored good on the Legislative while 2 students did not complete; and 7 students scored good on the Reflection while 3 students scored fair.			
6	Assess crisis situations and respond with the appropriate differential techniques applicable to various crisis situations.	Direct Measure: Students will complete a comprehensive final exam in HSE 225 that covers the basic theories and principles of crisis intervention, including identifying and demonstrating appropriate and differential techniques for intervening in various crisis situations.	On average, students will earn at least 80% on this artifact.	Fall 2023 Mean: 73.9375% Mean of Completers: 16/16 = 100% Range: 41 to 93 n: 16	Assessment results demonstrate d: a.) Benchmark was 6.00% below goal.	a.) Benchmark was not met.	a). No changes are recommended due to the State Alignment changes.	Future actions to be implemented will be determined by the State Alignment as the class will be revised.

7	Demonstrate professional work ethics/traits and personal behaviors necessary for career success.	Direct Measure: Students will complete 160 hours in an approved environment for the practicum experience in WBL 111. The student's supervisor will use a standard Likert-Type Scale to rate the student's demonstration of professional work traits. The 4-point scale designation: Exceptional = 4 Very good = 3 Average = 2 Marginal = 1	On average, students will earn at least a 3 on the 4-point scale on the WBL 111 final semester grade and an average of 3 on the 4-point scale for each work trait.	Spring 2024 Mean: 3.6% Mean of Completers: 5/5 = 100% Range: 100% n: 5	Assessment results demonstrate d: a.) Benchmark met. b.) Benchmark met and/or exceeded on 12 traits: Relationship with others = 3 Judgment = 2.8; Ability to learn = 3; Communication skills = 2.6; Teamwork = 2.63 Dependability = 3; Quality of work = 2.8; Leadership ability=2.6; Attitude = 2.8; Punctuality = 3.2; Attendance = 3.2; Potential for greater	a.). Benchmark met	a.) No changes are recommended due to the State Alignment changes.	Future actions to be implemented will be determined by the State Alignment as the program will be revised.
---	--	---	--	--	--	--------------------	--	--

					responsibility = 3			
8	Apply multicultural competence in service delivery.	Direct Measure: Students will complete a comprehensive final exam in HSE 125 that covers counseling work with a diverse client population.	On average, students will earn at least 80% on this artifact.	Spring 2024 Mean: 91.14% Mean of Completers: 19/19 = 100% Range: 75.71 to 97.14 n: 19	Assessment results demonstrated: a.) Benchmark met and exceeded by 11.14%	a) Benchmark met.	a.) No changes are recommended due to the State Alignment changes.	Future actions to be implemented will be determined by the State Alignment as the class has been deleted and archived at the State level.

Program Review – A45400 Medical Assisting

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Melody Gibson

Program Code(s)/Name(s): Medical Assisting

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A45400 Medical Assisting
- D45400 Medical Assisting
- C45400P Medical Assisting – Foundations of Medical Assisting

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Strengths: Certification Exam Success:** Our Medical Assisting graduates consistently excel, maintaining a 95% pass rate on the American Association of Medical Assistants (AAMA) certification exam over the last five years. This outstanding track record reflects their readiness to enter the workforce fully credentialed as CMAs (AAMA).
- **Quality Instruction and Job Placement:** The program consistently supports strong job placement, with many students securing employment immediately upon graduation—some even receiving offers prior to completing the program. Demand for Medical Assistants in our area remains robust, providing graduates with excellent career opportunities.
- **Apprenticeship and CCP -** The apprenticeship cohort is progressing well, receiving high scores and positive feedback from Caromont. Additionally, the East Gaston Health Academy pipeline remains strong, with recent high school graduates joining Gaston College's Medical Assisting diploma program.
- **Skills USA Achievements:** Our students have excelled in Skills USA competitions, earning both state and national awards. We are eagerly preparing for the 2024 state competition in Spring, ready to continue this tradition of success.
- **Areas for Improvement:** Encouraging Medical Assisting students to fully utilize available tutoring resources in Biology and Medical Assisting topics can significantly enhance their understanding and retention of essential material.
- **NEEDS:**
 - Developing our own skill assessment check-offs that are customized to align more closely with our program and community needs, rather than relying solely on standard textbook guidelines.
 - Expanded budget and strategic marketing to attract more students and meet community healthcare demands.
 - Increased partnerships with various healthcare facilities to offer students diverse clinical experiences, preparing them for a wide range of real-world environments.
- **Actions:**
 - Develop a marketing plan targeting high school student, career changers, and adult learners through social media, career fairs, and local events.
 - Collaborate with local healthcare facilities to co-host informational sessions on the demand for medical assistants.
 - Use alumni testimonials and success stories in digital and print materials to showcase program outcomes.
 - Offer incentives for local healthcare partnership offices to serve as practicum sites, such as access to continuing education resources or recognition awards.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- Collaborate closely with faculty to ensure MAERB competencies are effectively integrated and achieved in the classroom.

SECTION II: PROGRAM DATA

Program Enrollments

Academic Year 2023-2024 Unduplicated	A45400	C45400P	D45400

Entry – Program Enrollment

	Explanation/Narrative
Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining. Have Full-Time and Part-Time pathways been updated/reviewed? In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses? What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?	<p>The program enrollment is growing rapidly. This is due to the growing demand of medical assistants in our community. With our strong partnerships, the community depends on the value of the program to produce excellent entry level medical assistants.</p> <p>Full-Time pathways have been reviewed for ease of completion for students. Part time pathways are being reviewed this year for students with many outside responsibilities.</p> <p>Our program hours are consistent with other neighboring institutions and there are no major differences in the major courses offered.</p> <p>Our in-house division specific advising is invaluable to the enrollment of our program. More improvements could be made to attend high school fairs and community engagement events</p>
Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments.	<p>By having online and hybrid courses, we continue to offer flexible learning options to fit student needs. Our faculty has inclusivity training and offers one on one mentoring/tutoring support for students when needed. Our</p>

	Explanation/Narrative
<p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A45400 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the MED program at GC? Identify strategies for enrollment growth.</p>	<p>partnerships also offer career opportunities and a pipeline for all populations. The East Gaston Health Academy provides early exposure to healthcare careers and allows students from underserved backgrounds to transition seamlessly into the Medical Assisting Program post-graduation, supported by structured advising and guidance.</p> <p>Cleveland CC had 14 (new and recurring students) 0 students from Lincoln & 1 student from Gaston enrolled <u>from our service area</u> into the MED program at CVCC.</p> <p>The program should consider reaching out to Cleveland CC and get permission to contact students in the county to share program information/marketing campaign to students.</p> <p>Catawba Valley CC had 0 (new and recurring students for Spring 2024); however, 0 from Lincoln & 0 from Gaston students were <u>from our service area</u> have enrolled in the MED program at CVCC. No MED program at CVCC. This may be an opportunity for program growth.</p> <p>Central Piedmont CC had 48 (new and recurring students Spring 2024); however, 0 from Lincoln & 3 from Gaston totaling 3 students from our service area. $0 + 3 = 3$</p> <p>When reviewing these numbers, determine if the program has effectively marketed the Medical Assisting program to students in and around our service area counties.</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compared to the college **race/ethnicity** data.

Discuss program actions to enroll and retain underserved students or special population students.

Actions to enroll and retain underserved students are to plan targeted outreach and recruitment with information sessions and attending community events. Faculty will continue to participate in inclusivity and belonging training so that program atmosphere is where students feel respected and valued.

Demographic Enrollment Analysis by Gender:

College Wide – Demographics 2023-2024

Gaston College Unduplicated Enrollment
Academic Year 2023-2024 - by Gender

Program – Demographics 2023-2024

A45400: Medical Assisting Unduplicated Enrollment
Academic Year 2023-2024 - by Gender

Demographic Enrollment Analysis by Gender:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to gender. For example, explain the if the **gender** breakout between male and female students is more, less, or the same as the college's overall gender breakout.

Discuss program actions to enroll and retain underserved students or special population students.

Actions to enroll and retain underserved students are to plan targeted outreach and recruitment with information sessions and attending community events. Faculty will continue to participate in inclusivity and belonging training so that program atmosphere is where students feel respected and valued.

Demographic Enrollment Analysis by Age:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

Actions to enroll and retain underserved students are to plan targeted outreach and recruitment with information sessions and attending community events. Faculty will continue to participate in inclusivity and belonging training so that program atmosphere is where students feel respected and valued.

Program Course Information (Fall 2023 and Spring 2024)

Dept-Course	Students	Sections	Students/Section	FTE	FTE Value

Progress: Course and Grade Distributions Analysis

	Explanation
<p><u>Course Sequence/Success:</u></p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>Courses are organized to help students gradually build on what they've learned, starting with the foundational concepts and moving to more complex skills.</p> <p>Our program's course success rates are consistently above average. The courses where students face the most challenges tend to be the required GenEd courses for the Diploma program or fully online courses for students who prefer a traditional format.</p> <p>Enrollment needs have surged in 2023-2024, surpassing previous years and our expectations. Demand for medical assistants in the community is high, and the job outlook for the next 10 years is exceptionally strong.</p>
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>Does the program offer clinical, WBL, or Apprenticeship opportunities?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>Yes, we have revised the course requirements within the last year to better serve students and maintain the current standards of the healthcare setting.</p> <p>There is no significant curriculum revisions anticipated within the next two years.</p> <p>The program offers clinical practicum as part of our accreditation standards. Students must complete 240 hours of clinical.</p> <p>We offer Medical Assisting at East Gaston High School as part of the Caromont Health Academy. Students are taught</p>

	Explanation
	the same material as traditional campus students in equal instruction.
Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality. Include Quality Matters and online training information here	Shifting to online and web-blended course delivery has significantly boosted our enrollment. Our Medical Terminology classes are now offered campus-wide, leading to an increase in enrollment. We consistently listen to our students and consider the feedback given of the modality of our courses. Course evaluations are essential for our program to stay accessible to student needs. 2 of our faculty members are Quality Matters certified online instructor and also ACUE certified online instructors. During our monthly faculty meetings, we discuss new ways to engage our students online and in the traditional classroom and lab.
Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?	Thanks to the structured sequencing of our program curriculum, we do not have any courses with particularly low enrollment. Our program maintains a strong success rate of 99%, with a minimal 4% withdrawal rate, typically due to external factors like family, job, or health-related matters. Courses with Low Enrollment <ul style="list-style-type: none"> • MED 276 – students who choose to continue to pursue their AAS degree Courses with Low Success Rates <ul style="list-style-type: none"> • None – although, revisiting delivery of topics whether online or traditional seated, to be accessible for students learning needs. • Courses with High Withdrawal Rates <ul style="list-style-type: none"> • none
Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated. Explain how the student feedback is being used to improve the course(s).	End-of-course evaluations consistently receive positive feedback, with excellent comments from both students and practicum partners. Students frequently highlight instructor support as an invaluable resource. We hold monthly faculty meetings to review student successes and address any concerns. These meetings ensure that all faculty members are aligned and using a consistent approach in their courses. The Program Chair also reviews all end-of-course evaluations with faculty to ensure continuous improvement and alignment across the program.

Program Retention Data

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
A45400 Medical Assisting	A45340	DNA	DNA
D45400 Medical Assisting - Diploma	D45340	33%	100%
C45400P Medical Assisting - CCP	C45400P	DNA	DNA

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	The program's retention rate is well above average and there are no inherent obstacles in this area. Withdrawal rate is typically due to personal matters or students realizing that they want to go into a different field.

Completion/Credentials Earned

	Explanation
Graduation: Using the data in the above tables, discuss the student completion data and any identified trends? Identify any known barriers to timely student completion and how they can be addressed.	The program aims to boost graduation rates and career readiness by addressing key barriers like scheduling conflicts, financial constraints, and college readiness. To enhance career readiness, the program aligns its curriculum with industry demands, provides mock interviews and resume training, hosts Medical Assisting Career Fairs, and ensures diverse practicum experiences.

Medical Assistants

Description: what do they do?

Perform administrative and certain clinical duties under the direction of a physician. Administrative duties may include scheduling appointments, maintaining medical records, billing, and coding information for insurance purposes. Clinical duties may include taking and recording vital signs and medical histories, preparing patients for examination, drawing blood, and administering medications as directed by physician.

Also known as:
Certified Medical Assistant (CMA), Chiropractor Assistant, Clinical Medical Assistant, Doctor's Assistant, Health Assistant, Ophthalmic Assistant, Ophthalmological Assistant, Optometric Assistant, Outpatient Surgery Assistant, Registered Medical Assistant (RMA)

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	The medical assisting program at Gaston College has a five-year average of 94% for job placement for the years 2023-2024. Graduation outcome is 100%.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	<p>The Gaston College Medical Assisting Program offers both a diploma and an Associate of Applied Science (A.A.S.) degree in medical assisting. This structure allows students to begin working as a Certified Medical Assistant (CMA) in a medical office after earning their diploma while continuing their studies to complete the A.A.S. degree.</p> <p>The Gaston College Medical Assisting Program collaborates with local medical practices to provide clinical sites for its students' eight-week practicum experience. This partnership not only enriches student training through hands-on clinical experience but also supports local healthcare organizations by supplying skilled, entry-level medical assistants ready for employment upon graduation.</p> <p>The Gaston College Medical Assisting Program is actively engaged in an apprenticeship program in partnership with Gaston College Apprenticeship 321 Program and CaroMont Health. This collaboration allows medical assisting students to gain valuable, paid on-the-job experience while completing their studies, meeting the growing demand for skilled medical assistants in our community and supporting local healthcare workforce needs. Through this apprenticeship, students are well-prepared for entry-level roles upon graduation, ensuring a smooth transition from classroom to career.</p>

	Explanation
	The Medical Assisting Program meets with its Advisory Committee annually during the spring semester. This committee offers valuable guidance on curriculum development, program admission criteria, and continuing education opportunities for local medical assistants. Each year, the program shares its annual report to the accrediting agency, along with average graduate certification scores and pass rates, with the committee. The Advisory Committee's feedback consistently affirms the high standards of the program and the excellence of its graduates.
Uniqueness: What do we do that sets us apart from neighboring institutions? How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?	Gaston College Medical Assisting graduates take the American Association of Medical Assistants (AAMA) certification exam, recognized as the gold standard in the field. Our graduates have achieved an impressive 100% pass rate on this national certification exam in 2022 and 2023, significantly surpassing the 58% national average. Local healthcare organizations actively seek to hire our graduates, consistently impressed by their high level of knowledge and practical skills. Additionally, our marketing efforts through social media have effectively showcased the program's quality and the accomplishments of our graduates, further strengthening our reputation in the community.

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Medical Assisting (45400)	46.62	25.91	22.19	38.56	59.91

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Medical Assisting & Phlebotomy	\$526,590.54	106.6	\$405,143.26	(\$121,447.28)	76.5	\$344,153.61	(\$182,436.93)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	With increased enrollment and a restructuring of faculty roles, the program is highly viable and essential to meet the growing demand for medical assistants in our community. A new hospital and outpatient physician pavilion are opening soon, and we have been contacted for helping staff the outpatient offices.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>We have many partnerships with major healthcare organizations and independent organizations providing students with hands-on practicum experiences. These clinical placements not only give students practical experience but also strengthen job placement opportunities after graduation.</p> <p>Our partnership with local high schools allows students interested in healthcare to gain early exposure to the field. Students from the Academy are encouraged to continue their education in the Medical Assisting Program at Gaston College after high school graduation, creating a seamless educational pathway.</p> <p>Our apprenticeship program has developed an apprenticeship cohort that enables students to gain work experience while earning their degree. This initiative, which has received positive feedback from CaroMont, supports student learning and retention while meeting the demand for skilled medical assistants in the community.</p> <p>We actively participate in SkillsUSA allows students to showcase their skills at state and national levels, enhancing both the program's visibility and its reputation for excellence. SkillsUSA not only builds students' confidence but also connects them with industry professionals and potential employers.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	The Medical Assisting Program submits an Annual Report Form (ARF) each year, with outcome data published on the college website. These outcomes offer valuable insights into the program's success, providing both the program and the community with a transparent view of achievements and areas of accountability. The most recent ARF was submitted in February 2023 and was accepted from MAERB (Medical Assisting Education Review Board) without any errors.

	the medical office setting.	through the use of project simulation in completing an incident report based on a scenario in MED 131.	project, incident report utilizing scenario.	Completers: 95% Range: 0%-100% n: 24	this outcome for knowledge of management skill		trainings implemented.	this benchmark and provide continuous real-life scenarios for practice and proficiency.
8.	Apply clinical, administrative and laboratory skills in the office setting and function as an entry-level health care professional.	Faculty and clinical practice staff will work to assess student's ability to function at entry level.	Student will achieve at least an 90% on their practicum evaluation in MED 260	Summer 2022 Diploma Mean:100% Mean of Completers: 100% Range: 89%-99% n:24	Students exceeded entry level expectations in performing medical assisting skills in the clinical/administrative areas of the medical office.	Keep clear communication with office staff to assure that practicum evaluations are accurately reflecting the student's externship performance in the clinical setting.	Adequate training of preceptors in the office to provide honest feedback will allow for student to grow in ability	Program Coordinator will continue to provide a practicum orientation to each office manager/preceptor participating in clinical practicum to ensure that practicum evaluations are accurately reflecting the student's performance in clinical externship.

Program Review – A45110 Associate Degree Nursing

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Phonzie Childers

Program Code(s)/Name(s): Associate Degree Nursing

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A45110 Associate Degree Nursing
- A45110PN Associate Degree Nursing
- A45110RN Associate Degree Nursing
- C45110A Associate Degree Nursing
- C45110B Associate Degree Nursing

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Strengths:** Strong administrative and community support. Strong NCLEX pass rate.
- **Areas for Improvement:** Increase retention of students who begin each ADN cohort. Increase retention of full-time faculty. Improvement in processes by creating standard workflows and master courses that follow the NC concept-based nursing curriculum.
- **Needs:** Increase number of full-time faculty. Propose student success coach model.
- **Actions:** Identify top five goals for the ADN program and create standard workflows to support the goals.

SECTION II: PROGRAM DATA

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>Program enrollment remains steady. The Associate Degree Nursing program is a full-time selective admission program with a point system administered by an application management system. We routinely have more applicants than available spots. Additionally, Apprenticeship 321 numbers have increased in the program.</p> <p>The program is set up using the state curriculum standard and is equivalent to neighboring institutions.</p> <p>Gaston College Admissions coordinates tours of the nursing program areas so that prospective students can see what we offer to our community. Numerous information sessions are held throughout the year.</p> <p>The nursing program reviews current nursing education literature and NC Board of Nursing recommendations to ensure our program is second to none. The nursing program also relies on input from advisory committee members, clinical partners, and students.</p>
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A45110 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the NUR program at GC? Identify strategies for enrollment growth.</p>	<p>For this past reporting cycle, the program is closely aligned with the college-wide demographics.</p> <p>Students may leave the college service area to attend other schools due to the selective admission process.</p> <p>Cleveland CC had 120 (new and recurring students for Spring 2024); however, 3 from Lincoln & 20 from Gaston students were <u>from our service area</u> have enrolled in the NUR program at CCC. $3+20 = 23$. An opportunity for program growth.</p> <p>Catawba Valley CC had 99 (new and recurring students for Spring 2024); however, 3 from Lincoln & 7 from Gaston students were <u>from our service area</u> have enrolled in the NUR program at CVCC. $3+7 = 10$ An opportunity for program growth.</p> <p>Central Piedmont CC had 187 (new and recurring students Spring 2024); however, 2 from Lincoln & 6 from Gaston totaling 8 students from our service area. $2 + 6 = 8$ The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college *race/ethnicity* data.

Discuss program actions to enroll and retain underserved students or special population students.

For this past reporting cycle, the program is closely aligned with the college-wide demographics.

Enrollment is done through an online application management platform with a point system that removes possible unconscious bias.

Retention efforts are made through individual meetings, tutoring, support services, and an educational software provider that monitors academic performance, attendance, and engagement.

Demographic Enrollment Analysis by Gender:

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the gender breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Compared to the college-wide demographics in regards to gender, the Practical Nursing program is 92% female, compared to 64% female college-wide. This is not unusual in academic nursing programs and in the field. Nursing has traditionally been associated with women; however, we are making attempts to attract men and move beyond the traditional gender roles in nursing. We have targeted marketing, promote inclusivity, and have hired our first male full-time nursing faculty member.</p>
---	--

Demographic Enrollment Analysis by Age:

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

The ADN program has a higher percentage of students in the 25-44 and 45-64 age groups compared to the college-wide demographics. One factor to explain the difference is that many students choose nursing as a second career. Additionally, the bridge program requires students to already be a Practical Nurse.

Progress: Course and Grade Distributions Analysis

	Explanation
Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year) How do Course Success Rates compare to the College success rate? Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.	The sequence of the general education courses will be evaluated (co-requisite versus pre-requisite). Course success rates for the Practical Nursing courses are evaluated with a "B" or higher, compared to the college definition of "C+". In each subsequent nursing course, the course success rate improves. Courses are reviewed and identified during curriculum review committee meetings.
Curriculum/Course Materials Have the program's core course requirements or total credit hours been reviewed or revised within the last two years? Are significant curriculum revisions anticipated in the next two years? Does the program offer clinical, WBL, or Apprenticeship opportunities? If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?	The program's core course requirements are in line with the state curriculum standards. The program is reviewed annually. Curriculum revisions are not anticipated in the next two years. Clinical experiences are part of the ADN curriculum. Apprenticeship opportunities are available.
Modality:	The day traditional ADN program is taught in a traditional/seated delivery method, including lectures, labs,

	Explanation
<p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>simulation, and clinicals. The evening ADN bridge program (LPN to RN) is a hybrid program with online and seated components.</p> <p>Faculty in the bridge program complete distance education training. Both full-time faculty members have taken Association of College and University Educators (ACUE) courses on effective online instruction.</p>
<p>Student Achievement:</p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>The ADN program always meets enrollment goals and consistently has a waitlist of potential students.</p> <p>The withdrawal rates are higher than the college averages. Strategies have been identified: medical math, longer orientation, student tutors, and success coaches.</p>
<p>Evaluation:</p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Positive comments:</p> <ul style="list-style-type: none"> • Instructors care about the students • Flexibility • Enjoy clinical experiences and simulation <p>Negative comments:</p> <ul style="list-style-type: none"> • Students want to see test questions • Students would like to select their preceptors <p>Student evaluations are used to identify strengths and weaknesses. Patterns in the evaluations can trigger programmatic modifications.</p>

Job Outlook

About this section

Employment of registered nurses is projected to grow 6 percent from 2023 to 2033, faster than the average for all occupations.

About 194,500 openings for registered nurses are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

Demand for healthcare services will increase because of the large number of older people, who typically have more medical problems than younger people. Registered nurses also will be needed to educate and care for patients with chronic conditions, such as diabetes and obesity.

Job growth is expected across most types of healthcare settings, including hospitals and outpatient care centers that provide same-day services, such as chemotherapy, rehabilitation, and surgery. In addition, because many older people prefer to be treated at home or in residential care facilities, registered nurses will be in demand in those settings.

Job Outlook

About this section

Overall employment of nursing assistants and orderlies is projected to grow 4 percent from 2023 to 2033, about as fast as the average for all occupations.

About 216,200 openings for nursing assistants and orderlies are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

As the baby-boom population ages, nursing assistants and orderlies will be needed to help care for an increasing number of older people who have chronic or progressive diseases, such as heart disease and diabetes.

Demand for nursing assistants may be constrained by financial pressures on nursing homes, which might lead some facilities to close or reduce staff. However, increased opportunities are expected in home- and community-based settings as patient preferences and shifts in federal and state funding generate demand for care in these settings.

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	ADN graduates that pass NCLEX have a 100% job placement rate.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	This program is an integral part of the Gaston County community and the surrounding areas. Providing a diverse nursing workforce is also important to this community. Studies show that people living in a community are more likely to visit healthcare providers who are representative of their race, ethnicity, and gender. The nursing shortage was predicted before the pandemic, which exacerbated the problem. The critical shortage is due to a combination of factors including an aging population, increased need for healthcare services, and job burnout of current employees. We are doing our part to meet the growing demand for nurses.
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	Healthcare systems, including CaroMont Health and Atrium Health depend on qualified ADN graduates to enter the nursing workforce as experienced nurses are retiring and leaving the workforce. Nursing employment opportunities are expected to continue to grow. Upon graduation, all students can work in the service area. There are more jobs available than graduates. The advisory board plays a critical role in supporting and guiding the program. The board is very active in sharing industry updates, hospital needs, and helping with curriculum. Additionally, the advisory board helps with supplies and equipment as needed.
Uniqueness: What do we do that sets us apart from neighboring institutions?	Excellent facilities for classroom, lab, and simulation experiences for students, utilizing several low, medium, and high-fidelity simulators. Committed faculty who spend considerable amount of time reaching out to students to assist in their success.

	Explanation
How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?	The nursing department holds informational sessions throughout the year to gauge interest in the nursing programs. The nursing program benefits from experienced advisors and recruiters who may be the first contact for students.

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Associate Degree Nursing (45110)	165.26	153.94	161.13	149.16	148.35

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Associate Degree Nursing	\$1,575,471.77	264.4	\$1,336,373.65	(\$239,098.12)	215.5	\$1,095,933.87	(\$479,537.90)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	Nursing programs have historically cost more than other programs due to equipment and supplies in order to provide real-life experiences for students in a safe environment. The PN program and ADN programs share classrooms, labs, and simulation teaching/practice areas. The nursing programs strives to utilize cost-saving practices.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<ul style="list-style-type: none"> CaroMont, Atrium and Abernathy Laurels Apprenticeship CaroMont and Atrium Career Clubs Gaston and Lincoln County School System

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	The Accreditation Commission for Education in Nursing (ACEN) did a site visit in September 2024. We are waiting for the results.

Program Review – D45660 Practical Nursing

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Paige Okon

Program Code(s)/Name(s): Practical Nursing

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- D45660 Practical Nursing (Diploma Only)

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Strengths:** Strong administrative and community support. Strong NCLEX pass rate.
- **Areas for Improvement:** Increase retention of students who begin each PN cohort in the fall semester. Increase retention of full-time faculty. Improvement in processes by creating standard workflows and master courses that follow the NC concept-based nursing curriculum.
- **Needs:** Increase number of full-time faculty. Propose student success coach model.
- **Actions:** Identify top five goals for the Practical Nurse program and create standard workflows to support the goals.

SECTION II: PROGRAM DATA

Program Enrollments -

Entry – Program Enrollment

Academic Year 2023-2024 Unduplicated	D45660
American Indian/Alaska Native	0
Asian	2
Black	30
Hispanic	17
Non-U.S. Resident	2
Two or More Races	7
Unknown	13
White	70
Grand Total	141

	Explanation/Narrative
<p>Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>Program enrollment remains steady. Practical Nursing is a full-time selective admission program with a point system administered by an application management system. We routinely have more applicants than available spots. Additionally, Apprenticeship 321 numbers have increased in the Practical Nursing program.</p> <p>The program is set up using the state curriculum standard and is equivalent to neighboring institutions.</p> <p>Gaston College Admissions coordinates tours of the nursing program areas so that prospective students can see what we offer to our community. Numerous information sessions are held throughout the year.</p> <p>The nursing program reviews current nursing education literature and NC Board of Nursing recommendations to ensure our program is second to none. The nursing program also relies on input from advisory committee members, clinical partners, and students.</p>
<p>Enrollment Analysis: Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for D45660 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the PN program at GC? Identify strategies for enrollment growth.</p>	<p>For this past reporting cycle, the program is closely aligned with the college-wide demographics.</p> <p>Students may leave the college service area to attend other schools due to the selective admission process.</p> <p>Cleveland CC had 32 (new and recurring students for Spring 2024); however, 1 from Lincoln & 8 from Gaston students were <u>from our service area</u> have enrolled in the PN program at CCC. $1+8 = 9$. An opportunity for program growth.</p> <p>Catawba Valley CC had 0 (new and recurring students for Spring 2024); however, 0 from Lincoln & 0 from Gaston students were <u>from our service area</u> have enrolled in the PN program at CVCC. No Practical Nursing program at CVCC. A possible opportunity for program growth.</p> <p>Central Piedmont CC had 18 (new and recurring students Spring 2024); however, 1 from Lincoln & 1 from Gaston totaling 2 students from our service area. $1 + 1 = 2$</p>

	Explanation/Narrative
	The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.

Demographic Enrollment Analysis by Race/Ethnicity:

<p>Demographic Enrollment Analysis by Race/Ethnicity:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college <i>race/ethnicity</i> data.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>For this past reporting cycle, the program is closely aligned with the college-wide demographics.</p> <p>Enrollment is done through an online application management platform with a point system that removes possible unconscious bias.</p> <p>Retention efforts are made through individual meetings, tutoring, support services, and an educational software provider that monitors academic performance, attendance, and engagement.</p>
--	--

Demographic Enrollment Analysis by Gender:

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the gender breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Compared to the college-wide demographics in regards to gender, the Practical Nursing program is 94 % female, compared to 64% female college-wide. This is not unusual in academic nursing programs and in the field. Nursing has traditionally been associated with women; however, we are making attempts to attract men and move beyond the traditional gender roles in nursing. We have targeted marketing, promote inclusivity, and have hired our first male full-time nursing faculty member.</p> <p>Enrollment is done through an online application management platform with a point system that removes possible unconscious bias.</p> <p>Retention efforts are made through individual meetings, tutoring, support services, and an education software provider that monitors academic performance, attendance, and engagement.</p>
---	---

Demographic Enrollment Analysis by Age:

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the **age** breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

The Practical Nursing program has a higher percentage of students in the 25-44 age group compared to the college-wide demographics. One factor to explain the difference is that many students choose Practical Nursing as a second career. Older students also like the shorter program length.

In fall 2025, we will enroll high school students in the Practical Nursing program.

Progress: Course and Grade Distributions Analysis

	Explanation
Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year) How do Course Success Rates compare to the College success rate? Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.	The sequence of the general education courses will be evaluated (co-requisite versus pre-requisite). Course success rates for the Practical Nursing courses are evaluated with a “B” or higher, compared to the college definition of “C+”. The first nursing course has the same withdrawal rate as the college; however; in the subsequent courses the withdrawal rate is minimal. Courses are reviewed and identified during curriculum review committee meetings.
Curriculum/Course Materials Have the program’s core course requirements or total credit hours been reviewed or revised within the last two years? Are significant curriculum revisions anticipated in the next two years? Does the program offer clinical, WBL, or Apprenticeship opportunities?	The program’s core course requirements are in line with the state curriculum standards. The program is reviewed annually. Curriculum revisions are not anticipated in the next two years. Clinical experiences are part of the Practical Nursing curriculum. Apprenticeship opportunities are available.

	Explanation
If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?	
Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality. Include Quality Matters and online training information here	The Practical Nursing program is taught in a traditional/seated delivery method, including lectures, labs, simulation, and clinicals.
Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?	The Practical Nursing program always meets enrollment goals and consistently has a waitlist of potential students. During this assessment cycle, there was a day and evening cohort. Success and withdrawal rates are consistent with the college averages.
Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated. Explain how the student feedback is being used to improve the course(s).	Positives: Students appreciate highly knowledgeable instructors who demonstrate a strong understanding of the course material. The student's feel instructors effectively apply curriculum content to real-life nursing situations, helping students grasp its relevance. Students appreciate the instructor's eagerness to help, present clear demonstrations, and ability to address weaknesses to enhance understanding. Students appreciate that teaching style is organized, straightforward, and engaging, incorporating personal experiences to make lessons more relatable. Students feel the instructor is approachable, dedicated, and provides timely feedback. Student's feel instructor motivates students, communicates clearly about course expectations, and ensures they are well-prepared for assessments. Negatives: Students feel that exam reviews for individual tests would enhance learning, increased in-class activities would make class time more engaging, and additional classroom plugs would improve convenience for computer charging. How Student Feedback is Being Used to Improve the Courses: The feedback highlights the program's strengths in making content understandable, addressing students' needs, and fostering engagement. Based on this, improvements could

	Explanation
	include incorporating more real-life applications, reinforcing complex topics through demonstrations, and maintaining clear communication. The program can address weaknesses and provide constructive feedback and guide course adjustments to ensure students receive targeted support. Additionally, recognizing the value of motivational approaches can help reinforce a positive learning environment, promoting student success. Based on student feedback, exam reviews for individual tests are being considered to enhance learning and better prepare students for assessments. Efforts are being made to incorporate more in-class activities to create a more engaging and interactive learning environment. Additionally, the need for more classroom plugs for computer charging has been acknowledged to improve student convenience and accessibility to digital resources.

Program Retention Data

Job Outlook

About this section

Employment of registered nurses is projected to grow 6 percent from 2023 to 2033, faster than the average for all occupations.

About 194,500 openings for registered nurses are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

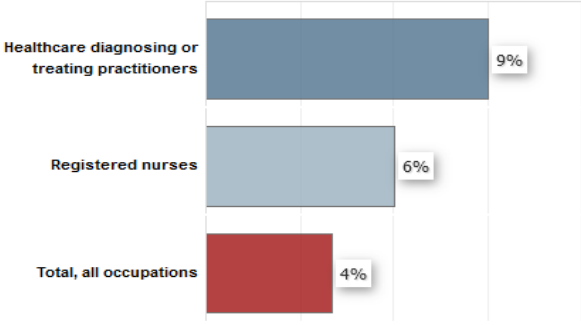

Employment

Demand for healthcare services will increase because of the large number of older people, who typically have more medical problems than younger people. Registered nurses also will be needed to educate and care for patients with chronic conditions, such as diabetes and obesity.

Job growth is expected across most types of healthcare settings, including hospitals and outpatient care centers that provide same-day services, such as chemotherapy, rehabilitation, and surgery. In addition, because many older people prefer to be treated at home or in residential care facilities, registered nurses will be in demand in those settings.

Registered Nurses

Job Outlook

About this section

Overall employment of nursing assistants and orderlies is projected to grow 4 percent from 2023 to 2033, about as fast as the average for all occupations.

About 216,200 openings for nursing assistants and orderlies are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

As the baby-boom population ages, nursing assistants and orderlies will be needed to help care for an increasing number of older people who have chronic or progressive diseases, such as heart disease and diabetes.

Demand for nursing assistants may be constrained by financial pressures on nursing homes, which might lead some facilities to close or reduce staff. However, increased opportunities are expected in home- and community-based settings as patient preferences and shifts in federal and state funding generate demand for care in these settings.

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	All Practical Nursing students receive job offers upon graduation and successfully passing the NCLEX. They all complete a minimum of 90 hours of Preceptorship, also known as Focused Client Care Experience by the NCBON during the Spring semester in order to assist them for entry level nursing upon successful passing of the PN-NCLEX.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	This program is an integral part of the Gaston county community and the surrounding areas. The average age of the entering nursing student is 25-44 years, which could indicate second career choices. Providing a diverse nursing workforce is also important to this community. Studies show that people living in a community are more likely to visit healthcare providers who are representative of their race, ethnicity, and gender. The nursing shortage was predicted before the pandemic, which exacerbated the problem. The critical shortage is due to a combination of factors including an aging population, increased need for healthcare services, and job burnout of current employees. We are doing our part to meet the growing demand for nurses.
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	Upon graduation, all students can work in the service area. There are more jobs available than graduates. We have numerous community partners, including our local hospital systems, medical offices, county schools, and other higher education institutions. The advisory board plays a critical role in supporting and guiding the program. The board is very active in sharing industry updates, hospital needs, and helping with curriculum. Additionally, the advisory board helps with supplies and equipment as needed.
Uniqueness:	The Practical Nursing program at Gaston College offers a day and evening program. Healthcare apprenticeships at the

	Explanation
What do we do that sets us apart from neighboring institutions? How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?	College began with the Practical Nursing program and remain strong. The facilities are up to date including classrooms, lab, and simulation. The outreach regarding both program options, including the apprenticeship option is effective. Numerous information sessions are held each year, including sessions at local hospitals.

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Practical Nursing (45660)	96.38	98.97	94.22	112.16	67.19

Program Financial Viability – Practical Nursing included in Nursing data below.

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Nursing	\$1,575,471.77	264.4	\$1,336,373.65	(\$239,098.12)	215.5	\$1,095,933.87	(\$479,537.90)
Nurse Aide (Curriculum & Con. Ed.)	\$721,185.22	81.8	\$308,866.72	(\$412,318.50)	77.7	\$349,552.10	(\$371,633.12)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	Nursing programs have historically cost more than other programs due to equipment and supplies in order to provide real-life experiences for students in a safe environment. The PN program and ADN programs share classrooms, labs, and simulation teaching/practice areas. The nursing programs strives to utilize cost-saving practices.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<ul style="list-style-type: none">• CaroMont, Atrium and Abernathy Laurels Apprenticeship• CaroMont and Atrium Career Clubs• Gaston and Lincoln County School System

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	The Accreditation Commission for Education in Nursing (ACEN) did a site visit in September 2024. We are waiting for the results.

Program Review – A45580 Pharmacy Technology

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Sierra Calhoun

Program Code(s)/Name(s): Pharmacy

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A45580 Pharmacy Technology
- C45580 Pharmacy Technology – Certificate
- C45580A Pharmacy Technology – Pharmacy Technician
- C45580P Pharmacy Technology – Pharmacy Technician (CCP)

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Strengths:** Student Satisfaction and 100% pass rate thus far.
- **Areas of Improvement:** To ensure the successful growth and operation of the program, I will require the addition of one to two adjunct instructors. This support will be crucial as the program continues to expand. Ongoing community outreach efforts will be essential to boost enrollment.
- **Needs:** Focused community outreach for the Pharmacy Technician program, coupled with increased marketing efforts during the spring and summer months, will be critical to promoting the program and driving enrollment growth.
- **Actions:** My main focus right now is building stronger connections with local pharmacies to set up apprenticeship opportunities and partnerships for clinical training, while also reaching out to potential students. I also plan to increase the program's visibility through social media. To help prepare students for their clinical experiences, I will shadow our clinical partners this spring to better understand what they need and expect from our students. This will help me adjust the program to better meet industry standards.
Starting in Fall 2024, the Pharmacy Technology Program will move to a 16-week Continuing Education course.

Program Enrollments

Entry – Program Enrollment

	Explanation/Narrative
<p>Enrollment Analysis:</p> <p>Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>The program's enrollment is showing positive growth. It increased from 12 students to 21 students, which is a significant improvement. This growth suggests that the program is becoming more appealing to students, potentially due to factors like increased awareness, effective marketing efforts, or meeting the needs of the local community and industry. Continued growth like this can strengthen the program by attracting more resources, building partnerships, and increasing its reputation.</p> <p>However, it's also important to ensure the program can support the growing number of students with adequate staff, resources, and facilities.</p> <p>Yes, the Full-Time and Part-Time pathways have been reviewed and updated. These updates ensure that the pathways are aligned with current program goals, meet student needs, and provide flexibility for various schedules. This process helps maintain the program's quality and relevance for all students.</p> <p>Similar. Our program hours are comparable to those offered by neighboring institutions, ensuring consistency with industry standards and student expectations. The major courses we offer also align closely with those at other schools, covering the same essential topics and skills required for success in the field. While there may be slight variations in course names or specific content, the overall structure and objectives remain similar to ensure our students receive a competitive education.</p> <p>Strategies to Improve Enrollment Goals: To boost enrollment, we have implemented early marketing efforts. These include monthly Zoom information sessions, active social media promotion, participation in career expos, and direct outreach to local high schools and</p>

	Explanation/Narrative
	<p>businesses. We are also distributing marketing materials to high school counselors and pharmacies to increase awareness. These efforts will continue to expand in the future, ensuring we reach more potential students.</p> <p>Strategies to Improve the Program for Students:</p> <p>We gather and review student feedback to identify areas for improvement. This includes updating the curriculum to meet industry needs, strengthening partnerships with clinical sites and local employers, and providing more support through open communication and mentorship opportunities. We also plan to implement additional certifications, such as CSPT, to give students an edge in the job market.</p> <p>Strategies to Improve Course Offerings:</p> <p>To keep our courses relevant and flexible, we regularly review and adjust the course structure and content based on feedback from students, instructors, and industry partners. For example, we recently transitioned to a 16-week Continuing Education course for Fall 2024 to better meet student needs. We are also exploring additional course pathways and certifications to provide more options and career opportunities for our students.</p>
<p>Enrollment Analysis:</p> <p>Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A45580 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the PHM program at GC? Identify strategies for enrollment growth.</p>	<p>Our outreach efforts focus on reaching a wide range of people. This includes targeted social media campaigns with our marketing team, working with the CaroMont Health Science Academy at East Gaston High School to connect with juniors and seniors in Gaston County, and encouraging word-of-mouth referrals. These strategies help make sure people are aware of our program and have access to it.</p> <p>Cleveland CC had 0 (new and recurring students for Spring 2024); however, 0 from Lincoln & 0 from Gaston students were <u>from our service area</u> have enrolled in the PHM program at CCC. No PHM program at CCC. This may be an opportunity for program growth.</p> <p>The program should consider reaching out to Cleveland CC and get permission to contact students in the county to share program information/marketing campaign to students.</p> <p>Catawba Valley CC had 0 (new and recurring students for Spring 2024); however, 0 from Lincoln & 0 from Gaston students were <u>from our service area</u> have enrolled in the PHM program at CVCC. No PHM program at CVCC. This may be another opportunity for program growth.</p>

	Explanation/Narrative
	<p>Central Piedmont CC had 7 (new and recurring students Spring 2024); however, 0 from Lincoln & 1 from Gaston totaling 3 students from our service area. $0 + 1 = 1$. With the low enrollment number, the program may want to explore if this could be another opportunity for program growth.</p> <p>When reviewing these numbers, determine if the program has effectively marketed the Pharmacy Technology program to students in and around our service area counties.</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Race/Ethnicity:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compare to the college *race/ethnicity* data.

Discuss program actions to enroll and retain underserved students or special population students.

Based on the most recent program demographic enrollment data for 2023-2024, there are both similarities and differences between the college's overall enrollment and the program's enrollment in terms of race/ethnicity. The difference could suggest that the program appeals less strongly to certain groups, possibly due to factors like targeted outreach, accessibility, or awareness of the program. By analyzing this data, the program can identify areas where additional outreach or support may be needed to ensure all racial and ethnic groups have equitable access to the program and are fully represented.

The program is focused on enrolling and supporting underserved and special population students through targeted outreach and inclusive practices. Enrollment efforts include partnering with local high schools, community organizations, and agencies to connect with underrepresented groups, as well as promoting the program through accessible and culturally relevant materials. To reduce financial barriers, the program provides information on scholarships, grants, and financial aid opportunities. Flexible learning options, such as web-blended courses that combine in-person and online instruction, help accommodate students with different schedules and needs. To retain students, the program offers resources like tutoring, academic advising, and mentorship programs to support academic success. It also fosters a sense of belonging by creating an inclusive environment where all students feel valued and supported, hosting workshops and events tailored to special populations. Open communication is maintained to address student concerns, and continuous improvements are made based on feedback to enhance the program and ensure equitable opportunities for all students.

Demographic Enrollment Analysis by Gender:

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the gender breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>The most recent demographic enrollment data for 2023-2024 shows a clear difference in gender between the program and the college’s overall enrollment. In the program, there is only one male student, and the rest are female, creating a noticeable gender imbalance. This is different from the college’s overall enrollment, which likely has a more balanced male-to-female ratio. This imbalance may suggest that the program attracts more female students, which is common in fields like pharmacy technology, where women are often more represented. Recognizing this trend can help the program adjust its outreach to encourage more male students to enroll, aiming for a more balanced gender representation.</p> <p>The program focuses on enrolling and retaining underserved and special population students by prioritizing accessibility and support. It partners with local high schools, community organizations, and agencies to reach students who may not be aware of the program. Financial aid information is provided to help remove economic barriers, ensuring that students from various backgrounds can afford to enroll. The program offers flexible web-blended courses, combining in-person and online instruction, to accommodate different schedules. To support retention, the program connects students with resources like tutoring, academic advising, and</p>
---	---

	mentorship. It creates an inclusive learning environment through events and workshops tailored to special populations and maintains open communication to address student concerns and gather feedback for continuous improvement. These efforts ensure that underserved and special population students receive the support they need to succeed.

<p>Demographic Enrollment Analysis by Age:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to age. For example, explain if the age breakout between the different groups is more, less, or the same as the college’s overall age breakout.</p> <p>Discuss program actions to enroll and retain underrepresented students or special population students.</p>	<p>Based on the most recent program demographic enrollment data for 2023-2024, the program’s age range is between 18 and 55 years old. This differs somewhat from the college’s overall age breakout, which may have a broader distribution across age groups. The program tends to attract a slightly younger audience, with most students falling in the 18-24 age group, while others are in the 25-55 age range. This suggests the program appeals to both traditional students just out of high school and non-traditional students looking to change careers or further their education later in life. The age distribution in the program reflects a balance between younger students and adults seeking career advancement.</p>
--	---

	<p>The program works to enroll and retain underrepresented students by partnering with local high schools and community organizations to spread awareness. It provides information about financial aid, scholarships, and grants to help with costs. Flexible web-blended courses make it easier for students with different schedules to participate. The program also offers support like tutoring, academic advising, and mentorship to help students succeed. It creates an inclusive environment where all students feel welcomed and ensures open communication to address any challenges. These efforts help underrepresented students get the support they need to succeed.</p>

Progress: Course and Grade Distributions Analysis

	Explanation
Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year) How do Course Success Rates compare to the College success rate? Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.	Yes, the courses, including general education and elective courses, are selected and sequenced in a logical way. The program is designed to ensure that foundational courses are taken in proper sequence, building a strong base of knowledge as the program is progressing to more advanced topics. This structure helps students gain the necessary skills and understanding step by step, making it easier for them to succeed and complete the program. The Course Success Rates are 100% pass rate. Yes, all the courses being offered for the program are meeting enrollment needs, with each course having an enrollment of 5 students. There are no courses with lower than 5 enrollments, as the current enrollment numbers are consistent across all courses.
Curriculum/Course Materials Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?	Yes, the program's core course requirements and total credit hours have been reviewed and revised within the last two years. These revisions ensure that the program remains up to date, meets industry standards, and provides students with the necessary skills and knowledge for their future

	Explanation
<p>Are significant curriculum revisions anticipated in the next two years?</p> <p>Does the program offer clinical, WBL, or Apprenticeship opportunities?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?</p>	<p>careers. The adjustments are made to enhance the overall quality of the program and ensure it aligns with current educational, and workforce demands.</p> <p>Yes, starting in Fall 2024, the Pharmacy Technology Program will move to a 16-week Continuing Education course.</p>
<p>Modality:</p> <p>How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Yes, the program's core course requirements and total credit hours have been reviewed and updated in the last two years. These changes help keep the program relevant and aligned with industry standards, ensuring students are prepared with the skills and knowledge needed for their careers. The updates also aim to improve the overall quality of the program.</p> <p>N/A</p>
<p>Student Achievement:</p> <p>What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Courses with Low Enrollment</p> <ul style="list-style-type: none"> N/A <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> PHM 110 Introduction to Pharmacy <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> N/A
<p>Evaluation:</p> <p>Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Students are generally satisfied with the program and enjoy their time, with very few complaints. They appreciate the support and learning environment provided. The only common complaint is that students would like their grades to be delivered more quickly. Other than that, the feedback is overwhelmingly positive, with students expressing their satisfaction with the course content and instruction.</p> <p>Student feedback is reviewed to make improvements to the courses. For example, to address concerns about grading, the program is working on delivering grades faster. The feedback also helps identify areas where students may need more support, and changes are made to improve their learning experience. By listening to their input, the program ensures it continues to meet students' needs and gets better over time.</p>

Completion/Credentials Earned

	Explanation
Graduation: Using the data in the above tables, discuss the student completion data and any identified trends? Identify any known barriers to timely student completion and how they can be addressed. What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?	There was not a graduating class for Spring 2024. To improve time to degree completion, the program offers flexible learning options like web-blended courses and ensures that courses are sequenced efficiently. To help students be career-ready upon graduation, the program provides hands-on experiences, strong connections with local employers, and career-focused resources like job placement assistance. These strategies aim to support students in finishing their degrees on time and preparing for successful careers.

Job Outlook

About this section

Employment of pharmacy technicians is projected to grow 7 percent from 2023 to 2033, faster than the average for all occupations.

About 47,400 openings for pharmacy technicians are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

Demand for pharmacy services is expected to increase because of the large number of older people, who typically use more prescription medicines than younger people. The growing prevalence of chronic diseases, such as diabetes and hypertension, in the general population also will lead to increased demand for prescription medications.

In addition, pharmacy technicians will be needed to take on a greater role in pharmacy operations because [pharmacists](#) are increasingly performing more patient care activities. Technicians will need to perform tasks—such as collecting patient information, handling prescription transfers, and verifying the work of other technicians—that were previously done by pharmacists.

Employment projections data for pharmacy technicians, 2023-33

Occupational Title	SOC Code	Employment, 2023	Projected Employment, 2033	Change, 2023-33		Employment by Industry

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	There was not a graduating class for Spring 2024.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	This pharmacy program is valuable to the community by providing trained pharmacy technicians to meet the demand in local healthcare and pharmacies. It helps improve access to healthcare and offers local residents stable job opportunities. The program also builds strong relationships with local employers, ensuring that graduates are ready to contribute to the workforce.
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	<p>This program leads to employment opportunities by training students to become skilled pharmacy technicians, a profession in high demand in local healthcare facilities and pharmacies. Graduates are prepared to fill essential roles in the community, contributing to the local economy and helping meet the workforce needs of nearby employers.</p> <p>Our community partnerships have been valuable by providing support from local healthcare facilities and pharmacies, offering hands-on experience and job opportunities for our students. These partnerships ensure our program aligns with community needs. Additional collaboration opportunities include creating more apprenticeship programs and certification options, which can strengthen relationships with local employers and open more career paths for our students.</p> <p>The advisory committee's feedback is positive. They have expressed interest in hiring our students and are pleased with the training they receive through the program.</p>
Uniqueness:	What sets us apart from neighboring institutions is our strong community partnerships, flexible learning options,

	Explanation
What do we do that sets us apart from neighboring institutions?	and focus on hands-on experience. We also offer support services to help students succeed and connect with local employers for job opportunities after graduation.
How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?	The department's promotional and outreach efforts are highly effective in highlighting the program's unique vision and attracting students. Through targeted marketing, community partnerships, and outreach efforts, we successfully reach prospective students and showcase the benefits of the program.

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Pharmacy Technology (45580)	DNA	DNA	5.69	12.72	14.19

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Pharmacy Tech (Curriculum & Con. Ed.)	\$116,292.33	13.9	\$60,341.80	(\$55,950.53)	14.2	\$63,882.11	(\$52,410.22)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	The program is financially viable. It is supported by enrollment, community partnerships, and available financial aid options for students, ensuring it can continue to operate successfully.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	We partner closely with CaroMont and Atrium's pharmacies, and we have relationships with many local pharmacies. Our community outreach efforts include reaching out to local high schools and sending flyers to businesses and

	Explanation
	organizations throughout the county to promote the program.

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	N/A

Curriculum Map – A45580 Pharmacy Technology

*Starting in Fall 2024, the Pharmacy Technology Program will move to a 16-week Continuing Education course.

Course	PLO1	PLO2	PLO3	PLO4
	Demonstrate the written and oral communication skills required for safe and legal practice in the role of pharmacy technician.	Demonstrate the critical thinking skills necessary for safe preparation and distribution of medication.	Demonstrate an understanding of policies and other print materials related to safe preparation and distribution of medication.	Perform mathematical calculations needed to safely prepare medications and solutions.

Program Review – A45740 Surgical Technology

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Kimberly Holman

Program Code(s)/Name(s): Surgical Technology

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A45740 Surgical Technology

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

Strengths:

- The Surgical Technology Program is meeting minimum enrollment capacity. We have a state-of-the-art laboratory for students to become proficient in their lab skills prior to entering the clinical site.
- The Surgical Technology Program underwent initial accreditation with no citations or recommendations for improvement. We are awaiting the final accreditation decision from CAAHEP.
- The demand for Surgical Technologists within the local organizations is very high.
- Apprenticeship cohort is underway at CaroMont with great feedback.

Areas for Improvement:

- We are working toward correcting the curriculum sequencing to make the curriculum schedule flow more easily for students.
- Faculty to complete BaAt Training to enhance student learning.

Needs: To help complete the state-of-the-art laboratory we are creating, the program would like to purchase a Laparoscopic Simulator to give students a real- world experience.

- Continued marketing and recruitment for Surgical Technology to meet community demands
- Training new faculty for didactic, lab, and clinical instruction.
- Continued professional development for Gaston College and to maintain professional certification.

Actions: The program is in the process of building all its courses in Blackboard Ultra, building a new laboratory, and changing curriculum sequencing.

- Work with the Marketing department to maximize exposure of the demand of surgical technologists in our community.
- Work with faculty to make sure that professional development to maintain credential and Gaston College requirements are being met.

SECTION II: PROGRAM DATA

Program Enrollments

Entry – Program Enrollment

Academic Year 2023-2024 Unduplicated	A45740
American Indian/Alaska Native	0
Asian	0
Black	4
Hispanic	1
Non-U.S. Resident	0
Two or More Races	0
Unknown	2
White	9
Grand Total	16

	Explanation/Narrative
Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's enrollment. For example, is the program enrollment growing or declining. Have Full-Time and Part-Time pathways been updated/reviewed? In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses? What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?	<p>The program has a maximum enrollment capacity (MEC) of 15 students. The program has enrolled its second cohort since 2023 and has met MEC with the first two cohorts.</p> <p>The program continues to show student interest with at least 70 student applications each year since the start of the program. The demand for Surgical Technologists within the local healthcare organizations is exceedingly high.</p> <p>The Surgical Technology Program is a 21-month program, which offers an associate in applied science degree. There are no pathways for Early College students into this program. Students must be 18 years of age to enter the Surgical Technology Program. Most of the program delivery is seated, however the program does offer one online delivery course in the second year to assist second year students with work schedules and family friendly hours.</p> <p>Program hours are compatible with other neighboring institutions and the major courses may differ with the Humanities courses. Gaston College's Surgical Technology Program gives students a choice of their Humanities courses, whereas other neighboring institutions have a set list of Humanities courses that students can take.</p> <p>The Surgical Technology faculty takes every opportunity to participate in campus activities where area High School students are involved to gain more awareness of the</p>

	Explanation/Narrative
	program. The curriculum sequencing schedule is being re-worked for a better flow to accommodate students with their apprenticeship work schedules.
<p>Enrollment Analysis:</p> <p>Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A45740 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Surgical Technology program at GC? Identify strategies for enrollment growth.</p>	<p>From the graphs below, it shows that the Surgical Technology Program is aligned with the overall college enrollment with white and black students. It falls short with Asian and Hispanic nationalities.</p> <p>Some of the neighboring Surgical Technology Programs have been active for over 50 years and are well established programs. They also have more clinical affiliates that students work with during their clinical experiences. Gaston College utilizes CaroMont Regional Medical Center, Atrium Health-CMC, and Atrium Health-Lincoln as their clinical affiliates. CaroMont is the program's main sponsor, so all students rotate through that facility.</p> <p>Gaston College's Surgical Technology Program leaders are working to obtain other area hospitals, Surgery Centers, and physician's offices to offer students more clinical experiences.</p> <p>Cleveland CC had 20 (new and recurring students for Spring 2024); however, 1 from Lincoln & 2 from Gaston students were <u>from our service area</u> have enrolled in the SUR program at CCC. $1+2 = 3$. An opportunity for program growth.</p> <p>The program should consider reaching out to Cleveland CC and get permission to contact students in the county to share program information/marketing campaign to students.</p> <p>Catawba Valley CC had 19 (new and recurring students for Spring 2024); however, 3 students from Lincoln & 1 student from Gaston were <u>from our service area</u> that have enrolled in the SUR program at CVCC. $1+2 = 3$. An opportunity for program growth.</p> <p>Central Piedmont CC had 47 (new and recurring students Spring 2024); however, 1 from Lincoln & 2 from Gaston totaling 2 students from our service area. $1 + 1 = 2$</p>

	Explanation/Narrative
	<p>When reviewing these numbers, determine if the program has effectively marketed the Surgical Technology program to students in and around our service area counties.</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

<p>Demographic Enrollment Analysis by Race/Ethnicity:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compared to the college <i>race/ethnicity</i> data.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>When comparing the Surgical Technology Program enrollment to the overall college enrollment, the student demographic charts are similar. There are a few differences in Hispanic, Asian and the Unknown. The Surgical Technology Program aligns with the College in White and Black students but did not enroll any Asian students in 2023-2024 reporting year. There were also less Hispanic students in the program as compared to the College. There were more Unknown ethnicities in the Surgical Technology Program as compared to the College.</p> <p>Actions to enroll and retain underserved students are to plan targeted outreach and recruitment with information sessions and attend as many community recruitment events as possible.</p>
---	---

	Faculty will continue to participate in inclusivity and belonging training so that program atmosphere is where students feel respected and valued.
--	--

Demographic Enrollment Analysis by Gender:

<p>Demographic Enrollment Analysis by Gender:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to gender. For example, explain the if the gender breakout between male and female students is more, less, or the same as the college’s overall gender breakout.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>When comparing the Surgical Technology Program to the overall College Gender enrollment, the chart shows significant reduction in male enrollment. The healthcare sector has long been dominated by women-who currently perform 77% of healthcare jobs nationally according to the School of Public Health at the University of Minnesota.</p> <p>Actions to enroll and retain underserved students are to plan targeted outreach and recruitment with information sessions and attend as many community recruitment events as possible.</p> <p>Faculty will continue to participate in inclusivity and belonging training so that program atmosphere is where students feel respected and valued. Also, faculty will work with the Marketing Department to highlight males in the role of the surgical technologist to entice male students to enroll.</p> <p>The Program Director will work with TRIO staff and the Multicultural Club- Men of Excellence to bring more</p>
---	--

	awareness of the Surgical Technology field to those underserved populations.
--	--

Demographic Enrollment Analysis by Age:

<p>College Wide – Demographics 2023-2024</p> <p>GASTON COLLEGE Unduplicated Enrollment Academic Year 2023-2024 - by Age</p> <table border="1"> <thead> <tr> <th>Age Group</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>18-24</td> <td>59%</td> </tr> <tr> <td>25-44</td> <td>33%</td> </tr> <tr> <td>45-64</td> <td>6%</td> </tr> <tr> <td>65+</td> <td>2%</td> </tr> </tbody> </table>	Age Group	Percentage	18-24	59%	25-44	33%	45-64	6%	65+	2%	<p>Program – Demographics 2023-2024</p> <p>A45740: Surgical Technology Unduplicated Enrollment Academic Year 2023-2024 - by Age</p> <table border="1"> <thead> <tr> <th>Age Group</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>18-24</td> <td>50%</td> </tr> <tr> <td>25-44</td> <td>50%</td> </tr> <tr> <td>45-64</td> <td>0%</td> </tr> <tr> <td>65+</td> <td>0%</td> </tr> </tbody> </table>	Age Group	Percentage	18-24	50%	25-44	50%	45-64	0%	65+	0%

Progress: Course and Grade Distributions Analysis

	Explanation
Course Sequence/Success: Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year) How do Course Success Rates compare to the College success rate? Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.	The course sequence has been modified for Fall 2024 and will also be monitored to see if a few of the General Education courses can be added as pre-requisites to admission into the program. Success rates cannot be measured since there has not been a graduating cohort. The Surgical Technology Program is a continuous, 21-month program so when a student drops a SUR course, they will no longer be enrolled in the program.
Curriculum/Course Materials Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?	The total credit hours for the Surgical Technology Program has been modified from the original 64 credit hours to 69. SUR 212- Clinical Supplement has been added to the Fall 2025 course sequence.

	Explanation
Are significant curriculum revisions anticipated in the next two years?	The program offers apprenticeships with CaroMont Health, which allows the student to work part-time while attending school. CaroMont pays for all tuition, books, and uniforms and will offer a job to the post-graduation students.
Does the program offer clinical, WBL, or Apprenticeship opportunities?	The Surgical Technology Program does not offer CCP pathways at this time.
If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty instruction in CCP Pathways are of equal quality and rigor as the college campus program?	
Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.	The Surgical Technology Program offers seated, and online modalities, although most SUR didactic and all courses that have lab components are seated due to the extensive hands-on requirement.
Include Quality Matters and online training information here	The Program Director is building out all the SUR courses in Blackboard and will work with the Instructional Design team to make them Quality Matters certified.
Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?	<p>Courses with Low Enrollment</p> <ul style="list-style-type: none"> The program continues to show strong interest and meets minimum enrollment capacities (MEC). <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> As mentioned above, the low success rates were due to the initial start-up challenges. <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> As mentioned above, the withdrawal rates were due to initial startup challenges, and the program is now steady with 6 second year students. The program also enrolled 15 first-year students in the Fall of 2024 and has maintained all 15.
Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated. Explain how the student feedback is being used to improve the course(s).	<p>Students noted that tests were given back in a timely manner, however grades were not entered in a timely manner in the grade center of Blackboard, so students did not have that information to know what their course GPA was.</p> <p>Lab practice was excellent with hands-on activities and the instructor was experienced in Surgical Technology. The instructor knew the material; however, the delivery method was boring and hard for students to stay focused.</p> <p>The program hired a new program director in March 2024, who completely revamped all Blackboard material making it more complete. Also, the Grade Center was set up so</p>

	Explanation
	<p>students can view their grades. All courses were converted to Blackboard Ultra giving the instructor the ability to produce more engaging assignments using the AI component.</p> <p>The new instructor uses different delivery methods such as Kahoot, Touch Surgery, and does break- out sessions to keep students engaged in the didactic portion of the course.</p> <p>The Program Chair reviews all end-of-course evaluations with program faculty. If negative student feedback about an Instructor is a valid concern; the concern is addressed through a coaching session with the instructor. If the feedback is a suggestion for improvement in the program or a concern about program guidelines, etc. then it is addressed at the level of the program chair, and the divisional dean if necessary, and the appropriate action warranted is taken.</p>

Program Retention Data – Surgical Technology is a new program. No retention data available.

Program Titles	Programs Code	Fall 2022 to Fall 2023 retention	Fall 2023 to Spring 2024 retention
Surgical Technology (A45740)	A45740	DNA	DNA

Program Progress: Retention and Progression

	Explanation
<p><u>SLOs and Curriculum Map:</u> Attach curriculum map and analysis of program learning outcomes.</p>	See the attached curriculum map and program learning outcomes.
<p><u>Retention and Progression:</u> Discuss the program retention and identify any barriers to student progress.</p> <p>Consider course success/withdrawal data.</p>	<p>The program enrolled 14 students in the first cohort in Spring 2023 and currently has retained 6 students from that cohort, which gives the program a 43% retention rate.</p> <p>The launch of the Surgical Technology Program at Gaston College faced numerous challenges during the start-up phase. Although Gaston College hired a program director who met the educational and credentialing requirements to manage the program effectively, the director lacked the necessary experience in both the didactic and lab settings to create an optimal learning environment for students. This</p>

	Explanation
	<p>led to significant student stress and concerns about not receiving the essential knowledge for success.</p> <p>The program hired a new Clinical Coordinator in January 2024 that had 19 years of teaching experience, who became the new Program Director in March 2024. This change resulted in Blackboard revision, and curriculum sequence changes that would help students have a schedule that was more family and work friendly. The instructor also had all assignments listed in the Blackboard calendar with due dates and students could see their current grades in the Grade Center.</p>

Credential Earned – Academic Year 2023-2024

Surgical Technology is a new program. Data will be present going forward.

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends?</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?</p>	<p>The program has not had a graduating cohort yet. The first cohort will graduate in Spring 2025.</p> <p>The second-year students will be enrolled in SUR 137 in Spring 2025, which is a Professional Success Prep course. This course provides employability skills and an overview of theoretical knowledge in preparation for certification. Topics include test-taking strategies, resume preparation, interviewing strategies, communication skills, and teamwork concepts. Upon completion, students should be able to prepare a resume, demonstrate appropriate interview techniques, and identify strengths and weaknesses in preparation for certification.</p>

Job Outlook

About this section ?

Overall employment of surgical assistants and technologists is projected to grow 6 percent from 2023 to 2033, faster than the average for all occupations.

About 8,700 openings for surgical assistants and technologists are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

The aging of the large baby-boom generation is expected to increase the demand for surgical procedures, which should result in a greater need for surgical assistants and technologists. A rise in the number of surgeries among all age groups also is expected to support job growth.

Heightened demand for these workers is expected in outpatient settings, such as ambulatory surgery centers. These facilities are seeing an increase in the number of surgeries because of advances in medical technology and changes in insurers' policies.

Surgical Technologists

Description: what do they do?

Assist in operations, under the supervision of surgeons, registered nurses, or other surgical personnel. May help set up operating room, prepare and transport patients for surgery, adjust lights and equipment, pass instruments and other supplies to surgeons and surgeons' assistants, hold retractors, cut sutures, and help count sponges, needles, supplies, and instruments.

Also known as:

Certified Surgical Technician, Certified Surgical Technologist (CST), Operating Room Surgical Technician (OR St), Operating Room Technician (OR Tech), Operating Room Technologist (OR Tech), Surgical Scrub Technician, Surgical Scrub Technologist (Surgical Scrub Tech), Surgical Technician, Surgical Technologist (Surgical Tech)

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	<p>Students graduate and earn credentials rather than transferring to a four-year university. No transfer options available.</p> <p>The aging of the baby boomer population increases the demand for surgical procedures which should increase the need for surgical technologists. A rise in the number of surgeries among all age groups is expected to support job growth.</p> <p>There is an expected 6% job growth from 2023-2033, which is much faster than average. Job outlook for a surgical technologist is bright.</p>

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	This program was started at the request of CaroMont Regional Medical Center due to the shortage of surgical technologists in their operating room. There were also several letters of support from community hospitals due to the shortage.
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	<p>According to the NC Dept. Of Commerce, the annual growth rate is 1.5% and over 5,000 openings in Charlotte and the surrounding areas.</p> <p>By partnering with CaroMont and other area hospitals, we can meet the needs of the community. Additionally, this collaboration opens innovative marketing opportunities that can help drive enrollment and growth.</p> <p>The Program Advisory Committee (PAC) is driven to empower students by supporting training within the clinical setting that can significantly enhance their employability. Because of the diverse communities of interest within the Program Advisory Committee (PAC), more awareness will be forthcoming about the surgical technology profession.</p>

	Explanation
Uniqueness: What do we do that sets us apart from neighboring institutions? How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?	The Surgical Technology lab is state-of-the-art with new equipment the is fully functional, giving students real world experiences.

SECTION IV: CONNECTION

Curriculum FTEs by Students' Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Surgical Technology (45740)	DNA	DNA	DNA	DNA	12.31

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Surgical Technology	\$96,874.28	12.0	\$60,867.56	(\$36,006.72)	12.3	\$62,603.00	(\$34,271.28)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	The Surgical Technology Program had an FTE count of 12.3 for Fall 2023. Surgical Technology is a viable program for Gaston College. Many area healthcare facilities require employees to obtain associate degrees and hold certifications for employment, making the Surgical Technology Program vital to Gaston and Lincoln County residents.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	The Surgical Technology Program partners with CaroMont Regional Medical Center to offer students apprenticeship opportunities. CaroMont Health will pay for books, tuition, and uniforms for each apprentice, as well as give the student a part time job. The student will be offered a full-time position as a surgical technologist post-graduation.

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	The Surgical Technology Program underwent the initial accreditation site visit on September 23 rd and 24 th , 2024 to obtain their accreditation status. Once results are submitted to CAAHEP, CAAHEP will make a published announcement indicating the status of the program's accreditation. The program must obtain accreditation status in order for students to sit for the national certification exam administered by the National Board of Surgical Technologists and Surgical Assistants. ARC/STSA site visitor's findings were no citation and no areas for improvement.

Curriculum Map – A45740 Surgical Technology

Course	PLO1	PLO2	PLO3	PLO4	PLO5
	Collaborate as a member of the healthcare team.	Demonstrate the application of anatomy and physiology concepts to meet current industry standards in the surgical setting.	Demonstrate aseptic technique and a sound surgical conscience when performing surgical procedures in the health care setting.	Explain universal precautions, principles of sterilization, and its application in the operating room (OR).	Explain and demonstrate client care concepts for the surgical environment.

Program Learning Outcomes - A45740 Surgical Technology

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1	Collaborate as a member of the healthcare team.	Students will complete a final lab practicum in SUR 111: Perioperative Patient Care that involves role play of team members in the perioperative environment.	On average, students completing the assessment will earn at least 80% of the available points to demonstrate their ability to collaborate as a member of the healthcare team.	Fall 2023 Mean: 90% Range: 64%-90% n: 13	The lab practicum is a good measure of the program learning outcome. The students in the lab were divided into two sections allowing the instructor to focus on skills being accurately performed.	It has been determined that more skills need to be added to the assessment method.	Fall 2023 was the first semester.	To contribute to continuous improvement, the assessment will be modified for fall 2024 to include more healthcare team members in the role play and more skills.
2	Demonstrate the application of anatomy and physiology concepts to meet current industry	Students will complete a final exam SUR 122: Surgical Procedures I with 100 questions.	On average, students completing the assessment will earn at least 80% of the	Spring 2024 Mean: 75% Range: 58% - 88% n: 8	The assessment is broad-based testing students' knowledge of anatomy and physiology	Need detailed information on specific concepts to determine what needs to be done for	The assessment was done for the first time in spring 2024.	The textbook will change for spring 2025 with a new edition with added content. The coursework will be in Blackboard Ultra.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
	standards in the surgical setting.		available points to demonstrate the application of anatomy and physiology concepts.		within different surgical specialties.	continuous improvement.		The assessment will be set up with test item analysis to determine frequently missed concepts.
3	Demonstrate aseptic technique and a sound surgical conscience when performing surgical procedures in the health care setting.	Students will complete a final instructor evaluation in SUR 123: Clinical Practice I.	On average, students will earn at least 80% on this assessment.	Spring 2024 Mean: 88% Range: 81%-89% n: 8 Summer 2024 Mean: 88% Range: 80%-94% n: 8	The assessment is a good match for the ELO because the students are performing a live surgical procedure in front of the instructor. The instructor can measure if the students can critically think through the steps of a surgical procedure using sound aseptic technique. Also, faculty	The assessment method will remain the same.	The assessment was done for the first time in spring 2024.	To contribute to continuous improvement, students will receive more feedback from the Clinical Coordinator on a monthly basis which should result in students performing better on the final assessment.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
					can observe if students can correct contaminations or breaks in sterility as they arise.			
4	Explain universal precautions, principles of sterilization, and its application in the operating room (OR).	Students will complete a final exam in SUR 111: Perioperative Patient Care.	On average, students will earn at least 80% on this assessment.	Fall 2023 Mean: 93% Range: 75% - 100% n: 13	The final exam measures students' knowledge of universal precautions, principles of sterilization, and its application in the operating room.	Need to be able to determine areas of weakness. In fall 2023 the test was not done in Blackboard; thus, item analysis was not performed.	Fall 2023 was the first semester.	The final exam will be modified and administered in Blackboard Ultra giving the instructor the ability to perform test item analysis.
5	Explain and demonstrate client care concepts for the surgical environment.	Students will complete a final instructor evaluation in SUR 135: Clinical Practice II.	On average, students will earn at least 80% on this assessment.	Fall 2024 will be the first assessment.	Fall 2024 will be the first assessment.	Fall 2024 will be the first assessment.	Fall 2024 will be the first assessment.	Fall 2024 will be the first assessment.

Program Review – A45780 Veterinary Medical Technology

Academic Year: 2023-2024 (Summer 2023, Fall 2023, Spring 2024)

College Dean: Dr. Lori Metcalf

Program Chair: Melanie Skinner

Program Code(s)/Name(s): Veterinary Medical Technology

List all degrees, diplomas, and certificate or other recognitions offer in the program:

- A45780 Veterinary Medical Technology
- C45780 Veterinary Medical Technology – Foundations of Animal Science
- C45780P Veterinary Medical Technology – Foundations of Animal Science (CCP)

SECTION I: EXECUTIVE SUMMARY

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Strengths:**
 - **Innovative Approach:** The adoption of the Hy-Flex, web-assisted model enables students to have a better work/school/life balance.
 - **Faculty Support:** Faculty are open and available to assist students, demonstrating genuine concern for their success.
 - **Consistency:** Low turnover among full-time and part-time faculty ensures curriculum continuity and reduces stress for students and staff
 - **Versatility:** Faculty can teach any subject, allowing for seamless coverage when needed.
 - **Practical Experience:** Students gain hands-on experience with live animals before Work-based-learning (WBL), often outperforming peers from online programs.
 - **Enhanced Skills:** Splitting WBL into two 160 –hour sections allows students to practice and develop new skills alongside experienced professionals, reinforcing their learning and sometimes leading to employment opportunities.
- **Areas for Improvement:**
 - **VTNE Pass Rate:** The program's Veterinary Technician National Exam (VTNE) 3-year pass rate is lower than desired partly due to the inclusion of data from the COVID-19 period. The program's pass rate is comparable to or higher than other community colleges in the state. The decrease in VTNE national pass rates was noted nation-wide after COVID. To improve student success, an online VTNE Prep class was introduced in the final two semesters, resulting in a 95% pass rate on the VTNE for the class of 2024, with 19 out of 23 graduates having taken it.
 - **Student Engagement:** With the transition to Hy-Flex, maintaining the same level of student engagement as in fully seated classes is a challenge. Faculty are exploring strategies to enhance engagement.
 - **Vet Tech Club Activity:** The Hy-flex model has reduced student interaction, leading to a disconnect. Efforts are underway to increase club activities and foster student unity.
 - **Survey Response Rates:** Graduate and employer survey response rates remain low. Finding a solution is challenging as participation cannot be mandated.

Strengths: What are we doing well?

Areas for Improvement: What can we do to better serve our students?

Needs: What do we need from the institution? Include Personnel and Equipment Request

Actions: What are our next steps? How will we make use of this program review for future improvement?

- **Enrollment and Preparedness:** Increasing enrollment has led to more students directly out of high school, who may be less prepared for the program's rigor, affecting retention and VTNE pass rates.

- **Needs:**

- **Additional Full-Time Faculty DVM:** To support the program's live animal component, an additional full-time DVM is needed. Currently, we have only one DVM, and their absence on days with animals limits our ability to prescribe treatments and medications or perform surgery and anesthesia. Animals entering the program also need to be assessed for illness or injury and prescribed appropriate treatments. This task is challenging for a single veterinarian. Increasing student enrollment will necessitate more animals, further demanding our current veterinarian's time and effort.

- **Actions:**

- Continue to require the VTNE Prep class and monitor student pass rates.
- Continue to evaluate early-level disengagement from students in the Hy-Flex model and reach out to them early and often.
- Research a way to ensure applicants are more prepared for the rigors of the program.

SECTION II: PROGRAM DATA

Program Enrollments

Entry – Program Enrollment

	Explanation/Narrative
Enrollment Analysis: Use the most recent program enrollment data, in the table above, to discuss the implication of the program's	Program enrollment has remained the same for the last 3 years. All pathways have been updated and reviewed.

	Explanation/Narrative
<p>enrollment. For example, is the program enrollment growing or declining.</p> <p>Have Full-Time and Part-Time pathways been updated/reviewed?</p> <p>In comparison to neighboring institutions, how do our program hours compare? What are the differences in major courses?</p> <p>What strategies have been and/or will be implemented to improve enrollment goals? Improve the program for our students? Improve course offerings?</p>	<p>Program hours for Gaston College are 67.</p> <ul style="list-style-type: none"> • AB Tech has 70 hours • Cape Fear CC has 74 • Central Carolina CC has 71 • Nash CC has 71 <p>There are no differences in major courses.</p> <p>The program is working to implement a veterinary assistant certificate for students who complete the first three semesters. This initiative aims to boost completion rates and may attract students interested solely in obtaining the certificate.</p>
<p>Enrollment Analysis:</p> <p>Share the strategies that are utilized to support underserved populations and non-traditional enrollments.</p> <p>(Consider program demographic data compared to college wide demographic data.)</p> <p>New Question: Review program enrollment for A45780 at other institutions in our neighboring counties.</p> <p>Key Question: Why are students in Lincoln and Gaston counties not enrolling in the Veterinary Medical Technology program at GC? Identify strategies for enrollment growth.</p>	<p>Cleveland CC does <u>not</u> offer the VET program.</p> <p>Catawba Valley CC does <u>not</u> offer the VET program.</p> <p>Central Piedmont CC does <u>not</u> offer the VET program. T</p> <p>With the program primarily being offered at Gaston College and servicing students Lincoln, Gaston, and surrounding counties, what marketing efforts have been explored to reach students in and around our service area counties?</p> <p>The college plans to use marketing efforts to ensure the students in our service area understand the value of attending GC.</p>

Demographic Enrollment Analysis by Race/Ethnicity:

<p>Demographic Enrollment Analysis by Race/Ethnicity:</p> <p>Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college’s overall enrollment and the program’s enrollment for 2023-2024 as it pertains to race/ethnicity. For example, explain the race/ethnicity group with the most difference compared to the college <i>race/ethnicity</i> data.</p> <p>Discuss program actions to enroll and retain underserved students or special population students.</p>	<p>Similar to the overall college demographic, the majority of students are white. The most significant demographic difference is among black students. Over the past five years, the program has seen an increase in black students applying to the program.</p> <p>The vet tech program has a much more diverse group of students regarding race, gender identity, and sexual orientation than it has in the past, and it is the program’s desire to build a framework that reflects diversity, equity, inclusion, and belonging.</p> <p>Socioeconomic circumstances and inequalities make underserved students less inclined to pursue college in general, but it seems the veterinary field has a particular lack of diversity when it comes to race/ethnicity. Finding ways to target those students via social media, advertisement and community outreach would be beneficial in enrolling more diverse students. Once enrolled, referring students to resources such as TRIO or The Minority Male Mentoring Organization would give those students support. However, there are no clubs or organizations that target minorities in general, and establishment of such could assist in retention. Carolina Animal Referral and Emergency currently offers a scholarship aimed at supporting “underrepresented populations within the veterinary community”. Promoting</p>

Demographic Enrollment Analysis by Gender:

Demographic Enrollment Analysis by Gender:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to gender. For example, explain the if the **gender** breakout between male and female students is more, less, or the same as the college's overall gender breakout.

Discuss program actions to enroll and retain underserved students or special population students.

The percentage of people who identify as female in the vet tech program is 92% versus Gaston College's 65%. Entrance into the veterinary profession in general has swung towards more female than male. The program has seen an increase in male students graduating in recent years.

The vet tech program has a much more diverse group of students regarding race, gender identity, and sexual orientation than it has in the past, and it is the program's desire to build a framework that reflects diversity, equity, inclusion, and belonging.

Finding ways to target those students via social media, advertisement and community outreach would be beneficial in enrolling more diverse students. Once enrolled, referring students to resources such as TRIO or The Minority Male Mentoring Organization would give those students support. Promoting Apprenticeship 321 to more veterinary hospitals may also help.

Demographic Enrollment Analysis by Age:

College Wide – Demographics 2023-2024

Program – Demographics 2023-2024

Demographic Enrollment Analysis by Age:

Use the most recent program demographic enrollment data, in the graphics above, to discuss similarities and/or differences between the college's overall enrollment and the program's enrollment for **2023-2024** as it pertains to age. For example, explain if the

The age breakdown of students enrolled in the vet tech program is nearly identical to that of students enrolled in Gaston College.

There are no actions the program needs to take.

age breakout between the different groups is more, less, or the same as the college's overall age breakout.

Discuss program actions to enroll and retain underrepresented students or special population students.

Program Course Information (Fall 2023 and Spring 2024)

Progress: Course and Grade Distributions Analysis

	Explanation
<p><u>Course Sequence/Success:</u></p> <p>Are courses (including general education and elective courses) selected and sequenced in a way that makes sense? (Math and English requirements in the first semester/year)</p> <p>How do Course Success Rates compare to the College success rate?</p> <p>Are the courses that are being offered for the program meeting enrollment needs? Share/Identify courses that have low enrollment.</p>	<p>All courses (including general education and elective courses) are selected and sequenced in a way that makes sense.</p> <p>The program has a much higher success rate than the college, however, the program requires a passing grade of 80% or above for successful completion whereas the general education programs require a passing grade of 70% or above. Comparing our success rate using 70% or above does not utilize the data correctly if looking at retention in our program.</p> <p>Students are enrolled in cohorts. Classes in which students are least successful tend to be those in the first two semesters. This is often due to withdrawals of younger students who change their minds, students with life challenges, and students who are not prepared for the rigor of a medical program.</p>
<p><u>Curriculum/Course Materials</u></p> <p>Have the program's core course requirements or total credit hours been reviewed or revised within the last two years?</p> <p>Are significant curriculum revisions anticipated in the next two years?</p> <p>Does the program offer clinical, WBL, or Apprenticeship opportunities?</p> <p>If the program offers Career and College Pathways (CCP) at one or more service area high schools, how does faculty ensure instruction in CCP Pathways is of equal quality and rigor as the college campus program?</p>	<p>The program's core course requirements and total credit hours have been reviewed or revised within the last two years.</p> <p>The addition of a Veterinary Assistant Certificate will utilize the courses already offered in the order they are offered.</p> <p>The program has two WBL classes; one each summer.</p> <p>The program is teaching out the CCP pathway. However, students currently in the pathway get the same courses as the students accepted into the program, oftentimes the CCP students are enrolled in a class with the students accepted into the program.</p>

	Explanation
<p>Modality: How does the program ensure they are choosing the best delivery methods? Consider course success rates by modality.</p> <p>Include Quality Matters and online training information here</p>	<p>Currently, the only data available is that of the traditional seated modality. The program is monitoring student involvement in the online aspects of the vet tech program.</p> <p>One vet tech faculty member is Quality Matters Certified. All full-time faculty are Blackboard Accessibility Certified.</p>
<p>Student Achievement: What strategies have been and/or will be implemented to impact the low enrollment, low success rate, high withdrawal rate courses within the program?</p>	<p>Courses with Low Enrollment</p> <ul style="list-style-type: none"> Students are enrolled in cohorts and progress through the program in cohorts. <p>Courses with Low Success Rates</p> <ul style="list-style-type: none"> There are four courses with lower success rates: <ul style="list-style-type: none"> VET 123: Parasitology VET 121: Medical Terminology VET 120: Anatomy and Physiology VET 215: Pharmacology VET 120, 121, and 123 are first-semester courses where students often face challenges meeting the rigor of the program. Faculty provide tutoring and refer students to appropriate resources as needed. <p>Courses with High Withdrawal Rates</p> <ul style="list-style-type: none"> Courses with high withdrawal rates tend to be the same as those with low success rates.
<p>Evaluation: Upon reviewing course evaluations share some of the common positive and negative statements students have indicated.</p> <p>Explain how the student feedback is being used to improve the course(s).</p>	<p>Positive statements focused on faculty and their commitment to student learning.</p> <p>Negative feedback focused on perceived lack of consistency when faculty evaluate student skills.</p> <p>Faculty adhere to established protocols when students perform skills, but during clinical labs, variations in faculty styles and perceptions may occur. Faculty must teach and evaluate students while ensuring the safety and well-being of both students and patients. Given the uniqueness of each situation, achieving uniformity in evaluations is challenging. Faculty continually seek methods to make lab instructor evaluations more equitable, though individual instructor perspectives and student personalities inevitably influence the process.</p>

Program Retention Data

Veterinary Medical Technology (A45780)	A45780	89%	63%
Veterinary Medical Technology-Foundations of Animal Science (C45780)	C45780	DNA	DNA
C45780P Veterinary Medical Technology – Foundations of Animal Science (CCP)	C45780P	DNA	DNA

Program Progress: Retention and Progression

	Explanation
SLOs and Curriculum Map: Attach curriculum map and analysis of program learning outcomes.	See the attached curriculum map and program learning outcomes.
Retention and Progression: Discuss the program retention and identify any barriers to student progress. Consider course success/withdrawal data.	Retention rates are lowest during the fall and spring semesters, primarily due to the challenges faced by first-year students. Consequently, the retention rate from fall to spring (63%) is lower than from fall to fall (89%). Students who successfully complete the first two semesters are more likely to finish the program. The Fall 2022 cohort began with 43 students, including 2 returning students, and graduated 22 students, resulting in a 51% retention rate. The Fall 2023 cohort started with 36 students, including 1 returning student, and currently has 23 students, reflecting a 63.89% retention rate.

Credential Earned – Academic Year 2023-2024

Completion/Credentials Earned

	Explanation
<p>Graduation:</p> <p>Using the data in the above tables, discuss the student completion data and any identified trends.</p> <p>Identify any known barriers to timely student completion and how they can be addressed.</p> <p>What strategies have been and/or will be implemented to improve time to degree completion? Improve success for being career ready for employment upon graduating with degree?</p>	<p>The completion rate for the vet tech program has remained consistent. The 2023 – 2024 data reflects students who began in Fall 2021 during the pandemic. With 30 students enrolled in the graduating class of 2023 and an expected attrition rate of 40 – 50%, 17 students graduating is within the expected completion rate.</p> <p>The data for C45780 (Foundations of Animal Science) does not seem correct since we certainly did not have that many students from East Gaston. I cannot speak on that data.</p> <p>The primary obstacle to timely student completion is achieving a course grade of 80% or higher. As noted, many incoming students are often unprepared for the program's rigor.</p> <p>According to a study published in <i>Frontiers in Veterinary Science</i> on May 8, 2024, the following factors contribute to lower retention rates in veterinary technology programs:</p> <ul style="list-style-type: none"> • Mental health issues • A lower number of students able to pass their classes • Challenges in balancing work, academic, and personal life <p>Frontiers Trends in enrollment, retention, and graduation of United States veterinary technicians/nurses schools</p> <p>Students coming out of high school with no college experience are not prepared for the rigor of the program and do not have sufficient study skills. The program is looking into the advisability of adding pre-requisite class(es) to help prepare students who want to apply.</p>

	Explanation
	<p>The program is also in the process of preparing a veterinary assistant certificate curriculum, with the hope this will aid in increasing completion rates.</p> <p>The research paper mentioned above highlighted the implementation of a coaching program, in addition to an academic tutoring program. Such a program could be beneficial for all students at Gaston College.</p>

Employment Data: Veterinary Assistants and Laboratory Animal Caretakers

Job Outlook

About this section ?

Employment of veterinary assistants and laboratory animal caretakers is projected to grow 19 percent from 2023 to 2033, much faster than the average for all occupations.

About 25,800 openings for veterinary assistants and laboratory animal caretakers are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

Increases in consumers' pet-related spending are expected to drive employment in the veterinary services industry, which employs most veterinary assistants and laboratory animal caretakers. In clinics and other veterinary service establishments, assistants help [veterinarians](#) and [veterinary technicians and technologists](#) with various procedures. Demand for veterinary assistants will be strong as the demand for these procedures increases.

Also, laboratory animals will continue to be needed as part of the scientific research process to help ensure the safety and efficacy of new medical, surgical, and pharmacological techniques. This is expected to create demand for laboratory animal caretakers.

Veterinary Assistants and Laboratory Animal Caretakers

Description: what do they do?

Feed, water, and examine pets and other nonfarm animals for signs of illness, disease, or injury in laboratories and animal hospitals and clinics. Clean and disinfect cages and work areas, and sterilize laboratory and surgical equipment. May provide routine postoperative care, administer medication orally or topically, or prepare samples for laboratory examination under the supervision of veterinary or laboratory animal technologists or technicians, veterinarians, or scientists.

Also known as:

Animal Care Provider, Animal Caregiver, Avian Keeper, Certified Veterinary Assistant, Emergency Veterinary Assistant, Inpatient Technician Assistant, Kennel Vet Assistant (Kennel Veterinary Assistant), Research Animal Attendant, Small Animal Caretaker, Veterinarian Assistant (Vet Assistant)

Job Outlook

About this section 

Employment of veterinary technologists and technicians is projected to grow 19 percent from 2023 to 2033, much faster than the average for all occupations.

About 15,400 openings for veterinary technologists and technicians are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Employment

As the number of households with pets and spending on pets continue to rise, strong demand is expected for veterinary technologists and technicians. Increased treatment options also will contribute to rising demand for these workers over the projections decade.

Veterinary Technologists and Technicians

Description: what do they do?

Perform medical tests in a laboratory environment for use in the treatment and diagnosis of diseases in animals. Prepare vaccines and serums for prevention of diseases. Prepare tissue samples, take blood samples, and execute laboratory tests, such as urinalysis and blood counts. Clean and sterilize instruments and materials and maintain equipment and machines. May assist a veterinarian during surgery.

Also known as:

Certified Veterinary Technician (CVT), Emergency Veterinary Technician (Emergency Vet Tech), Internal Medicine Veterinary Technician (Internal Medicine Vet Tech), Licensed Veterinary Technician (LVT), Registered Veterinary Technician (RVT), Veterinarian Technician (Vet Tech), Veterinary Laboratory Technician (Vet Lab Tech), Veterinary Nurse (Vet Nurse), Veterinary Technician (Vet Tech), Veterinary Technologist

Transition/Employment Outcomes

	Explanation
Job Placement/Transfer: Share the graduation outcome data regarding job placement or transfer. (Consider JobsEQ data, GradCast data, Performance Measures, and UNC Transfer data)	In 2023 - 2024, the Veterinary Technology Program graduated 24 students. Compared to the job demands and availability for Gaston and Lincoln Counties (15 and 9, respectively), the program is meeting the demand. However, most practices seeking technicians are in the Charlotte area, where the demand far exceeds the program's current graduating class size.

SECTION III: CONNECTION

	Explanation
How valuable is this program to the community? (Review JobsEq data, consider the NC Commerce Labor Market Data Tools & Reports, https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools#EmploymentProjections-405 https://www.commerce.nc.gov/data-tools-reports/labor-market-data-tools/employment-projections#IndustryProjections-272)	The demand for educated licensed technicians is growing. According to data from the Department of Labor, the job market for credentialed technicians is projected to grow by 24% by 2030. This program is valuable to the counties Gaston College serves and neighboring counties. According to the 2023 – 2025 Occupational Projections for NC, there are an average of 357 annual openings for veterinary technicians and 1,087 openings for veterinary assistants. Implementing a veterinary assistant certificate would be a valuable asset to the veterinary community.
Community: How does this program lead to employment opportunities in the local community or prosperity zone? How have we benefitted from community partnerships and what other opportunities exist for collaboration? What is the advisory committee feedback?	The program does not have an official way to keep up with these numbers. However, word-of-mouth shows that graduates of the Vet Tech Program have an employment rate of approximately 98% in the field of their major immediately after graduation. The program partners with Gaston County Animal Care and Enforcement to assist in socialization, treatment, diagnostics, and spaying and neutering of dogs and cats brought into the shelter. This partnership helps provide space in the shelter, de-stresses the animals and decreases the number of unwanted pets in Gaston County, while allowing students to get a quality education. Students seek WBL employment in a variety of veterinary facilities across the state. Many of these facilities end up hiring the student and ask for more WBL students. The NCAVT rotates hosting continuing education seminars for veterinary technicians among the veterinary technology programs in the state. Technicians and other veterinary professionals from around the state attend lectures at Gaston College when it is the program's turn to host.

	Explanation
	Advisory committee members state that the local employers are happy with Gaston College graduates and would like to see more graduates enter the workforce.
Uniqueness: What do we do that sets us apart from neighboring institutions? How effective are the departments promotional and outreach efforts in highlighting this unique vision and attracting students?	The veterinary technology program started a “Hy-flex/Web-assisted” modality. <ul style="list-style-type: none"> All lectures will be available in 3 different formats. Students may choose which modality works best for that day. <ul style="list-style-type: none"> They can attend the lesson seated They can attend the lesson simultaneously via Zoom They can watch the recording of the lecture and submit notes All labs will be seated or mostly seated This will allow students who need to work more flexibility to better suit their needs while providing each student with the same class material and lecture. Gaston College’s marketing team has been good at marketing the program through social media, but outreach to adjacent counties would be beneficial.

SECTION IV: CONNECTION

Curriculum FTEs by Students’ Primary Major

FTE	19-20	20-21	21-22	22-23	23-24
Veterinary Medical Technology (A45780)	95.13	93.56	90.72	86.41	101.97

Program Financial Viability

Program	Total Costs	FTEs by Major Prefixes	FTE Values by major Prefixes	Revenue - Cost by major Prefixes	FTEs by Program of Study (NCCCS data)	FTEs Values Program of Study	Revenue - Cost by Program of Study
Vet Tech	\$517,793.92	88.1	\$396,170.29	(\$121,623.63)	102	\$458,871.48	(\$58,922.44)

Program Financial Viability

	Explanation
How financially viable is the program? (Consider FTE data and program financial viability data)	The program has two summer semesters which are not calculated in the FTE’s. However, with the remodeling of the program, the lab-heavy classes that were in the summer have been moved to the spring. This should increase FTE’s.

SECTION V: Partnerships/Community Outreach

	Explanation
What partnerships and/or community outreach activities are related to the program?	<p>The program partners with Gaston County Animal Care and Enforcement to assist in socialization, treatment, diagnostics, and spaying and neutering of dogs and cats brought into the shelter. This partnership helps provide space in the shelter, de-stresses the animals and decreases the number of unwanted pets in Gaston County, while allowing students to get a quality education.</p> <p>The program hosts a job/externship fair every February for prospective hospitals to meet students seeking WBL externship sites. In Spring of 2024, 27 veterinary facilities attended. Students seek WBL employment in a variety of veterinary facilities across the state. Many of these facilities end up hiring the student and ask for more WBL students.</p> <p>The NCAVT rotates hosting continuing education seminars for veterinary technicians among the veterinary technology programs in the state. Technicians and other veterinary professionals from around the state attend lectures at Gaston College when it is the program's turn to host.</p> <p>Wake Forest University supplies mice for student learning and one of the RVT's that works in the research lab comes to speak with the students about the handling and housing of research mice.</p> <p>Charlotte-Mecklenburg Animal Care and Control is allowing vet tech students the opportunity to sign up as volunteers during spay/neuter days. This initiative provides the students with valuable hands-on-experience while also supporting the shelter by increasing the number of trained volunteers.</p>

SECTION VI: ADDITIONAL INFORMATION

	Comments
Please include any additional data and/or information related to program-level accreditation.	The Veterinary Medical Technology Program at Gaston College is accredited by the AVMA and is due for reaccreditation in 2026 –2027.

Program Learning Outcomes - A45780 Veterinary Medical Technology

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1.	Prepare animals and equipment for examination and surgery.	Students will demonstrate competency in essential skills relating to surgical prepping of patient and setting up a surgical suite.	At least 80% of students will successfully complete the essential skills related to surgical prep of patient and setting up a surgical suite before the completion of VET 213.	Spring 2024: 100% of completers successfully demonstrated competency in this PLO. Of the 23 students that completed the program in Spring 2024, 19 students completed the skills in VET 213 in Fall 2023 and 4 completed the skills in VET 214, Spring 2024 (82.6%).	Students have opportunities to practice skills with guidance from faculty and to complete unfinished skills in other classes.	More time for students outside of lab hours would assist students in completing skills in a timelier manner although the number of students that successfully completed the skills in VET 213 was above the 80% success rate, it is close, and with the application of the Hy-Flex model, the program the program will need to monitor this data.	AVMA requires completion of these skills for graduation so no student can complete the program without completing these skills. Previous data asked if 90% of students successfully completed the skills before graduation, and the answer was always 100%. We modified the question to help determine how many students completed the skills related to this PLO during the course in which the PLO	With the switch to a Hy-Flex modality, the program is collecting data on how the opportunity to complete skills may be affected by the decrease in in-person lab hours.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
							was introduced and developed.	
2.	Safely prepare and administer medications in a veterinary setting.	Students will demonstrate competency in essential skills relating to administering oral, topical, subcutaneous, intramuscular, and intravenous medications.	At least 80% of students will successfully complete the essential skills related to oral and topical medications at the completion of VET 133 and completion of subcutaneous, intramuscular, and intravenous medications by VET 213.	Summer 2023 and Fall 2023: 100% of completers successfully demonstrated competency. Out of 52 students in VET 133, 96% of students completed the skills related to that class in that class. 32 students had 6 skills each to complete for VET 213 related to this PLO. Of these 192 skills, 3 skills were not completed in VET 213.	Students have opportunities to practice skills with guidance from faculty and the opportunity to complete unfinished skills in other classes.	Students tend to complete skills in the courses to which the skills are assigned; however, it is close, and with the implementation of the Hy-Flex model, the program will need to monitor this carefully.	AVMA requires completion of these skills for graduation so no student can complete the program without completing these skills. Previous data asked if 90% of students successfully completed the skills before graduation, and the answer was always 100%. We modified the question to help determine how many students completed the skills related to this PLO during the course in which the PLO was introduced and developed.	With the switch to a Hy-Flex modality, the program is collecting data on how the opportunity to complete skills may be affected by the decrease in in-person lab hours.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
3.	Correctly collect specimens for laboratory analysis.	Students will correctly collect urine and blood for laboratory analysis.	At least 80% of students will successfully complete the essential skills related to urine and blood collection by the completion of VET 212.	Fall 2023: 100% of completers successfully demonstrated competency in this skill. 28 students had 9 skills each to complete related to this PLO. Of these 252 skills, 4 skills (all blood collection skills) were completed in the following semester in WBL.	Students have opportunities to practice skills with guidance from faculty starting in VET 211, during the spring semester.	More opportunities to collect blood.	AVMA requires completion of these skills for graduation so no student can complete the program without completing these skills. Previous data asked if 90% of students successfully completed the skills before graduation, and the answer was always 100%. We modified the question to help determine how many students completed the skills related to this PLO during the course in which the PLO was introduced and developed.	With the switch to the Hy-Flex modality, the program will begin teaching this skill in VET 131 during the spring semester. The students will then have their WBL course in the summer to continue to practice. The program will monitor the success of this action during the next evaluation of PLO's.
4.	Safely perform laboratory,	Students will safely	At least 80% of students will	Spring 2024: 100% of completers	Students have opportunities to practice	The program exceeded the benchmark for	The program exceeded the benchmark for	Monitor the ability of students to complete these

Students have the opportunity to complete the skills related to surgical	The program exceeded the benchmark for this PLO. Will continue to monitor the skills related to this PLO to identify any that may need to be started earlier.	The program exceeded the benchmark for this PLO. Will continue to monitor the skills related to this PLO to identify any that may need to be started earlier.	Monitor the ability of students to complete these skills with less in-person lab time. Determine if some of the skills related to dentistry can be introduced in other classes more effectively.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
				end of the course.	assisting in VET 213.			
6.	Provide proper husbandry of animals and their environment.	Students will be able to adequately explain the proper care of animals and the environment in which they must be housed.	At least 80% of students will receive an 80% or above exam average in VET 110, (Animal Breeds and Husbandry).	Fall 2023: 90% (28/31) students received an 80% or above exam average.	Students have many resources for studying.	The program exceeded the benchmark for this PLO.	The program exceeded the benchmark for this PLO.	With the switch to the Hy-Flex modality, the program will monitor the ability of students to continue to meet or exceed the benchmark.
7.	Demonstrate an understanding of common veterinary diseases and diagnostic procedures.	Students will adequately explain common veterinary diseases and diagnostic procedures.	At least 80% of students will receive an 80% or above exam average in VET 126. (Veterinary Diseases 2).	Fall 2023: 66% (19/29) students received an 80% or above exam average. While 66% of students scored below the 80% average, 4 other students received an average of 81 – 82%.	Students have many resources for studying and tutoring.	The percentage of students with a minimum exam average of 80% is well below the benchmark.	Faculty are already discussing what material is foundationally important and what is not. The faculty will also work to make VET 211 coincide more with VET 126 since the courses cover the same topics, but from a different perspective.	The program will evaluate the material students are tested on and determine if focusing on more foundational information and reiterating that information in other classes will increase the percentage.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
8.	Demonstrate knowledge of veterinary regulatory issues and veterinary office procedures.	Students will demonstrate adequate knowledge of veterinary regulatory issues and veterinary procedures.	Students will achieve a minimum of an 80% average in VET 137, (Veterinary Office Practices) lecture.	Spring 2024: 100% (24/24) students received an 80% or above exam average.	This class is set up in such a way that students are graded more for their participation in discussion boards etc than by exams. The goal of this class is to make students think about interpersonal communication and client education.	The percentage of students with a minimum class average of 80% is well above the benchmark.	The program exceeded the benchmark for this PLO.	The program will continue to evaluate student success in this course and to modify as needed.

Program Learning Outcomes – Career and Technical Education and Public Safety Programs

During the 2023-2024 assessment cycle the following programs in Career and Technical Education and Public Safety were only required to submit program learning outcomes assessments.

- A25800 Accounting and Finance
- D35100 AC, Heating, and Refrigeration Technology
- A40130 Applied Engineering Technology
- A30120 Audio and Video Production
- A60160 Automotive Systems Technology
- A25120 Business Administration
- A40140 Civil Engineering Technology
- A50210 Computer Integrated Machining
- A55180 Criminal Justice Technology
- A35130 Electrical Systems Technology
- A40200 Electronics Engineering Technology
- D30200 Gunsmithing
- A25590 Information Technology
- A40320 Mechanical Engineering Technology
- A25310 Medical Office Administration
- A25370 Office Administration
- A25380 Paralegal Technology
- A30170 Sports Media Technology
- A25620 Supply Chain Management
- A50500 Textile Technology
- D50420 Welding Technology
- A55240 Fire Protection Technology
- A55480 Public Safety Administration

Program Learning Outcomes - A25800 Accounting and Finance

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1	Demonstrate the ability to use General Journal to record business transactions	ACC 120 (Prin of Financial Acct) Problem 2-2A This problem involves students preparing journal entries, posting them to the ledger, and preparing an unadjusted trial balance.	On average, students will earn at least 85% or higher on this artifact.	Spring 2017 82% Fall 2017 92% Fall 2018 91% Fall 2019 94% Fall 2020 90% Fall 2021 Mean of completers: 93% Range: 3-100 N: 130 Fall 2022 Mean of completers: 93% Range: 3-100 N: 105 Fall 2023 Mean of completers: 89% Range: 1-100 N: 122	The measurement tool effectively measures students' ability to correctly analyze and record business transactions and economic events, leading to the proper reporting of financial information.	Student performance was down from 93% in 2022 to 89% in 2023. We will need more time to see if this is a trend or simply a lower number that reverts to the mean in future cycles.	The tool was revised to align with a new textbook edition in 2023. This could explain the moderate drop in performance, but we will again need to see more data to be sure.	Instructors will reduce the number of "check my work" attempts to encourage more engagement with learning resources rather than allowing students unlimited tries. This should yield a more accurate measure of student understanding rather than allowing them to guess until it is correct. Instructors also plan to add more tutorial videos to help students.
2	Demonstrate the ability to adjust the accounts and prepare a trial balance at the	ACC 220 (Intermediate Accounting I) Chapter 3,	On average, students will earn at least 80% or	Fall 2017 85% Fall 2018 80% Fall 2019 91% Fall 2020 83% Fall 2021 Mean of	Results show the students can recognize accounts that need to be adjusted and	No major issues are detected. Student performance remains well above	Instructors have been taking steps in class to encourage more student engagement with	Instructors will reduce the number of "check my work" attempts to encourage more engagement with

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
	end of the period.	problem 3-6 This problem involves students preparing general journal entries, posting them to the ledger, preparing a trial balance, preparing and posting adjusting entries, preparing the financial statements, and preparing the closing journal entries.	higher on this artifact.	Completers: 96% Range: 68-100 n: 11 Fall 2022 Mean of completers: 88% Range: 33-100 N: 21 Fall 2023 Mean of completers: 89% Range: 29-100 N: 16	can update the accounts by preparing an adjusted trial balance at the end of the reporting period.	benchmark and ticked slightly above results from 2022.	study resources prior to completing the assessment as well as adding more content specifically addressing adjusting entries and adjusted trial balance. Results show a modest increase in performance so far, but more data will be necessary to see the full impact.	learning resources rather than allowing students unlimited tries. This should yield a more accurate measure of student understanding rather than allowing them to guess until it is correct.

	operation, removal and repair of electrical components. This includes troubleshooting, testing, and replacing, parts using appropriate service information	an electrical motor in AHR 111. This replacement requires 11 steps.	a single attempt.	Average 9.5 n = 15	troubleshooting and replacement methods for motors associated with HVAC equipment.	underperformed		students performed well.

Program Learning Outcomes - A40130 Applied Engineering Technology

PLO #	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1	Apply basic industrial safety concepts	ISC 112 – Eligible for 10-hour OSHA card (5 pt) and acceptable final exam score (3-7 pt) max of 12	On average students should score 9 or above	Fall 2023 n = 19 Mean = 9.42 Range 8 – 12 Spring 2024 n = 13 Mean = 10.15 Range 8 –11 Only high school students	Integration of the OSHA 10-hour card so students can earn an outside industry recognized credential in the course	Change to an 8-week session but need to stress importance of completing online assignments	There was a smaller class size in fall which meant lower scores had a greater impact on class average, but it was still acceptable. The spring class with the high school, our mean was higher with changing the order of the classes being taught.	Switch class to an 8-week session but make sure that they meet for 8 classes which may mean changing days to not be on a possible holiday. We should improve class attendance.
2	Summarize concepts of mechanical systems, gearing, and basic maintenance practices.	MNT 110 – final exam score	Students should score 70 or better	Spring 2024 N = 3 Mean = 86 Range 80 - 94	Some hands on and students are learning the basics	Low enrollment and better clarity on what will be covered in class/ next semester will be first MEC 130	Some improvement in scores but with course change, this metric will be revised	Switching course to MEC 130 to have greater clarity on content and increase enrollment, now required for all in major
3	Apply written, oral, and graphical communication in well-defined	MEC 161 - Technical report which includes diagrams	Rubric score from 1 – 4 (zero if not submitted)	Spring 2024 N = 15 Mean = 3.47 Range 2 - 4	All online course which is building those communication skills	Importance of research paper and rubric still needs work.	Significant improvement with revised rubric but still had questions from students	Switched some summaries to quizzes and need to implement more quizzes that cover

PLO #	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
	technical and non-technical manufacturing technology environments ; and identify and use appropriate technical literature.		Class average should 2.5 or greater					the whole video content and articles
4	Explain the basic use of sensors, actuators, valves and other components needed in automation systems including fluid flow as well as basic robotics.	ATR 211 mastery shown through their midterm/ final videos	Score 15 out of 20 points on the videos	Fall 2023 N = 5 Mean = 20 Group videos this semester 20 Spring 2024 N = 3 Mean = 19 Range 18-20	Students are given a lot of hands-on time to apply all these principles with the various robots and sensors	Increase time spent on integration of systems & increase number in class. It is hard to do the integration of systems with low numbers. Need to include more on schematics.	Improvement hard to show with using group videos due to smaller class sizes	Adding ATR 211 course as a required course for the major which will increase the enrollment – must be watchful regarding class size from safety aspect. May require some students to do lecture work while others are programming. Add schematics to train on this usage. Class size is still small since the current students are not required to take ATR 211.

Program Learning Outcomes - A30120 Audio and Video Production Technology

PLO #	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1	Apply proper operation and care for broadcast equipment including: -Audio console -Microphones -Digital Audio Editing -Studio and ENG video cameras/camcorders -Digital Video	BPT 131 (Audio/Radio Production I) Portfolio, Lab #7 This is a lab where students get to record and edit their own project. This project demonstrates various audio skills. BPT 231 (Video/TV Production I) Lab #8 Gaston College Tour This program is filmed and edited by the student and is a 3:00 tour of the college. This demonstrates basic knowledge of filming and editing.	On average, students will earn at least 80% on this artifact.	BPT 131 Fall 2018 96% Spring 2019 96% Fall 2020 99.4% Fall 2021 80% Fall 2022 Mean of Completers: 75% Range: 0-100 n: 16 Spring 2024 Mean of Completers: 75% Range: 0-95 n: 14 BPT 231 Fall 2020: 95% Fall 2021: 82% Fall 2022 Mean of Completers:	What is working well and why? Students seem to be grasping the concepts of production much better than in the past. We attribute this to the addition of BPT 140, which stresses fundamentals prior to this course.	What isn't working and why? We are continuing to stress organization and details with the students.	What changes were implemented since the previous cycle? How do these changes explain the improvement or decline (as compared to the previous cycle) that you see in the current assessment results? BPT 140 production class was added as a pre-requisite and gave them additional production skills prior to this course.	What should be done in response to these results? Clearly explain why this change (or lack of change) is justified and how it will contribute to continuous improvement. None

Program Learning Outcomes - A25120 Business Administration

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1 A25120BU A25120HR	Recognize and explain the influence of supply and demand theories in various business situations.	ECO 251 (Principles of Microeconomics) Supply and Demand Module Exam This is an objective measurement tool that assesses understanding of supply and demand in various business situations.	On average, students will earn at least 80% on this artifact.	Fall 2016 81% Fall 2017 83% Fall 2018 85% Fall 2019 90% Fall 2020 87% Fall 2021 85% Fall 2022 Mean of Completers: 88% Range: 13-100 n: 300 Fall 2023 Mean of Completers: 87% Range: 39-100 n:332	Students are demonstrating competency in learning supply and demand concepts, how they are used to allocate resources in a market economy and understanding how changes relate to changes in the broader market. Performance is significantly higher than the benchmark.	Results have consistently been above benchmark for several years. Faculty feel it's time for a different outcome and measurement tool.	The outcome was changed to "Demonstrate knowledge of economic concepts and trends and their impact on human societies." The measurement tool was changed to the Final Exam. An item analysis will be performed to identify strengths and weaknesses. We have not yet seen a measurement	Monitor data as it comes in, starting with Fall 2024. The new measurement tool should give a much broader and more useful view of student learning.

							cycle using the new outcome/tool.	
2 A25120BU A25120HR	Analyze promotional strategies for various companies and products	MKT 120 (Principles of Marketing) Chapter 16 Exam This is an objective measurement tool that tests students' analysis of promotional strategies.	On average, students will earn at least 80% on this artifact.	Summer 2017 92% Spring 2018 94% Spring 2019 89% Spring 2020 91% Spring 2021 90% Spring 2022 91.5% Spring 2023 Mean of Completers: 90% Range: 80-100 n: 40 Spring 2024 Mean of Completers: 83% Range: 10-100 n: 23	Students are performing very well, demonstrating that they can analyze promotional strategies for various companies and products.	Student performance was down from 90% in 2023 to 83% in 2024. The n was also down from 40 to 23.	No change was implemented in the previous cycle. The exam was modified two cycles ago, so we are monitoring results as they come in.	Keep an eye on results over the next few cycles to see if performance rises to normal levels. 2024 could be an anomalous year, but if the downward trend continues, we will need to look deeper into what is happening.
3 A25120BU A25120HR	Identify offer, acceptance, and mutual	BUS 115 (Business Law I) Chapter 10 Exam	On average, students will earn at	Fall 2016 79% Fall 2017 84% Fall 2018 88% Fall 2019 88%	Students are demonstrating success at identifying	No areas for improvement identified at this time. Students	No changes were made last year since the quiz was	It's almost time for the course to be rebuilt, at which point we will assess

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
	assent as they relate to contracts	This is an objective measurement tool that tests students' understanding of the following contract principles: offer, acceptance, mutual assent.	least 80% on this artifact.	Fall 2020 92% Fall 2021 93% Range: 0-100 n: 100 Fall 2022 Mean of Completers: 91% Range: 10-100 n:118 Fall 2023 Mean of Completers: 90% Range: 47-100 n:132	these key elements of a contract. Performance is down slightly from last year but still above benchmark and within the normal range.	are performing far above benchmark.	revised the previous year. Results so far indicate students are doing well. More data cycles should reveal the long-term impact of the changes.	whether the outcome and tool should be changed
4 A25120HR	Apply the Fair Labor Standards Act to various personnel situations	BUS 217 (Employment Law and Regs) Chapter 16 Exam This is an objective measurement tool that tests whether students can apply the Fair Labor Standards Act	On average, students will earn at least 80% on this artifact.	Fall 2016 70% Fall 2017 76% Fall 2018 79% Fall 2019 79% Fall 2020 74% Fall 2021 Mean of Completers: 83% Range: 30-100 n: 38 Fall 2022 Mean of Completers: 81%	2021 was the first year in the last several that performance met the benchmark. 2023 built on that momentum as student performance rose another 1%, demonstrating that students	No major concerns at the moment. There was a significant performance drop in 2020, but subsequent results have shown it to be an outlier.	No changes made last cycle. The exam was revised in 2021 to clarify some questions that were easy for students to misinterpret. The changes had a significant impact on student performance.	The course is being rebuilt in Summer/Fall 2024 with content updates and revised quizzes and assignments. The quiz will remain on the same subject matter, but the questions will be different, so we anticipate some change in performance results.

Program Learning Outcomes - A35130 Electronics Systems Technology

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1	Demonstrate knowledge of the National Electrical Code in the installation of electrical circuits for residential, commercial and industrial applications	Students will properly install the wiring and devices for 3 receptacles in accordance with NEC standards.	Students will achieve a score of 4 out of 5 parts of the process.	Spring 2024 ELC-113-D01 Range of scores 3 to 5 Average of 4.5 n = 17	Vast majority of students achieve goal with 1 or 2 practice events, builds experience working with hands	More hands-on, possibly seeking habitat for humanity house to wire to achieve more practical experience.	No changes made	Success is good, no actions required.
2	Demonstrate knowledge and competencies of electric machines, electrical controls, and PLC and the ability to troubleshoot and solve electrical problems	Program PLC simulation software to control traffic lights to avoid crashes.	Students must achieve a score of 18 of 24.	Spring 2024 ELC-128-D01 Range of scores 18 to 24 Average 22.3 n = 14	Most students catch on very quickly to PLC programming after taking ELC-112 first	Possibly require ELC-112 as local prerequisite.	No changes made	No actions really needed, students did well.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
3	Demonstrate the ability to interact with others and demonstrate a professional work attitude, including an understanding of social and ethical responsibilities, timeliness, and appearance.	Students must work as a team to wire a combination circuit on LAB VOLT equipment	Team must achieve 8 of 10.	FALL 2023 ELC-112-D01 Range :9 to 10 Average 9.3 Number of teams 19	Builds team interaction and problem solving.	Increase team size to foster more interactions.	No changes made	Success is good, no action required.

Program Learning Outcomes - A40200 Electronics Engineering Technology

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1	Graduates will demonstrate an ability to apply the knowledge, techniques, skills, and modern tools of mathematics, science, engineering, and technology to solve well-defined engineering problems appropriate to Electronics Engineering Technology	Advanced Circuit Analysis (ELC 133) Rubric. This rubric consists of four Performance Indicators (PI) rated from 1 to 4, for a maximum possible score of 16.	On average, students will earn at least 12 out of 16 on this artifact.	Summer 2024 Mean:12.5 of 16 Range: 9.5 – 15.0 n: 3	PI4- Analysis of RLC circuit (4 of 4)	PI2 – Analysis of parallel RL Circuit (2.4 of 4)	Performance improved slightly.	Not applicable, the program has been terminated.
2	Graduates will demonstrate an ability to design solutions for well-defined technical problems and	Microprocessors (ELN 232) Rubric. This rubric consists of four Performance Indicators (PI) rated from 1 to	On average, students will earn at least 12 out of 16 on this artifact.	Spring 2024 The course was not offered. It will be offered once more in Spring 2025.	Not available.	Not available.	Not available.	Not applicable, program has been terminated.

				Results	Strengths	Areas for Improvement		
	standard tests, measurements, and experiments and to analyze and interpret the results.	Analysis I. This rubric consists of four Performance Indicators (PI) rated from 1 to 4, for a maximum possible score of 16.	of 16 on this artifact.	n: 7	predicted values in an experiment (4.0 of 4).	resistance in a circuit (3.4 of 4).		
5	Graduates will demonstrate an ability to function effectively as a technical team member	Teamwork Observation Rubric of Group Lab in ELN 133 Digital Electronics. This rubric consists of four Performance Indicators (PI) rated from 1 to 4, for a maximum possible score of 16.	On average, students will earn at least 12 out of 16 on this artifact.	Fall 2023 Mean: 13.7 Range: 7 to 16 n: 8 (3 teams of 2-3)	PI2 - Team members actively work to fulfill roles and responsibilities (4 of 4).	PI1 – Measure AC waveforms in circuits. (3.5 of 4)	Overall score increased.	Not applicable, program has been terminated.

Termination of EET program:

At this time, Gaston College is approved to offer an Associate in Applied Science (AAS) in Electronics Engineering Technology. The College is also approved to offer a closely related degree, an AAS in Applied Engineering Technology. In order to streamline operations within the Career and Technical Education Division, the College proposes to terminate the AAS in Electronics Engineering Technology. Currently, new student enrollment for Fall 2023 in the AAS in Electronics Engineering Technology is 11 students. Faculty will work with these new students and all returning students (six students who entered between 2020-2022) to develop a plan for degree completion for the Electronics Engineering Technology program. New and returning students will also be given the option of changing their program to Applied Engineering Technology due to the significant overlap in these programs. Course substitutions for courses completed by students as a part of the Electronics Engineering Program will be made as allowable by the Applied Engineering Curriculum Standard to help students in this transition.

Program Learning Outcomes - A55420 Fire Protection Technology

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from the Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1	Demonstrate fire prevention practices, per NFPA 1021 guidelines	Students are required to create various types of presentations in FIP 124. The student must research fire prevention needs in their area, develop a fire safety program, and present their findings in a graded paper.	On average the student earns at least a 70% score of the available points on their final exam and graded final research project.	2023-2024 Academic year 100% of students received a grade of 70% or higher	The majority of students are performing above the success criteria	Work to ensure a higher percentage of online students achieve the stated goal.	Had a 100% increase in final exam scores from the previous year.	Use Gaston College services to encourage and ensure online students are successful in their class attempts.
2	Demonstrate written and oral communication skills, applicable to the fire service, incorporating NFPA 1041 and 1021	Students are required to examine various case studies in FIP 152. The case studies promote the student's ability to discuss laws, codes, and ordinances as	On average the student earns at least 70% of the available points on their final exam and graded final project.	2023-2024 Academic year 100% of students received a grade of 70% or higher 2023-2024 Academic year 100% of students received a grade of 70% or higher	The majority of students are performing above the success criteria	Work to ensure a higher percentage of online students achieve the stated goal.	I had a 100% decrease in the final exam but a 100% increase in the student's final grade project.	Use Gaston College services to encourage and ensure online students are successful in their class attempts.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from the Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
		they relate to fire protection.						
3	Demonstrate knowledge of the financial processes associated with the fire service	Students are required to examine different types of budgets and grants in FIP 228. The budget analysis allows the student the ability to comprehend the importance of finance as it applies to the operations of a fire department.	On average the student earns at least a 70% score of the available points on their final exam as well as their final grade	2023-2024 Academic year 100% of students received a grade of 70% or higher 2023-2024 Academic year 100% of students received a grade of 70% or higher	Students are performing above the success criteria	Continue to stay abreast of industry trends	Had a 100% increase in the final exam score from the previous year and maintained a 100% class pass rate.	Explore ways to better communicate and relate material related to outcomes through assignments and class materials
4	Demonstrate and apply fire-ground operations management, to include applicable NFPA standards and guidelines	Students are presented with scenarios and provided strategies and tactics associated with fire ground operations during FIP 220, FIP 221, and FIP 276. The	On average the student earns at least a 70% score of the available points on their final exam and graded final research project.	2023-2024 Academic year 90% of students received a grade of 70% or higher 2023-2024 Academic year 100% of students received a	Students are performing above the success criteria	Work to ensure a larger percentage of students master the stated outcome for the final exam	We had a 3% increase in students' grades for the final exam but an increase of 100% on students' grades for their final project from the previous year	Explore ways to better communicate and relate material related to outcomes through assignments and class materials

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from the Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
		scenarios, strategies, and tactics provide the student with the knowledge, skills, and abilities to function as a fire scene commander.		grade of 70% or higher				
5	Demonstrate knowledge of fire service organization and management	Students are tested in fire service organizations in FIP 276. The principles of the National Incident Management System (NIMS) and Administrative Functions of planning, policy development, and human resource management are presented and evaluated for proficiency.	On average the student earns at least a 70% score of the available points on their final exam and their graded final research project.	2023-2024 Academic year 100% of students received a grade of 70% or higher 2022-2023 Academic year 100% of students received a grade of 70% or higher	The majority of students are performing above the success criteria	Work to ensure a higher percentage of online students achieve the stated goal.	We had an increase of 100% in students' final exam grades and a 100% increase in students' graded projects from the previous year	Use Gaston College services to encourage and ensure online students are successful in their class attempts.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from the Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
6	Demonstrate knowledge of an effective emergency management program to include applicable NFPA standards and guidelines.	Students are tested in emergency management operations in EPT 140, FIP 120, and FIP 276. The students are presented with modern fire service functions as an <i>all-hazard</i> organization focusing on the functions of prevention, preparedness, mitigation, response, and recovery.	On average the student earns at least a 70% score of the available points on their final exam and graded final research project.	2023-2024 Academic year 85% of students received a grade of 70% or higher 2023-2024 Academic year 80% of students received a grade of 70% or higher	The majority of students are performing above the success criteria	Work to ensure a higher percentage of online students achieve the stated goal.	We had an increase of 2% in students' final exam grades and a 20% increase in students' graded projects from the previous year.	Use Gaston College services to encourage and ensure online students are successful in their class attempts.

Program Learning Outcomes A30200 Gunsmithing

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
1.	Read and work from blueprints using hand tools and make basic machine tool setups using manual lathes and milling machines.	This will be assessed in GSM-120 Direct Measures include: • Exams/Quiz	On average, students will earn at least 80% or higher on the Hands-on portion of the final Exam. This is an exercise where the student demonstrates their ability to produce a complete part within specs on the Manual Lathe Machines.	Fall 2023 100% percent pass rate with an 80% or Better	Lab project and assignments are working well. Students like the task they are being given.	Parts and components have been out of stock for students to purchase so they can complete some of their assemblies. Also, we have limited machines for the students to complete their task.	The GSM department will ask for more Manual Lathes and Milling machines	Now that the GSM program has its FFL the GSM department can work on this by finding other vendors to source parts.
2.	Produce custom tooling and fixtures for use in gunsmithing type work.	This will be assessed in GSM-111 Direct Measures include: • Completed projects	Students will perform ALL lab Assignments Students must complete 10 hands on Lab assignments in this class to pass this course	Spring 2024 100% percent pass rate with an 80% or Better	Lab project and assignments are working well. Students like the task they are being given.	We need more complex parts to keep the students busy. Students seem to have some "free time" between assignments	The department added more assignments to the class. This decreases the amount of down time between assignments.	The GSM department will look at adding a couple of complex projects to further the student's skill set.

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
3.	Diagnose and correct basic malfunctions, produce and fix simple parts, choose, and install sights.	This will be assessed in GSM-127AA And GSM-127AB This is a 2-part class (Students will not be given a grade until they complete GSM-124BB) <ul style="list-style-type: none"> Exams/Quiz 	Students will be given an inoperative firearm. They will then be given a set amount of time (Dependent on the model) to diagnose the problem. And they will have to write a work order for this problem with a description of how to fix it.	Fall 2023 100% percent of students were able to diagnose the problem. And they will have to write a work order for this problem with a description of how to fix it.	The teaching materials that are being used in the GSM program seem to be working well.	The Firearm models were limited this go around due to not receiving our FFL.	First Complete Cycle	First Complete Cycle
4.	Perform barrel alterations such as custom-barreled actions, recoil pads, and choke tubes.	GSM-125 Affected class Completed Custom Rifle barrel for their Firearm.	Students will perform ALL lab Assignment Students must complete their custom barrel for their rifle.	Summer 2024 100% of students were able to complete their custom barrels.	Newly created assignments /options are working well. Projects are being completed as intended.	Students are satisfied with the current task however the GSM program is looking into how to lessen the cost of this class.	The GSM Program added some additional assignments to better utilize machine time.	The GSM program will look into how we can reduce thy students cost in this class.

Program Learning Outcomes - A25590AD Information Technology – Applications Development

PLO#	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
PLO1	Demonstrate the proper use of terminology in relation to applications development .	CSC 289 Programming Capstone Project The CSC 289 Capstone Programming project is a semester-long project, graded by rubric for each learning outcome, where students propose, design, and create a customized program utilizing multiple programming languages interfacing a common database.	On average, students will earn at least 80% on this artifact.	Spring 2020 100% Spring 2021 98% Spring 2022 Mean of Completers: 100% Range: 100-100 n: 4 Spring 2023 Mean of Completers: 100% Range: 100-100 n: 2 Spring 2024 Mean of Completers: 99.6% Range: 95-100 n: 12	What is working well and why? Students continue to do very well on this learning objective as indicated by scores the past several years. There is a level of consistency.	What isn't working and why? None specifically noted; however, due to changes in technology, the learning objective will be continuously updated.	What changes were implemented since the previous cycle? How do these changes explain the improvement or decline (as compared to the previous cycle) that you see in the current assessment results? No changes have been made from the previous cycle. Scores indicated objective met. Very consistent across multiple cycles.	What should be done in response to these results? Clearly explain why this change (or lack of change) is justified and how it will contribute to continuous improvement. The learning objective will stay the same and students will continue to be challenged through changes in technology. Beginning Fall 2024, the program outcomes may change based on

Program Learning Outcomes - A25590IS Information Technology – Information Systems Support

PLO #	Expected Program Learning Outcome Description	Assessment Means	Success Criteria	Assessment Analysis			Impact of Changes from Previous Cycle	Actions to be Implemented
				Results	Strengths	Areas for Improvement		
PLO 1	Demonstrate the proper use of terminology in relation to information systems support.	CTS 289 System Support Project The CTS 289 Information Systems Support project is a semester-long project, graded by rubric for each learning outcome, where students create and document an information system support project from design to implementation.	On average, students will earn at least 80% on this artifact.	Spring 2020 93% Spring 2021 97% Spring 2022 96% Spring 2023 Mean of Completers: 92% Range: 75-100 n: 3 Spring 2024 Mean of Completers: 84% Range: 32-99 n: 6	What is working well and why? Students continue to do very well on this learning objective as indicated by scores the past several years. There is a level of consistency. In the spring of 2024, students struggled to explain key terms and concepts. Students were referred to the writing center for guidance, but most did	What isn't working and why? Starting with the Fall of 2024, these program outcomes will change and the assessments will change.	What changes were implemented since the previous cycle? How do these changes explain the improvement or decline (as compared to the previous cycle) that you see in the current assessment results? No changes have been made from the previous cycle. Scores indicated objective met. Very consistent across multiple cycles.	What should be done in response to these results? Clearly explain why this change (or lack of change) is justified and how it will contribute to continuous improvement. The learning objective will stay the same and students will continue to be challenged through changes in technology. The learning outcomes for this track may change as the course selection is updated beginning in Fall of 2024.

		problems encountered in working in the teams. Also discussed are the advantages and disadvantages of working in teams.						
--	--	--	--	--	--	--	--	--

Termination of MET Program:

At this time, Gaston College is approved to offer an Associate in Applied Science (AAS) in Mechanical Engineering Technology. The College is also approved to offer a closely related degree, an AAS in Applied Engineering Technology. In order to streamline operations within the Career and Technical Education Division, the College proposes to terminate the AAS in Mechanical Engineering Technology. Currently, new student enrollment for Fall 2023 in the AAS in Mechanical Engineering Technology is eight students. Faculty will work with these new students and all returning students (20 students who entered between 2020-2022, ten of whom are already co-enrolled in the Applied Engineering Technology program) to develop a plan for degree completion for the Mechanical Engineering Technology program. New and returning students will also be given the option of changing their program to Applied Engineering Technology due to the significant overlap in these programs. Course substitutions for courses completed by students as a part of the Mechanical Engineering Program will be made as allowable by the Applied Engineering Curriculum Standard to help students in this transition.

Program Learning Outcomes - A25310 GE & A25310MC Medical Office Administration

								provides students of all levels an opportunity to show success outside of standardized tests or quizzes.
2 DE, GE, MG, TE	Define career expectations and opportunities in the textile field.	TEX 110 Career Exploration Assignment Fall 2023: Instructor utilized career exploration assignments and semester project final paper	On average, students will earn at least 80% or higher on this artifact.	The program began in Fall 2022. During the year, the outcomes were created with measurement beginning in Fall 2023. Fall 2023 Mean: 98% Mean of Completers: 9 Range: 90-100 n: 9	This assignment provides students with the opportunity to explore various companies throughout the global textile supply chain, learn job qualifications and potential skills needed for various career pathways in the textile industry.	For future assignments, the title will change to "Industry Exploration" to accommodate adult learners and working learners enrolled in the course. Also, the content of the assignment may change to include questions that are catered to adult learners looking to understand different employers and markets within the industry.	Student performance data will be gathered in fall 2024 to compare to fall 2023 and evaluate the effectiveness of this assignment in achieving learning outcomes.	This assessment is still relevant for program learning outcomes however, the assignment name and some of the assignment questions now reflect "Industry Exploration Assignment" to account for traditional, apprentices and adult learners.

3 DE	Identify stages of the fashion product development cycle.	TEX 121 Quiz 7	On average, students will earn at least 80% or higher on this artifact.	The program began in Fall 2022. During the year, the outcomes were created with measurement beginning in Fall 2023. Fall 2023 Mean: 72.5% Mean of Completers: 3 Range: 0-100 n: 4	This assignment Ensures students grasp fundamental aspects of the product development process, such as ideation, material selection, production planning, and market analysis	Future assignments will expand upon fundamental knowledge and encourage students to apply course content to real-world applications, challenge critical thinking and understand industry related skills	Additional data will be collected in Fall 2024 to support this learning outcome but the assignment will change to reflect the necessary fundamental knowledge, real-world applications and more.	All students did not finish assignment. This assignment did not effectively showcase students' ability to apply course content related to product development in the textile industry. Future assignments will go beyond merely reinforcing basic terminology to foster deeper application and understanding
3 GE	Explain the critical stages in the various sections of the textile and apparel supply chain.	TEX 113 Product Development Project Changed to new Assignment in Fall 2023 Final Project	On average, students will earn at least 80% or higher on this artifact.	The program began in Fall 2022. During the year, the outcomes were created with measurement beginning in Fall 2023.	This project was completed independently and required students to research relevant information about functional	Only one student completed the original project, which was based on online research and included a written paper accompanied by a slide deck. In contrast, the Spring 2024	Student performance data will be gathered in Spring 2025 to compare to Spring 2023 and evaluate the effectiveness of this assignment in achieving learning outcomes.	This final project provided students with the opportunity to mimic steps in the textile supply chain by producing their own fabric from fiber, yarn and quality testing. This project will be

				Fall 2023 Mean: 50 Mean of Completers: 1 Range: 0-100 n: 2	fabrics produced from different yarn components .	project featured a hands-on approach, giving students the opportunity to create small yarn and fabric samples, fostering practical application and engagement		expanded upon in Fall 2024.
3 MG	Apply fundamental business management skills	TEX 119 Module 9 Concepts and Terminology Quiz	On average, students will earn at least 80% or higher on this artifact.	The program began in Fall 2022. During the year, the outcomes were created with measurement beginning in Fall 2023. Fall 2023 Mean: 76.7% Mean of Completers: 3 Range:50-90 n:3	This assignment helps students achieve a solid foundation of key terms and concepts. This foundational knowledge is essential for analyzing supply chain processes, understanding industry-specific	While this assignment successfully tests the student's knowledge of management principles, some of the content on the quiz can be updated in the future to help students with application and correlation to real-world problems.	Student performance data will be gathered in fall 2024 to compare to fall 2023 and evaluate the effectiveness of this assignment in achieving learning outcomes.	Future assignments will be updated to help students reinforce key concepts. Assignments could include: Case Study Assessment surrounding textile innovative entrepreneurs

					practices, and effectively identifying basic management skills in the textile supply chain.			
3 TE	Demonstrate use of textile manufacturing equipment	TEX 113 Test 1 and 2 Shirley Analyzer Report	On average, students will earn at least 80% or higher on this artifact.	The program began in Fall 2022. During the year, the outcomes were created with measurement beginning in Fall 2023. Fall 2023 Mean: 87.5% Mean of Completers: 2 Range: 85-90 n: 2	The Shirley Analyzer Lab and Report provided students with the opportunity to shadow Lead Lab Technicians and to run fiber samples on standard industry equipment to generate quality data and better understand yarn processing	Test 1 and 2 from Spring 2023, were changed to a lab assignment and report in Spring 2024 to overcome the lack of application and provide students with real-world application with the use of equipment used across the textile industry	Instead of relying solely on standardized tests for assessment, Spring 2024 introduced hands-on activities and application-based studies in the Textile Technology Center lab. This approach allowed students to engage more actively and evaluate their understanding through real-world applications.	With the addition of new small-scale laboratory equipment, the implementation of hands on lab reports will be added to help students understand the various types of equipment for staple fiber, polymers and yarn.

1	Graduates will demonstrate an ability to safely inspect, test, install, repair and replace oxyfuel welding/cutting equipment. Oxyfuel cutting	Direct Measures Identify components Assemble components Light, setup and shutdown Quizzes WLD-111	Direct On average, students will earn at least 90% on this artifact.	Fall 2022 Mean: 93.0 0-95.00% Mean of Completers: 100% Range: 60-100 Spring 2023 Mean: 85.00-91.00% Mean of Completers: 100% Range: 60-100 Summer 2023 Mean 98.00% Mean of Completers: 100% Range: 60-100 Fall 2023	Students work with hands-on cutting rigs and various cutting processes from introductory to mastery in order to achieve and demonstrate proficiency in various cutting processes related to the welding and fabrication industry.	More complex, hands-on projects for students.	Updated existing equipment to meet industry standards so students are now able to train on the actual apparatus equal to what they will use while working in the field.	Since the oxyfuel process is used in every WLD section, equipment is in continual need of maintenance and replacement and expansion.
