

Factor the trinomial.

$$\begin{array}{cc} 2c^2 - 11c + 5 \\ \hline 1c, 2c & \hline 1, 5 \end{array}$$

$$(c \quad 1)(2c \quad 5)$$

2c

$$\boxed{(c - 5)(2c - 1)}$$

5c

10c

1c

$$2c^2 - \underline{1c} - \underline{10c} + 5$$

$$2c^2 - 11c + 5$$
